

## Connecting to the Forticlient VPN:

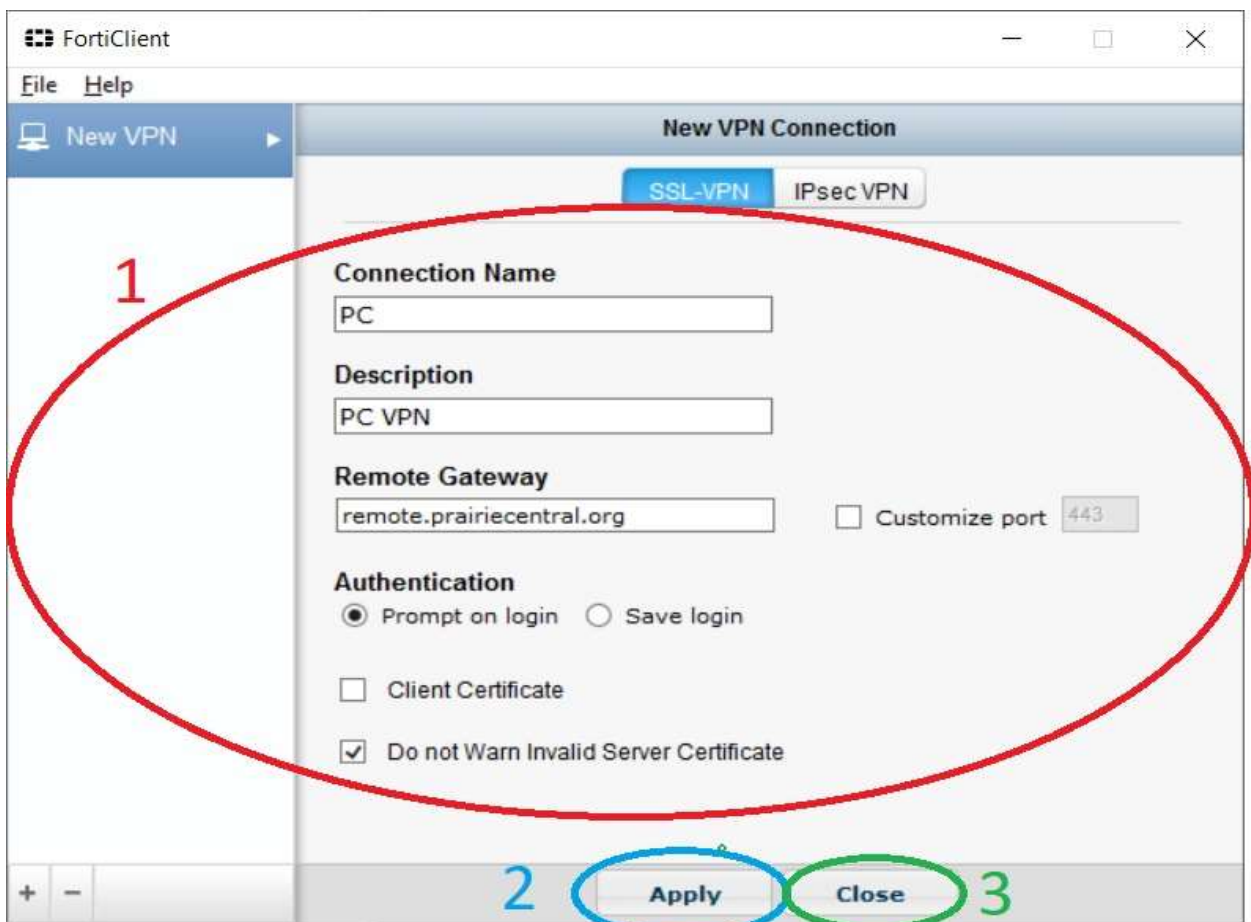

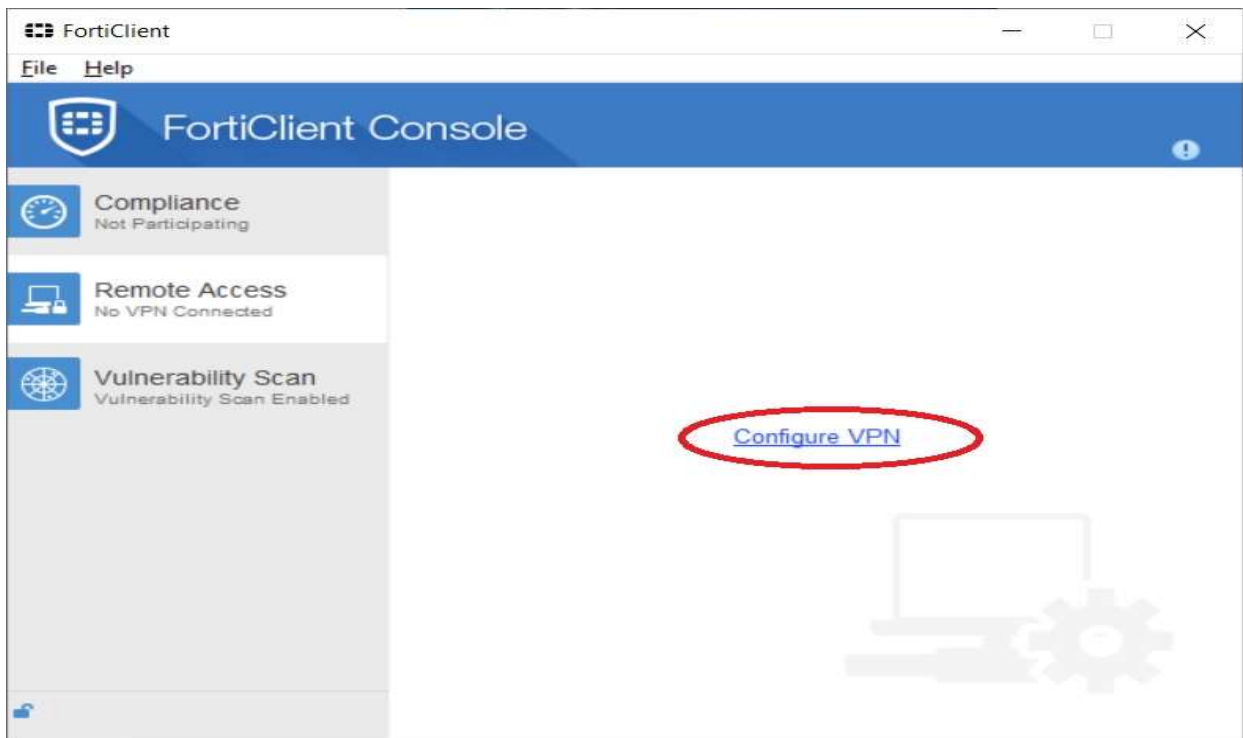

- 1) Find the green shield icon in your task bar (you may need to click the ^ to fully expand the taskbar icons). It looks like this: (Note: If you don't have this icon then you can install the software from this link: <https://5il.co/msdu> and just click next through all the prompts after accepting the licensing agreement. **\*\*Some browsers may tell you EXE files are dangerous, just tell it to keep the file and run the install.\*\***)

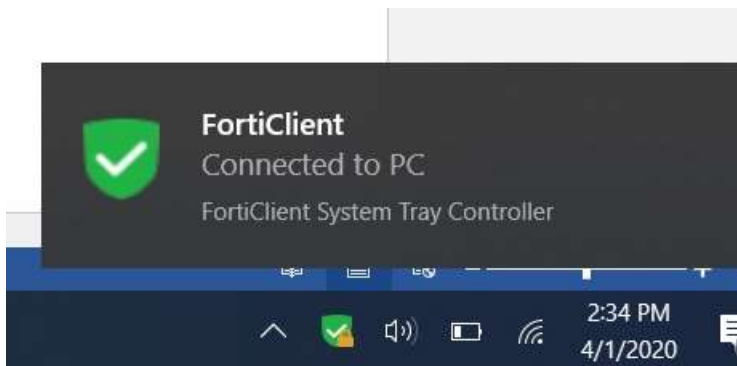

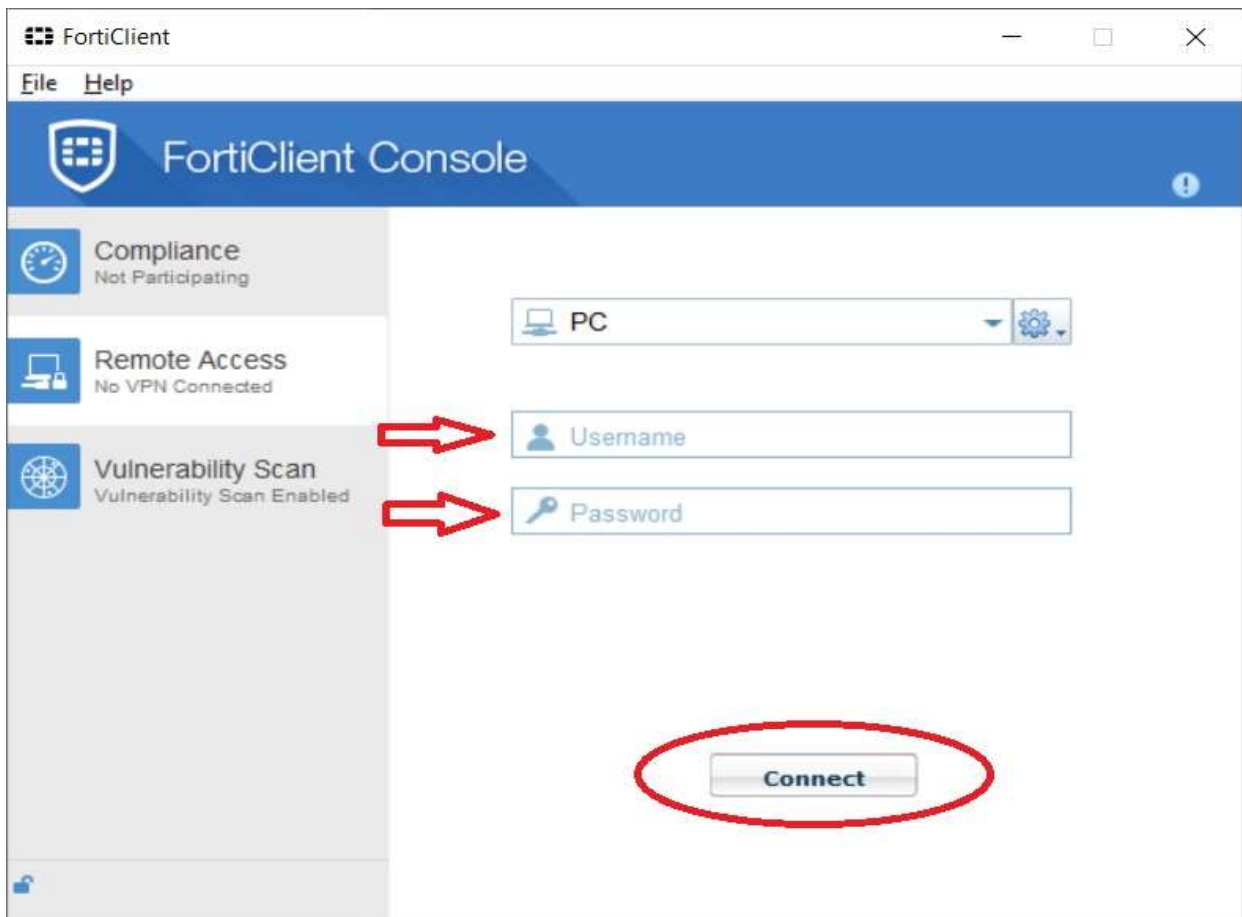

- 2) Double click the icon and it will bring up the following window, on the left hand side of that window click on the "Remote Access" tab.

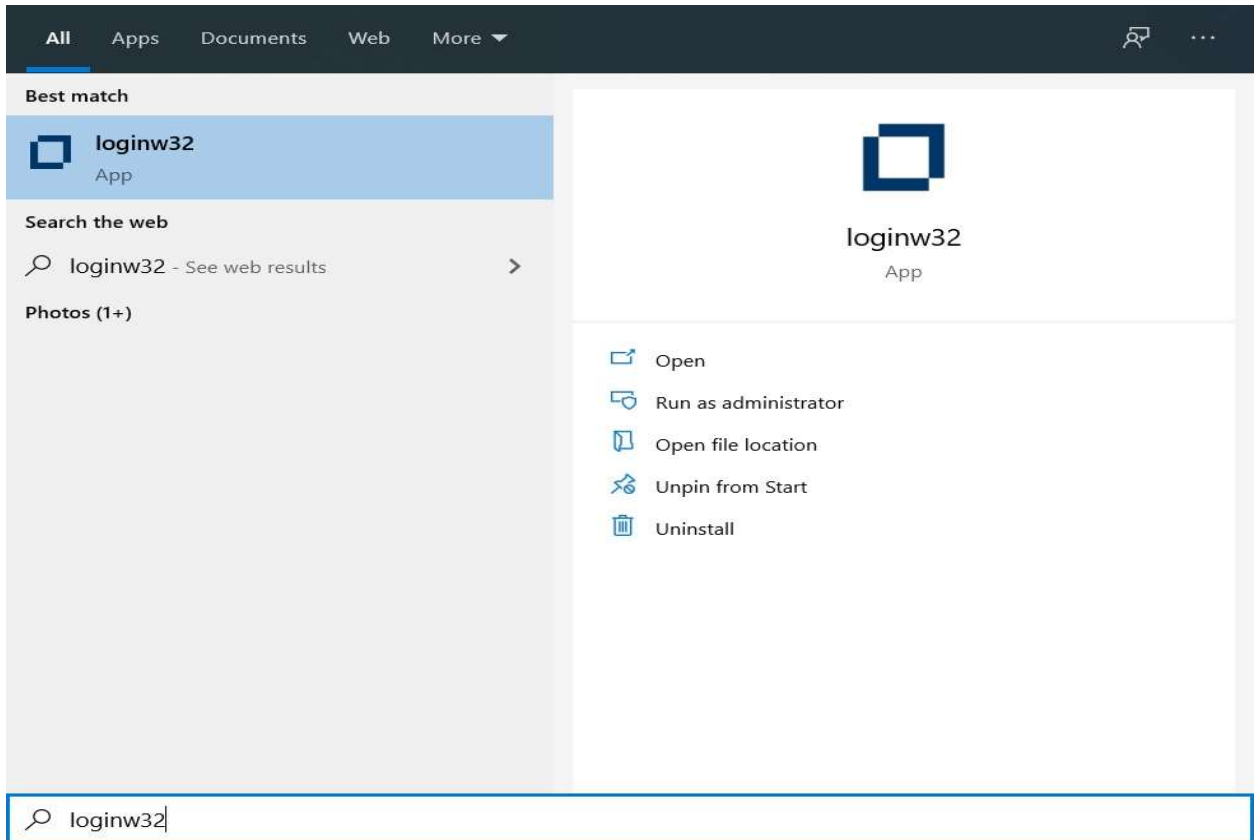

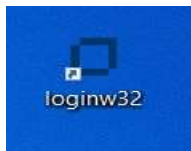

- 3) Click on the "Configure VPN" link and fill in the settings like the following image. Then click "Apply", and then click "Close" to be brought to the next step.

- 4) Fill in your username and password and click “Connect”. It will show a status bar that will go to 100 percent and then you will get a pop up in the task bar area saying you are connected.

- 5) Once you are connected you either need to find the icon that looks like the following image or click on your Start Menu and type in "loginw32":

- 6) Once you have opened that application you should have a window asking for login credentials. Enter your school login to then connect to your H: Drive.
