

To better secure our schools, and more importantly, keep our children and staff safe, Berkeley Heights Public Schools has incorporated the Raptor Visitor Management system in our daily safety protocols. This system operates with ID card readers, located in the main entrance. The system can “red flag” visitors who are not legally permitted on school grounds, generate a visitors’ log and create a visibly distinct visitor badge to identify individuals in the building. Each school will scan your license upon arrival, however, to expedite entry, you can set up a digital passport. Follow the directions below:

Locate the “Raptor Safe” App in the App store and download either the IOS or Android app (whichever phone you have).

Enter your mobile phone number. It will send you a verification code.

Enter the verification code that was sent to the mobile number.

- Scan your license or government ID.
- Take your selfie. It will ask you to move your face in several directions. This is done to ensure the picture from the ID matches your facial features.
- Enter the information to create your account.
- There is no invitation code. Tap the "Click here" link.
- It will create your Raptor Passport QR code.
- When you arrive at William Woodruff, there will be a tablet at the entrance. Select "Scan School ID or Digital Pass."
- Open your Raptor Safe app to the passport and scan the QR code using the front-facing camera. Your badge will print and will be given to you prior to entering the building. Please wear it for the duration of your stay.
