

The Colville School District is an essential part of Colville and the surrounding area. Without state funding for building construction and renovation it is still necessary to ensure that the Colville School District buildings are safe and secure for the students of Colville. All the buildings in Colville School District were built before school safety and security concerns were considered for building standards. Aster School was built in 1940, Hofstetter School was built in 1951, Colville Junior High was built in 1972, Fort Colville was built in 1982 and our newest building, the High School was built in 1993.

Your yes vote in this election will allow for safety and security upgrades to occur in the entrances vestibules of each school, improved communication systems, upgrading playgrounds, heating, ventilation, and air conditioning systems and modernizing technology.

Please support the Safety and Security of the students at Colville Schools by voting yes on Proposition 1.
