Dear Franklin Families,

We recently sent out a community notification regarding required lead testing of water outlets at the Franklin High School. An outlet reported higher than the 5 parts per billion minimum allowed by the State of New Hampshire. The federal minimum allowed is 10 parts per billion. One outlet reported 5.93 parts per billion and 11.2 parts per billion. The outlet has not been in use for several years, but was required to be turned on to test it. The outcome is the outlet will continue to remain shut off and unused. This outlet was never used for drinking water. We apologize for any confusion in regard to the previous notification. Student safety continues to remain our number one priority.

Respectfully,

Jefferson Braman, Business Administrator
Daniel LeGallo, Superintendent
