

March 2026

Dear Community Members,

The Bald Eagle Area School District Board of School Directors has begun a facilities and feasibility study to look at the condition and use of our school buildings. This study will help us understand what our schools may need in the future.

Over time, school buildings age, student needs change, and the way we teach and learn also evolves. Because of this, it is important for us to take a careful look at our facilities. The study will review things like building conditions, safety, enrollment trends, and how our spaces support student learning. The goal is to gather clear information so we can plan responsibly for the years ahead.

At this time, **no decisions have been made** about changes to any buildings or programs. The purpose of the study is simply to collect information and explore possible options. Should any decisions be considered in the future, they will be made carefully and with community input.

Community voices are an important part of this process. In the coming months, there will be opportunities for parents, staff, students, and community members to share their thoughts. This may include surveys, community forums, public meetings, and other ways to provide feedback.

We encourage you to take part and share your ideas. You can find information throughout the process at our dedicated information page: [BEASD District Rebalancing and Future Planning](#). Your input will help us better understand what our community values and what our students need to succeed. Thank you for your continued support of the Bald Eagle Area School District and our students.

Sincerely,

The BEASD Board of School Directors
Chris Santini - Superintendent
Skip Pighetti - Assistant Superintendent
