The CHS 2026-2027 CHS registration information packet sent home, states to complete the data confirmation process on Aeries. Additionally this school year, the email Mr. Kevin Ward sent Monday August 3rd, indicates families giving their student health insurance information for a new program, CYBHI. The email indicates "more information will come soon." However, as of now, Aeries pre-registration requires you to fill this section out or your pre-registration is not complete. The CHS registration information packet states that "if the Aeries data confirmation has not been completed, families/students will be directed to complete this step before the registration process can continue." Also, that CUSD families will not be able to view their student's classroom assignment or schedule. Health insurance information should not be a requirement to complete registration of a student. While on the surface a good option to improve funding to the district, information on CYBHI needs to be shared as soon as possible to CUSD families.
