## Academies of Loudoun Student Parking

A limited number of parking spots (300 each day) are available for students. Permits are issued via a lottery system. Parking permits at the Academies are separate from parking permits at home schools. If students intend to drive to both locations, they must apply at both schools separately. **All students should make arrangements for bus transportation (can be canceled if/when a student wins the lottery).**

- Parking permit applications should be completed by students (not parents). It is important that students who drive are aware of the process and procedures.
- Applications for permits must be accurate and complete when submitted. Failure to provide accurate information will prevent applications from being processed.
- Communication regarding parking permits will be made via the email address entered on the application. Please ensure the email address provided is accurate and monitored.
- Parking permits are assigned specifically for either A or B days. Failure to provide the correct ACL day on the application will prevent processing (see below).
- **The window for entering the parking permit lottery will close on August 28.**
- Pending availability, applications received after August 28 will be processed on a first come first served basis.
- There is no fee for parking at the Academies
