HT-801	Grandstream SIP to FXS adapter-1 port The HT801 delivers powerful VoIP technology and routing capabilities to home and office environments, and allows users to successfully connect their analog devices to a manageable and powerful VoIP network. Built upon Grandstream's market-leading SIP ATA/gateway technology, with millions of units successfully deployed worldwide, this powerful ATA features exceptional voice quality in various applications and environments. The HT801 comes with 1 easy-to-use FXS ports, state-of-the-art encryption with a unique security certificate per unit, automated provisioning for volume deployment and device management and outstanding network performance.	\$55.00	2	\$110.00
Subtotal:				\$565.00

Services		Price	Qty	Ext. Price
LAB- Flat Rate Labor	Labor - Project Flat Rate Labor Initial setup of virtual PBX per user. Setup of users including visit to customer site to plug in & register phones, provide basic user & admin training, test each phone, test auto attendants, go over recording of auto attendant greetings with system manager, go over access to customers portal. This fee does not include installing, relocating, programming, or working on any customer owned network devices including switches, routers, firewalls, servers, patch panels or outlets. It is assumed that we are plugging your SIP devices into a fully functional computer network. It is the customers responsibility to pay for any assistance we may require by your IT support vendor due to unforeseen issues which may occur on the computer network. Return visits to a customers site may incur additional charges if due to circumstances outside of our control.	\$0.00	1	\$0.00
