# Teacher Student Success Act 2026 - 2027

Goals, Plan, Budget

At East Elementary School (EES) we are working to ensure high levels of growth in all areas of a student's education.

One goal for the 2025-2026 school year at EES is to continue to have students use Mustang Meadows (our wellness room) and Cozy Corner areas in classrooms to learn how to manage their own emotions and behaviors. We have added a movement center in Mustang Meadows as well. This will give all of our students the opportunity to take a few minutes to disconnect from the stressful situation they are in, relax, recover or move, and continue their learning in a better frame of mind. This is measured by the number of repeat students using the wellness room. We look for patters and address them with our school counselor, wellness room aide and student success coach.

Title I aides and our intervention aides are an important part of helping fill the leaning gaps of our students. To help our interventions run more effectively I will provide a $2,000 stipend to our Title I supervisor for organizing and running Title I and managing our intervention aides and the aide schedule.

Students need unstructured recess time to more fully develop their creativity which helps their cognitive development. We will hire recess aides to monitor students during their recess time. When the recess aides are not helping at recess they will be providing interventions in our classrooms.

To keep our students healthy and in school we will hire a health aide which will allow students to be treated and remain at school which will help our students stay in the class and continue to learn. If a student is sick or seriously injured then the health aide can convey proper information to the parents of the child. This person will also maintain our immunization, health related data entry, records and work with the district registered nurse for any training that is needed.

Any carry over money will be used to hire additional intervention aides, add more time to our recess aides, health aide, as well as purchase wellness room and cozy corner supplies, and/or help purchase new laptops/iPads for students to use in class.

Our plan to reach these goals for our students include the following strategies:

1. Wellness room consumables/replacements as well as cozy corner consumables/replacements. $500
2. Wellness room aide to supervise the room - $20,000
4. Recess Aides - $26,000
5. Title I Supervisor - $2,000
6. Health Aide – $12,000

All monies for the 2024 – 2025 school year were spent as described.
