ANNUAL NOTIFICATION OF ASBESTOS INSPECTION (AHERA)

TO: Parents, Students & Staff of the Maine School Administrative District No. 33
FROM: Ben Sirois, Superintendent
DATE: October 16, 2025

In compliance with the U.S. Environmental Protection Agency (EPA) Asbestos Hazard Emergency Response Act (AHERA, we performed inspections of our school buildings for asbestos-containing building materials. The inspection findings and the required asbestos management plans are on file at the Central Administration Office of the Superintendent, at the St. John Valley Technical Center.

The EPA requires all schools (K through 12) to perform reinspections of the asbestos materials every three years. On February 29th, 2024, a State Certified, licensed inspector performed these reinspections. The results were reviewed by an accredited management planner and recommendations were made to continue to safely manage each asbestos material remaining in our buildings.

In accordance with AHERA regulations, any remaining asbestos containing materials in the school buildings are checked on a six-month surveillance program. These materials remain in good condition and we will continue to manage them in place as recommended by the accredited management planner.

The results of the reinspection and removal work are on file in the management plan in the Superintendent's office at 431 US Rte 1, Frenchville, Maine. These documents are available for viewing during normal school hours (8:00 a.m. – 3:00 p.m.). Copies are available upon request at the cost of $0.10 per page.
