Floodwood School District Construction Advances Through Summer

Floodwood, MN – Summer construction continues at the Floodwood School District as crews move further into the next phase of the facility improvement projects. Work is now focused on installing new building systems and completing interior and exterior improvements that will help create a safe, efficient, and well-maintained school for students, staff, and the community.

Plumbing and HVAC work above the ceilings is continuing throughout the building as crews install new components and prepare areas for the next stages of construction. In selected areas, acoustical ceilings are being reinstalled as work progresses, providing another visible sign of the improvements taking place throughout the facility.

This project also reached several important milestones in recent weeks. New air handling units were delivered and are being set in place as part of the mechanical upgrades. Roofing work has also begun, with materials delivered and crews starting the next phase of exterior improvements.

District maintenance staff continue working through their summer maintenance schedule while construction activities take place throughout the building. The District appreciates the community's continued cooperation as construction progresses. While the playground and athletic fields remain open for public use, community members have continued to do an excellent job of staying clear of the construction areas and allowing crews to work safely around the building.

District staff will continue to work remotely and remain unavailable at the district building through August 30 while construction is underway. Any needs during the summer months should be emailed to attendance@isd698.org, and a member of the office team will respond as soon as they are able.

The Floodwood School District remains committed to keeping the community informed as construction progresses and looks forward to sharing additional updates as work continues through the remainder of the summer months. Please visit the district website at www.isd698.org for the most up to date information.
