Policy

SECURITY AND ELECTRONIC SURVEILLANCE

Security

The security of the Woodbridge Township Public School District buildings and grounds for protecting the safety of the students, staff and the school community is essential for creating an environment where student achievement can be fostered.

Security means all buildings shall be locked when not in use, and safe practices shall be employed in the use of electrical, plumbing, and heating equipment for protection from fire hazards and faulty equipment. The board requires close cooperation with local police and fire departments and with building inspectors.

An adequate key control system shall be established to control access to school buildings. Funds and valuable records shall be kept in a safe place and securely locked. The superintendent shall oversee the development of procedures to provide for the security of the students, the staff, and of school facilities and property.

Electronic Surveillance

The Woodbridge Township Board of Education authorizes the use of electronic surveillance equipment in school buildings, on school property and on school buses to ensure the health, welfare, and safety of all staff, students, and visitors to district property and to safeguard district buildings, grounds, and equipment. The superintendent will approve appropriate locations for surveillance equipment.

The superintendent will notify staff and students, through staff and student handbooks or by other means that surveillance equipment may record school activity in school buildings, on school property and on school buses. A statement shall be posted in a prominent, public place in buildings and on school grounds where electronic surveillance equipment to alert the school community and the public that electronic surveillance monitoring devices are used in school buildings, on school grounds and on school buses and all school buildings and school grounds may be monitored.

Live Streaming

District video surveillance equipment has the capability to live stream the video wirelessly to remote locations. In accordance with law (N.J.S.A. 18A:41-9) the district shall establish a Memorandum of Understanding with local law enforcement which provides local law enforcement with the capacity to activate the equipment and view the live streaming video. The Memorandum of Understanding shall include, but need not be limited to:

A. The designation of individuals who shall be authorized to view live streaming video;

B. The circumstances under which the designated individuals would view live streaming video; and

C. A detailed plan for preventing and detecting unauthorized access to live streaming video.

Records

The content of the surveillance recordings may become a part of a student's educational record or of a staff member's personnel record. Content added to student and staff records shall be confidential according to law and board policies (see 4112.6/4212.6 Personnel Records, 5125 Student Records). Content related to disciplinary proceedings shall be subject to rules for all the forms of evidence. Surveillance footage used as evidence shall be permitted only when it is in a legitimate educational interest. The district will comply with all applicable state and federal laws related to record maintenance and retention.

TECHNOLOGY

The Woodbridge Township Board of Education shall develop a technology plan that effectively uses electronic communication to advance and promote learning and teaching. This system of technology shall be used to provide local, statewide, national and global communications opportunities for staff and students. Educational technology shall be infused into the district curriculum to maximize student achievement of the Core Curriculum Content Standards.

ACCEPTABLE USE OF THE INTERNET

A. Introduction

In the academic setting computers are used to support learning, enhance instruction, improve communication and access sources of information. It is the general policy of the Woodbridge Township School District that all computers, whether in a classroom, lab, or the media center, be used in a responsible, efficient, ethical and legal manner (i.e. copyright issues, illegal access to information, illegal use of credit cards, etc.)

Internet access is available to students and teachers in the Woodbridge Township School District. The Internet offers vast, diverse, and unique resources to both students and teachers. Our goal in providing this service to teachers and students is to promote educational excellence in schools by facilitating resource sharing, innovation, and communication. Because access to the Internet provides connections to many other computer systems, users (and parents of users) must understand that the Internet is a world-wide entity serving a diverse user population. Since there is no organization which oversees the various sites, virtually anything can be found on the Internet. Library media specialists and other employees in charge of access to the Internet will make every attempt to monitor student usage while developing the information literacy skills of the students; however, the Woodbridge Township School District has no control over the information found through the Internet and is not responsible for its content, timeliness or accuracy, or suitability for student access.

B. Purpose

The Internet, a global electronic information infrastructure, is a network of computer networks used by educators, business, the government, the military, and countless other organizations. In the Woodbridge Township School District the Internet will be used to educate, to access information, to communicate, and to develop the information literacy skills needed for further success in post-secondary education and the work place.

As a learning resource the Internet is similar to books, magazines, videos, CD-ROMs, and other information sources. The Woodbridge Township School District considers the use of the Internet as an educational resource that will follow district guidelines for use and selection. Because the Internet is a fluid environment, the information which will be available to students is constantly changing; therefore, it is impossible to predict with certainty what information students might locate. Just as the purpose, availability, and use of media materials does not indicate endorsement of their contents by school officials, neither does making electronic information available to students imply endorsement of that content.

C. Objectives of Internet Use

The Internet shall be another resource used by the instructional staff to help students and staff to develop the skills needed to:

1. Discriminate among information sources;
2. Identify information appropriate to their age and development levels;
3. Evaluate and use information to meet their educational goals and the goals and objectives of the district's curriculum.

D. Use

Woodbridge Township School District students and staff shall use the Internet to participate in educational activities such as:

1. Asking questions of and consulting with experts;
2. Communicating with other students and individuals beyond the boundaries of Woodbridge Township;
3. Accessing, analyzing, synthesizing and using information that meets their educational needs.

E. Expected Behavior

The use of the Internet is a privilege, not a right, and inappropriate use will result in disciplinary action by school officials and/or the cancellation of those privileges. Students and staff are expected to abide by generally accepted rules of network etiquette. All Internet activity in this school district must be in support of education and research, and consistent with the educational objectives of the Woodbridge Township School District.

F. Guidelines for Publication of Student Work on the Internet

The Woodbridge Township School District will take all reasonable and necessary steps to protect student confidentiality. When student work is published on the Internet, the following guidelines shall be followed:

1. Students shall be identified by first name or initials only. No personally identifiable information about students shall be published.
2. Pictures of students shall not provide information identifying any student.
3. Student phone numbers, home addresses, and e-mail addresses shall not be published.
4. The only address, phone number, or e-mail address which may be published is that of the school, care of the sponsoring teacher or the teacher’s e-mail address at school.
5. If personally identifiable information is to be released concerning a particular student, it will only be released after the parent signs a consent form to allow the release.

G. Disciplinary Action Related to Misuse of the Internet

Student failure to abide by the Woodbridge Township Internet User’s Contract may result in disciplinary action following disciplinary procedures established in the school district. The definitions therein are not exclusive. If a student is clever enough to invent a new way of misusing the system, and it is reasonable that the student would know what he/she is doing is improper, the student may nonetheless be disciplined.

Acceptable Use For Technology Resources

A. Availability of Access

1. **The district has worked consistently to create a technological foundation that provides equal access to all technology to all staff and students. This ongoing work sets the procedures and protocols needed to eliminate any downtime to ensure success in a hybrid learning environment. The district has provided all students in Grades PK through Grade 12 with their own device in preparation for the remote learning environment. ALL students in the Woodbridge Township School District will now have their own device. Each device is assigned to a specific student and is to be used ONLY by the assigned student. Devices are never shared. All students in the district will be bringing their assigned devices back and forth from home to school to allow for equal technology accessibility both at school and in the home.**
2. **Students have access to a variety of software to use on their assigned computers. Our online learning environment is facilitated through the Google Workspace for Education. Students can use the Google Suite to produce word processing documents, spreadsheets, and presentations via Google slides. Students may receive their lessons and class materials and communicate virtually with their class and teacher via Google Classroom. Online textbook programs and educational programs are accessible to all staff and students, and these resources are very important tools in supplementing and complementing curriculum content virtually.**
3. **All student devices are set up to automatically adhere to our internet content filtering when used outside of the school network, so that the students are protected exactly as they are when they are on the district network. This ensures that all devices when used from home are kept safe from malware attacks, viruses, and inappropriate content. Devices also will be pre-configured with the necessary security settings on these devices for compliance with all approved programs and security standards.**
4. **Students have access to a district assigned and monitored account that can be used to contact their teacher with any questions as well as provide assigned work. Students can keep track of their current grades and schedules via the Genesis Student Portal. The district utilizes Clever to simplify the login process to all student software and websites.**
5. **To ensure equal access to a safe remote learning environment, students must use a District-issued device to access the full scope of our digital learning platform. Only District-based devices will have the appropriate safeguards and software required for students to safely and effectively access the remote learning environment.**
6. **The district has set the goal to make sure all students in the district will have internet access at home. The district has conducted ongoing technology surveys throughout the pandemic. Based upon these survey results, the district has a list of families who do not have internet access at home. District staff are contacting these families to review options for obtaining internet access at home. The district will be working with both Comcast and T-Mobile to provide internet access to these students in the future. Based upon ongoing communication with families as well as monitoring online work, the schools will monitor students' access to the internet during the school year.**
7. **All teachers in the district have their own district assigned laptop. They have access to all of the tools the students do including the Google Workspace for Education, Google Classroom, online textbooks, and other educational software. Staff also have access to the student monitoring software GoGuardian to keep students on task and provide remote support. In order for teachers to maintain live and interactive communication**

with their students remotely, they have access to Zoom and Google Meet and can set up sessions for students to remotely take part in classes remotely. The teacher has the option to start a Zoom session on their computer and share their desktop screen with the Zoom or Google Meet session in order for both the students in the classroom to see exactly the same thing. Teachers also are offered tools to create and edit videos of either themselves, using their computer's integrated camera, or of their desktop screen, that can be uploaded to Google Classroom for students to watch and refer back to at any time.

~~1~~**8**. Access to the district's electronic communications system, including the Internet, shall be made available to students and employees for instructional and administrative purposes and in accordance with administrative regulations.

~~2~~**9**. Access to the district's electronic communications system is a privilege, not a right. All users shall be required to acknowledge receipt and understanding of all administrative regulations governing use of the system and shall agree in writing to comply with such regulations and guidelines. The individual in whose name a system account is issued will be responsible at all times for its proper use. Non-compliance with applicable regulations may result in suspension or termination of privileges and other disciplinary action consistent with district policies. Violations of law may result in disciplinary action by the district and possibly, criminal prosecution.

B. Acceptable Use

1. The superintendent or designee shall develop and implement administrative regulations, guidelines, and user agreements, consistent with federal intellectual property laws and the purposes and mission of the district.
2. The district's technology resources will be used only for learning, teaching and administrative purposes consistent with the district's mission and goals.
3. The district shall train all interested users in the appropriate use of the system and shall make copies of acceptable use guidelines available to all users.
4. It shall be a violation of district policy for any student or employee to use the district's electronic communications:
   a. For commercial use or financial gain;
   b. To connect software or external data without permission from the superintendent or designee;
   c. For illegal purposes, in support of illegal activities, or for any other activity prohibited by district policy or guidelines;
   d. In the case of an employee, without permission of the superintendent or designee;
   e. To log on to a computer or e-mail system by using another's password, or assist others to do so;
   f. To send anonymous messages, of any kind;
   g. To submit, publish or display any defamatory, inaccurate, racially offensive, abusive, obscene, profane, sexually oriented, or threatening materials or messages, whether public or private;
   h. To attempt to harm or disable any equipment, materials, or data;
   i. To knowingly place a computer virus on a district computer or otherwise damage the district's electronic communications system;
   j. To use the district's electronic communications system to provide addresses or other personal information that others may use inappropriately;
   k. To access information resources, files, documents, or account of another user without authorization;
   l. To encrypt electronic communications so as to avoid security review by system administrators;
   m. To use or redistribute copyrighted programs or data, except with the written permission of the copyright holder or designee in accordance with applicable copyright laws, district policy, and administrative regulations; or
   n. To purge electronic mail and data files contrary to established retention guidelines.

C. Student Users

Student users must adhere to the standards applicable to all users, listed above, as well as the following:

1. Students may not distribute personal information about themselves by means of the electronic communications system. This includes, but is not limited to, personal addresses, telephone numbers and social security numbers;
2. Students should never make appointments to meet people whom they met on-line, and should report to a teacher or administrator, if they receive any request for such a meeting; and
3. Students may not use the electronic communications system without the supervision and permission of a staff member.

D. Internet Safety

The superintendent or designee shall develop and implement an Internet safety plan that, to the extent possible:

1. Controls students' access to inappropriate materials, as well as to materials that are harmful to minors;
2. Ensures student safety and security when using electronic communications;
3. Prevents unauthorized access, including hacking and other unlawful activities; and
4. Restricts unauthorized disclosure, use, and dissemination of personally identifiable information regarding students.

E. Filtering

1. The District must, as a prerequisite to receiving universal service discount rates, implement certain Internet safety measures, and submit certification to the Federal Communications Commission (FCC).
2. Each District computer with Internet access shall have a filtering device, service, or software that clocks access to visual depictions that are obscene, pornographic, inappropriate for students, or harmful to minors, as defined by the Children's Internet Protection Act and as determined by the Superintendent or designee.
3. The superintendent or designee shall enforce the use of such filtering devices. Upon approval from the superintendent or designee, an administrator, supervisor, or other authorized person, may disable the filtering device for bona-fide research or other lawful purpose.

F. Monitored Use

Electronic mail transmissions and other use of the electronic communications system by students and employees shall not be considered confidential. Such use may be monitored at any time by district staff, as approved by the superintendent or designee, to ensure appropriate use for educational or administrative purposes.

G. Intellectual Property Rights

As agents of the district, employees shall have limited rights to work they create using the district's electronic communications system. The district shall retain the right to use any product created in the scope of a person's employment, even when the author is no longer an employee of the district.

H. Publication of Student Work on the Internet

Student work published on the internet will only be identified with the student's first and last initials, and no other personally identifiable information.

I. Termination/Revocation of System User Account

The district may suspend or revoke any system user's access to the district's system upon violation of district policy and/or administrative regulations regarding acceptable use.

J. Consequences of Improper Use

Improper or unethical use may result in disciplinary actions consistent with district policy and, if appropriate, other state and federal laws. This may also require restitution for costs associated with system restoration, hardware, or software costs.

K. Disclaimer of Liability

The district shall not be liable for users' inappropriate use of electronic communication resources or violations of copyright restrictions, users' mistakes or negligence, or costs incurred by users. The district shall not be responsible for ensuring the accuracy, age appropriateness, or usability of any information found on electronic resources, including the Internet.

Implementation

The superintendent shall prepare regulations to implement this policy.
