LEAP Registration Open for 2026-2027

6/11/2026

Dear Parents and Guardians,

Registration is now open for LEAP Before School & After School Programs. Please review the following reminders and important updates regarding LEAP enrollment.

- LEAP is intended to support classroom learning through homework assistance, tutoring, academic interventions, and enrichment activities aligned with the instructional day. Priority enrollment is for unduplicated students and students with identified academic support needs

- Participation in a previous or current school year does not guarantee enrollment for the upcoming year. Families are encouraged to make appropriate childcare arrangements and not rely solely on LEAP acceptance.

- All LEAP enrollment applications must be submitted electronically through the 6Crickets online registration platform. Parents must complete the online application each school year, applications do not "roll over". 6Crickets registration links will be sent through Parent Square and will be available on the district website: https://www.losbanosusd.org/page/leap-elementary-and-middles-school-programs. Completing online registration does not guarantee enrollment. LEAP Site Leaders will begin notifying families of enrollment status in August.

- Registration for **incoming Transitional Kindergarten** (TK) students and **students new** to Los Banos Unified School District requires an update to the district's Aeries Student Information System, which is scheduled for completion in July 2026. As a result, LEAP electronic registration through 6Crickets for TK students and newly enrolled students will become available beginning July 7, 2026. To ensure equitable access to the program, registration dates for incoming TK and new students will be adjusted to account for the delayed system access and will receive the same enrollment consideration as applications submitted during the initial registration period.

For more information, please email the Expanded Learning office at leapoffice@losbanosusd.net.

Thank you,

Expanded Learning – LEAP Office
