

#### **District Level DVA Rubric Item 8.04**

The measured component for DVA Rubric Item 8.04 reads, *“Each school district shall annually provide or make available to parents and district-determined age-appropriate students information on the programs developed by the TxSSC for legal consequences, and other unintended consequences, of sharing of visual material depicting a minor engaged in sexual content.”*

To demonstrate compliance with this rubric item, districts should post links to the Texas School Safety Center resources (see below links) on the district website for parents to review.

Formalized guidance must also be provided to age-appropriate students as determined by the district. This formalized guidance is developed by the district and must include information related to the legal consequences, and other unintended consequences, of sharing of visual material depicting a minor engaged in sexual content. This guidance is typically found in an appropriate section of the student code of conduct or student handbook.

A screen shot of the TxSSC resources link and documentation of the delivery of this information to age-appropriate students must be uploaded under DVA Required Documenta District-Level Rubric Item 8.04.
