

Attending: Josh Peters – Chairman Pro Tem, Councilman Greg Eades, Safety Service Director Rex Castle, Street Superintendent Bill Long. London resident Michael Norman.

The meeting was called to order by Chairman Pro Tem Josh Peters at 6PM.

The minutes of the May meeting were submitted for review. Motion by Josh Peters to accept, 2nd by Greg Eades. Motion passed.

Street Department Report: Superintendent Bill Long submitted a 3 page report of activities performed by the Street Dept. (see attached report). Highlights of the report: All of the new lights are in. The traffic control cameras still need to be “fine tuned”. They will be working on this moving forward. Bill did advise that he has received calls about the length of the lights. He advised that current code allows for more time for pedestrians to cross the streets, so the lights are a little longer. There are 4 street employees to be trained on the lights and the cameras. The storm sewer camera is in, and they have started to use it. There is still training to be completed on the camera system. They did test 3 separate units, and the camera system came in under the \$120,000 budget, at just under \$94,000. There may still be a few items to purchase for the trailer, which was an old trailer that the Fire Department had and is being re purposed for the storm sewer camera equipment. The State Route 56/State Route 38 paving project has started. So far patching and repairs has taken place before the main paving project starts. Bill was asked if there is a completion date for the project, and he responded that ODOT has not given a firm date, but it should be in June. ODOT is aware of the strawberry festival. Bill also shared that ODOT has not moved on allowing truck traffic on Midway. Councilman Eades asked if the lines on Center by the Sunoco station can be moved back, to allow Semi’s to make the turn easier. Bill advised he will research this to see if it can be moved back. There was a storm sewer collapse on Puleo drive, as Columbia Gas bored thru storm sewer. He has also met with AT&T and Columbia Gas about their work in the area. The Street department currently has an opening for a Street Worker. The last worker they hired left by mutual agreement.

Safety Service Director Report: Rex castle advises that they have met with property owners on Mariemont & Graceland twice. The water that comes from behind the properties causes issues in the back yards and the septic systems of the residents. With the help of Madison County Engineer they have determined that the cost will be about \$178,000 to put in catch basins to remove the water, of which the property owners will be responsible for \$125,000. The owner of the land behind these houses, Paul Gross, will donate the land for an easement to allow for the catch basins. The water will then be directed to a larger pipe that goes under N Main Street and ties into a ditch on the west side of the road. It was determined that each property owner will have to pay \$6,250 which can be paid up front, or as part of a special assessment on their property taxes so the payments can be spread out over time. This should go to council for 3 readings, and also there should be a Public hearing. Rex also brought up an issue with trees that were placed by the City that are now causing trip hazards, in the newer residential areas. A discussion ensued about the City’s responsibilities for these issues and if the Tree Fund can be used to repair sidewalks if tree roots are the cause. SSD Castle feels that the ordinance will need to be changed to allow for this. There was also a discussion about the need to have sidewalks repaired throughout the City. No action was taken on this.

Recreations Department Report: SSD Castle advised that Landon McKenzie has been hired as the new Recreation Director. He had a prior commitment and could not make the meeting. Landon is pool certified, so the City has not contracted with Tammy Braskett which was previously discussed as a possibility. McKenzie did forward a report about the pool (see attached). The highlights are: The pool has been open for 3 days and there have been 482 paid admissions so far. The Splash pad is not open yet and is in need of repairs as it may not have been winterized properly by Patterson pools. The City has contacted Patterson and repairs will be completed soon.

The next meeting will take place on July 6 at 6PM.

The meeting was adjourned at 701PM, so the members could be shown the Storm Water camera system, which Bill brought to the meeting.

Respectfully submitted by Councilman Greg Eades

Public Service Committee Meeting

The London Municipal Pool opened for the 2022 season, this past Saturday, May 28th. Colder weather kept the public at home for the day, but few still stopped in to purchase pool passes for the upcoming season. Warmer weather the last few days has made the pool a popular spot for people to cool off. Some quick numbers from the past few days-

	Sunday May 29th	Monday May 30th	Tuesday May 31st
Daily Pool Passes Sold	115	197	170
Punch Cards Sold	5	6	4
Season Passes Sold	9	9	11
Nightly Deposit	+\$2100	+\$2600	+\$3000

- The underwater lights have been replaced. This allows for the pool to be rented out for after hour parties.
- Concrete work has been completed in an area that spans the length of the diving well and main pool, as well as the area in front of the concessions
- Swim lessons are being planned and details should be released by the beginning of next week
- Madison County Marlins had their first practice in the racing pool this past Thursday. They have 45 team members and will be hosting a swim meet on June 15th
