BFA FAIRFAX BUILDING PROJECT UPDATE

DECEMBER 24, 2025

Greetings!

It has been a while since we shared a construction update. Largely, this has been because the vast majority of the project was complete and ready for students to occupy when school began. DEW has been working steadily under the guidance of our architects, Black River Design, our clerk of the works, Mike Bruso, and our school administration to finish the job. Since school has been in session, the work is completed outside of school hours and during days when school is out of session, including the upcoming holiday break.

The Fairfax School Board is pleased to announce a Community Open House on Thursday, January 15th, from 6:00-7:30 PM. A ribbon cutting and opening remarks will be made at the MS/HS entrance (probably inside since it will be January) followed by full access to the building with guides and staff in key places to direct you and answer questions. Although many people have been in the building for conferences, the play and basketball games already, this will be your chance to see inside classrooms and other spaces not ordinarily open during these times. This includes the cafeteria, science labs, music rooms, gymnasium, and the new elevators and classrooms!

We will provide more details and reminders after the new year, but please mark your calendar for the BFA Community Open House: January 15th from 6:00 to 7:30 PM.
