

SafeSide CARE Suicide Prevention Framework Training

June 10 - 11, 2026 | 8:30 am – 12:30 pm

This virtual training is a two-part series hosted by CESA 3. Participants must engage in both sessions to receive a certificate of completion. Cost is free thanks to Wisconsin Department of Public Instruction and SAMHSA federal grant funding.

Empower Your Team!

Create a unified, compassionate, and systematic approach to suicide prevention. In the high-stakes environment of school mental health, having a clear, shared framework isn't just helpful—it's essential for student safety and staff confidence. This interactive training is designed for school-based mental health professionals, administrators who support them, and community mental health professionals working in or collaborating closely with school systems.

Evidence-Based Framework

Go beyond compliance with an evidence-based approach that balances clinical rigor and human connection. In this interactive, thought-partnering space, you'll practice key skills, connect policy to real-world application, and collaborate with peers. We'll explore the four pillars of the SafeSide CARE model:

CONNECT
Build the foundational alliance needed to understand a student's unique context and experience.

ASSESS
Move toward collaborative information gathering to develop person-specific supports.

RESPOND
Master best-practice interventions, including safety planning, expert consultation, and seamless referrals.

EXTEND
Implement long-term strategies and skills that support students in their daily lives, far beyond the immediate crisis.
