Los Banos Unified School District

List of Proposed Major Projects by School Site

Measure C — Proposed Major Facilities Projects by School Site

Measure C identifies a range of proposed capital improvements across Los Banos Unified School District campuses. Projects are focused on maintaining and modernizing existing facilities, replacing aging portable classrooms with permanent instructional space, improving classroom and instructional environments, addressing infrastructure and accessibility needs, and upgrading student-support facilities.

The proposed projects vary by campus based on the age, condition, and identified needs of each school site.

Charleston Elementary School — Established 1953

Proposed improvements include:

- **Modernization of existing facilities:** Modernize permanent building interiors and upgrade electrical systems, roofs, windows, flooring, and interior and exterior finishes as needed.
- **Replacement of aging portable classrooms:** Replace aging portable classrooms with modern, permanent classroom facilities to address current instructional space requirements.
- **Updated instructional environments:** Provide permanent classroom spaces designed to support current academic programs, instructional practices, and educational technology.

Grasslands Elementary School — Established 2018

Proposed improvements include:

- **Classroom modernization:** Upgrade classroom environments to support current academic and instructional standards, including the integration of modern educational technology.
- **Accessibility improvements:** Improve campus facilities and learning environments to provide appropriate access for students with disabilities.
- **Contemporary learning spaces:** Enhance classroom functionality to support current instructional programs and the evolving needs of students and teachers.

Henry Miller Elementary School — Established 1953

Proposed improvements include:

- **New instructional and support facilities:** Construct modern classrooms and support spaces, including a new library/media center, to expand instructional resources and student learning opportunities.
- **Permanent classroom capacity:** Provide modern, permanent classrooms designed to support current academic and instructional requirements.
- **Physical education and outdoor facilities:** Upgrade physical education facilities, sports fields, and playgrounds to support student health, physical activity, wellness, and safe use of outdoor spaces.

Lorena Falasco Elementary School — Established 2005

Proposed improvements include:

- **Classroom and facility upgrades:** Upgrade classrooms and support facilities to accommodate current instructional programs, educational technology, and high-quality learning environments.
- **Interior and finish improvements:** Replace classroom carpeting and tackboards, resurface classroom floors, and repaint building interiors and exteriors where needed.
- **Student restroom improvements:** Provide additional student restroom capacity to support campus needs.

Los Banos Elementary School — Established 1936

Dual Language Immersion Program

Proposed improvements include:

- **Permanent classroom replacement:** Replace aging portable classrooms with modern, permanent classrooms to address current instructional space requirements.
- **Critical infrastructure renewal:** Repair or replace aging or deteriorating roofs, plumbing, gas and sewer lines, and electrical systems as needed.

- **Instructional facility modernization:** Upgrade classrooms and related facilities to support high-quality instruction, current educational technology, and contemporary learning requirements.

Mercey Springs Elementary School — Established 2013

Proposed improvements include:

- **Accessibility and outdoor facilities:** Improve accessibility for students with disabilities and upgrade sports fields and playgrounds to support student health, wellness, and inclusive use of campus facilities.
- **Classroom modernization:** Upgrade classroom facilities to support current instructional programs, educational technology, and contemporary learning environments.
-

Miano Elementary School — Established 1964

Proposed improvements include:

- **Permanent classroom replacement:** Replace aging portable classrooms with modern, permanent classroom buildings.
- **Kindergarten and student activity facilities:** Provide improved kindergarten classrooms and upgrade physical education facilities, sports fields, and playgrounds to better support student learning, physical activity, and wellness.
- **Building modernization:** Modernize permanent building interiors and upgrade electrical systems, roofs, windows, flooring, and finishes as needed.
- **Instructional technology and learning environments:** Upgrade classrooms and support facilities to accommodate current instructional programs and modern educational technology.

Volta Elementary School — Established 1959

Proposed improvements include:

- **Campus modernization:** Modernize permanent classrooms and support facilities, including electrical systems, roofs, windows, flooring, and interior and exterior finishes where needed.
- **Updated instructional spaces:** Upgrade classrooms and related facilities to support current instructional programs and educational technology.
- **Student dining facilities:** Improve student lunch areas and related facilities to better accommodate campus needs.
- **Permanent classroom replacement:** Replace aging portable classrooms with modern, permanent classroom buildings.

Westside Elementary School — Established 1937

Proposed improvements include:

- **Building and infrastructure modernization:** Modernize permanent classrooms and support facilities, including electrical systems, roofs, windows, flooring, and interior and exterior finishes.
- **Instructional facility upgrades:** Upgrade classrooms and support facilities as needed to support current instructional programs and modern educational technology.
- **Physical education and outdoor facilities:** Improve physical education facilities and sports fields to support student health, wellness, and student activities.
- **Student dining improvements:** Improve student lunch areas and related facilities.
- **Permanent classroom replacement:** Replace aging portable classrooms with modern, permanent classroom buildings.

Creekside Junior High School — Established 2014

Proposed improvements include:

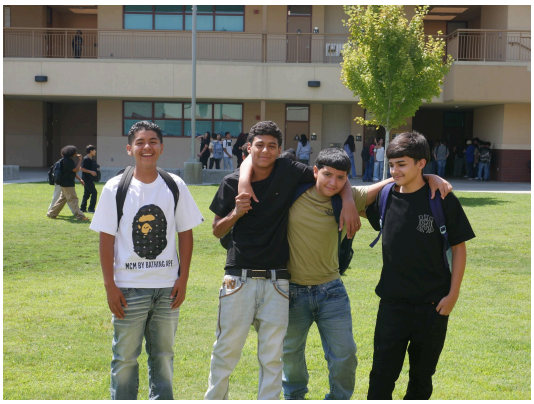

- **Classroom and laboratory modernization:** Upgrade classrooms, laboratories, and support facilities as needed to support contemporary instruction and educational technology.
- **Physical education and outdoor facilities:** Improve physical education facilities and sports fields to support student health, wellness, and athletic activities.
- **Career technical education:** Provide modern career technical education facilities and equipment supporting instruction in mathematics, science, engineering, and technology.

Los Banos Junior High School — Established 1999

Proposed improvements include:

- **Classroom and laboratory upgrades:** Modernize classrooms, laboratories, and support facilities to support current instructional programs and educational technology.
- **Infrastructure and safety improvements:** Repair or replace deteriorating roofs, plumbing, gas and sewer lines, and electrical systems as needed to address current health and safety requirements.
- **Accessibility improvements:** Improve campus accessibility for students with disabilities.
- **Career technical education:** Provide modern career technical education facilities, equipment, and instructional spaces supporting mathematics, science, engineering, and technology programs.
- **Permanent classroom replacement:** Replace aging portable classrooms with modern, permanent classroom buildings.

Los Banos High School — Established 1966

Proposed improvements include:

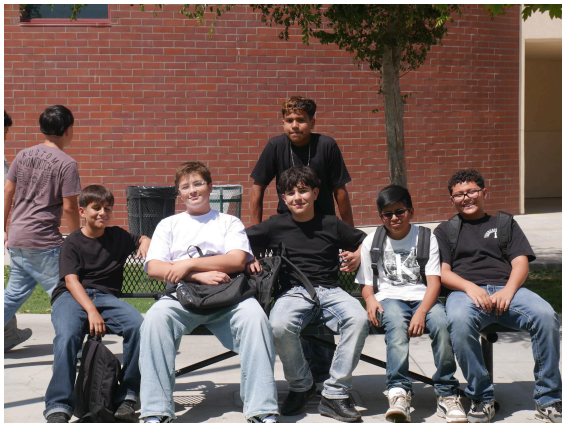

- **Career technical education facilities:** Provide modern career technical education classrooms, facilities, and equipment supporting instruction in mathematics, science, engineering, and technology.
- **Permanent classroom replacement:** Replace aging portable classrooms with modern, permanent classroom buildings.
- **Classroom, laboratory, and technology upgrades:** Upgrade classrooms, laboratories, and instructional technology to support current high-quality instructional programs.
- **Physical education and outdoor facilities:** Improve physical education facilities and sports fields to support student health, wellness, and athletic activities.
- **Campus security and student facilities:** Improve campus security features and renovate restroom facilities.

Pacheco High School — Established 2010

Proposed improvements include:

- **Classroom and laboratory modernization:** Upgrade classrooms, laboratories, and support facilities to support current instructional programs and educational technology.
- **Career technical education:** Upgrade career technical education facilities, equipment, and classrooms supporting instruction in mathematics, science, and engineering.
- **Sports and activity facilities:** Upgrade sports facilities to support student athletics, physical activity, and wellness programs.

San Luis High School — Established 1968-69

Proposed improvements include:

- **Facility reconstruction:** Rebuild classroom and support facilities as needed to address current health, building safety, and educational requirements.
- **Modern instructional environments:** Provide updated classroom and support spaces designed to meet contemporary educational and facility standards.
