

EMERGENCY CLOSINGS

The decision to close schools or delay the opening of schools due to severe weather or other emergency conditions rests with the Superintendent of Schools. The Superintendent will consider student safety, road conditions, availability of transportation, and forecasted weather in making such decisions.

The Superintendent is charged with developing a coordinated plan of action for alerting parents, students, and staff members of closings or delayed openings. The essentials of the plan will be publicized through various publications, including the school calendar and the district newsletter. The plan will include specifics including the local radio and television programs to be used and an explanation of the district's telephone hotline which will be employed to keep the community informed as to the most current information.

Revised 11/96 - Adopted 1/30/97
