RE: Sole Source

Dear Ms. Darden,

Thank you for the opportunity concerning Sanitech Systems being the only known source able to provide all the Martin County's specifications for a comprehensive Cafeteria Sanitation and Food Safety program.
Our system includes four integrated programs that interface together to supply the best industry standards relating to School Nutrition cleaning and safety protocols:

- Cafeteria Manual Cleaning Products
  - Standardization of all cleaning products and procedures
  - Color coded products bottles and SDS
  - In person monthly cafeteria site review and employee training
  - Service reports provided after each visit

- Dish Machine Ware Wash Products & Dispensers
  - Chemicals dispensed using a closed loop system to prevent improper usage
  - In person monthly preventive maintenance on the dish machine
  - Service reports provided after each visit

- Computerized HACCP Data Collection & Management
  - iPad and temperature probe included
  - If iPad or probe are broken or damaged they are replaced at no cost
  - Proprietary software included
  - All software updates included

Website provided on our server to view data collected and run reports
All collected data stored on our secure server

- Wireless Equipment Temperature Monitoring
  Wireless temperature monitoring for walk-in coolers and freezers
  All critical data from sensors visible at one click on web or mobile app
  No charge replacement of all faulty sensors.
  Out of range information reported by sensors sent by email or text

All of the above programs are supplied at one set annual cost to the district.

According to our research, we are the only company with the specific products, equipment, training and proprietary computer software combined together to provide this service. Please feel to contact me should you need any additional information.

Sincerely,

Bill Burnside
Director of Operations
Sanitech Systems
