TO: Superintendent and Board of Bishop Union High School

FROM: Tom Parker, CEO
Mammoth Hospital

RE: Memorandum of Understanding between Bishop Union High School and Mammoth Hospital for the provision of services of a Certified Athletic Trainer

Mammoth Hospital employs Certified Athletic Trainers as part of its provision of Physical Therapy services in Inyo and Mono Counties. Bishop Union High School wishes to provide the services of a Certified Athletic Trainer to enhance the delivery of quality interscholastic athletic programs to the students it serves. Each agency agrees to participate in the provision of an Athletic Training program by providing the following services.

Mammoth Hospital agrees to:

1. Mammoth Hospital will provide, as able, the services of a Certified Athletic Trainer free of charge to Bishop Union High School (BUHS) for game coverage of high-risk sports and assessment and treatment of injuries for all other sports. The schedule will be set by mutual agreement of the high school Athletic Director and the Mammoth Hospital Orthopedic Clinic Manager and Physical Therapy Supervisor. The term of service is contemplated to be the regular high school athletics season, approximately August through June but can be extended on an as needed basis if mutually agreed upon by the Mammoth Hospital Orthopedic Manager and the high school Athletic Director. The activities of the ATC (Certified Athletic Trainer) are provided under the umbrella of the Mammoth Hospital liability insurance program. This agreement will automatically renew each year unless written notification is given by either party 30 days prior to termination.

2. The duties of the Certified Athletic Trainer shall include, but not be limited to, injury screening and assessment of athletes and facilitation of medical referral when appropriate; return-to-play decision making; rehabilitation and treatment of athletic injuries and illness; establish and communicate policies and procedures for the day-to-day operation of the training facility; provide oversight of strength and conditioning programs and provide education and consultation to coaching staff and athletes regarding age and gender appropriate fitness and strength training practices; institute best practices for the management and use of the high school weight training facility; provide assistance with proper fitting of athletic protective equipment; be present as needed for practices and home games for football and basketball. If

physician consultation is needed, the ATC will provide prompt referral to physician services through Mammoth Hospital or provide a report to the athlete's physician of choice. The athlete's coach must contact the athletic trainer to set up a time to assess the athlete.

Bishop Union High School agrees to:

3. Bishop Union High School will provide adequate working space and supplies to carry out the provision of athletic training services by the ATC when on the school campus including janitorial services in the fitness facility and athletic training room; repair and maintenance of any athletic training equipment that is owned by BUHS; support for the production and distribution of education materials for athletes, parents, and coaches; general oversight and facilitation of the athletic training function on the school site by the Athletic Director.

4. Bishop Union High School will provide free of charge advertisement for Mammoth Hospital and its physicians, physical therapists, and athletic trainers in its printed programs; verbal announcements of hospital sponsorship of athletic training services at interscholastic athletic competitions; display of hospital banners in the gymnasium, training facility, and athletic fields.

Hi Marnie-

I have been working on the attached MOU with Mammoth Hospital. We have had one in place for athletes to go visit Chis Matteson in the morning for sports related injuries. Thai MOU was Mammoth Hospital's idea to expand some training hours available by using their building on the corner of Line and Home. There is a line in there about our custodial staff keeping things clean and that is meant for only when the trainer is on out site.

Anyway, it would be great if the board could approve the attached MOU at the October board meeting so we can move forward.

I will also get the winter coaches list to you as soon as possible for board approval.
