Learning Dashboard – Access and Features

1. Using an internet browser (Safari, Chrome, etc.) sign in to the web version of the PowerSchool parent portal at https://powerschool.easdpa.org/public.
    a. For directions on how to add a quick link to the EASD PowerSchool parent portal website on your mobile device home screen click here.
2. Select Learning Dashboard from the left menu

3. You will see a list of options along the left side of the Learning Dashboard page. At the top are Attendance, Adaptations, Teacher Comments, and Work Habits. Clicking any of these buttons will give you details about each item from the school year, not just a specific marking period.

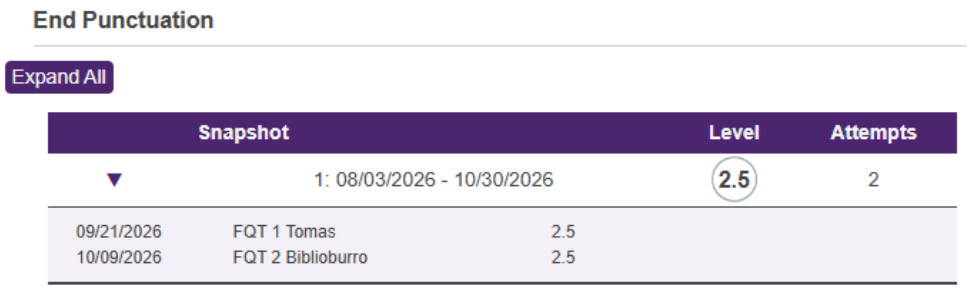

4. Below the Work Habits table is the Target Pacing Guide which shows progress summaries in each subject for your student. Click on the subject name in any progress summary to show a list of learning targets and your student's progress on each target in the main section of the dashboard.

5. The number on the right in dark purple shows how many learning targets your student is currently on pace to meet end of year grade level expectations. The number on the left in light purple shows how many learning targets your student is still working towards meeting grade level expectations. All data on the Learning Dashboard is updated live as teachers enter new assignments in their gradebook.

6. The main section of the Learning Dashboard shows a list of learning targets students have received feedback on this year for the selected subject. Click the number in the Level column for a specific learning target to show a list of assignments for that target. This will also update live as teachers continue to add assignments throughout the school year.

7. Students receive feedback on each learning target using the district Proficiency Scale expectations found at the bottom of the Learning Dashboard page.
