FROM THE OFFICE OF MR. BILL VALIMA, Superintendent/Principal 6-12

As the 1991 Fresh Prince song goes, "Summer, summer, summertime…time to sit back and unwind". I hope this summer offers our students and staff just that, a time to unwind from a busy school year. I felt like this was a very positive year for our school community. As you know, we continue to be thankful for our sinking fund. This summer we are replacing the floors in the middle and high school classrooms, the library, the elementary office, and the admin office which is home to our School Social Worker's office and our Business Office. Currently, our custodial staff are not having time to sit back and unwind as they are moving everything out of the classrooms. If you see Brian, Mandy, Jes, or Jeff around town give them a thank you for getting everything ready for the summer projects.

I also want to thank the student body for how serious they took state testing this spring. Often kids (and adults) ask, "Why should we take this seriously? It doesn't count for anything." Well, as I explained to our middle and high school students, testing does matter. Tests like the NWEA give us immediate feedback about student strengths and weaknesses. The results help students and teachers better understand where students are academically and how to help students grow. Tests like the PSAT can help set students on a path toward college and career readiness. If students are considering taking Dual Enrollment college courses while in high school, PSAT scores can be used as the entrance exam for their college application.

Speaking of college and career readiness; this year Superior Central High School students dually enrolled at Bay College in 44 college classes. We also had 4 students partner with Northern Michigan and MARESA at the Marquette-Alger Technical Middle College. Five of our high school students attended the Career Technical Education program at NMU (3 in Automotive Repair and 2 in Welding). We also had 6 students take the Advanced Placement (AP) United States History course in person with Mrs. Hancock. Students also took AP Computer Science Principles, AP Environmental Science, AP European History, AP Unites States Government and Politics, and AP Modern World History via an online platform. We also had 7 Seniors take advantage of internships at local businesses and schools. Many of these students will leave Superior Central School with multiple college credits, great life experiences, and have gotten a head start on their college and career readiness path.

I am proud to be the Superintendent and 6-12 Principal of Superior Central Schools. I love what we do here. I love the environment that we have created for our students, our staff and our stakeholders. Thank you again for giving me the opportunity to work with your children. As always, if you have any questions or concerns, feel free to call me @ 906-439-5532 x 244 or email me @ bvalima@superiorcentralschools.org or stop in for a visit.

Sincerely,

Bill Valima

FROM THE OFFICE OF MRS. SUSAN KORPI Principal K-5

It feels like not too long ago we were sitting in feet of snow wondering if summer would ever arrive, and here we are! I hope this school year has been a time of academic, social and emotional growth for your child. It has been a privilege to be a part of their childhood and their school success.

This summer please put down your phone, shut off the TV, and enjoy time with your family and friends. While away from the classroom encourage your child to maintain a few learning habits so they can return to school confident and ready for success in the fall. Learning doesn't just happen behind a school desk - it can be found in everyday experiences.

Reading is one of the best activities students can do during the summer months. Encourage your child to read for at least 20 minutes each day. Kids can read anything from chapter books to graphic novels, magazines to vintage comic books (as a kid I spent many hours reading Archie comics in my hammock), or turn on an audio book while traveling in the car (we enjoyed The Button War by Avi and Saving Winslow by Sharon Creech). Regular reading helps maintain vocabulary, comprehension, and fluency skills. This summer the Rock River Township library is having a reading challenge - offering up Mama Cows or a gift certificate to the Chatham Pub in exchange for reading. Take up the challenge as a family!

Math skills can be incorporated into your child's day as well. Cook or bake together, practicing fractions and measuring skills (perfect a recipe and enter it into the Alger County Fair). Students can also practice budgeting, estimating cost, counting money and comparing prices while grocery shopping or a day of visiting garage sales. If going on a trip purchase an atlas or paper map (sometimes available for free at welcome centers) and have your child practice map reading and distance measurement skills.

Summer is also the perfect time to explore the outdoors. Nature walks, gardening, hiking, and visits to local parks encourage curiosity and observation skills. We are blessed to live in a beautiful part of the world - make a list of UP waterfalls and see how many you can visit this summer. Find your old digital camera and have your child photograph the interesting things they can find around your yard. Set up a bird feeder (or better yet, build one together) and keep track of the birds that come. Keeping a simple journal, sketchbook, or photo collection of summer adventures can strengthen writing and communication skills while creating memories.

Finally, encourage your child to pursue their interests and discover new passions. Building with blocks, creating artwork, conducting simple science experiments, learning a new hobby, or volunteering in the community support creativity and personal growth. By staying curious and engaged throughout the summer your child will continue to learn while enjoying all that summer has to offer. I hope your family has a safe, relaxing, and adventure-filled summer break!

SHOP NOTES by Mr. Cogger

It is that time of year when I look up and realize there are only hours left in the academic year. I was lucky enough to have the best Advanced Construction Crew that I have ever worked with in over a decade of teaching. Our garage shop build is completely dried in and ready for next years class to pull electrical, roofing, siding, and more. After a year of snow, I am looking forward to a space to work on larger projects out of the incessant snow. A big thanks to these tough students for pulling it off.

Our Construction Trades class once again visited Habitat For Humanity and helped hang over 60 sheets of drywall in a 54" crawl space. This continues to be a highlight trip for our students. A big thank you to Dominos Pizza for feeding us again.

This year we piloted a "Powersports Unit" as the culmination of a small engines course. At one point we had six snowmobiles, a PPT, a dirtbike, and a 4-wheeler. Do you have a small engine that needs to be brought back to life? If so, please scan the QR Code below and fill out the form.

Congratulations to these three for winning the Builders Show.
