Principal Update

A massive thank you to our incredible John F. Kennedy Elementary School community! From May 1st through May 15th, our students in Grades 3 through 5 and our dedicated staff members showed immense caring by participating in a friendly competition to help feed local families. Together, we collected approximately 700 pounds of nonperishable food items, including over 400 boxes of pasta and nearly 140 bottles of sauce! All donations have been delivered to the Windsor Food and Fuel Bank to support our neighbors right here in Windsor. A special shout-out goes to our amazing JFK K-Kids members, who worked courageously throughout the drive to collect donations, count items, and publicize the challenge. We are incredibly proud of our students' leadership, empathy, and commitment to community service!

Field Day Update

Today's schoolwide Field Day was an absolute spectacular success, filling our campus with pure joy, bright smiles, and incredible school spirit. Students had a blast participating in a lineup of phenomenally planned events, with highlights including the ultimate teamwork of tug-o-war, the thrilling challenge of the obstacle course, and the endless laughs of the water balloon toss. A massive thank you to our wonderful staff, coordinators, and volunteers who meticulously planned this seamless day to make it unforgettable for our students. We are so proud of all our participants for bringing their best energy and outstanding sportsmanship to the field!

3rd Grade Update

Humanities: Third graders read the informational text, Ancient Greece. Students learned about the history of this ancient civilization and explored its city-states, government, religion, arts, sciences, and warfare. Students answered questions such as: If you could journey to the past, where would you rather live, Athens or Sparta? They supported their opinion with examples from the text.

STEM: Students have been learning about estimating the mass of an object and solving word problems involving mass. Students learned new math vocabulary words including grams and kilograms. They used the CUBES strategy to solve word problems. Third graders also learned about liquid volume with milliliters and liters.

Dates To Remember: *Important dates for parents/guardians*

June 11th	SOAR/BAND Concert 6:30-7:30
June 15th	Early Release/Last Day of School

Introducing MagicSchool AI to Windsor Public Schools

Dear Windsor Families,

We have launched **MagicSchool**, a secure AI platform designed specifically for education that fully complies with Connecticut Student Data Privacy laws.

Our goals:

- **Privacy First:** MagicSchool ensures a safe, controlled environment where student data remains private and secure.
- **Teacher-Led Learning:** AI is a tool to support instruction and provide personalized differentiation; it does not replace the vital role of the teacher.
- **Age-Appropriate Tools:** Students will access specialized tools, like research assistants and critical thinking partners, designed for their grade level.
- **Guidelines**: In alignment with our AI Guidelines, we will use MagicSchool to enhance, not replace critical thinking and creativity.

We are committed to a balanced approach that values traditional learning and limited screen time while preparing students for a digital future.

Frequently Asked Questions

How are we making sure kids aren't using AI to do their work for them?

Across Windsor Public Schools, AI is used to enhance, not replace, student thinking. Magic School is used to support not replace student thinking. MagicSchool does not allow students to freely search the internet; all student access is structured around teacher-assigned tools, class-based content, and controlled parameters to ensure a safe and focused learning experience. Teachers design lessons that require students to explain their thinking, participate in class, and apply learning independently.

How do we prevent AI plagiarism?

We have clear expectations that AI is a tool, not a substitute for original work. Students are taught to cite AI when used and to be transparent. Students are taught that AI is a tool not their own work, and must be used responsibly. Teachers emphasize process, in-class work, and student voice, and misuse of AI is addressed in alignment with school policies.

How do we address the use of AI in brainstorming and creativity?

Magic School includes age-appropriate tools that help students generate ideas and ask questions. AI is encouraged as a brainstorming and feedback tool, helping students generate ideas and refine their thinking. However, students are expected to build, revise, and create original work. Creativity and critical thinking remain at the center of all assignments.

How do we address misinformation and inaccuracy? ("Trust but Verify")

Students are taught to always verify AI-generated content. Magic School is a starting point for learning, not the final answer. AI can produce inaccurate or biased information, so students must cross-check sources, evaluate credibility, and think critically. “Trust but verify” is a core expectation across all grade levels.

How will AI affect learning?

Windsor Public Schools approach balances innovation with traditional learning (teacher-led), ensuring students continue to develop strong foundational skills and critical thinking. AI will support personalized learning and differentiation while keeping teachers at the center of instruction.

How do we handle bias and fairness?

We explicitly teach students that AI can reflect biases. Students learn to analyze responses, question assumptions, and consider multiple perspectives. There is also zero tolerance for using AI to create harmful, discriminatory, or inappropriate content.

How do we protect student privacy and safety?

Students use district-approved tools like MagicSchool in a secure environment that complies with student data privacy laws. They are taught to never input personal or confidential information into AI systems. Protecting student data is a top priority.

To close, AI will never replace the "inspired teaching" that defines a Windsor education. By using MagicSchool as a supervised thinking partner, we are helping Windsor students move from being passive consumers of technology to becoming empowered, ethical, and "life-long learners."

For more information, please review our **WPS AI Guidelines** or reach out to your school principal.

Sincerely,

Dana Gagne
Principal

We strive to make your visit to our schools both pleasant and productive. Family engagement is essential to student success, and we encourage you to connect with the staff who support your child. Whether you are observing a classroom or volunteering through prior arrangements with the Family Resource Center (FRC) or a teacher, we appreciate your partnership.

To ensure student safety, protect instructional time, and accommodate all families, please follow these guidelines:

Scheduling Your Visit

- Volunteering must be scheduled at least 24 hours in advance through your child's teacher or the FRC.
- Classroom observations must be scheduled with administration
    - Observations are limited to 20 minutes to minimize disruption
    - Only one parent/guardian may observe at a time due to space limitations. Please arrange care for younger children; the FRC can assist if needed.

Arrival and Safety

- All visitors must sign in and sign out at the front lobby with a valid ID, be processed through the Raptor System, and wear a visitor badge/sticker at all times.
- **Parents/guardians are expected to drop off their child outside, not inside. If students are brought after 8:45 the doors will be closed and they will need to be signed in at security and will be marked tardy.**
- Visitors will be escorted to and from their destination.

Classroom Expectations

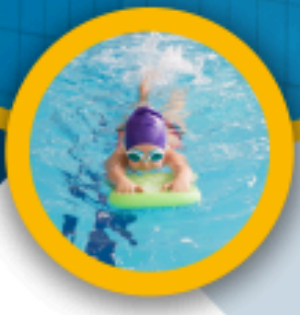

- Recording (audio or video) is not permitted.
- Respect student confidentiality—do not discuss other students outside the classroom.
- For questions or feedback, please schedule a separate time with the teacher.

Please note that the principal may reschedule or decline visits if they would disrupt the learning environment.

Thank you for helping us maintain a safe and focused school environment. We look forward to partnering with you!

READY TO DIVE INTO SUMMER?

- CAN YOU SWIM 2 LAPS OF FREESTYLE AND BACKSTROKE?
- ARE YOU FOCUSED AND DETERMINED?

Parenting Adolescents Toward Healthier Ways (PATHWays)

School avoidance is a complex issue that involves the child who struggles with attendance, parents, and school systems.

The Anxiety Disorders Center is researching a treatment program that will focus on assisting parents in addressing the problem of school avoidance. This research will examine the use of a daily parent diary during treatment to track time in school, sleeping, using screens, and engaged in physical activity.

The PATHWays program aims to help parents:

- Understand how accommodations for anxiety may contribute to school avoidance.
- Learn ways to reduce accommodations.
- Create rules/structure around sleep, screen time, and activity.

Parents/guardians of students (ages 12-18, grades 6 -12) who are struggling with school attendance may be eligible for this research program.

If you know a family that would be interested in our program or would like more information about our program, please contact the Anxiety Disorders Center at (860) 545-7707.
