April 21, 2026

Dear GRPS Patrons:

The final quarter is already half complete, and I would like to thank all of you for your support of Gordon-Rushville Public Schools this school year. We still have many culminating activities coming up prior to the end of the school year, so remember to check our website, mobile app, social media, and school mailings for dates and times for the various activities at each school building.

As mentioned in previous letters, the district has been engaging in a formal process to evaluate facilities and plan for potential facility improvements. So far this school year, the district has held multiple board work sessions/community meetings regarding facilities. Information regarding previous meetings can be found on our website at the following link https://www.grmustangs.org/article/2669138. Gordon-Rushville Public Schools will host an additional Community Facility Meeting Board Work Session on April 27, 2026, at 5:30 PM at the high school gymnasium in Gordon. At this time, the board of education has worked to narrow down potential options and would like to provide information regarding the remaining options and receive additional community input. We encourage all available patrons to attend the meeting at the high school on April 27. Please remember that this is an ongoing process, and feedback from each community meeting helps inform next steps regarding potential facility improvements. Also, please remember that the options presented are initial frameworks for improvement, so any input regarding these frameworks is beneficial.

As always, we appreciate the parent and community support for our schools, and our dedicated teachers and staff will continue to work hard to help each student work toward success during the final weeks of school. Please reach out to us if you need anything!

Sincerely,

Nathan Livingston, Superintendent
