August 2026 Update

CONSTRUCTION UPDATE

As summer comes to a close, so does the current phase of the interior renovation work happening throughout the building. Final finishes are being applied to the Library, District Office, and High School/Middle School Office as these spaces near competition. Site improvements, such as new concrete and asphalt, have been installed along the new north drop-off loop and along the east parking lot.

The Technical Education (Tech Ed) renovation and addition work is also nearing completion. Exterior walls for the addition are in place and roofing installation should wrap up shortly, while interior renovation progression continues to advance.

The PAC and Cafeteria Commons addition is well underway, with masonry walls and steel structures continuing to rise within the addition footprint. Once roof decking is installed on top of the steel structure in the next few weeks, it will be easier to have a feel for and imagine the spaces.

NEXT STEPS

Furniture installation will occur in the Library, District Office, and High School/Middle School Offices in the coming weeks in preparation for the beginning of the school year. Once the school year starts, the PAC and Cafeteria Commons addition will become the main focus and its construction will continue through spring of next year.
