Don't take chances with your family's health—make sure you all get vaccinated against influenza every year!

Here's how influenza can hurt your family . . .

Influenza can make you, your children, and your parents really sick.

Influenza usually comes on suddenly. Symptoms can include high fever, chills, headaches, exhaustion, sore throat, cough, and all-over body aches. Some people say, "It felt like a truck hit me!" Symptoms can range from mild to severe. When influenza strikes your family, the result is lost time from work and school and, possibly, doctor visits and trips to the hospital.

Influenza spreads easily from person to person.

An infected person can spread influenza when they cough, sneeze, or just talk near others. Some people might get flu by touching a surface contaminated with the flu virus and then touching their own mouth, nose, or eyes. People infected with flu don't have to feel sick to be contagious—they may even spread the flu virus to others the day before they have symptoms.

Influenza and its complications can be so serious that they can put you, your children, or your parents in the hospital—or lead to death.

Each year in the U.S., from 120,000–710,000 people are hospitalized and from 6,300–52,000 people die from influenza and its complications. The people most likely to be hospitalized and die are infants, young children, older adults, and people of all ages who have conditions such as heart or lung disease. But it's not only the youngest, oldest, or sickest who die: every year influenza kills people who were otherwise healthy.

Influenza can be a very serious disease for you, your family, and friends—but you can all be protected by getting vaccinated.

There's no substitute for yearly vaccination in protecting the people you love from influenza. Vaccination will help keep you and your loved ones safe from a potentially deadly disease. Get vaccinated every year, and make sure your children and your parents are vaccinated, too.

Get vaccinated every year! Get your children vaccinated! Be sure your parents get vaccinated, too!

Fight the Flu in Arkansas fights

Dear Parent,

Each year, in partnership with the Arkansas Department of Health (ADH), school districts hold an in-school flu immunization clinic to provide flu vaccine to their students.

If you decide to vaccinate your child during the flu vaccine clinic, please follow the instructions below.

1. Read the Vaccine Information Statement for the vaccine.
2. Read and complete the front and back of the Arkansas Department of Health (ADH) consent form.
3. PRINT clearly all information required on the ADH consent form.
4. Make sure you have signed the ADH consent form for the flu vaccine.
5. Sign the school district (FERPA) consent form (you may have signed this form at the beginning of the school year when your child was registered for school).
6. Return both consent forms to your child's school as quickly as possible.

This is a great opportunity for your child to receive the flu vaccine with no charge to you. If you have insurance, ADH will ask your insurance company to pay for the cost of giving the vaccine. If you do not have insurance or your insurance does not pay for vaccines, there will still be no charge to you.

REMEMBER, only those students with the completed paperwork (the signed ADH consent AND the school district FERPA consent) will receive the flu vaccine.

If you should have any questions or concerns about the vaccines or the ADH consent form, please contact your local health unit.

Thank you.

For Payment: The ADH may release PHI about you to Medicaid, Medicare, and/or your health plan/insurance carrier to obtain payment for our services. For example, we may need to give your health plan PHI about a clinical exam or vaccinations that you or your child received, so your health plan or Medicaid or Medicare will pay us for treatment or services.
