Northern Adirondack Central School District Celebrates Landmark Approval of Capital Improvement Project

The Northern Adirondack Central School District (NAC) is proud to announce that the community has voted in favor of both Proposition 1 and Proposition 2 in the Capital Project referendum held on December 16, 2025. This successful vote marks a transformative moment for the district, securing a future of enhanced safety, modernized infrastructure, and expanded opportunities for all students.
"This is a monumental day for our students and our entire community," said the Superintendent of Schools, James C. Knight, Jr. "By supporting these propositions, our residents have chosen to reinvest in our educational and extracurricular facilities, ensuring that NAC remains a place where students can excel for generations to come.".

A Vision for the Future
The approved project addresses critical needs identified through a comprehensive Building Condition Survey and input from staff and stakeholders.

Proposition 1: Educational & Infrastructure Improvements ($38,000,000)

This tax-neutral proposition focuses on immediate infrastructure and safety needs across the campus.

Key highlights include:

- **Elementary School:** Comprehensive roof replacement, bathroom renovations, and upgrades to the building management and fire alarm systems.
- **Middle-High School:** Interior upgrades, flooring finishes, and the installation of a standby generator to ensure operational continuity.
- **Safety and Efficiency:** Campus-wide utility upgrades, including new well and water services and significant electrical panel replacements.

Proposition 2: Athletics & Program Enhancements ($10,990,000)

Building on the foundation of Proposition 1, this phase focuses on extracurricular and hands-on learning facilities.

- **Multi-Sport Artificial Grass Athletic Complex:** A state-of-the-art turf field designed for baseball, softball, and soccer, featuring a 500-seat grandstands to enhance the spectator experience that meets ADA requirements.
- **New Agricultural Program Building:** A dedicated space for hands-on learning, centralized storage, and community concessions, supporting the district's commitment to diverse educational pathways that align with the NYSED Portrait of a Graduate.

Next Steps
With the community's authorization, the district will now enter the design phase, scheduled to run from January through August 2026. Following a review by the New York State Education Department (NYSED), construction is slated to begin in Spring 2027, with a target completion date of Fall 2028.

The district extends its deepest gratitude to the Capital Project Committee, the Capital Project Ambassadors and the community as a whole for their dedication to the process and their commitment to the future of the Northern Adirondack Central School District.
