Dear Families,

Thank you for a great year! As we wrap up this school year we begin planning and preparing for the **2026-2027** year.

Please review the list below. These are the NYS requirements regarding your child's health and wellness while at school. If you have any questions about what is required for school please call the health office.

- Physical exams are required by NYS for school attendance grades 7, 9 and 11.
- Vision & hearing screenings for grades 7/11
- Scoliosis screening for girls in grade 7 & grade 9 for boys

Immunizations schedules **required by NYS:**

- 6-12 grade need TDAP booster
- 7-11 grade need meningococcal conjugate vaccine
- 12th grade requires a **second** meningococcal conjugate vaccine after the age of 16

Your primary physician can fax physical forms and immunization records to the HS health office at **607-236-6027.**

For the 2026-2027 school year when a student requires medication that must be taken during school hours. I am required to have a new prescription signed by your physician annually, therefore ***a new order must be obtained for the start of the 2026-2027 school year***. This includes the use of inhalers and the ability to self carry/self administer.

- Signed prescription/authorization from the prescribing physician
- Signed authorization from the student's parent or guardian
- The medication in its **original container**

NYS law requires over the counter medications like Tylenol, Benadryl, Pepto Bismol, Ibuprofen, cough drops and chapstick to have a physician's order. Therefore, students are not allowed to have these in school without a physician's prescription and a note from the parent.

Best wishes,

Laurie Mosher, LPN
