SPRINGDALE™
WE'RE MAKING IT HAPPEN

- Footing
- Temporary Electric
- Plumbing Rough-In Under Slab (electrical and heat duct under slab if applicable)
- Slab (before pouring; if finished floor elevation required must have prior to this inspection, termite slip and insulation also required)
- Crawl Space (before floor sheathing is installed)
- Plumbing Yard Lines (water, sewer, gas; before covering)
- Electrical Yard Lines (before covering)
- All Rough-In (electrical – heat and air ducts – plumbing top out – framing)
- Insulation (before installing sheet rock – at framing if fiberglass batts are used – at final for blown attic insulation)
- Gas Pressure Test
- Temporary Heat (gas pressure test, thermostat, filter on return air, gas connected—flex, power to unit, if vent "T" foil tape to H/V) Note: May void manufactures warrantee.
- Approach and Sidewalk (before pouring)
- Final (ready to occupy, yard must be rough graded, trash free - perm electric at final)

Note: Prior to calling for any inspections Building permit must be posted and trash containment available on site.
