4-Year Student Application 2026/2027

MANCHESTER SCHOOL OF TECHNOLOGY HIGH SCHOOL PROFILE

The MST High School offers a project-based education with competency grading providing rigorous academics. This model gives students multiple opportunities to demonstrate their knowledge. Upon the successful completion of 9th grade, students will select a two-year Career and Technical education (CTE) program that interests them. All MST High School students are expected to complete at least one CTE program before graduation. Our mission is to give students the opportunity to move through a flexible educational model, which will enable some students to graduate with a diploma in as little as three years. This can be accomplished through learning opportunities where students will have academic support directly within the CTE program, through application, and through project-based learning. Opportunities will exist for field experiences, job shadowing, internships, and early college credit. Students will not be using traditional textbooks as MSTHS is a 1-to-1 device high school where students utilize Chromebooks for the majority of their work.

In order to be successful at MSTHS, students should be motivated, independent learners with good organizational skills. A commitment to one's own education and good attendance are essential ingredients to success.
