Gathering Parent Feedback for the CTE CLNA

Best Practices:

- Should be distributed by districts in your consortium to **as many parents of high school and middle school students as possible.**
- **The CTE Lead and principal(s) should develop a plan for making the feedback opportunity available to as many parents as possible.**
- **Sample practices districts have utilized in the past:**
  - Posting the survey link on the district's social media accounts
  - Posting the survey link on the district's web page
  - Have the QR code available for parents to scan with their phones at parent teacher conferences.
  - Distributing the feedback link via school messenger apps such as Remind

✓ Feedback needs to be gathered electronically.

✓ Consider if translation of the feedback form is needed and if so, be sure to translate into the applicable languages similar to how the district translates other documents and information for parents and caregivers.

× Do NOT print the form and/or have parents complete via paper/pencil.
