

Talented Arts Program

Does your child . . .

- hum or sing a lot?
- drum out rhythms?
- play make-believe?
- do funny voices?
- paint or draw with lots of detail?

Acting promotes communication skills!

THEN THEY MAY BE PERFECT FOR THE TALENTED ARTS PROGRAM

Email your school counselor if you believe your child has obvious talent in visual arts, performing arts, or both! Students are initially screened by their teacher using the appropriate screening instrument. If they pass the screening criteria, then the student will be referred for a talent evaluation conducted by two state-trained evaluators to determine whether the student meets the criteria for the classification of talented in music, theater, or visual arts.

Playing music uses the entire brain!

All art forms promote healthy neural circuits!
