

AI Engagement Levels

Level	Role of AI	How AI is Used (Scenario)
1	No AI	The task is completed entirely without AI assistance. This level ensures you rely on your own knowledge, language, and skills.
2	Brainstormer	Use AI to prepare, plan, and organize. You can use AI to generate ideas, create structures, or brainstorm different perspectives.
3	Editor	Use AI to improve your original work. You can use AI to check the clarity, quality, or grammar of a draft you have already written.
4	Collaborator	The student and AI work together on specific tasks. AI completes certain elements of the assignment as directed by your teacher.
5	Creator	AI is a full thought partner for the assignment. Use AI to help solve complex problems, develop new insights, or co-design a creative project
