March 19, 2026

Dear Community Members,

Following our recent announcement regarding the light tower, we received significant feedback from the community. While some expressed hope that the tower could remain in place, many appreciated our commitment to preserving it for the future. Although we share that sentiment, student and staff safety must remain our top priority.

Today, E. Lee Construction of Delphos began the removal process. The interior light has been carefully removed and preserved for future restoration and repurposing within the district. The tower itself was safely dismantled, placed on a trailer and transported to a secure district storage location.

With the tower now removed, normal middle school drop-off and pick-up will resume next week.

Thank you for your continued support and commitment to keeping our students safe. We appreciate the community's cooperation and pride in our schools.

Sincerely,

Don Diglia,
Superintendent
