November 5th, 2026

Wildcat Family,

As the weather begins to change, I wanted to resend our annual information regarding school closures due to inclement weather. Our plan is to use our AMI days first, just as we did last year. We have five AMI days available before any make-up days would be required. In addition, we have the option of using three built-in snow days. If we experience winter weather at the start of the second semester—as we did last year—we may use these built-in days. Please pay close attention to alerts regarding how any missed day will be made up.

We also have the option of using snow routes when needed. Snow-route bus stop information can be found on our website using the following link:
https://aptg.co/64rDtl

When considering school cancellations, the safety of all students is always our top priority. District personnel will check bus routes, monitor local conditions, and review weather forecasts for the entire day. Administrators collaborate with one another and with surrounding districts to gather additional information before a final decision is made.

Notification: In the event of a school cancellation, notice will be provided as soon as a decision is reached. The most reliable sources of information will be our school alert system, the Warsaw R-IX App, the district Facebook and/or Twitter pages, and the district website. If you are not receiving alerts, please contact your student's school office. We will also notify local television stations (KY3 and KOLR10).

Please understand that any decision to cancel school is made with the safety of our students and families as the highest priority.

Sincerely,

Scott Gemes

Scott Gemes, Superintendent
