

FROM THE SUPERINTENDENT

Dear Brunswick-Brittonkill Community,

As we approach our upcoming spring recess, I want to wish each of you a restful and rejuvenating break. Whether you are traveling or enjoying time at home, I hope you find time to enjoy the spring weather and time with your loved ones.

We have seen significant work on our campus this past month, and I want to highlight the exciting updates regarding our athletic facilities and other building upgrades.

New Turf Field
It has absolutely wonderful to watch our students and athletes finally utilizing the stadium synthetic turf field. Seeing the field in use is a major milestone for our district, and we are thrilled to have this premier surface available for our programs. Having the new field has been very useful to our spring student athletes as they have been able to practice outside when the natural fields were frozen and wet.

Track
I know many of you are anxiously watching the progress of the track. Please know that we are just as eager as you are! Here is the latest:

- **Current Status:** The asphalt paving was successfully completed just before the plants shut down for winter.
- **The Plan:** We are officially the first project on the list for spring completion.
- **The Timeline:** Once the weather stabilizes, contractors have committed to working 12-hour shifts, seven days a week to finish the surfacing in approximately two weeks.
- **The Weather Factor:** To ensure the track surface lasts for years to come, we need consistent temperatures of at least 55°F with low moisture. We are monitoring the forecast daily to find the perfect window for installation.

Building & Safety Improvements
Beyond the fields, our contractors have been busy with critical infrastructure work:

- **Main Entrance:** We have completed structural steel modifications and installed a new standing seam metal roof and linear lighting at the canopy.
- **Safety Systems:** Both the High School and Elementary School are moving into the final stages of a fire alarm and PA system switchover, ensuring our communication and safety alerts are state-of-the-art.
- **Elementary Upgrades:** New message boards have been installed, and a new sump pump was added to the boiler room to improve facility maintenance.

We have a busy "April break" ahead, with several projects scheduled to be performed while the buildings are empty. Thank you for your continued patience and support as we put the finishing touches on these exciting projects.

Enjoy the recess!

Sincerely,
Angelina Maloney
