

4TH GRADE NEWS

May 2026

What We Are Learning:

Language Arts: The focus is on the SBAC with our being able to identify the purposes of writing, fact and opinion, powerful vocabulary...all of it, really! Go get 'em, Mustangs!

Math: We will be using our computational skills and analytical skills during SBAC testing. Watch us demonstrate all that we can do this month!

Science / Social Studies: After our field trip to the New England Air Museum, we continue to apply our science skills in studying animal adaptations as well as coupling the science with pourquoi folktales from cultures around the world.

TIPS FOR HOME:

- Practice math facts!
- iReady or IXL lessons are a great resource to use at home for additional practice.
- Read, read, read! Discuss what your child read. Ask questions while you are reading, talk about what you are visualizing while you read,, and make predictions about what will happen next!
