

Explore Aerospace & Manufacturing Careers with UAMP

Utah's Aerospace and Manufacturing Pathway (UAMP) Program gives high school students the chance to explore exciting career options in Utah's fast-growing aerospace and manufacturing industries. These fields offer competitive pay, stable jobs, and plenty of opportunities for the future.

From engineering and fabrication to operations and logistics, there's a role for many interests and skills. Through UAMP, students connect with industry professionals and apply classroom learning in the real world, getting a closer look at the many careers that drive these industries.

By joining UAMP and completing Career & Technical Education (CTE) programs available in the Davis School District, you'll start building the skills and experience that lead to a lifelong, rewarding career.

Requirements for this Pathway:

1. Explore UAMP Operations or Business Specialties and choose the jobs that interest you most.
2. Fill out and submit the UAMP interest form to your high school's CTE Coordinator.
3. Sign up for CTE courses that match your chosen UAMP specialty.
4. Complete all UAMP requirements to earn official UAMP recognition.

Operation Specialties*
