Middle School FAQs

What does a middle school day look like?

Unlike the elementary level, a middle school student will have six classes usually with a different teacher each hour. The six classes will generally include four academic classes (English Language Arts - ELA, Social Studies, Mathematics, and Science) and up to two elective classes each semester. Classes are approximately 50-55 minutes in length with a 5-minute passing time in between classes. This gives students an opportunity to go to their locker, use the bathroom, and/or take a brain break. For an example of grade level schedules, click on any of the following links:

- ▶ [6th grade](#)
- ▶ [7th grade](#)
- ▶ [8th grade](#)

What is a Term?

A term is approximately 10 weeks in length. There are 4 terms in a school year. Some 6th & 7th grade classes are a term in length to allow for additional exploration opportunities for students. At the 6th grade level, Digital Technology 6 and PE 6 are examples of term classes.

What is a Semester?

A Semester is approximately 20 weeks in length. There are 2 semesters in a school year. At the 6th grade level, Pre-Engineering 6 and Art 6 are examples of a semester class.

How are lunches set up?

Students will eat lunch in the school cafeteria but only with students in their grade. For instance, 6th grade students will all eat lunch together after 3rd Hour. Students will use the same HVS personal lunch code as they did in elementary school.

How do I get involved in school activities, like sports, clubs, etc?

Huron Valley Schools encourages students to get involved in their schools outside the classroom. A variety of sports, clubs, and other activities are offered to meet the interests of students. For more information, visit the school website, read informational emails and newsletters, or contact the school.

Middle School FAQs

How do percentages relate to letter grades?

The general percentage-to-letter breakdown is listed below:

Letter Grade	A	A-	B+	B	B-	C+	C	C-	D+	D	D-	E
Percentage Range	93% - 100%	90% - 92%	87% - 89%	83% - 86%	80% - 82%	77% - 79%	73% - 76%	70% - 72%	67% - 69%	63% - 66%	60% - 62%	59%

In extenuating circumstances, a “G” or “H” grade can be given for a passing (“G”) or failing (“H”) grade.

What is a Grade Point Average (GPA)?

A student’s grades will make up his or her Grade Point Average (GPA). On report cards, a student is provided with a GPA based on the current term and/or semester. A student’s middle school GPA will not transfer to the high school.

How do I make the Honor Roll?

A student is eligible for the Honor Roll if he or she earns at least a 3.0 GPA for a semester. The following designations are applied for students making the Honor Roll:

GPA Range	3.0 - 3.49	3.50 - 3.74	3.75 - 3.99	4.0
Honor Roll Designation	Honor Roll	Honor Roll with Academic Honors	Honor Roll with High Academic Honors	Honor Roll with Highest Academic Honors

What else should I know?

We highly recommend that both students and parents stay aware of all events at the middle school. You can do this by accessing the school website on a regular basis. The website will provide you current information updates, staff contacts, classroom homework links, and building announcement links. Also, each building has social media platforms (i.e. Facebook, Instagram, X, etc.) that highlight building events. Be sure to like or follow these official school sites.

Career Pathways

Michigan Career Pathways and National Career Clusters

Career Pathways are careers that are grouped together because many of the people in them share similar interests and strengths. All pathways include a variety of occupations that require different levels of education and training. Selecting a Career Pathway provides a focus into which one can begin directing energies and determining a tentative career “fit” though it is always acceptable to change one’s mind. By identifying with a pathway students are aided in selecting courses, extra-curricular activities and part-time employment. Career Pathways provide a plan for all students regardless of their interests, abilities, talents, or desired levels of education. All pathways have equal dignity.

The following six (6) Career Pathways have been developed by the state of Michigan. The U.S. Department of Education Office of Vocational and Adult Education (OVAE) has identified 16 career clusters representing career opportunities for the 21st century economy. These clusters will frame student opportunities as they pursue postsecondary education and a wide range of career opportunities from front-line to professional and managerial careers.

Grade 6 - Required Courses

Digital Technology 6

Term

Prerequisite: None

This course encourages students to master several core digital skills while reflecting on how technology shapes our world. Students hone file-management habits and keyboard fluency while also learning about safe, ethical online behavior with a strong focus on protecting personal data. Using spreadsheets and simple databases, students analyze information and solve everyday problems. Creativity, collaboration, and real-world relevance are also emphasized as students create multimedia stories and presentations with photo, video, and audio tools. Foundational AI literacy is introduced as well, showing students how intelligent tools operate and how to use them responsibly.

English Language Arts 6

Year

Prerequisite: None

Sixth grade English Language Arts continues to develop students' skills in vocabulary, comprehension, and writing. Students actively participate in the process of reading, writing, speaking and listening. Students learn about the crafting techniques that are common to narrative, informative, and argument writing; and write a personal narrative, a literary essay, and an argument-based multimedia presentation and speech.

Math 6

Year

Prerequisite: None

Sixth grade students work toward mastery of fluency with all operations of whole, decimal, and fractional numbers. Students examine the use of factors and multiples to solve problems, the relationships among fractions, ratios, decimals, and percents, and solve ratio and rate problems using reasoning of multiplication and division. Students learn the procedures for dividing fractions and why it makes sense, calculate surface area and volume in applied situations, and extend their knowledge of rational numbers. Students compute with decimals and percents in real-world situations, calculate and graph various measures of central tendency, use variables to write expressions and equations that correspond to given situations, construct and analyze tables to write equations that describe relationships between quantities, and solve simple one-step equations. As in all mathematics courses, the Standards for Mathematical Practice are the "processes and proficiencies" by which all other mathematics standards are taught.

Math 6 Advanced

Year

Prerequisite: Staff Recommendation

In this course, students work at an accelerated pace compared to the regular grade level course. Students will be exposed to a year and a half of content within one year while demonstrating proficiency in concepts beyond their grade level. The curriculum includes all the 6th grade Michigan Standards for Mathematics and approximately the first half of the 7th grade standards. The units of study in this course include Rational Numbers; Ratios, Proportions and Percents; Geometry; Statistics and Data Displays; and Expressions, Equations and Inequalities. See course descriptions for Math 6 and Math 7 for a more detailed description of the topics included within these units.

Physical Education 6

Term

Prerequisite: None

Sixth Grade Physical Education is a one-term required course in which students begin to understand the role of lifelong fitness. This course provides learning opportunities for students to acquire knowledge, skills, fitness, and attitudes to enhance their quality of life through physical education. Students will participate in a wide variety of activities which include recreational games, introduction to specific team sports with a focus on lead-up games, and introductory fitness activities. Students will engage in meaningful experiences that promote learners to be independent as well as value teamwork and a healthy, active lifestyle.

Grade 6 - Required Courses

Science 6: Physical Science

Year

Prerequisite: None

Science 6: Physical Science is an introductory course aligned to the Michigan Science Standards, also known as the Next Generation Science Standards (NGSS). Students will engage in three dimensional learning of cross cutting concepts, science and engineering practices, and disciplinary core ideas. Units of study include Introduction to Matter and Scientific Inquiry Chemistry of Materials, Chemical Reactions, Energy, Fields and Interactions, Force and Motion, and Waves.

Social Studies 6: Geography

Year

Prerequisite: None

Sixth grade social studies is a geography-based course which introduces students to the physical and human geography of the world. In this course, students will examine a variety of global issues that come from human activities. These issues are examined through case studies from different regions of the world. Students also assess the extent to which geographic, historical, political, socio-cultural, and/or economic factors account for differences in the causes and/or consequences of global phenomena.

Grade 6 - Elective Courses

Art 6

Semester

Prerequisite: None

Sixth grade Art builds on the Elements of Art and Principles of Design that were introduced in elementary school. After students demonstrate an understanding of the Elements of Art and Principles of Design, they apply them in projects of both two and three dimensional works of art. This class fosters communication skills, creative abilities, the study of various cultures, self-discipline and persistence.

Band 6

Year

Prerequisite: None

In this class, we will be developing basic musicianship skills on instruments. Students will perform in a small number of concerts. No prior experience is needed for this class.

Choir 6

Year

Prerequisite: None

Sixth grade choir is an introduction to the choral world. Students learn how to read music, blend our voices, and how to perform. The choir goes on field trips to performances and shows as well as collaborates with the other middle and high schools. Choir is about exploring voices, working as a team and experiencing new music.

Communication Arts 6

Semester

Prerequisite: None

The purpose of this course is to provide students with the opportunity to increase their presentation and listening skills. Through a variety of individual and collaborative speaking/performing projects, students will engage in critical thinking and develop more confidence with public speaking. Units will include improvisation, dramatic interpretation, formal and informal speeches, and basic theatrical structure (including the creation of artistic elements such as costumes, sets and props).

English Language Arts 6 Foundations

Semester

Prerequisite: Staff Recommendation

The ELA 6 Foundations course is designed to help students, who are performing significantly below grade level, recover reading and writing skills. The course is taught using readers/writers workshop methodology: the readers workshop helps students to develop strategies to increase reading fluency and comprehension levels; the writers workshop helps students to develop confidence, voice and fluency as writers.

EL (English Learner) Academic & English Language Skills

Semester or Year

Prerequisite: Staff Recommendation

Students will gain critical skills to support English language development and academic success. Areas of study will include organization, time management, study and test taking strategies, and strategies for reading, writing, speaking and listening in English. Students will use their semester classes, lessons and activities to practice and apply these skills.

EL (English Learner) Sheltered English Language Arts

Year

Prerequisite: Staff Recommendation

In this yearlong course, students receive language development and academic English language support with a focus on reading, writing, listening, and speaking. This course and content fulfill the requirements for middle school English Language Arts courses.

Grade 6 - Elective Courses

Math 6 Foundations

Semester

Prerequisite: Staff Recommendation

The Math 6 Foundations course is designed to help students, who are performing significantly below grade level, recover math skills and conceptual understanding as well as support their learning of Math 6 content.

Pre-Engineering 6

Semester

Prerequisite: None

This course introduces a dynamic design process where students are challenged to solve real-world problems through creative thinking and innovation. At the outset, learners are presented with a central unit problem that serves as a springboard for exploration and discovery throughout the lessons. They delve into various ways of communicating design concepts—from initial sketches to detailed solid and mathematical models—demonstrating how simulated models can capture authentic scenarios and generate valuable data for further analysis. As a cumulative project, students work collaboratively to identify design requirements and conduct thorough research to design, create, test, and refine an actual product.

Skills for Success 6 (SFS)

Semester or Year

Prerequisite: Staff Recommendation

Skills for Success is designed to help students with organizing, planning, prioritizing and self-monitoring with an overall goal of supporting students in their academic classes. This course will provide a smaller class setting so that students are better able to receive individualized help as well as additional time to work on assignments from other classes. Strengthening skills in setting short and long-term goals, planning for projects, reviewing for assessments and progress monitoring are examples of the focus for this course.

Sports & Fitness 6

Semester

Prerequisite: None

Sixth Grade Sport & Fitness is a one semester elective course for students who are looking for more PE in their schedules beyond the one-term requirement. This course provides students an additional semester of PE where they will participate in a wide variety of activities which include a deeper dive into recreational games, a variety of team sports, and additional fitness activities. Attention will be given to advanced skill development and application in team sport game situations. Students will gain a deeper understanding of the role of lifelong fitness.

[Back to Middle School FAQs](#)

Grade 7 - Required Courses

English Language Arts 7

Year

Prerequisite: None

In seventh grade English Language Arts, students participate in a reading workshop that hones reading skills through lessons on setting, inference, plot, tone, mood, voice, theme, conflict, and literal evidence. They also explore a variety of informational text structures that will challenge their ability to analyze, cite evidence, and draw inferences from text. Students will participate in the writing process through a variety of pieces, including a personal narrative or memoir, a research report, and an argument-based multimedia presentation and speech.

Health 7

Term

Prerequisite: None

Utilizing the Michigan Model for Health Curriculum, students learn accurate and current information on the following units of study: Social and Emotional Health, Safety and Violence Prevention, Healthy Eating & Physical Activity, Tobacco, Alcohol & Other Drug Prevention, and Reproductive Health. Through participation in this course, students gain knowledge and skills necessary to make healthy decisions in a wide range of physical, emotional, and social issues.

Math 7

Year

Prerequisite: None

In seventh grade, students draw, construct, and describe geometric figures. They use knowledge of angles and writing equations to describe relationships between figures and to solve problems. Students continue developing knowledge of the number system as they extend their previous understandings of operations with fractions to add, subtract, multiply, and divide positive and negative rational numbers. For the first time, students are introduced to probability. Students continue analyzing one variable statistics and use random sampling to think about data sets and use mathematical tools to compare two data sets. A primary focus of the course is the development of proportional reasoning. Proportional reasoning serves as a foundation to support connections between mathematical ideas and coherence across grades. As in all mathematics courses, the Standards for Mathematical Practice are the “processes and proficiencies” by which all other mathematics standards are taught.

Math 7 Advanced

Year

Prerequisite: Math 6 – Advanced

In this course, students work at an accelerated pace compared to the regular grade level course. Students will be exposed to a year and a half of content within one year while demonstrating proficiency in concepts beyond their grade level. The curriculum includes approximately half the 7th grade Michigan Standards for Mathematics and all of the 8th grade standards. The units of study in this course include Equations and Angle Relationships; Geometry; Linear Systems and Functions; Real Numbers and Exponents; and Probability and Data Analysis. See course descriptions for Math 7 and Math 8 for a more detailed description of the topics included within these units.

Physical Education 7

Term

Prerequisite: None

Seventh Grade Physical Education is a one-term required course in which students add to their understanding of personal conditioning skills as well as individual and team sports. During individual, dual, and team sports, they will enhance their knowledge of rules, skills, and teamwork as well as developing strategies to play sports more successfully. During this course, they will be introduced to specific training principles and strategies to assist them in improving their personal fitness goals. Students will learn to appreciate the value of skill acquisition and development. Students will engage in meaningful experiences that promote learners to be independent as well as value teamwork and a healthy, active lifestyle.

Grade 7 - Required Courses

Science 7: Life Science

Year

Prerequisite: None

Science 7: Life Science is an introductory course aligned to the Michigan Science Standard, also known as the Next Generation Science Standards (NGSS). Students will engage in three dimensional learning of cross cutting concepts, science and engineering practices, and disciplinary core ideas. Units of study include Cells, Body Systems, Reproduction, Evolution, and Ecology.

Social Studies 7: Ancient History

Year

Prerequisite: None

Seventh grade social studies focuses on ancient world history and geography. The course investigates human history from the beginning until around 1500. Students learn that historians must have evidence to support the claims they make in their accounts, learn about the earliest humans, explore early migration and settlement patterns, take a comparative look at world religions, and examine how the emergence of pastoral and agrarian societies set the stage for the development of early modern civilizations.

Grade 7 - Elective Courses

Art 7

Semester

Prerequisite: None

This semester course builds upon the Elements of Art and the Principles of Design that students have studies in Sixth Grade Art. A variety of materials and techniques are used as students create more advanced works of art. Creativity and problem solving is emphasized. Students create two and three dimensional works of art and critique their own artwork and the artwork of others.

Band 7

Year

Prerequisite: None

In this class, we will continue to develop musicianship skills. Students will be involved in a wide range of performance opportunities. New students to band are welcome to take this class as well.

Choir 7

Year

Prerequisite: None

Seventh and eighth grade choirs are a continuation of exploring the choral world. Students continue to learn how to interact with our music, find harmonies, and perform in a professional manner. The choirs go on field trips to shows and choral competitions as well as the potential for overnight trips. Also, students collaborate musically with the other middle and high schools. Choir helps build teamwork skills and provides opportunities to become a better musician all while being a part of the HVS choir community. Class placement may be determined based on vocal type (SATB).

Communication Arts 7

Semester

Prerequisite: None

Students in this class will develop their communication skills both individually and with others. Student ownership is a core element in this course. There are theatre components such as individual, duet, and group performances, along with learning the different aspects of stagecraft. The course also includes digital components such as video and graphic arts where students will use various media platforms to communicate an intended message to an audience.

English Language Arts 7 Foundations

Semester

Prerequisite: Staff Recommendation

The ELA 7 Foundations course is designed to help students, who are performing significantly below grade level, recover reading and writing skills. The course is taught using readers/writers workshop methodology: the readers workshop helps students to develop strategies to increase reading fluency and comprehension levels; the writers workshop helps students to develop confidence, voice and fluency as writers.

EL (English Learner) Sheltered English Language Arts **Year**

Prerequisite: Staff Recommendation

In this yearlong course, students receive language development and academic English language support with a focus on reading, writing, listening, and speaking. This course and content fulfill the requirements for middle school English Language Arts courses.

Grade 7 - Elective Courses

EL (English Learner) Academic & English Language Skills

Semester or Year

Prerequisite: Staff Recommendation

Students will gain critical skills to support English language development and academic success. Areas of study will include organization, time management, study and test taking strategies, and strategies for reading, writing, speaking and listening in English. Students will use their semester classes, lessons and activities to practice and apply these skills.

Math 7 Foundations

Semester

Prerequisite: Staff Recommendation

The Math 7 Foundations course is designed to help students, who are performing significantly below grade level, recover math skills and conceptual understanding as well as support their learning of Math 7 content.

Pre-Engineering 7

Semester

Prerequisite: None

This course introduces a dynamic design process where students are challenged to solve real-world problems through creative thinking and innovation. At the outset, learners are presented with a central problem which serves as a springboard for exploration and discovery throughout the lessons. They delve into various ways of communicating design concepts, from initial architectural sketches and scale measurements to detailed 2D drafting and parametric 3D modeling. Students explore the art and science of architecture by addressing feasibility, cost, function, and aesthetics while investigating how sustainable "green" choices can minimize negative environmental impacts. As a cumulative project, students work collaboratively to identify design requirements and conduct thorough research to design, create, and test physical and digital models.

Skills for Success 7 (SFS)

Semester or Year

Prerequisite: Staff Recommendation

Skills for Success is designed to help students with organizing, planning, prioritizing and self-monitoring with an overall goal of supporting students in their academic classes. This course will provide a smaller class setting so that students are better able to receive individualized help as well as additional time to work on assignments from other classes. Strengthening skills in setting short and long-term goals, planning for projects, reviewing for assessments and progress monitoring are examples of the focus for this course.

Sports & Fitness 7

Semester

Prerequisite:

Seventh Grade Sport & Fitness is a one semester elective course for students who are looking for more PE in their schedules beyond the one-term requirement. This course provides students an additional semester of PE to gain a deeper understanding of the role of lifelong fitness. Students will participate in fitness activities, individual and team sports, and lifetime activities. During this course, they will add specific training principles and strategies to assist them in improving their personal fitness goals. Students will also be introduced to a variety of weight resistance techniques. Students will engage in learning about the value of nutrition and different types of physical activity such as muscular endurance and cardiovascular activities as a part of a healthy lifestyle.

Grade 8 - Student Scheduling and Course Descriptions

Required Courses (4 hours)	English Language Arts 8 (Full Year)	
	Math 8 or Honors Algebra 1 (HS Credit) (Full Year)	
	Science 8: Environmental Science (Full Year)	
	Social Studies 8: US History American Revolution through 1900 (Full Year)	
Elective Courses (2 hours)	Band 8 (Full Year)	
	Choir 8 (Full Year)	
	Spanish 1 (HS Credit) (Full Year)	
	Art 8 (1 Semester)	Engineering 8 (1 Semester)
	Fundamentals of Art & Design (HS Credit) (1 Semester)	Intro to Multi-Media 8 (1 Semester)
	Jazz Band 8 (1 Semester)	LACES 8 (Learning & Caring for Every Student) (1 Semester)
	Physical Education 8 - Personal Conditioning (1 Semester)	Physical Education 8 - Team Sports (1 Semester)
	Student Leadership 8 (1 Semester)	Theatre Arts 8 (1 Semester)
	Video Productions 8 (1 Semester)	
	SUPPORT COURSES	
	EL (English Language) Language Development - Sheltered ELA (Full Year)	
	EL (English Learner) Academic & English Language Skills (1 or 2 Semesters)	ELA 8 Foundations (1 Semester)
	Math 8 Foundations (1 Semester)	Skills for Success (SFS) 8 (1 Semester or 1 Year)

[Back to Middle School FAQs](#)

Grade 8 - Required Courses

English Language Arts 8

Year

Prerequisite: None

Eighth grade English Language Arts provides students with a critical foundation in reading and writing narrative, informational, and argument texts. Through analysis and production of texts in these three modes, students become more adept readers, thinkers, and writers. Across the year, they come to understand the distinctions between narrative, informational and argument texts by studying fiction and nonfiction in a variety of formats and developing a more thorough understanding of audience and purpose when both reading and writing.

Math 8

Year

Prerequisite: None

In eighth grade, students begin to develop the concept of functions and how to explore and represent them with tables, equations, and graphs. They analyze linear functions and solve linear equations, and extend learning to include systems of linear equations. The use of scientific notation and rules of exponents is also introduced. Students study other concepts including statistics and geometry. Statistics moves from one variable statistics to two variable statistics. In their study of geometry, students transform geometric figures using reflections, rotations, dilations, and translations to justify congruence and similarity of figures. They also work with radicals and integer exponents as they use the Pythagorean Theorem and solve problems involving the volume of cylinders, cones, and spheres. As in all mathematics courses, the Standards for Mathematical Practice are the “processes and proficiencies” by which all other mathematics standards are taught.

Honors Algebra 1 (High School credit*)

Year

Prerequisite: Math 7 - Advanced

In Algebra 1, students continue their study of linear function at an advanced level. Students will solve, graph, and write linear functions, as well as study systems of linear functions and other appropriate applications. Students will also deepen their study of exponential functions - including growth, decay, and other real world applications. Students will complete the course through an introduction to polynomials and quadratic functions. This course lays the foundation for students to continue on the advanced math pathway into their high school career.

**Middle school courses that address the MDE High School Merit Curricular requirements will count towards high school graduation and credits. However, middle school grades will not be included in the high school GPA for any purpose.*

Science 8: Environmental Science

Year

Prerequisite: None

Science 8: Environmental Science is an introductory course aligned to the Michigan Science Standards, also known as the Next Generation Science Standards (NGSS). Students will engage in three dimensional learning of cross cutting concepts, science and engineering practices, and disciplinary core ideas. Units of study include Land, Water, & Human Interaction, Geological Processes, Solar System & Beyond, Weather & Climate, and Earth's Resources.

Social Studies 8: US History - American Revolution through 1900

Year

Prerequisite: None

This course introduces students to American history from the Revolution through 1900, with an emphasis on the values and ideals of our constitutional republic. Students deepen their understanding of history as they use primary and secondary sources to both support and analyze historical arguments and narratives. Students explore the Revolutionary era, the creation of the Constitution and challenges to the early republic, westward expansion, the Civil War era and Reconstruction, reform movements, and changes facing our country at the end of the 19th century including industrialization and immigration.

Grade 8 - Elective Courses

Art 8

Semester

Prerequisite: None

This semester course builds upon the Elements of Art and the Principles of Design that students have studied in sixth and seventh grade Art. A variety of materials and techniques are used as students create more advanced works of art. Creativity and problem solving is emphasized. Students create two and three dimensional works of art and critique their own artwork and the artwork of others.

Band 8

Year

Prerequisite: None

In this class, we will continue to develop musicianship skills. Students will be involved in a wide range of performance opportunities. New students to band are welcome to take this class as well.

Choir 8

Year

Prerequisite: None

Seventh and eighth grade choirs are a continuation of exploring the choral world. Students continue to learn how to interact with our music, find harmonies, and perform in a professional manner. The choirs go on field trips to shows and choral competitions as well as the potential for overnight trips. Also, students collaborate musically with the other middle and high schools. Choir helps build teamwork skills and provides opportunities to become a better musician all while being a part of the HVS choir community. Class placement may be determined based on vocal type (SATB).

Engineering 8

Semester

Prerequisite: None

This semester-long course is designed to build upon the concepts learned in Pre-Engineering 6 and Pre-Engineering 7. Students will use the design process and engage with a variety of engineering projects. Students are exposed to learning opportunities that build the collaboration and problem-solving skills needed for a lifetime of learning and working. Students are immersed in a collaborative experience, seeking to answer questions through hands-on discovery and experimentation. These projects give students a deeper exposure to a variety of different engineering fields which may include (but are not limited to) Mechanical, Civil, Electrical, Transportation, and Computer Engineering.

English Language Arts 8 Foundations

Semester

Prerequisite: Staff Recommendation

The ELA 8 Foundations course is designed to help students, who are performing significantly below grade level, recover reading and writing skills. The course is taught using readers/writers workshop methodology: the readers workshop helps students to develop strategies to increase reading fluency and comprehension levels; the writers workshop helps students to develop confidence, voice and fluency as writers.

EL (English Learner) Academic Skills

Semester

Prerequisite: Staff Recommendation

Students will gain critical skills to support English language development and academic success. Areas of study will include organization, time management, study and test taking strategies, and strategies for reading, writing, speaking and listening in English. Students will use their semester classes, lessons and activities to practice and apply these skills.

Grade 8 - Elective Courses

EL (English Learner) Sheltered English Language Arts

Year

Prerequisite: Staff Recommendation

In this yearlong course, students receive language development and academic English language support with a focus on reading, writing, listening, and speaking. This course and content fulfill the requirements for middle school English Language Arts courses.

Fundamentals of Art & Design (High School credit*)

Semester

Prerequisite: Art 8

Fundamentals of Art and Design (Design) is intended to provide a foundation for advanced courses and satisfies the .5 Visual Performing Applied Arts credit required for graduation. It is designed to provide a beginning experience in the visual arts, primarily, but not exclusively, two-dimensional. This course will explore a variety of mediums including graphite, charcoal, pen/ink, pastel, tempera, watercolor, acrylic, and clay. Students will also explore a variety of artists, art processes and materials such as drawing, painting, printmaking, 2D and 3D design. Emphasis is placed on understanding the Elements of Art and Principles of Design as a basis for composition, utilizing essential vocabulary and exploring art history from various perspectives. Current trends including art in science and technology along with art in the potential "job market" will be examined. Students will learn how to exhibit, present, and publish quality works of art. Willingness to get involved in the creative process is a more important requirement than the student's talent or previous experience. A lab fee is required.

**Middle school courses that address the MDE High School Merit Curricular requirements will count towards high school graduation and credits. However, middle school grades will not be included in the high school GPA for any purpose.*

Introduction to Multimedia 8

Semester

Prerequisite: None

Introduction to Multimedia 8 explores a wide variety of current digital design practices to convey ideas and information visually, graphically, and auditorily. Units in this course will explore the skills needed to produce websites, podcasts, digital videos, video games, graphic designs, and virtual reality spaces. In completing these units, students will continue to learn the importance of building a positive digital footprint while engaging in the design process using a variety of platforms, tools, and formats.

Jazz Band 8

Semester

Prerequisite: None

This class is for any 8th grader who is currently registered in a regular band class. Students may play secondary instruments, if they choose to and students can play drum set, bass guitar, guitar, and piano, as well. This class performs in a variety of performances each spring.

LACES 8 (Learning and Caring for Every Student)

Semester

Prerequisite: Course Application

This class provides an opportunity for Peer to Peer support. Students who are selected as LACES receive specialized training and are paired with a special needs student to assist them in their social and academic development.

Math 8 Foundations

Semester

Prerequisite: Staff Recommendation

The Math 8 Support course is designed to help students, who are performing significantly below grade level, recover math skills and conceptual understanding as well as support their learning of Math 8 content.

Grade 8 - Elective Courses

Physical Education 8 - Personal Conditioning

Semester

Prerequisite: None

In this semester long course students will be introduced to various fitness concepts such as: assessment, cardio-respiratory and muscular strength training. The students establish goals and keep fitness logs to emphasize consistent and effective fitness planning. Goal setting, training techniques, personal fitness programs, and individual levels of performance are emphasized. Students develop an understanding of cardio-respiratory fitness, muscular strength training and explore potential risks associated with these activities. After they assess their own initial fitness levels, they develop a plan for self-improvement and understand the benefits to lifelong health and fitness.

Physical Education 8 – Team Sports

Semester

Prerequisite: None

This P.E. course is designed for the student who enjoys participating in sports in a team atmosphere. The course includes basic physical education concepts as well as those lifetime activities that the student is likely to participate in (i.e.: basketball, volleyball, team handball, footbasket, soccer, flag football, softball, rackets).

Skills for Success 8 (SFS)

Semester or Year

Prerequisite: Staff Recommendation

Skills for Success is designed to help students with organizing, planning, prioritizing and self-monitoring with an overall goal of supporting students in their academic classes. This course will provide a smaller class setting so that students are better able to receive individualized help as well as additional time to work on assignments from other classes. Strengthening skills in setting short and long-term goals, planning for projects, reviewing for assessments and progress monitoring are examples of the focus for this course.

Spanish 1 (*High School Credit)

Year

Prerequisite: GPA and Availability

The Spanish 1 high school curriculum introduces students to the Spanish language and culture. Emphasis is placed on developing meaningful authentic communication in Spanish in a variety of contexts. To develop language proficiency students communicate verbally and in writing through familiar topics focusing on themselves and the world in which they live which includes family, school and community. By engaging in meaningful communication students become familiar with Spanish life and culture and gain a better understanding of their role as a citizen in a global society. Students broaden their cultural knowledge by exploring the regions of the world where Spanish is spoken. Through new information and insights into cultures, customs and traditions of the Spanish-speaking world, students begin to demonstrate respect for other cultures and begin to recognize differences and similarities between their own culture and other cultures. Throughout the year, students continue learning how to communicate effectively in Spanish and demonstrate awareness of Spanish language and culture.

**Middle school courses that address the MDE High School Merit Curricular requirements will count towards high school graduation and credits. However, middle school grades will not be included in the high school GPA for any purpose.*

Student Leadership 8

Semester

Prerequisite: None

Learn valuable character qualities and rewarding skills to be successful in your life! Using those skills, students will participate in planning and implementation of school-wide activities. Leadership skills being developed will be used to enhance the school community.

Grade 8 - Elective Courses

Theatre Arts 8

Prerequisite: None

Semester

Students in this eighth grade course are enhancing their theatrical stage and technical skills. Through multiple performances, the students will demonstrate their skills and growth. They will produce written, verbal and visual responses to dramatic material while analyzing character motives/emotions and making clear artistic choices.

Video Productions 8

Prerequisite: None

Semester

This class will consist of working with several different medias. Students will produce a video production of the school announcements every day. The show consists of writing/scripting, directing, producing graphics, teleprompting, camera operation, lighting, sounds, and acting. Students will also cover post production; digitizing, linear vs. non-linear editing and publishing. Along with the production and postproduction of the show, students will be working with multiple software applications to help prepare the daily show.

Special Education

In order to receive special education services at Huron Valley Schools, students must meet strict State of Michigan guidelines and must be certified in at least one of the following areas:

- Speech or Language Impairment
- Specific Learning Disability
- Emotional Impairment
- Physical Impairment
- Hearing Impairment
- Visual Impairment
- Autism Spectrum Disorder
- Traumatic Brain Injury
- Other Health Impairment
- Cognitive Impairment
- Severe Multiple Impairments
- Other specific disabilities outlined in the state guidelines

Huron Valley Schools' Student Support Services department includes a variety of programs designed to meet the unique needs of students. The department staff includes a teacher consultant, resource room teachers, work study coordinator, psychologists, social worker, speech and language pathologist, and other ancillary staff. Our staff works together to provide a variety of supports and services. We offer a full continuum of support to assist each student in working toward meeting his/her goals and objectives. Status updates on goals and objectives are provided throughout the year.

Specific classes taught within the Special Services Department vary from year to year depending upon the needs of our students. Most of these classes parallel the academic curriculum offered in general education and follow the Michigan Merit Curriculum. In some cases, a student's specialized program will lead to a Certificate of Completion. The needs of students are met through the use of specialized instruction, accommodations, ancillary services and transition support. Support is determined through the IEP process.
