Fayette School Committee

Our vision:
To support a school community where *ALL* approaches to learning are valued and students achieve

We, the Fayette school committee, define achievement as individual students having the tools they need to learn and develop. This includes, but is not limited to, the evolution of self awareness and active engagement in multifaceted learning processes with dedicated teachers; Teachers who are committed to offering continuous quality learning environments where children are invited to be courageous, reflective and curious thinkers.

Our Mission:
To foster a school community that offers continuous quality learning experiences that invite children to be confident, courageous, reflective and curious thinkers.

Looks like:
Individualized and whole group instruction and assessment practices; Hands on experiential and meaningful learning experiences, integration of subject matter, children playing and engaging in innovative and collaborative learning opportunities. Additionally, working with families and students as they continue engagement with tuition programs of their choice.

Sounds like:
Teachers/staff/community members and students interacting with respect and kindness, student to student creative projects and problem solving, playful learning, communicating through inquiry, laughter, and fun.

Feels:
Welcoming, like Collaborative partnerships, Safe, Enjoyable
