Nazareth Area School District

2025-2026 District Issued Device Agreement and Financial Obligation Information

---

The Nazareth Area School District is committed to providing all students with authentic learning experiences enhanced by technology integration. Through the use of relevant, project-based activities—available anytime, anywhere—students will develop essential skills in communication, collaboration, and problem-solving.

To support this, NASD offers students the opportunity to use a district-owned iPad or Chromebook during and beyond school hours. Important information regarding the use of these district-issued devices is outlined below.

Student/Family Responsibilities

- There will be no insurance premium for the 2025–2026 school year.
- **The provided protective case must remain on the district-issued device (iPad or Chromebook) at all times. Removal of the case is not permitted.**
- **Stickers or adhesive decorations are not allowed on the device or its case. This helps reduce the time and effort needed during device collection and maintenance.**
- All service and maintenance must be performed by NASD technicians only.
- Students must abide by all school district policies regarding technology use (Policies 237.2, 815).
- Families agree to the financial responsibility for any repairs due to damage, theft, or loss.
- Devices must be returned to the district before summer break for routine maintenance and software updates, if required.
- Devices must be returned prior to withdrawing from the district (e.g., transferring to another school).

Financial Obligation

In cases where a district-issued device or accessory is damaged—whether due to accident, abuse, neglect, intentional damage, loss, or theft—the student and/or parent/guardian will be responsible for a financial obligation fee to cover the cost of repairs, not to exceed the full replacement value of the device. A separate fee will be assessed for each incident.

Families participating in the Free and Reduced Lunch Program are also responsible for any financial obligation fees related to damage, loss, or theft. Final determination of all fees will be made by the school administration.

The chart on the following page is designed to provide families with a better understanding of possible financial obligations. This is not a complete list of possible scenarios:

Nazareth Area School District

2025-2026 District Issued Device Agreement and Financial Obligation Information
