Little Silver Borough Public Schools' Time Capsules

In the year 2000, students of the Little Silver School District buried 25-year time capsules at Point Road and Markham Place Schools

When current district leadership was made aware of the existence of time capsules at both Point Road and Markham Place Schools, a months long adventure began.

The locations of both capsules were lost to time, construction projects, staff-turnover, and nature.

Extensive research and efforts ensued, including:

- Speaking to retired staff members
- Conversations with alumni and community members
- Reviewing photos
- Exploratory digging
- Using metal detectors and ground penetrating radar.

These efforts resulted in a lot of leads, a lot of hope, but months of no results.

Even discovering the marker, pictured to the left, took months. It was buried six inches below the surface of the courtyard at Point Road, and was located several feet away from where the Point Road Time Capsule was eventually discovered.

Unfortunately, the Markham Place Time Capsule could not be located and all efforts have been abandoned.

Additionally, while every effort was made in 2000 to preserve and protect the Point Road Time Capsule, it suffered through 25 years of weather, ground shifting, root growth, and water exposure. As you can see from the pictures to the left the crate the items were stored in was severely damaged.

While all the documents were placed inside multiple plastic bags, exposure to ground water and repeated freezing/thawing left them waterlogged, covered in mold and mildew, and fused together (think paper mache).

We placed what we hoped could be salvaged aside to dry. We thought perhaps we could peel some of the documents apart and preserve/share them through images. The mold and mildew was extensive so no documents could be kept to distribute or display.

We are sad that so much of the students' words, thoughts, ideas, and work were lost to time, but the following images are what could be shared.

Please share this slide deck with everyone you know in the hopes that some of the alumni can identify their work.

We hope this leads to some smiles and laughs for all who review these "thoughts locked in time."

HERE WE ARE IN THE
YEAR 2025

Mrs. Rostic's Class

When I grow up I want to be .....

Name	Occupation
Melissa B	a Broadway dancer
Shannon C	a pet doctor
Luke Fette	a construction worker
Charlotte I	a painter
Taylor Gil	a teacher
Roger Gra	a race car driver
Kailee Hea	a soccer player
William H	a police officer
Ryan Kirm	a baseball player
Katherine McGuire	a teacher
Philip Moran	a basketball player
Brendan Mulholland	a hockey player
Benjamin O'Connell	a vet
Patrick O'Connell	a vet
Michael Reardon	a basketball player
James Stevenson	a doctor
Amanda Sullivan	a doctor
Andrew Tierney	a baseball player
Daniel Vargas	a baseball player
Patrick Waite	a baseball player

GRADE 3

IN THE YEAR 2025, THE WORLD WILL BE...

1. Drug free because people will start getting smart and won't do drugs.

2. People will have flying cars and will live on mars.

3. In the year 2025 would be a better place because more people will be kind because they are trying to be nice.

4. In the year 2025, there would be a fishing pole that can tell you when a fish is on the hook or near by.

5. In the year 2025 the world will have flying cars that could go under water too

6. People will have computer that give food and drinks.

GRADE 3

IN THE YEAR 2025, THE WORLD WILL

1. I think the thrust of a car will be able to break the sound barrier.

2. I think that there will be micro chips that plug on to you and down load information.

3. I think some of us will be living on the moon. And we will have hover boards to move around.

4. I think people won't need a space suit in space.

5. I think they will make a vaccine so that you never get sick.

6. I think that scientist will find two new planets we can live on. Ivana Fillon

GRA

I think that we won't drive cars we will drive overcrafts.

21. There will be hovering cars. People will live in the ocean. It will be a great world.

22. People will live on the moon.

23. Animals might be able to fly.

24. I think that all people will have to leave Earth because the sun will grow too big and destroy Earth.

25.

GRADE 3

IN THE YEAR 2025, THE WORLD WILL BE...

1. Corinne Hallander In the year 2025, The world will have flying cars and robots I stores and houses.

2. Annie Holzeller In the year 2025 The world will have magical bunnys and magical piano.

3. Ellie Moss In the year 2025 the world will be so chinchilla is a pet.

4. Tyler Matthews In the year 2025 parks will be cleaned and there will be flying cars.

5. Kathryn Dean In the year 2025, There will be flying cars and people could go on vacation in outer space.

6. Lauren Weaver In the year 2025, this would will be a wonderful place.

GRADE 3

20. different. Nobody will cut down the rainforest because people will realize how valuable the rainforest is.

21. verry different. People will live on mars and the rain forest will not be cut down.

22. There would be something that you can talk to animals.

23. There will be no more rainforests so people will have to plant other plants.

24. There will be more cures for different diseases.

25. I think that there will be 3D tv. So that people can walk up to the people on tv.

GRADE 3

IN THE YEAR 2025, THE WORLD WILL BE...

1. just like 25 years back in time but people will be living in space. Rick

2. Uglier because of the pollution. Chris

3. a free place where people will be judged by the inside and not the outside. Amy

4. a cool place where spaceships will go to other planets, and buildings will be larger so people can have more jobs. Adriana

5. a place with talking cats, flying cars and books that read to you. Laura

6. full of Larger and better computers. Austin.

GRADE 3

20. a very nice place to live because people will have a cure for cancer and they'll be nicer too. Catherine

21. beautiful with sunny weather and pretty flowers all over. Taylor

22. all metal and if you press a button on your desk the object will appear.

23. really beautiful with flowers. Andrew

24. a place where everyone will have a computer. Ryan

25. exciting and new with hover-cars, high buildings, a world language, and new places. Jason

John Forrester
I think there will be bet
technology.

Nick Grady
I think we will have wierd suits

I think it will be easier
to live

Hannah Phillips In the year 2025 the
Earth will be 4025 years old.

Caleb Doherty
I think there would be
a new inventions.

Lindsay Warmbing
In the year 2025 I think there
would be more complicated inve
but it wouldn't be total

3/22/00 Chris LaMattina

One hundred years from now, there will be airboards which are boards that fly, flying boats that can go in the water and in the air. People will live on the moon and have hover cars and rockets bikes that go so fast.

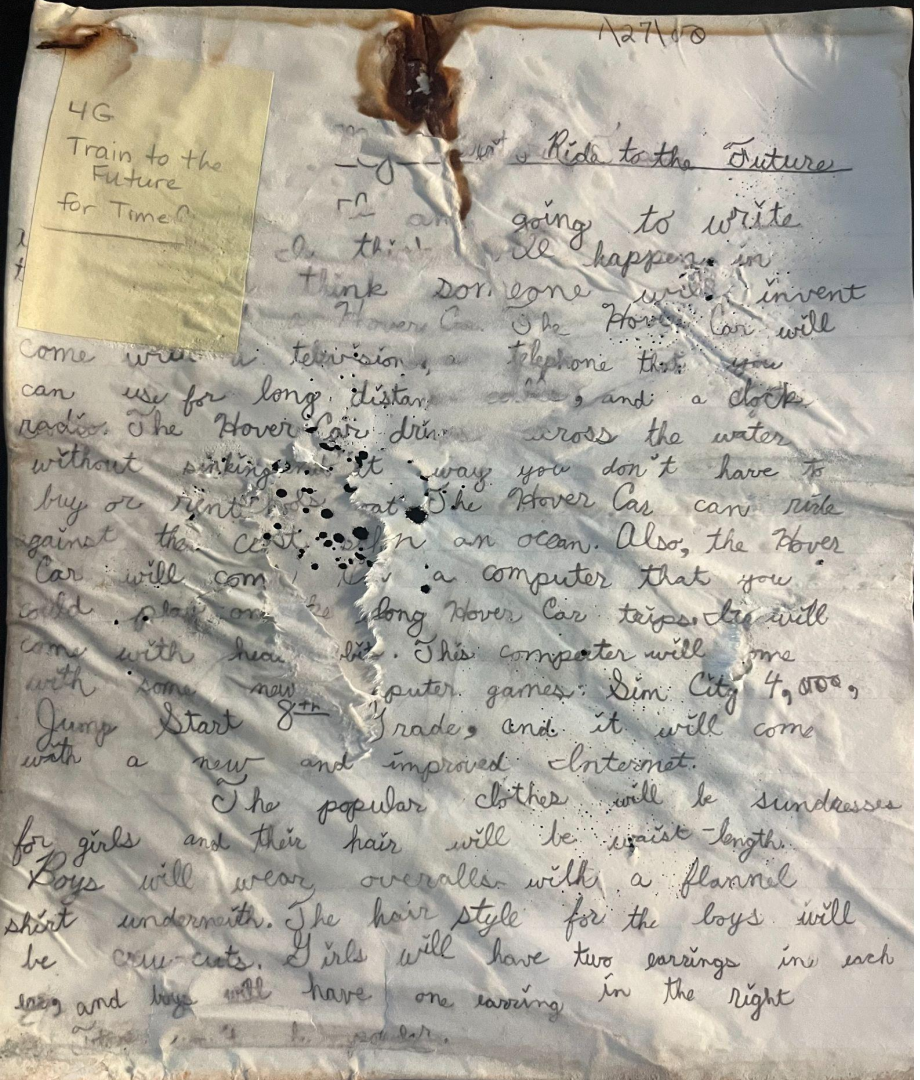

I think there will be a transportation machine that goes under water and moves along the ocean floor.This is how the machine will be made: it will have a one thousand horse power mega engine, 10 car wheels, 500 rockets, 8 bikes in it, 1 boat 800 gallons of gas!

I think there would be air boards that would fly everywere. Everything would be free and won't cost anything.There would be flying cars that fly everywhere. Kids could play with light sabers and fly with jet packs. Everybody will live in mansion with 20 dogs and cats. People will live on the moon. I wish food came in a pill and when you put water on it it will turn into a feast.

Danielle Leiner March 30, 2000

Louie Magnus April 4, 2000

One hundred years from there will be hover boats to fly to your house . I think there will be hover skis to fly over the snow . There will also be air boards to fly out side the house . There will be robot maids to cook and clean for you . There will be food in pill form and cloning so you could clone yourself. One of the most expensive machines is the flying washing machine. It cleans by itself and starts with a push of a knob. It will have wings, free soap, and a laundry basket and detergent.

Train to the Future
for Time

A Ride to the Future

going to write
happens in
invent
The Hover Car will
come with a television, a telephone that you
can use for long distance, and a clock
radio. The Hover Car can cross the water
without sinking. It way you don't have to
buy or rent a boat. The Hover Car can ride
against the current on an ocean. Also, the Hover
Car will come with a computer that you
could play on the long Hover Car trips. It will
come with headphones. This computer will come
with some new computer games: Sim City 4,000,
Jump Start 3rd Grade, and it will come
with a new and improved Internet.

The popular clothes will be sundresses
for girls and their hair will be waist-length.
Boys will wear overalls with a flannel
shirt underneath. The hair style for the boys will
be crew-cuts. Girls will have two earrings in each
ear, and boys will have one earring in the right

Jan. 28, 2000

The Train to the Future

One day me and my mom had to go to New York. We had to go to the train station and wait for the train number 41. In about five minutes the train will come. The train in front of us said the Train to the Future. I wanted to see if it really went to the future and I saw one of the doors open, so I sneaked in.

When I sat down the train went up in the air and went into a time warp and then I started to turn. Then the train went on a train track. When I got off the train everything around me looked different. The cars could fly and turn into spaceships. There were no roads but skyways. The motorcycles could fly and every where I looked there was a robot. So I decided to see what else there was. Where toy rides were supposed to be there were real rockets, cars and other different things. I finally went back on the train and then the same things happened. Then I was back at the train station then I got off the train and into the train with my mom. I would never forget the day I went in a train and into the future.

Hayley Newman

Train to the Future

By Sydney Fetten

The year is 2025 and in the past twenty five years a lot has changed. I, Sydney Fetten am 35 years old, that's one change. But other things have changed too. For one thing there are cars that fly. To come to think of it everything is automatic. Cars, trucks, boats, you name it! There are even robot servants. I can't believe how much has changed!

Also clothing has changed. People today wear jumbo jet flying suits. I wear a modern vet suit, but modern means I can fly in it. Clothes today are way different.

One more thing that has changed are animals. Scientists all over have been making mechnical fairy tale animals. Such as dragons, and other creatures.

New species of animals have been discovered. Like the Faragitia, a bird rarely seen and is as big as a house. I think the mechanical animals are really cool. I think the Faragitia is made up!

In 2025 things are a lot different from years ago. The people, the lifestyle, the animals and everything else. I think 2025 is great and so does everyone else!

Story

What I Think the Future will be Like

I can't wait until the future! In the future I think the best way of travel will be hover crafts. They will be able to go 1,000,000 miles per hour. That way you will be able to get to work in 2 seconds.

Doctors will be able to cryopreserve people so they can live as long as they want. If somebody wanted to see something 100 years from then they could.

In the future the clothes would be much different. You could just push a button and your clothes are on. There will be a deflating jacket and if your jacket is on to tight you can just deflate it.

Video games will have 1,000 bits and the graphics will be amazing. They will have much better games. The people on the games will look like people. The future is going to be great!

A Fun Future

January 2000

If it were to be the future there would be great inventions from me. This is what I think the future would be like.

My favorite invention would probably be a robot. I could do everything with it. It could pick up my clothes and it could do my homework! It could also clean my room, make my bed and give me any snack that I wanted. Another invention would be a tv that could be connected to a camera and you could make movies. It would also run by a two inch chip instead of a video or DVD.

This is what I think I'll make in the future. Now this is what I think will happen in the future.

All of the restaurants will have one half for kids and a half for adults. Also, school would be from home and be linked by computer. Also all of the

January 27, 2000

Hi! I am about to tell you my predictions for the future. You may think I'm crazy at the end but I'm not. I live in the 21st century.

First, I think that cars will fly and run by water. They will not polute as much. I also think that skateboards will hover above ground. They will have an adjustable control stick in the center. Finally, I think trains will be out lawed and hovering skateboards will be the main source of transportation.

I also predict that people will live to 200. I think this because with all the new medicen comeing out it will save people from dieing. Another prediction is that computers will be pobet size. I predict this because some all ready are. I also think that meals will be in pill form. I think this because people are getting lazyer and lazyer every day. I predict that phones will have T.V.'s built in so, you see who you are talking to.

See I'm not crazy!

By Tyler Gilmore

Alexis Ferreira

Jan. 27, 2000

What will it be like?

I think in the year 3000, 1000 years from now things will be totally different. There could be a car that flies. There could be new languages like Germanise. There could be new countries like Jamiloca. I bet things will be totally different!!

In the year 3000 there will be different races. There is a white, brown and a dark brown. But there might be black. The real color black! Not hopefully they won't be treated badly! In the year 3000 there might be a better kind of technology. There might be longer days and shorter nights. There might be a new season. I wonder if all this will happen???

In the year 3000 there might be information on other planets. There might be a way all the planets will come together and make one big country. Dinosaurs might come back to life. all the continents might come together and form one big country. I this will all happen but if it does it will be because of us.

It's my birthday. The good old February 24th. But somthings different. What is it? Hold I remember. It's the year 2025. Everything has changed. Cars are zooming past my window. Hovering 2 feet off the ground. A lot has changed since the year 2000! Well, time to get up and explore a new place. My favorite thing to do on my birthday is explore new things. First I get dressed and go outside. I take my car out to the desert. I get my pick, shovel, brushes and glasses. I like to find things nobody else has found. One time I found some fish bones another time I found a dinosaur tooth. One one time I uncovered a hole dinosaur skeleton. After this hard day exploring I hed for home. Had a great birthday. I'll let you know what happens next year.

Vicki Kelsey
January 27
2000

Dear Diary,

My name is Victoria Kelsey and hear are my thoughts for the future.

My first thought is that there will be new gadgets. One of them might be a techno-bot. I think a techno-bot will be a robot that serves your family and does whatever you say. Another gadget is an electronic-super-chess. Electronic-super-chess is a game where you play regular chess except the pieces move by themselves.

Another thought for the future is peace on earth. To stop wars, pollution, the killing of animals, and murderers. If these things were done, than I think our world would be better.

Some things might change like money or clothing. There might be new cars and vehicles. But I'll just have to wait and see.

#18

The Future

This is what I think the future will be like. I think that there will be flying cars that will run on Dr Pepper. It would be really fun. In the future I also think that there will be motor roller blades.

In the future there might even be new candy like ultimate jawbreakers, or liquid bubblegum. When the year 2,100 comes I think that you will be able to get your drivers license when you are 10. I wish that would come true now.

There are some more things I think will happen in the year 2,100. I think meals will come in a pill. I think all people will be treated fairly no matter if they are a black or white. That is what I think the future will be like.

By: Peter McCue

1-28-00

Train to the Future

The future will be much different. Many things will be invented. Things will be discovered. The future will be interesting.

Many inventions will be made. There will only be robot servents. They will be called Androids. Fly cars will be very popular. Outfits will give you anything your heart desires. Shoes that make you run faster than light speed will take you anywher you want to go. These are some thought that may become real.

Many things will be discovered. Medicines from the rain forest will help all sicknesses. Animals will be rescued. The Giant Pandas will come back very strong. This is what I think will happen in the future.

By
Matt Pelole

2100

In the year 2100 there are probably going to be alot of cool new things. There is probably going to be different things like cars, gliders, and spaceships. That is what I think are going to be really different in one hundred years.

I the year 2100 I think the vehicles are going to be better. I think there are going to be rocket powered gliders. I also think there are going to be hover crafts and flying cars. That is what I think the vehicles are going to be like.

I think that one hundred years from now the technology is going to be better. I think spaceships are going to be super fast. I also think the medicines are going to make you live longer and they are alot stronger. That is what I think the technology is going to be like.

That is what I think the future will be like.

The Future Train According to me

Hi, What do you think will happen in the future? Y3K flying cars. This is what I think will happen.

In the future, I think there will be flying water powered cars. Also the technology might allow us to go to Pluto and into other galaxy! Doctors could even find a cure for cancer. In Y3K there could be a three week [illegible]. On the phones maybe you could dial a name anywhere in the world. We might even live on other planets!

This is what I think will happen in the future. What do you think will happen?

By Alex Rousseau

A Creative Future

I think that in the future people will invent flying cars and discover new lifeforms. People may invent tools that can cryogenically freeze people. Mankind may discover new planets and inhabit them.

In the next 100 years people may invent stealth planes with all natural shields. Mankind may also invent [illegible] planes. In the next 200 years people may invent suits that make you [illegible]

The Train to the Future

When the future begins, I think there will be quite a few changes. In the new Millenium, I think that cars will fly. And if cars could fly, you would never run out of [illegible]

I also believe that my hamster, Scabby, will be able to communicate with me. If that happens, it will be a miracle. Just imagine, communicating with your very own pet!

In the future, I would like to move into Sailor Jupiter. She is a cartoon character. If I morph, I will be sooo happy!

Well, I guess you have heard enough. Maybe you could make a few predictions of your own some day....

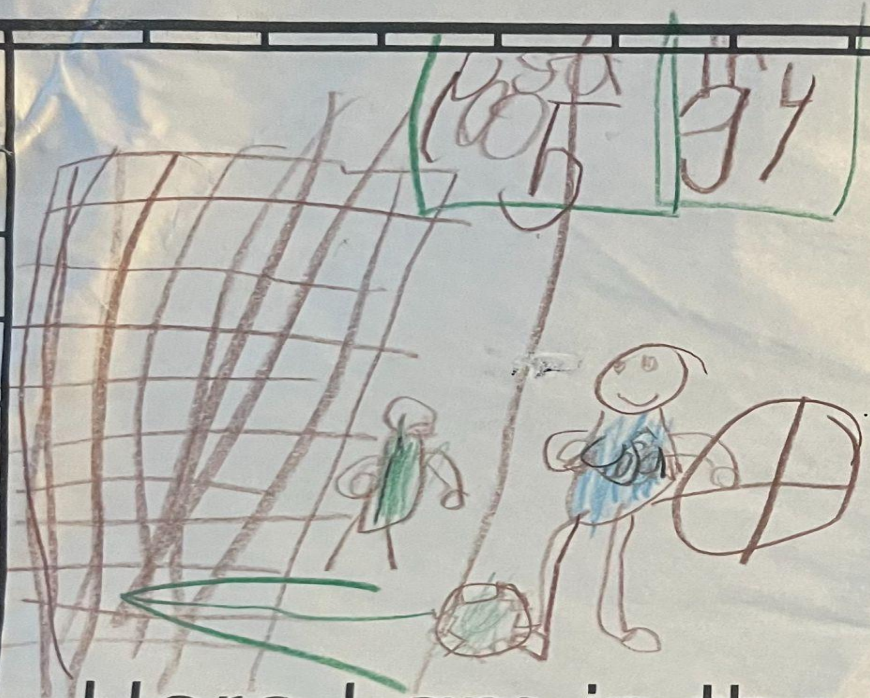

Time Capsill 2000

By
Gary Costello

I think the future will be different from now. I not scard of the future. I like the future. I just hope the world will not blow up. The future will have flying cars with candy machines with any kinds of candy. The cars that come out will only be made by our dellers like the Lexus, Corvette, Jaguar, and Mercedes. People are scard of the future but nothing will happen. You will not be a problem for us and do not be afraid of it because it is just a computer bug. You, Sulk will have your family, School should only be 4 hours so kids could have more time for family's.

The Rain Forest will stay where it is and nothing will happen to it.
