SELF-AWARENESS & SELF-MANAGEMENT

Parent Resource

GRADES 9-12

What is self-awareness and self-management?
Self-awareness and self-management means to understand and govern our thoughts, actions and impact on others.

As your child gets older, he or she will continue to develop self-awareness and self-management skills by recognizing how one's thoughts and ideas influence choices and impact others.

In grades nine through twelve, children begin:

- Implementing strategies and monitoring progress in achieving personal goals.
- Demonstrating behavior that respects the needs of others.
- Creating a plan to obtain a personal goal that addresses strengths, needs and risks.

Skills to Consider Practicing with Your Child:

- Formulating an effective long-term plan to achieve a personal or future professional goal.
- Evaluating strategies that assist with managing challenges or setbacks.

Discuss an Example:
Discuss a time when you disagreed with someone and how you adjusted your behavior to understand the other person's point of view. For example, when you had a disagreement with a friend or coworker and he or she was not able to see your perspective, how did you approach the situation?

Work to Develop Goals:
Work with your child to develop short and long-term personal goals. The goals should be measurable and achievable. Later, have them reflect on the progress, his or her progress and how self-awareness and self-management helped them reach these goals.

By gaining self-awareness and learning self-management, your child will be able to:

- Set personal goals.
- Develop a plan to achieve those goals.
- Monitor progress and adjust as needed.
- Reflect on the experience and learn from it.
