Dr. Miguel A. Cardona  
Secretary of Education  
United States Department of Education  
400 Maryland Avenue, SW  
Washington, DC 20202

Dear Secretary Cardona:

Throughout the COVID-19 pandemic, Florida has continually been the leader among states in returning students to in-person instruction, providing academic support to mitigate learning loss, closing achievement gaps, and promoting the health and well-being of our students and educators. Florida's experience in leading the nation in this regard since Fall 2020, coupled with state and district investments from CARES and CRRSA, resulted in unprecedented empowerment for our families to make educational choices based on their child's needs. Florida's commitment to supporting parents with educational options will undoubtedly reap benefits for the young scholars in the state for many years to come. Florida is proud that these federal dollars have been used strategically and our state currently boasts a 6<sup>th</sup> place ranking in its current expenditures of the Elementary and Secondary School Emergency Relief Fund allocation.

As Florida has been the national leader in offering in-person instruction for five days per week, we were able to assess 94% of our students in-person for statewide, standardized assessments in Spring 2021. The results of these assessments (received in Summer 2020), along with collecting and analyzing stakeholder feedback, were used methodically to inform the proposed initiatives. Stakeholder organizations included the State Board of Education as well as Florida educator, policy maker and parent groups. The following themes were confirmed with overwhelming support:

- Closing Achievement Gaps;
- Drastically Increasing Reading and Math Outcomes;
- Drastically Increasing Outcomes Across Other Content Areas; and
- Enhancing Student Services and Supports.

Please find enclosed Florida's State Plan for the American Rescue Plan Elementary and Secondary School Emergency Relief Fund. This plan will continue to build on the excellence and high expectations Florida has established for schools to continue to serve our students and families across the state.

Should you have questions, please contact Suzanne Pridgeon at [Suzanne.Pridgeon@fldoe.org](mailto:Suzanne.Pridgeon@fldoe.org).

Sincerely,

Richard Corcoran  
Commissioner

**State Plan for the  
American Rescue Plan Elementary and Secondary School Emergency Relief Fund**

**U.S. Department of Education**

**Issued: April 21, 2021**

OMB Number: 1810-0754  
Expiration Date: October 31, 2021

**Paperwork Burden Statement** According to the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless such collection displays a valid OMB control number. The valid OMB control number for this information collection is 1810-0754. Public reporting burden for this collection of information is estimated to average 100 hours per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. The obligation to respond to this collection is required to obtain or retain benefit under Section 2001 of the American Rescue Plan Act of 2021 (ARP Act). If you have any comments concerning the accuracy of the time estimate, suggestions for improving this individual collection, or if you have comments or concerns regarding the status of your individual form, application or survey, please contact Britt Jung, Office of State and Grantee Relations, Office of Elementary and Secondary Education, U.S. Department of Education, 400 Maryland Avenue, SW, Washington, DC 20202-6450, email: [SGR@ed.gov](mailto:SGR@ed.gov) directly.

## Introduction

The American Rescue Plan Elementary and Secondary School Emergency Relief (“ARP ESSER”) Fund, authorized under the American Rescue Plan (“ARP”) Act of 2021, provides nearly \$122 billion to States to support the Nation’s schools in safely reopening and sustaining safe operations of schools while meeting the academic, social, emotional, and mental health needs of students resulting from the coronavirus disease 2019 (“COVID-19”) pandemic. It is particularly important that ARP ESSER funding will enable States and local educational agencies (“LEAs”), and more directly schools, to support students who have been most severely impacted by the COVID-19 pandemic and are likely to have suffered the most because of longstanding inequities in our communities and schools that have been exacerbated by the COVID-19 pandemic.

The U.S. Department of Education (“Department”) is committed to working in partnership with States so that these unprecedented resources are quickly put to work to ensure students have sustained access to in-person instruction and that the resources are used to provide the effective support students need as they persist through and recover from the impacts of the COVID-19 pandemic. The thoughtful and timely use of these funds will have a lasting impact on our Nation’s schools and help to address the inequities in resources, services, and opportunities available to our students.

This template presents an opportunity for States to share their plans for the use of ARP ESSER funds with the public. The Department must approve a State educational agency’s (“SEA’s”) plan in order to make the State’s remaining ARP ESSER allocation available for use. Please note that the Department intends to issue ARP ESSER reporting requirements separately.

## Instructions

Each SEA must provide descriptions and other information that address each requirement listed below. An SEA may use this template or another format as long as every item and element is addressed in the SEA’s response. Throughout this document, questions that refer to an SEA’s ARP ESSER funding are referencing the total allocation to be received by the SEA, including that which it allocates to its LEAs.

Each SEA must submit to the Department by **June 7, 2021**, either: (1) its ARP ESSER plan or (2) the State requirements that preclude submission of the plan by that date and a date by which it will be able to submit its complete ARP ESSER plan.

To submit the SEA’s plan, please email the plan to your Program Officer at [State].OESE@ed.gov (e.g., [Alabama.OESE@ed.gov](mailto:Alabama.OESE@ed.gov)).

In order to ensure transparency, the Department will post each plan on the Department’s website when it is received and will indicate each plan’s approval status.

This template also allows States to fulfill the requirement of the Coronavirus Response and Relief Supplemental Appropriations (“CRRSA”) Act ESSER II 6-month reporting requirement in section 313(f) of the CRRSA Act.

#### A. Describing the State's Current Status and Needs

The Department recognizes the extraordinary efforts made by States, LEAs, and educators to support students during the COVID-19 pandemic. In this section, SEAs will describe the progress they have made, the priorities and student needs guiding their ARP ESSER funding decisions, and their current and projected operating status.

1. **Progress and Promising Practices:** Provide your assessment of the top 2-3 strategies that have been most effective in supporting the needs of students in your State during the COVID-19 pandemic, especially for students most impacted by the COVID-19 pandemic. Please include, if applicable, how your State will submit and encourage its LEAs to submit lessons learned and best practices to the Department's [Safer Schools and Campuses Best Practices Clearinghouse](#) so that they can be shared with other States and LEAs.

Florida led the nation in reopening schools in August 2020, with a focus on ensuring that all families in our state had access to high quality education opportunities and a full panoply of student services, regardless of whether a student was attending in-person learning at their school or participating in a virtual/blended learning option. Through Emergency Order No. 2020-06, which was signed on July 6, 2020, by Commissioner of Education Richard Corcoran, all Florida public schools were required to offer students the option to attend school in person for the 2020-21 school year, with priority placed on ensuring the health and safety of students and staff, while urgently deploying instructional supports that would mitigate any exacerbation of achievement gaps. Through this order, Florida maintained the flexibility for families to receive virtual instruction where preferred, which has been a long-standing option for students in the state even prior to the pandemic. In the fall of 2020, 54 percent of Florida families chose for their children to receive in-person instruction and 43 percent chose an innovative model (a blended option for in-person learning and distance learning) for their children, enabling parents to return to their jobs and contribute positively to the state's economy. By the spring of 2021, even more families opted for in-person education (67 percent) over the innovative model (31 percent). Data shows that this strategy paid off, as schools proved to be safe spaces for children and the state of employment improved. In June 2021, the Florida Department of Economic Opportunity announced Florida had experienced 13 consecutive months of job growth, gaining 595,000 private sector jobs over the year, and 839,800 jobs since the height of the pandemic.

Building on the success of Emergency Order No. 2020-06, Commissioner Corcoran issued Emergency Order 2020-07 on November 30, 2020, which extended the same options made available to parents in the fall and winter of 2020 through the end of the 2020-2021 school year. Specific to spring 2021, school districts were required to enhance and expand educational interventions for students who may be falling behind, particularly our most vulnerable students. School districts were also required to submit to the Florida Department of Education (FDOE) locally conceived education plans that outlined the strategies and approaches they identified as working best for the communities they serve. Concurrently, FDOE took steps to ensure school districts received the guidance and security they needed to comply with numerous state and federal laws in place to support every student, including those with medical vulnerabilities, English Language Learners and students with disabilities. Every school district created a unique, innovative plan that prioritized the safety and security of students and educators, while ensuring all Florida students would continue to receive a world-class education.

Building on the foundation established through the aforementioned education plans, FDOE allocated Coronavirus Aid, Relief, and Economic Security Act (CARES) funds toward the development of an online instructional continuity plan framework and associated professional development to ensure successful implementation. FDOE contracted with a vendor that conducted site visits and surveys to collect input from Florida's school districts regarding the transition to virtual learning in spring 2020, including lessons learned and successful practices, all of which will be analyzed and shared statewide to improve processes. In addition, the FDOE engaged with districts and schools to collect and analyze student formative assessment data throughout the school year, referred to as progress monitoring assessments, so that local and state level interventions and supports could be designed and deployed to accelerate learning in the areas of reading and math. This progress monitoring data provided an inside perspective on potential learning loss and areas to enhance focused strategies in our policy and spending plans for both the 2020-21 and 2021-22 school years.

- 2. Overall Priorities: Provide your assessment of the top 2-3 issues currently facing students and schools across your State as a result of or in response to the COVID-19 pandemic including, to the extent possible, data illustrating why these are the most critical and/or most widespread issues facing schools and students.**

FDOE's top priority has been the safety and health of Florida's students and school staff. Additional priorities are focused on reading literacy skills, especially in early learning programs, to establish the necessary foundational skills needed for lifelong success and closing achievement gaps, which were exacerbated in reading with English Language Arts (ELA) scores decreasing 3 percent in grades 3 through 10 on end-of-year assessments in spring 2021. The overall priorities that have been established in Florida continue to remain focused on those adopted by the State Board of Education in the *2020-2025 Strategic Plan*, which was in place prior to the pandemic. This commitment to our existing priorities and goals reinforces how Florida has not lost focus during the public health emergency, but rather has doubled down on ensuring an accelerated approach to achieving these student-centered priorities, including:

1. Ensuring the Attainment of Highest Student Achievement
2. Establishing Seamless Articulation and Maximum Access to Post-Secondary Education for All Students
3. Building an Exceptionally Skilled Workforce (Ensuring Florida is number one in Workforce Education)

In support of these priorities, FDOE has designed and deployed strategic investments and corresponding practices, in partnership with district and school leaders, which collectively enhance our abilities to succeed in reaching our goals. For example, FDOE has invested in reading literacy skills as a top priority with initial CARES dollars by establishing regional literacy directors and instructional coach teams to support the districts and schools with the most fragile students based on ongoing progress monitoring data. We are also upskilling literacy practices with summer institutes and other professional learning opportunities as Florida transitions to new English Language Arts (ELA) state standards, focusing on the foundational skills in the 2021-22 school year in grades K-2 and then building momentum to expand to K-12 for full implementation by the 2022-23 school year. This transitional plan offers districts clear pathways for onboarding new practices and investing their CARES dollars to parallel with the supports needed to ensure effective implementation and a coordinated focus on closing achievement gaps.

Florida led the nation in reopening schools in 2020-21 and FDOE offered maximum flexibility to school districts, which included waiving state assessments and providing authority for school districts to use alternative means to determine students' achievement for promotion and graduation decisions. The information derived through the state's renowned accountability system is critical to schools and districts, so FDOE prioritized progress monitoring with the goal of connecting early education to progress in developing reading skills; giving teachers diagnostic tools to support students in the moment; informing best practices and curriculum decisions; giving schools a "war room" of tools to succeed; and creating a great culture of student and teacher supports. Summer enrichment opportunities were also supported in 2020 to lessen the impact of achievement gaps and summer slide. While Florida's progress monitoring data does reflect learning loss, it has demonstrated less impact in reading and math in comparison to any other states based on a number of reports.

While Florida did administer end-of-year assessments in the spring of 2021, with 94 percent of students statewide participating and completing their assessments, the data reinforces the need to accelerate learning in reading and math in order to close gaps negatively impacted by the pandemic. The 2021 Florida Standards Assessments results were released in July 2021.

Florida educators and our school leaders are to be commended for their service and dedication in leading the nation for in-person instruction. An effective classroom teacher is the best predictor of student success and the top evidence-based instructional practice proven for accelerating learning. Elevating and celebrating educators continues to be a core value in Florida.

3. **Identifying Needs of Underserved Students:** Describe your State's 2-3 highest priority academic, social, emotional, and/or mental health needs for the remainder of the 2020-2021 school year (if applicable) and for the 2021-2022 school year related to the impact of the COVID-19 pandemic on each of the following student groups:
  - i. Students from low-income families,
  - ii. Students from each racial or ethnic group (e.g., identifying disparities and focusing on underserved student groups by race or ethnicity),
  - iii. Gender (e.g., identifying disparities and focusing on underserved student groups by gender),
  - iv. English learners,
  - v. Children with disabilities (including infants, toddlers, children, and youth with disabilities eligible under the Individuals with Disabilities Education Act ("IDEA")),
  - vi. Students experiencing homelessness,
  - vii. Children and youth in foster care,
  - viii. Migratory students, and
  - ix. Other groups disproportionately impacted by the pandemic that have been identified by the SEA (e.g., youth involved in the criminal justice system, students who have missed the most in-person instruction during the 2019-2020 and 2020-2021 school years, students who did not consistently participate in remote instruction when offered during school building closures, and LGBTQ+ students).

**To the extent possible, this description should include data on indicators such as estimates of the academic impact of lost instructional time,<sup>1</sup> chronic absenteeism, student engagement, and social-emotional well-being.**

Florida’s highest priorities for the 2021-22 school year are related to addressing the impacts brought on by the pandemic on our most vulnerable students, while ensuring our continued urgency towards closing achievement gaps. Our efforts include the continuation of literacy initiatives that demonstrated success in the 2020-21 school year, in alignment with research and evidence-based practices, which will continue to rely on data collected and analyzed from the 2020-21 end of year assessments, as well as progress monitoring formative assessment data gathered throughout the 2021-22 school year to ensure a coordinated focus on deploying a multi-tiered support system. The emergency orders the Commissioner issued placed the highest priority on ensuring a full panoply of services for our most vulnerable students. Florida also required in the 2020-21 school year that school districts develop a Fall Reopening Plan and Spring Plan, which specifically addressed each student group. Furthermore, Florida took bold steps to guarantee that districts were held harmless financially for fluctuations in their enrollment as a result of the public health emergency, which could have significantly impacted staffing patterns and assignments within schools, thus having a direct and significant impact on student outcomes. The data gathered in the 2020-21 school year in Florida proves that in-person learning was the most effective learning modality as opposed to an innovative or virtual option, reinforcing the significant impact effective teachers have on the measured learning outcomes of their students. Ensuring in-person instructional options for Florida families was so important and vital to FDOE’s mission to provide students with a world-class education that FDOE had to fight, and ultimately would win, a lawsuit filed by a special interest group seeking to prevent DOE Emergency Order No. 2020-EO-06 from going into effect.

Due to our proactive efforts, Florida was the first state to guarantee parents an in-person education option five days a week. The in-person instructional option has been especially important for economically disadvantaged and minority families, as well as families with students with disabilities, so much so that nearly 94 percent of Florida’s students successfully participated in the 2020-21 statewide assessments in ELA, mathematics, science and social studies at the end of the school year. The results indicate that Florida’s students will continue to need additional supports to recover lost learning, but there is no doubt that these impacts would have been catastrophically worse had Florida not worked diligently to reopen schools and create the options families needed. Some specific outcomes that we have observed from the 2020-21 school year include:

- The percentage of students scoring on grade level and above on ELA (grades 3-10) declined from 55 percent in 2019 to 52 percent in 2021 – a decline of 3 percentage points.
- The percentage of students scoring on grade level and above on mathematics (grades 3-8) declined from 61 percent in 2019 to 51 percent in 2021 – a decline of 10 percentage points.
- The percentage of students scoring on grade level and above on the Algebra 1 end-of-course (EOC) assessment declined from 60 percent in 2019 to 47 percent in 2021 – a decline of 13 percentage points.
- The percentage of students scoring on grade level and above on the Geometry EOC assessment declined from 57 percent in 2019 to 46 percent in 2021 – a decline of 11 percentage points.

---

<sup>1</sup> For the purposes of the plan, “academic impact of lost instructional time” refers to “learning loss” experienced by students as a result of the COVID-19 pandemic, as referenced in the ARP Act and the CRRSA Act.

- The percentage of students scoring on grade level and above in grade 5 on the statewide science assessment declined from 53 percent in 2019 to 47 percent in 2021 – a decline of 6 percentage points.
- The percentage of students scoring on grade level and above in grade 8 on the statewide science assessments (grade 8 assessment and grade 8 students who took the Biology 1 EOC) declined from 51 percent in 2019 to 48 percent in 2021 – a decline of 3 percentage points.
- The percentage of students scoring on grade level and above on the Biology 1 EOC assessment declined from 67 percent in 2019 to 62 percent in 2021 – a decline of 5 percentage points.
- The percentage of students scoring on grade level and above on the Civics EOC assessment declined from 71 percent in 2019 to 64 percent in 2021 – a decline of 7 percentage points.
- The percentage of students scoring on grade level and above on the U.S. History EOC assessment declined from 69 percent in 2019 to 63 percent in 2021 – a decline of 6 percentage points.

The fact that Florida was able to test the vast majority of students means that Florida’s educators will have deeper insight into their students’ performance and will be able to develop personalized strategies to improve academic achievement outcomes during the 2021-22 school year.

**Students from Low-Income Families.**

Students from low-income families comprise 63.7 percent of Florida’s total student population. Assessment data from the 2021 administration of the statewide assessments indicate additional focus will need to be placed on the academic needs of students from low-income families. Student performance among economically disadvantaged students typically lags the performance of all students, and the declines experienced this year among economically disadvantaged students were larger than the declines among all students. Specifically, whereas 52 percent of all students scored on grade level and above on ELA, 41 percent of students from low-income families scored on grade level and above on ELA. Additionally, whereas ELA performance declined 3 percentage points from 2019 to 2021 for all students, ELA performance declined 4 percentage points for students from low-income families. Similar patterns were found in grades 3-8 mathematics (decline of 12 percentage points versus 10 percentage points), Algebra 1 (decline of 15 percentage points versus 13), Geometry (decline of 13 percentage points versus 11), grade 5 science (decline of 7 percentage points versus 6), Biology 1 (decline of 6 percentage points versus 5), Civics (decline of 9 percentage points versus 7) and U.S. History (decline of 7 percentage points versus 6).

Subject	Percentage Scoring On Grade Level and Above, Students from Low-Income Families		
	2019	2021	Difference
ELA Grades 3-10	45	41	-4
Mathematics Grades 3-8 (FSA and EOCs)	51	39	-12
Algebra 1 EOC	51	36	-15
Geometry EOC	46	33	-13
Grade 5 Science	43	36	-7
Grade 8 Science (Grade 8 and Biology EOC)	39	36	-3
Biology 1 EOC	57	51	-6
Civics EOC	63	54	-9
U.S. History EOC	60	53	-7

The *2020-2025 Strategic Plan* adopted by the State Board of Education established metrics and targets for closing the achievement gaps between non-economically disadvantaged and economically disadvantaged students for the state as a whole and for the state’s Title I schools. The overall decline in assessment performance from 2019 to 2021 generally exacerbated pre-existing achievement gaps. Even if gaps were narrowed, they were narrowed as the result of all groups declining, not as the result of all groups improving with some improving at more accelerated rates. Progress monitoring and addressing learning loss will be priorities for this sub-group.

Throughout the pandemic, the state of Florida sought to support instructional continuity for students from low income families. For example, Florida partnered with T-Mobile to provide more than 600,000 Florida families with 100GB of internet per year over the next five years. School administrators apply for the program by providing ZIP codes for students that participate in the school lunch program. The schools then distribute the hotspots and devices, with T-Mobile providing assistance for setup and technical support.

**Students from each racial or ethnic group (e.g., identifying disparities and focusing on underserved student groups by race or ethnicity)**

Assessment data from the 2021 administration of statewide assessments indicate that additional focus will need to be placed on the academic needs of all students, as all student racial/ethnic subgroups declined between 2019 and 2021. In some instances, such as ELA, achievement gaps between White and Black/African American students and between White and Hispanic students did not widen. However, that was due to the fact that White, Black/African American and Hispanic students all declined at the same rate on ELA between 2019 and 2021 (each declined by 4 percentage points). In mathematics (grades 3-8, including FSA and EOCs), gaps between White and Black/African American students expanded, with Black/African American students declining at a larger rate than white students. The White and Black/African American achievement gap in mathematics in 2019 was 29 percentage points; in 2021, the gap has expanded to 35 percentage points. The gap between White and Hispanic students also expanded (14 points in 2019 versus 19 points in 2021). Expansion of achievement gaps between White and Black/African American students and between White and Hispanic students also occurred in high school level mathematics (Algebra 1 and Geometry), Science (Grade 5 and Biology 1) and social studies (Civics and U.S. History).

Race/Ethnicity	Percent of Enrollment, 2020-21	Percentage Scoring On Grade Level and Above, ELA Grades 3-10

The *2020-2025 Strategic Plan* adopted by the State Board of Education established metrics and targets for closing the achievement gaps between White and Black/African American students and between White and Hispanic Students. The overall decline in assessment performance from 2019 to 2021 generally exacerbated pre-existing achievement gaps. Even if gaps were narrowed, they were narrowed as the result of all groups declining, not as the result of all groups improving with some improving at

more accelerated rates. Progress monitoring and addressing learning loss will be priorities for this sub-group.

**Students by gender – please add a row for each gender (e.g., identifying disparities and focusing on underserved student groups by gender)**

Assessment data from the 2021 administration of statewide assessments indicate that additional focus will need to be placed on the academic needs of all students, as both male and female student scores declined between 2019 and 2021. In some instances, gender achievement gaps narrowed between 2019 and 2021. However, the narrowing, especially in the mathematics area, was due to female students declining at a higher rate than male students.

Subject	Percentage Scoring On Grade Level and Above, Female Students		
	2019	2021	Difference
ELA Grades 3-10	61	56	-5
Mathematics Grades 3-8 (FSA and EOCs)	61	50	-11
Algebra 1 EOC	63	47	-16
Geometry EOC	58	45	-13
Grade 5 Science	53	45	-8
Grade 8 Science (Grade 8 Assessment Only)	49	43	-6
Biology 1 EOC	69	63	-6
Civics EOC	73	65	-8
U.S. History EOC	68	62	-6

Subject	Percentage Scoring On Grade Level and Above, Male Students		
	2019	2021	Difference
ELA Grades 3-10	51	47	-4
Mathematics Grades 3-8 (FSA and EOCs)	60	52	-8
Algebra 1 EOC	58	46	-12
Geometry EOC	56	46	-10
Grade 5 Science	53	49	-4
Grade 8 Science (Grade 8 Assessment Only)	48	47	-1
Biology 1 EOC	65	61	-4
Civics EOC	70	64	-6
U.S. History EOC	70	65	-5

**English Language Learners**

English language learners comprise 9.6 percent of Florida’s total student population. Assessment data from the 2021 administration of the statewide assessments indicate additional focus will need to be placed on the academic needs of English language learners. Student performance among English language learners typically lags the performance of all students and the declines experienced this year among English language learners were larger than the declines among all students. Specifically, whereas

52 percent of all students scored on grade level and above on ELA, 15 percent of English language learners (those currently receiving ESOL services) scored on grade level and above on ELA. Though the decline on ELA for English language learners was less than for the overall population on ELA (2 percentage point decline versus 3), declines among English language learners in other subjects were larger than the overall student population – specifically, in grades 3-8 mathematics (decline of 11 percentage points versus 10) and Biology 1 (decline of 6 percentage points versus 5). Though larger declines in performance between 2019 and 2021 were not as numerous among English language learners as among other subgroups, the performance of this subgroup remains a major focus given the lower performance typically witnessed among this group, and the large population of English learners served in Florida.

Subject	Percentage Scoring On Grade Level and Above, English Language Learners		
	2019	2021	Difference
ELA Grades 3-10	17	15	-2
Mathematics Grades 3-8 (FSA and EOCs)	34	23	-11
Algebra 1 EOC	28	17	-11
Geometry EOC	25	17	-8
Grade 5 Science	15	13	-2
Grade 8 Science (Grade 8 and Biology EOC)	10	9	-1
Biology 1 EOC	25	19	-6
Civics EOC	33	27	-6
U.S. History EOC	24	20	-4

The *2020-2025 Strategic Plan* adopted by the State Board of Education established metrics and targets for closing the achievement gaps between English language learners and non-English language learners. In addition, the strategic plan established metrics and targets for the successful transition of English language learners. The overall decline in assessment performance from 2019 to 2021 generally exacerbated pre-existing achievement gaps. Even if gaps were narrowed, they were narrowed as the result of all groups declining, not as the result of all groups improving with some improving at more accelerated rates. Addressing progress monitoring and learning loss will be priorities for this sub-group.

### **Children with Disabilities**

Students with disabilities comprise 14.9 percent of Florida’s total student population. Assessment data from the 2021 administration of the statewide assessments indicate additional focus will need to be placed on the academic needs of students with disabilities. Student performance among students with disabilities typically lags the performance of all students. Specifically, whereas 52 percent of all students scored on grade level and above on ELA, 20 percent of students with disabilities scored on grade level and above on ELA. Though larger declines in performance between 2019 and 2021 were not seen among students with disabilities as among other subgroups, the performance of this subgroup remains a major focus given the lower performance typically witnessed among this group, and the unique needs of students within this subgroup.

Subject	Percentage Scoring On Grade Level and Above, Students with Disabilities		
	2019	2021	Difference
ELA Grades 3-10	22	20	-2
Mathematics Grades 3-8 (FSA and EOCs)	31	24	-7
Algebra 1 EOC	27	17	-10
Geometry EOC	24	18	-6
Grade 5 Science	24	21	-3
Grade 8 Science (Grade 8 and Biology EOC)	18	17	-1
Biology 1 EOC	34	30	-4
Civics EOC	41	34	-7
U.S. History EOC	41	35	-6

The *2020-2025 Strategic Plan* adopted by the State Board of Education established metrics and targets for closing the achievement gaps between students with disabilities and students without disabilities. The overall decline in assessment performance from 2019 to 2021 generally exacerbated pre-existing achievement gaps. Even if gaps were narrowed, they were narrowed as the result of all groups declining, not as the result of all groups improving with some improving at more accelerated rates. Addressing progress monitoring and learning loss will be priorities for this sub-group.

A review of emerging data on student performance and attendance indicates that, for the 2021-22 school year, the state’s highest needs for Florida’s students with disabilities are emerging in the following five areas:

1. Addressing the increasing shortage of qualified teachers to support the needs of students with disabilities, to include those Exceptional Student Education (ESE) staff tasked with assisting with federally required child find activities related to students with disabilities.
2. Addressing the need for a robust array of positive behavioral supports and behavioral and emotional skill acquisition (including for PreK students with disabilities), to include providing supports related to child find relative to students with emotional and behavioral disabilities.
3. Addressing academic readiness and academic skill acquisition for our youngest students with disabilities, to include providing supports related to Child Find for students with disabilities relative to PreK and primary-aged students.
4. Post-secondary preparation and supports for transition-aged students with disabilities.
5. LEA dispute resolution, parent communication and partnership specific to students with disabilities.

### **Students Experiencing Homelessness**

Students experiencing homelessness comprise 1.6 percent of the state’s total student population. Assessment data from the 2021 administration of the statewide assessments indicate additional focus will need to be placed on the academic needs of students experiencing homelessness. Student performance among these students typically lags the performance of all students. Specifically, whereas 52 percent of all students scored on grade level and above on ELA, 28 percent of students experiencing homelessness scored on grade level and above on ELA. Declines among students experiencing homelessness were larger than the overall student population in some areas – specifically, in ELA

(decline of 6 percentage points versus 3) and Biology 1 (decline of 10 percentage points versus 5). Though larger declines in performance between 2019 and 2021 were not as numerous among students experiencing homelessness as among other subgroups, the performance of this subgroup remains a major focus given the lower performance typically witnessed among this group.

Subject	Percentage Scoring On Grade Level and Above, Students Experiencing Homelessness		
	2019	2021	Difference
ELA Grades 3-10	34	28	-6
Mathematics Grades 3-8 (FSA and EOCs)	38	28	-10
Algebra 1 EOC	39	28	-11
Geometry EOC	37	27	-10
Grade 5 Science	33	27	-6
Grade 8 Science (Grade 8 Assessment Only)	27	26	-1
Biology 1 EOC	48	38	-10
Civics EOC	50	43	-7
U.S. History EOC	52	46	-6

Utilizing progress monitoring to inform strategies to address learning loss will be a top priority for this subgroup.

### **Children and Youth in Foster Care**

There are 17,146 (0.6 percent of enrollment) children and youth in foster care enrolled in Florida public schools. Assessment data from the 2021 administration of the statewide assessments indicate additional focus will need to be placed on the academic needs of students in foster care. Student performance among students in foster care typically lags the performance of all students. Specifically, whereas 52 percent of all students scored on grade level and above on ELA, 32 percent of students in foster care scored on grade level and above on ELA. Though larger declines in performance between 2019 and 2021 were not seen among students in foster care as among other subgroups, the performance of this subgroup remains a major focus given the lower performance typically witnessed among this group. It should be noted that Florida has made every effort to mitigate the impacts of lost instructional time for students in foster care. In addition to benefitting from the opportunity to receive high-quality, in-person instruction, Florida children in foster care were the recipients of nearly 1,000 electronic devices, which were made available through the FDOE, in collaboration with the Florida Department of Children and Families (DCF). These devices are critical to combatting the obstacles of educational stabilities, and children in foster care were prioritized to ensure they had the resources needed to succeed during and after the pandemic.

Subject	Percentage Scoring On Grade Level and Above, Children and Youth in Foster Care		
	2019	2021	Difference
ELA Grades 3-10	35	32	-3
Mathematics Grades 3-8 (FSA and EOCs)	38	34	-4
Algebra 1 EOC	32	25	-7
Geometry EOC	34	25	-9
Grade 5 Science	35	33	-2
Grade 8 Science (Grade 8 and Biology EOC)	27	26	-1
Biology 1 EOC	43	40	-3
Civics EOC	50	50	0
U.S. History EOC	50	47	-3

### **Migratory Students**

There are 14,451 (0.5 percent of enrollment) migratory students enrolled in Florida public schools. Assessment data from the 2021 administration of the statewide assessments indicate additional focus will need to be placed on the academic needs of migratory students. Student performance among migratory students typically lags the performance of all students. Specifically, whereas 52 percent of all students scored on grade level and above on ELA, 28 percent of migratory students scored on grade level and above on ELA. Though the decline on ELA for migratory students was the same as for the overall population on ELA (3 percentage point decline), declines among migratory students in other subjects were larger than the overall student population – specifically, in Algebra 1 (decline of 14 percentage points versus 13) and Biology 1 (decline of 6 percentage points versus 5). Though larger declines in performance between 2019 and 2021 were not as numerous among migratory students as among other subgroups, the performance of this subgroup remains a major focus given the lower performance typically witnessed among this group.

Subject	Percentage Scoring On Grade Level and Above, Migratory Students		
	2019	2021	Difference
ELA Grades 3-10	31	28	-3
Mathematics Grades 3-8 (FSA and EOCs)	46	36	-10
Algebra 1 EOC	46	32	-14
Geometry EOC	38	33	-5
Grade 5 Science	33	27	-6
Grade 8 Science (Grade 8 Assessment Only)	27	25	-2
Biology 1 EOC	49	43	-6
Civics EOC	50	43	-7
U.S. History EOC	51	45	-6

Utilizing progress monitoring to inform strategies to address learning loss will be a top priority for this subgroup.

**Other groups of students identified by the State (e.g., youth involved in the criminal justice system, students who have missed the most in-person instruction during the 2019-2020 and 2020-2021 school years, students who did not consistently participate in remote instruction when offered during school building closures, LGBTQ+ students)**

Florida is committed to addressing learning loss across all students and student subgroups. While Florida has not identified additional subgroups at the state level, Florida has worked to ensure that school districts and other LEAs have the tools needed to identify and target resources to the students most in need.

- 4. Understanding the Impact of the COVID-19 Pandemic: Describe how the SEA will support its LEAs in identifying the extent of the impact of the COVID-19 pandemic on student learning and student well-being, including identifying the groups of students most impacted by the pandemic. Where possible, please identify the data sources the SEA will suggest its LEAs use in thoughtfully diagnosing areas of need, including data on the academic, social, emotional, and mental health impacts of lost instructional time.**

In July 2020, Commissioner Corcoran issued DOE Emergency Order No. 2020-EO-06. This order recognized that education is critical to the success of the state and to individual students. It is known that extended school closures can impede the educational success of students, impact families' well-being and limit parents from returning to work. This order prioritized the need for schools to open fully to ensure the quality and continuity of the educational process and the comprehensive well-being of students and families. By signing this order, Commissioner Corcoran provided flexibility for districts to respond and mitigate the impact of the COVID-19 pandemic and prioritize the promotion of health, safety and welfare of persons connected to the Florida educational system. In order to receive the flexibility provided by the order, districts were required to open in-person instruction at least five days per week, provide the full panoply of services, conduct a robust progress monitoring system and ensure the availability of services for students with disabilities and English language learners. Every school district submitted a reopening plan on how it would meet these requirements.

By the conclusion of the 2020-21 school year, school districts reported local progress monitoring data three times, and 94 percent of students participated in statewide assessments.

Schools and districts identified subgroups of students most impacted by the pandemic:

- Students with Individual Educational Plans (IEP);
- Students with an ADA-Section 504 Disability (with or without an IEP);
- Students with a Developmental Delay;
- Students Acquiring English as a Second Language (ELL);
- Students Suspected of have a Reading and/or Language Impairment;
- Students with Limited Access to Technology; and
- Students Dependent on School for Meals (Free/Reduced-price Lunch).

Programs already in place to address student well-being:

Year-over-year increases in the Florida Education Finance Program (FEFP) for the district Mental Health Assistance program used to increase services and personnel:

- 2019-20 school year: \$75 million;
- 2020-21 school year: \$100 million; and
- 2021-22 school year: \$120 million.

Additional Investments in Mental Health Funding included:

- \$23 million CARES (to DCF) to reinforce Florida's mental health services system.
- \$2 million CARES for 18 rural districts to reduce mental health professional-to-student ratio and increase student access to mental health services.
- \$5.5 million for youth mental health awareness training for teachers and school personnel.
- The FDOE's Division of Early Learning (DEL), is actively building the capacity of the statewide early care and education workforce to prepare children for school readiness and kindergarten. DEL serves children birth to 13 years old and supports the whole child by establishing measures to ensure families have access to high-quality childcare and afterschool programs; collaborating with community support programs; and providing early childhood educators access to training in early childhood development, healthy social-emotional development, trauma-informed practice and positive classroom strategies.
- With \$8.9 million from the Preschool Development Birth to Five Grant (PDG), DEL has awarded sub-grants to early learning coalitions (ELCs) and Redlands Christian Migrant Association (RCMA) to identify and purchase needed social-emotional and/or mental health supports for children and their families, School Readiness (SR) providers and Voluntary Prekindergarten (VPK) providers.
- Resiliency Toolkits for schools and educators with lesson plans on topics like grit, respect and coping skills.
- New state standards for character education and substance use and abuse with supporting resources.
- Five hours of mental health instruction required each year for students in grades 6-12.

Suicide Prevention

The SEA established criteria and procedures for implementation of section 1012.583, Florida Statutes (F.S.), including components of FDOE-approved youth suicide awareness and prevention training materials, criteria for the provision of approved training and policies and procedures for administering suicide risk assessments. <https://www.fldoe.org/schools/k-12-public-schools/bosss/suicide-prevent.stml>  
Youth Mental Health Awareness Training (YMHAT) and Support

In accordance with s. 1012.584, F.S., the FDOE, as a state education agency (SEA), has supported LEAs through an annual YMHAT allocation designed to assist districts with providing an evidence-based youth mental health awareness and assistance training program to help school personnel identify and understand the signs of emotional disturbance, mental illness and substance use disorders and provide such personnel with the skills to help a person who is developing or experiencing an emotional disturbance, mental health or substance abuse problem.

More specifically for district school personnel, the benefits for the LEAs is that YMHAT:

- Informs on risk factors and warning signs of mental health and substance use problems.

- Provides information on anxiety, depression, psychosis, eating disorders, substance abuse disorders, ADHD and other disruptive behavior disorders.
- Provides a five-step action plan to help someone who is developing a mental health problem or is in crisis.
- Provides available evidence-based professional, peer and self-help resources.

As of August 2021, Florida has had over 200,000 educators and school-based personnel across the state complete the full training for Youth Mental Health Awareness, with nearly 2,000 instructors across the state supporting the ongoing professional development needs associated with this critical resource. In July 2021, the State Board of Education adopted statewide student standards for character education and substance use and abuse.

The Department of Education established a mental health resources page at <https://www.fldoe.org/mental-health/index.stml>.

5. **School Operating Status: It is essential to have data on how students are learning in order to support the goals of access and equity, especially for student groups that have been disproportionately impacted by the COVID-19 pandemic. Describe the current status of data collection on operational status and mode of instruction of all schools in your State. This description must include:**
  - i. **A description of to what extent, and how frequently, the State collects now and will collect in the future data for all schools in your State on:**
    - **Mode of instruction: The number of schools in your State that are offering fully remote or online-only instruction; both remote/online and in-person instruction (hybrid model); and/or full-time in-person instruction;**
    - **Enrollment: Student enrollment for all students and disaggregated for each of the student groups described in A.3.i-viii for each mode of instruction; and**
    - **Attendance: Student attendance for all students and disaggregated for each of the student groups described in A.3.i-viii for each mode of instruction.**

Mode of Instruction, Enrollment and Attendance are data elements within the statewide comprehensive management information system maintained by the FDOE. FDOE currently collects the data elements from school districts in October and February as point-in-time information, and in August for end-of-year and full-year information.

- The data described in A.5.i.a. and b. using the template in Appendix A (and to the extent available, the data described in A.5.i.c.) for the most recent time period available. Please note that this data can be submitted separately within 14 calendar days after a State submits this plan. The SEA must also make this data publicly available on its website as soon as possible but no later than June 21, 2021, and regularly provide updated available information on its website. The Department will periodically review data listed in A.5.i on SEA websites.

- ii. To the extent available, a description of the planned operational status and mode of instruction for the State and its LEAs for Summer 2021 and for the 2021-2022 school year.

See Appendix A.

### **B. Safely Reopening Schools and Sustaining their Safe Operations**

The Department recognizes that safely reopening schools and sustaining their safe operations to maximize in-person instruction is essential for student learning and student well-being, and especially for being able to address the educational inequities that have been worsened by the COVID-19 pandemic. In this section, SEAs will describe how they will support their LEAs in this vital area.

- 1. **Support for LEAs:** Describe how the SEA will support its LEAs in safely returning to in-person instruction and sustaining the safe operation of schools. This description must include:
  - i. How the SEA will support its LEAs implementing, to the greatest extent practicable, prevention and mitigation policies in line with the most up-to-date guidance from the Centers for Disease Control and Prevention (“CDC”) for the reopening and operation of school facilities to effectively maintain the health and safety of students, educators, and other staff;

*Complete the table below, adding rows as necessary, or provide a narrative description.*

The FDOE issued a comprehensive guidance document in June 2020: Reopening Florida’s Schools and the CARES Act, which is included as Attachment 1. In addition, the FDOE steadfastly coordinated with the Florida Department of Health to provide timely and accurate technical assistance on best practices regarding safely reopening schools. An extensive list of guidance documents and technical assistance webinars provided to districts is available at <https://www.fldoe.org/em-response/index.html>. Commissioner Corcoran issued two emergency orders during 2020 to ensure favorable conditions for in-person instruction. On July 6, 2020, DOE Order No. 2020-EO-06 was issued to require schools to offer in-person instruction. Districts could provide an innovative, remote instruction option and still receive full per-student funding as if students were attending in person. To receive this flexibility, each district submitted a fall 2020 Reopening Plan to FDOE for approval. Every school district had to sign assurances and provide a plan to provide the full panoply of services available to all students regardless of learning modality. All districts received approval and public schools in Florida were reopened by August 31, 2020. In order to support districts with the continued flexibility to offer innovative learning options at in-person funding levels, Commissioner Corcoran issued DOE Order No, 2020-EO-07 on November 30, 2020. Every district had to submit a spring 2021 Education Plan for FDOE approval with continued assurances and detailed plans. All districts received approval and continued multiple learning options for the remainder of the 2020-21 school year.

For the reopening of schools for 2021-22, on July 30, 2021, Governor DeSantis issued Executive Order Number 21-175, Attachment 2, directing the Florida Department of Health (FDOH) and FDOE to protect the rights of parents to make decisions for their children regarding masks.

On August 6, 2021, the Florida Department of Health issued an emergency rule establishing protocols for controlling COVID-19 in school settings. The FDOH’s emergency rule is incorporated as Attachment 3A. This rule sets forth health and safety practices like cleaning and handwashing that should be instituted in public schools. It provides that students may wear masks or face coverings, but allows parents to opt the student out of any mandates. It establishes protocols for students who test positive, who are exposed, and who have had a prior infection. It requires parental consent for testing and prohibits discrimination of students who opt out of wearing a mask or face covering.

On September 22, 2021, the Florida Department of Health issued an emergency rule further addressing protocols for controlling COVID-19 in the school settings. The FDOH’s emergency rule is incorporated as Attachment 3B. In this rule, the FDOH addressed protocols for quarantining students who are symptomatic for or have tested positive for COVID-19 and for quarantining students who have been exposed to a person who is positive for COVID-19.

The State Board of Education adopted two emergency rules on August 6, 2021. The first, Pupil Attendance Records for COVID-19, which is incorporated as Attachment 4, defines stay-home directive and allows asymptomatic students under such directives to be counted present and have access to assignments, curriculum, and assistance from instructional personnel. The FDOE will update attendance reporting documents to include a new code to report student present under this rule. The second, COVID-19 Hope Scholarship Transfer Procedures, which is incorporated as Attachment 5, defines COVID-19 harassment and allows students who have been harassed to be eligible for a Hope Scholarship. This scholarship provides transfer to another public or private school.

**Table B1.**

<b>Mitigation strategy</b>	<b>SEA response</b>
Universal and correct wearing of masks	Determined by Florida Department of Health pursuant to s. 1003.22, Florida Statutes.
Physical distancing (e.g., including use of cohorts/podding)	LEA decision. The SEA recommended the use of seating charts to facilitate contact tracing.
Handwashing and respiratory etiquette	LEA decision.
Cleaning and maintaining healthy facilities, including improving ventilation	LEA decision.
Contact tracing in combination with isolation and quarantine, in collaboration with the State, local, territorial, or Tribal health departments	LEAs collaborated with local health departments
Diagnostic and screening testing	LEAs collaborated with local health departments; In October 2020, Governor DeSantis provided 60,000 BiNax NOW rapid test kits to school districts.

Mitigation strategy	SEA response
Efforts to provide vaccinations to educators, other staff, and students, if eligible	LEAs collaborated with local health departments. The state complied with prioritization of educators at federal vaccine sites.
Appropriate accommodations for children with disabilities with respect to the health and safety policies	LEA decision. The fall 2020 Reopening Plan and spring 2021 Education Plan had district assurances for continuity of services for students with disabilities.

- ii. **Any Statewide plans, policies, estimated timelines, and specific milestones related to reopening and operation of school facilities, including any mechanisms the SEA will use to track, monitor, or enforce their implementation;**

In July 2020, Commissioner Corcoran issued DOE Emergency Order No. 2021-EO-06, which is attached as Attachment 6, offering LEAs level funding for students learning remotely if the LEA provided assurances to open for in-person instruction by August 31, 2020, and a Reopening Plan for monitoring and support for students. All plans were reviewed, revised if necessary, and approved by FDOE for the fall 2020 semester. In November 2020, the commissioner issued DOE Emergency Order No. 2020-EO-07, which is attached as Attachment 7 to continue funding flexibility for the spring 2021 semester upon approval of a Spring Reopening Plan detailing student progress monitoring and support. These plans were also reviewed, revised if necessary, and approved by FDOE for the spring 2021 semester. This funding flexibility is not available for the 2021-22 school year, but there are several remote learning options parents can pursue for their child (e.g., Florida Virtual School, a district virtual franchise, or a Virtual Instruction Provider).

- iii. **To what extent the SEA and its LEAs consult with Federal, State, and local health officials. This description should include, if available, whether the SEA and its LEAs have received support for screening testing from their State or local health department based on funding awarded by the CDC; and**

FDOE was in frequent contact with FDOH. DOE Orders No. 2020-EO-06 and 2020-EO-07 required the opening of schools “subject to advice and orders of the Florida Department of Health, local departments of health, and subsequent executive orders.” FDOH and its local health departments worked directly with LEAs on testing protocols, contact tracing, quarantine determinations, sanitization, etc.

- iv. **Any guidance, professional learning, and technical assistance opportunities the SEA will make available to its LEAs.**

FDOE provided vast resources to LEAs. Conference calls and webinars were held to share information and promote open communication. Conference calls with FDOE leadership were held to communicate

important announcements, and LEA superintendents had cell phone access to senior leadership staff for any questions. At least 49 webinars were held from March 2020 through May 2021. Topics included instructional continuity planning, safety measures, emergency orders, accountability, reopening plans, progress monitoring, CARES funding, early learning, workforce education, postsecondary, best practices, students with disabilities, testing kit training, reading and civics initiatives, after-school programs and much more. All documents and recordings are posted at <http://www.fldoe.org/em-response/documents.stml>.

Florida used CARES ESSER funds to hire 20 statewide regional literacy directors. The Florida Legislature called for the expansion of statewide regional literacy teams and appropriated funding authority to make this a reality. Florida already has regional team structures for school improvement. These two teams will work in tandem to improve literacy in schools. Statewide events for literacy and school improvement were held during 2021 to provide professional development and technical assistance on Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards implementation, the science of reading, and leveraging federal funds for school improvement.

2. **Safe Return to In-Person Instruction and Continuity of Services Plans:** Describe how the SEA will ensure that its LEAs that receive ARP ESSER funds meet the requirements in section 2001(i) of the ARP Act and the requirements relating to the ARP ESSER funds published in the Federal Register and available at <https://oese.ed.gov/offices/american-rescue-plan/american-rescue-plan-elementary-and-secondary-school-emergency-relief/> (ARP ESSER requirements) to either: (a) within 30 days of receipt of the funds, develop and make publicly available on the LEA's website a plan for the safe return to in-person instruction and continuity of services, or (b) have developed and made publicly available on the LEA's website such a plan that meets statutory requirements before the enactment of the ARP Act, including:
  - i. **How the SEA will ensure that each LEA plan includes, or will be modified to include, the extent to which it has adopted policies and a description of any such policies on each of the strategies listed in table B1;**

FDOE will require LEAs to submit an application that includes narrative components as well as a budget and assurances. At a minimum, the application will address the requirements noted above and in alignment with state law and rules.

- ii. **How the SEA will ensure that each LEA plan describes how it will ensure continuity of services including but not limited to services to address the students’ academic needs, and students’ and staff social, emotional, mental health, and other needs, which may include student health and food services;**

Under Florida law, specifically, s. 1003.22(3), F.S., the FDOH is the agency that has authority to adopt rules governing the control of preventable communicable diseases in public schools.<sup>2</sup> Therefore, school districts must comply with FDOH emergency rules.

Additionally, FDOE invested in the capacity of districts and schools to develop high quality Instructional Continuity Plans (ICPs), which are being collected to ensure that districts have alignment with evidence-based practices. Florida was one of a few states that offered summer programs in 2020 for struggling students based on achievement gaps. Work on ICPs was formalized with an external partner who will provide technical assistance to districts during the 2021-22 school year.

In fall 2020, each district submitted and received approval of their Reopening Plan. In January 2021, a Spring Education Plan was approved for each district. Each plan required assurances, including the collection of district progress monitoring data, and narrative for plans for to ensure continuity of services and supports for students with disabilities and English Language Learners.

Each LEA will be required to update its plan to address the requirements of the U.S. Department of Education’s Interim Final Rule, 88 FR 21195, and to review and update the plan not less than every six months. In addition, each LEA will be required to describe how it will ensure the effectiveness of the interventions it has undertaken to address the academic impact of lost instructional time and the academic, social, emotional, and mental health needs of all students, and particularly those students disproportionately impacted by the COVID-19 pandemic, including students from low-income families, students of color, English learners, children with disabilities, students experiencing homelessness, children and youth in foster care, and migratory students.

- iii. **How the SEA will ensure that the LEA periodically reviews, no less frequently than every six months for the duration of the ARP ESSER grant period (i.e., through September 30, 2023),<sup>3</sup> and revises as appropriate, its plan, and how the SEA will ensure that the LEA seeks public input, and takes such input into account on (1) whether revisions are necessary and, if so, (2) the revisions to the plan; and**

---

<sup>2</sup> This rule, and the enforcement of this rule by the Florida Department of Education, is being litigated in state and federal court. See, Florida State Conference of NAACP v. Florida Dep’t of Health, Case No. 4D21-2463 (Fla. 4th DCA); Scott v. DeSantis, Case No. 2021-CA-1382 (Fla. 2nd Cir.); Hayes v. DeSantis, Case No. 21-cv-22863, (S.D. Fla.).

<sup>3</sup> ARP ESSER funds are subject to the Tydings amendment in section 421(b) of the General Education Provisions Act, 20 U.S.C. 1225(b), and are therefore available to SEAs and LEAs for obligation through September 30, 2024. Review and revisions of these plans, if necessary, are not required during the Tydings period.

FDOE will provide technical assistance to ensure that LEAs periodically review their plan, including required public input, and will require assurances to ensure that the LEAs acknowledge the requirements.

- iv. **Describe, to the extent the SEA collects it, information about LEA implementation, to the greatest extent practicable, of each element of the most up-to-date CDC guidance listed in table B1 and its LEAs' needs for support and technical assistance to implement strategies consistent, to the greatest extent practicable, with relevant CDC guidance.**

The FDOE does not collect this information. Local decisions are made between school districts and local health departments.

### **C. Planning for the Use and Coordination of ARP ESSER Funds**

**The Department recognizes that seeking input from diverse stakeholders is essential to developing plans for the use of ARP ESSER funds that are responsive to the needs of students, families, and educators. In this section, SEAs will describe their plans for consultation and for coordinating the use of ARP ESSER funds with other resources to meet the needs of students.**

1. **SEA Consultation:** Consistent with the ARP ESSER requirements, describe how the SEA engaged in meaningful consultation with stakeholders, and incorporated input into its plan, including, but not limited to:
  - i. **students;**
  - ii. **families;**
  - iii. **Tribes (if applicable);**
  - iv. **civil rights organizations (including disability rights organizations);**
  - v. **school and district administrators (including special education administrators);**
  - vi. **superintendents;**
  - vii. **charter school leaders (if applicable);**
  - viii. **teachers, principals, school leaders, other educators, school staff, and their unions; and**
  - ix. **stakeholders representing the interests of children with disabilities, English learners, children experiencing homelessness, children and youth in foster care, migratory students, children who are incarcerated, and other underserved students.**

**The description must include how the SEA provided the public the opportunity to provide input in the development of the plan, a summary of the input (including any letters of support), and how the SEA took such input into account.**

Since March 2020, the FDOE has worked diligently with a number of stakeholders to ensure a coordinated and deliberate response to the COVID-19 pandemic. Engagement with school superintendents, educator and school leader associations, charter school networks, and a multitude of other partnering organizations has been key to Florida's reopening of schools and the rapid recovery of the state throughout the pandemic. To further support and engage stakeholders, FDOE developed an

online survey for stakeholders on proposed initiatives funded through the American Rescue Plan. It was sent to stakeholders representing the groups listed in i.-ix. above and was open from July 16-30, 2021. We received 2,576 comments. The table below summarizes the percent of responses indicating support or non-support of five types of initiatives.

	Summer Enrichment	After School Programs/Weekend Academies	Funding to Expand Proven Practices in Support of Reading Achievement	Student Support Services and Interventions	Enhanced Academic Enrichment and Math Supports
Yes	85.6%	80.2%	92.9%	87.7%	91.8%
No	14.4%	19.8%	7.1%	12.3%	8.2%

Below are the number of responses by stakeholder type (respondents could choose more than one type):

- Students - 578
- Families - 816
- Civil rights organizations - 42
- Disability rights organizations - 43
- School district superintendents - 40
- School and district administrators - 276
- Charter school leaders - 110
- Teachers - 1,973
- Principals - 180
- Other school leaders - 212
- Other educators - 231
- School staff - 296
- Education employee unions - 157
- Stakeholders representing the interests of children with disabilities - 337
- Stakeholders representing the interests of English language learners - 225
- Stakeholders representing the interests of children experiencing homelessness - 167
- Stakeholders representing the interests of children and youth in foster care - 152
- Stakeholders representing the interests of migratory students - 133
- Stakeholders representing the interests of children who are incarcerated - 81
- Stakeholders representing the interests of other underserved students - 245
- Other – 65

The results of this survey affirmed FDOE’s plan to focus on the five initiative areas presented therein. It showed overwhelming support for the areas of literacy and math support, and those project proposals were built out accordingly.

The Florida Education Association submitted recommendations for expanded educational opportunity and incentives to increase teaching capacity. Their ideas for summer, after--school and weekend enrichment; enhanced mental health support services; and teacher professional development for literacy, numeracy and science align with Florida’s proposals.

On August 18, 2021, the State Board of Education received an update on this state plan and FDOE’s work to ensure support of its proposals. The public is also invited to comment at these meetings regarding agenda items.

On September 23, 2021, the Department presented the emerging priorities for the ARP State Plan to superintendents at the Florida Association of District School Superintendents (FADSS).

**2. Coordinating Funds: Describe to what extent the SEA has and will coordinate Federal COVID-19 pandemic funding and other Federal funding. This description must include:**

- i. How the SEA and its LEAs 1) are using or have used prior to the submission of this plan and 2) plan to use following submission of this plan, Federal COVID-19 funding under the Coronavirus Aid, Relief, and Economic Security (“CARES”) Act and the CRRSA Act to support a safe return to and safely maximize in-person instruction, sustain these operations safely, and address the disproportionate impact of the COVID-19 pandemic on individual student groups (including students from low-income families, children with disabilities, English learners, racial or ethnic minorities, students experiencing homelessness, children and youth in foster care, and migratory students);**

*Complete the table below or provide a narrative description.*

**Table C1.**

<b>Funding source</b>	<b>Prior/current SEA and LEA uses (including funding amounts, if applicable)</b>	<b>Planned SEA and LEA uses (including funding amounts, if applicable)</b>
ESSER I (CARES Act)	See Narrative.	See Narrative.
GEER I (CARES Act)	See Narrative.	See Narrative.
ESSER II (CRRSA Act)	See Narrative.	See Narrative.
GEER II (CRRSA Act)	See Narrative.	See Narrative.

Florida led the nation in safely returning students to in-person instruction. All school districts in the state returned to in-person instruction by August 31, 2020. CARES and CRRSA funds have been strategically invested in the tools and resources necessary to address learning loss for our most vulnerable students and ensure that all students have the resources necessary to succeed. From the outset, Florida developed a comprehensive plan for responding to and recovering from COVID-19, and has worked to leverage and align the uses of CARES and CRRSA funds to maximize the impact of these funds. These strategic investments will be carried forward to the planned uses of ARP funds.

### **ESSER I (CARES Act)**

As of October 6, 2021, Florida is tied for 6<sup>th</sup> in the nation for spending percentage of ESSER funds. All of the state's ESSER I allocation has been awarded or encumbered through contract, as follows:

#### **ESSER Formula Grants to LEAs. (693,223,066)**

Under the CARES Act, formula grants were awarded to LEAs for a project performance period that spans 2019-20, 2020-21 and 2021-22. These funds have been, and continue to be, used to prevent, respond to and recover from COVID-19, in accordance with the allowable uses under the CARES Act.

#### **SEA Discretionary Projects (77,024,785):**

##### **Ensuring the B.E.S.T. Curriculum for Reading. (\$19,915,981)**

To ensure that LEA recovery efforts are effective, FDOE will provide grants to LEAs to assist in the identification and adoption of curriculum and supplemental instructional materials to drive teaching and learning in reading for grades K-3. The curriculum will be aligned to Florida's B.E.S.T. Standards. The curriculum must be vetted and approved by the FDOE's Just Read, Florida! Office, have the capacity to extend beyond direct classroom instruction, in the event schools close campuses again in the future, and provide options for parents/families to support learning in the home. Supplemental resources must be focused and aligned with the five constructs of reading.

##### **Pre-K – 3 Progress Monitoring and Data Informed Supports. (\$20,000,000;)**

The interruption of instructional services and the period of distance learning caused by COVID-19 will likely disproportionately impact the most vulnerable students. The recovery plan must include robust progress monitoring and data-informed supports to ensure that students do not fall behind. FDOE has provided LEAs with subgrants for the following activities:

- Invest in building the capacity of districts and schools to use screening and progress monitoring data to drive informed teaching practices and curriculum decisions. Invest in a screening and progress monitoring assessment with LEAs.
- Data share to help leverage student data and deployment of professional development to drive improvements.
- Provision of a data science budget, including a dedicated project manager.

In addition, FDOE is procuring services for modernizing the student and staff data collection systems with the ability to serve all school districts and public charter schools, Pre-Kindergarten through 12th grade, for the purposes of improving data quality for state and federal funding accountability and reporting requirements, longitudinal analysis, interactive dashboards, and transparency.

**Upskill Highly Effective Reading Coaches. (\$5,000,000)**

To support effective recovery efforts, the FDOE will assist LEAs in providing training and professional development for up to 2,000 highly effective reading coaches. FDOE will deploy a proven model for building reading coach effectiveness, accountability and empowerment to ensure teachers in every classroom build the skills needed to deliver scientifically based reading instructional strategies. This will involve engaging a research and evidence-based approach to coaching, grounded in the science of reading. Literacy Coach Definitions, domains and standards were developed which guide the development of the training. This training will result in a literacy coach credential designated on the educators' certificate.

**Capacity Building for Reading. (\$5,747,241)**

To support effective recovery efforts, the FDOE will deploy resources statewide that ensure the effective delivery of high-quality, evidence-informed reading instruction for any students identified in need at all grade levels. This would include providing professional development for teachers delivering reading instruction at all grade levels with these teachers attaining a reading endorsement. Two new high-quality state pathways reading endorsement pathways were established, offering over 5,000 educators a high-quality state option to earn the reading endorsement, ensuring educators have the knowledge and skill to teach all students to read.

**Ensuring High Quality Regional Supports. (\$4,252,758)**

To support effective recovery efforts, the FDOE will deploy Regional Support Teams that engage cross-divisional experts (Reading, ESE, etc.) that support and reinforce the professional development and coaching models being deployed statewide, while focusing efforts locally within the regions with support and oversight to ensure fidelity with implementation. These positions will be trained on implementation science, the strategies and practices being deployed during the training of the coaches and teachers. These positions will be trained to monitor district-level, school-level, and classroom-level data from the progress monitoring tool to help deploy additional professional development and interventions when needed with urgency and fast response. Services provided by these regional consultants will be for the shared benefit of all schools in the districts, traditional public, public charter and private schools.

**SAT/ACT. (\$8,000,964)**

COVID-19 interrupted the administration of college entry examinations (the SAT and the ACT), which adversely impacted the ability of students to articulate to colleges and universities and to receive scholarships for which they may have been eligible. To respond to this situation, the FDOE provided the SAT or ACT to students for free in 2020-21.

**Instructional Continuity Plans. (\$7,939,948)**

The FDOE provided grants to LEAs to support the development and deployment of Instructional Continuity Plans. The Instructional Continuity Plans include the LEA's plan for implementing distance learning in the event of unanticipated campus closures for an extended period of time. An overview training was held virtually in July, and four face-to-face trainings were held regionally in August. Teams from each district representing the areas of academics, operations, communications and technology attended these professional learning opportunities to ensure the effective development and submission of high-quality plans.

**Virtual Safety Net. (\$5,250,000)**

The FDOE provided a grant to the Florida Virtual School (FLVS), Florida's statewide, public virtual school to help provide a virtual safety net to enhance FLVS's learning management system and to increase FLVS capacity to serve additional students.

In addition, FLVS provided a 6-hour Virtual Teacher Training course that was made available to every public-school teacher in Florida. Teachers who took this course are prepared to instruct through any school district's FLVS franchise.

**Administrative Costs for Administration of the ESSER I Grant. (\$917,893)**

**GEER I (CARES ACT)**

All of the state's GEER I allocation has been awarded or encumbered through contract, as follows:

**Academic Acceleration (Extended Day and Year Recovery Efforts). (\$63,450,689)**

The FDOE provided grants to LEAs for early recovery efforts in summer and early fall 2020, to target students who have been disconnected or hard to reach via distance learning and Grades K-5 students identified with a substantial deficiency in reading this program has been extended through summer 2021.

**Prevention and Response. (\$10,672,137)**

The FDOE provided grants to LEAs to provide funding to public schools to support the cleaning regimen necessary to create a healthier learning environment for students, teachers and staff. In addition, funds may be used for schools to maintain a supply of adequate cloth face coverings and supplies for cleaning and disinfecting, including hand sanitizer, bleach wipes and spray and other personal protective equipment (PPE). Districts could also purchase deep-cleaning equipment, such as electrostatic sprayers and COVID-19 test kits.

**Private School Stabilization. (\$15,000,000)**

FDOE provided a grant to a scholarship funding organization to provide subgrants to private schools serving low-income students, to assist those entities in responding to COVID-19 and continuing to operate.

**Career and Technical Education (CTE) Infrastructure. (\$10,726,799)**

FDOE provided grants to LEAs to provide resources to build infrastructure and increase enrollment and capacity in high-demand Career and Technical Education (CTE) programs. The aim of this funding is to accelerate students' readiness for work and/or immediate entry into an in-demand postsecondary CTE program.

**Ensuring the B.E.S.T. Curriculum for Civics. (\$3,993,659)** FDOE provided grants to LEAs to purchase books from the state's K-12 civic literacy booklist, which will provide resources for students to catch up on the standards, whether attending on-campus programs, or remote learning.

**Community Response to Education Needs. (\$1,000,000)**

FDOE provided a grant to the Urban League to support after-school programs for our most vulnerable students.

**Civic Literacy. (\$1,000,000)**

FDOE provided grants to support the administration of the Florida Civics High School examination. It is noted that without additional supports, critical tools such as this examination could be lost.

**Telehealth. (\$2,000,000)**

FDOE provided grants to selected LEAs to support telehealth in school districts. Districts developed and submitted a plan to ensure more frequent access to mental health services by implementing innovative approaches that build capacity and enhance the mental health support for students and families. Two approaches were prioritized, including the hiring of mental health professionals as well as expanding contracts with mental health service providers, with a majority of this expansion to take place in the 2021-22 school year. The purpose of this funding is to enable schools and school districts with high student-to-staff ratios to develop the infrastructure necessary to respond to an increased need for mental health services and student support services, with a focus on enhancing access to school and community based providers in an effort to address non-academic barriers to success, which may be offered on site at schools or via telehealth services for Florida students. Examples of allowable endeavors through this funding opportunity include but are not limited to the costs associated with accessing additional school-based mental health services (hired professionals or contracted providers); costs associated with enhancing telehealth access; costs for services that are not covered by existing resources; equipment necessary to provide services; tele-health platforms that enhance districts' and schools' ability to serve students; and other innovative approaches that support student mental health.

**Guardian Program. (\$4,676,120)**

FDOE provided grants to sheriffs' offices to support the Coach Aaron Feis Guardian program. The Guardian program is designed to aid in the prevention or abatement of active assailant incidents on school premises. Florida sheriff's offices coordinate with Florida school districts to identify, screen, and train eligible individuals to act as school guardians. Guardians are required to provide a safe school campus to continue school operations while the state is responding to COVID-19.

**Charter School Funding Equity. (\$17,782,347)**

FDOE entered into contracts to charter schools to provide funding for increased enrollment in fall 2020, for which the charter school did not receive state FEFP funding, due to impacts COVID-19 had on the state funding formula.

**Postsecondary Rapid Credentials Initiative (\$34,813,329)**

FDOE provided grants to assist Florida College System (FCS) institutions and school district postsecondary technical centers in their ability to enroll and complete students in short-term, in-demand workforce/career and technical education (CTE) credentialing and certificate programs. Funds are directed to connecting those unemployed, underemployed, or furloughed with training in an in-demand area of the regional workforce board. Funds may be used to purchase necessary equipment, underwrite costs associated with administering in-demand non-credit industry certification preparation or clock hour career certificate programs or for-credit short-term CTE courses/programs.

### **Pathway to Job Market Dashboard (\$2,500,000)**

Through this initiative, FDOE seeks to develop a Pathway to Job Market Dashboard, which will be a technology platform that provides accurate quantitative data on Florida's CTE courses and programs, integrating labor market information so that students will have a viable route to well-paying jobs and careers in critical needs areas.

**Administrative Costs for Administration of the GEER I Grant.** (\$6,158,800).

### **ESSER II (CRRSA)**

**ESSER II Formula Grants to LEAs.** (\$2,820,490,851)

- Advance Lump Sum (\$847,774,548) - LEAs having 45 percent or less of their original ESSER (CARES Act) funds remaining as of April 22, 2021, were provided an immediate award of ESSER II funds on May 7, 2021, totaling \$847,774,548. This allocation ensured continued availability of funds. As of June 11, 2021, LEAs have spent \$120,249,588 of these funds.

The Florida Legislature appropriated the remainder of the ESSER Formula Grant Funds as follows:

- Non-Enrollment Assistance (\$112,329,220) – Each LEA must use a portion of its non-enrollment allocation to locate unaccounted students within the school district.
- Academic Acceleration (\$561,646,121) – Each LEA must use a portion of its academic acceleration allocation to remediate the learning loss among kindergarten through grade 12 students, including, but not limited to, students with disabilities, students experiencing homelessness, students who attended virtual classes or classes offered through an online learning environment during the 2020-21 school year, and children and youth in foster care.
- Technology Assistance (\$140,411,531) – The technology assistance allocation will be used by LEAs for the costs associated with purchasing educational technology, including hardware, software and connectivity, for students that aid in regular and substantive educational interaction between students and their classroom teacher, including low-income students and students with disabilities which may include assistive technology or adaptive equipment.
- Lump Sum (\$1,158,329,431) – Subject to a legislative budget amendment, LEAs will use the balance of the formula grant for any allowable purpose under CRRSA.

### **State Discretionary (\$297,718,479)**

The Florida Legislature appropriated the state discretionary portion of ESSER II as follows:

**Emergency Needs of the SEA (\$36,377,873)** – Through this appropriation, the Legislature determined that certain operational expenses of the FDOE for FY 2021-22 are emergency needs in response to COVID-19, including salaries, contracted services, and assessments.

**Progress Monitoring Assessments for Grades PK-8 (\$15,500,000)**

Through this initiative, the state will support a coordinated screening and progress monitoring program for students in Voluntary Pre-Kindergarten through Grade 8 by securing and implementing a common progress monitoring assessment.

**Student Literacy (\$6,500,000)**

This initiative will provide comprehensive supports to improve literacy outcomes for all students. Such supports will include increased literacy training for teacher candidates and current educators, including school administrators.

**SEA Discretionary (\$239,340,606)** Additional initiatives are designed to address learning loss and close achievement gaps that have been exacerbated by the COVID-19 pandemic. These initiatives include:

- **The Civics Literacy Excellence Initiative.** Through this initiative, the state will promote student achievement in civics. Alongside reading and mathematics, proficiency in civics is crucial to student academic development, and it is necessary to take steps to ameliorate declines occurring during the COVID-19 pandemic and to ensure that adequate resources are available for a dynamic and robust program that engages students, given other demands of LEA resources during and in the aftermath of the pandemic. Through this initiative, the state will fund programs that support effective delivery of Civics instruction, aligned to the state's rigorous standards. In addition, the state will launch a pilot program to allow students to explore government and public administration and inspire the next generation of leaders.
- **Early Grades, High Quality Tutoring Initiative.** The COVID-19 pandemic adversely impacted our youngest students, by interrupting in-person instruction or, in some cases delaying entry into pre-school or kindergarten. Moreover, the importance of reading proficiency in the early years cannot be overstated. This initiative is intended to triage supports with the goal of closing gaps that have likely been exacerbated as a result of the pandemic.
- **Leading Literacy.** This initiative will focus on development for principals and assistant principals on effective practices for literacy and aligning professional development for school leaders to effectively implement ELA standards in alignment with the science of reading practices, ensuring that leaders support teachers and effective practices based on data.
- **Literacy Coach Boot Camps.** The state will host and deploy boot camps to upskill literacy coaches in alignment with the standards and professional practices integrated into the newly developed Literacy Coach endorsement. These boot camps will provide intensive, evidence-informed professional development so that these professionals can secure the competencies needed to effectively lead teacher teams at their schools focused on accelerating reading proficiency.
- **Progress Monitoring Data Collection and Analysis.** The FDOE will continue to provide to LEAs the progress monitoring tool funded under the CARES Act. This tool supports the data collection and analysis of progress monitoring data for grades K-8.
- **K-12 Workforce Education Supports.** The state will fund projects designed to position students to seamlessly articulate to college and high demand careers, including provision of a work-based learning platform to connect and manage student engagement with potential workforce partners to participate in experiential learning opportunities, supporting the Workforce Education and Innovation Center, integrating Career and technical Education Standards into CPALMS (Florida's online resource for educators and schools), and procurement of a career-planning tool for K-12 that integrates with existing and emerging systems in support of workforce education.

- P-Tech Incubator and Start-Up Initiative. Through this initiative, the state will provide funding for up to five P-Tech programs which align to high-priority, high-quality career pathways in partnership with a state college and an industry partner. These grants can support initial start-up costs for programs that will target low-income students, with a priority on first generation college students to enter a high-demand career pathway.
- Get There Faster and Dual Enrollment and Credentialing Opportunities for Vulnerable Students in Computer Science and IT Fields. This program will support the expansion of the Get There Faster initiative, with a focus on high-quality career dual enrollment offerings for Florida high school students. This initiative would also provide funding to support high-quality work-based learning opportunities and other supports that will ensure students success towards a high-demand, high-value credential. As part of this initiative, funding would be dedicated to support innovative dual enrollment and credentialing opportunities for high school students (low-income as priority) with a focus on serving areas of the state where data indicates lack of opportunities for students to achieve a high demand credentials in computer science or IT.
- Disaster Relief Payments. Through this initiative, the state supported disaster relief payments to full-time teachers and principals to reimburse them for expenses incurred as a result of the COVID-19 pandemic, and to promote instructional continuity.
- SAT/ACT Assessments. Through this initiative, the state will continue to support student efforts to help students recover from the impacts of COVID-19 by providing the SAT or ACT assessment at no cost to high school juniors.
- Career Planning Tool. The FDOE will procure a career planning tool for K-12 grades that integrates with existing and emerging systems in support of workforce education.
- Disqualification List Database. The FDOE will create an educator disqualification database that will assist in ensuring school safety.

#### **SEA Administrative Costs (\$15,669,394)**

#### **GEER II (CRRSA)**

The following initiatives are planned using GEER II funds:

- Open Door Grant Program. Through this initiative, funds will be provided to increase interest and enrollment in short-term, high-value career and technical education credentialing, certificate, and integrated education and training programs.
- Accelerating Cybersecurity and IT Postsecondary Pathways. This program will support regional collaborative efforts to address talent supply gap in cybersecurity or cyber-related occupations and careers. Grant funds will be used to increase capacity in cybersecurity, cyber-related and IT programs.
- Apprenticeships in Support of Accelerated Skilled Trades Pathways. Funds for this initiative will be deployed through grants to technical colleges and state colleges for the development, expansion and acceleration of high-quality, high-impact pre-apprenticeship and apprenticeship programs that target high demand, credentialed professionals to support the workforce needs of Florida. Key targeted industry professional pathways would focus on trades such as HVAC, aircraft repair, construction trades, and similar disciplines.

- Credential Exchange and Digital Credentialing System. This initiative will support seamless articulation and instructional continuity by replacing the Florida Automated System for Transferring Educational Records (FASTER) application with a new solution to help state and local education agencies receive, manage, display, and transmit education and credentialing data. It also would permit the creation of new verifiable and interoperable credentials that are essential for Florida’s economic prosperity. The system would replace outdated technology for the secure exchange of student records among public educational institutions and add new functionality to permit residents to access and transmit their credentials to institutions or employers in a verified format.
- REACH Opportunity Platform – Real Time Labor Market Analytics. This funding will support licenses for shared, inter-agency use of a business intelligence and data analytics solution. The aim of the solution is to visualize the performance of all of the state’s workforce programs, measuring supply against real-time demand.

Administrative costs for GEER II.

- ii. **To what extent ESSER I and ESSER II funds have been awarded to LEAs and, if funds have not yet been made available to LEAs, when they will be. In addition, please provide any available information on the total dollar amounts of ESSER I and ESSER II funds that have been obligated but not expended by the SEA and its LEAs, including whether the SEA is able to track LEA obligations.**

All applicable ESSER I funds have been awarded to LEAs. As of October 5, 2021, over 65 percent of the ESSER II formula grant funds have been awarded and are available to LEAs. Of the balance remaining, all applications that have been submitted have been reviewed by FDOE staff and are either in process for the issuance of the award, pending questions with the LEA or are pending legislative review. In addition, we do have a small number of LEAs that have not yet submitted their applications. Awards will be made expeditiously upon submission of the application or response to pending inquiries. The FDOE is not able to track LEA encumbrances.

- iii. **In supporting LEAs as they plan for the safe return to and continuity of in-person instruction and for meeting the academic, social, emotional, and mental health needs of students resulting from the COVID-19 pandemic, the extent to which the SEA is also using other Federal funding sources including but not limited to under the Elementary and Secondary Education Act of 1965 (“ESEA”), IDEA, Workforce Innovation and Opportunity Act (“WIOA”), funding for child nutrition services, and McKinney-Vento Homeless Assistance Act, and the funds to support the**

**needs of students experiencing homelessness provided by section 2001(b)(1) of the ARP Act.<sup>4</sup>**

The FDOE has implemented the full flexibility offered by waivers from the U.S. Department of Education for LEAs to support students and staff in their return to in-person instruction for ESSA, IDEA and Perkins fund sources. The FDOE has provided guidance and training on flexibilities under these programs to support LEAs prudent use of funds for effective and efficient planning and implementation. The FDOE has provided guidance on how LEAs may leverage different fund sources to address the needs of students that have arisen during the pandemic.

**D. Maximizing State-Level Funds to Support Students**

**The Department recognizes that States have an extraordinary opportunity to address the disproportionate impact of the COVID-19 pandemic on underserved students through the ARP Act’s required State set-asides to address the academic impact of lost instructional time, provide summer learning and enrichment programs, and provide comprehensive afterschool programs. In this section, SEAs will describe their evidence-based strategies for these resources.**

1. **Academic Impact of Lost Instructional Time: Describe how the SEA will use the funds it reserves under section 2001(f)(1) of the ARP Act (totaling not less than 5 percent of the State’s total allocation of ARP ESSER funds) on evidence-based interventions to address the academic impact of lost instructional time by supporting the implementation of evidence-based interventions, such as summer learning or summer enrichment, extended day, comprehensive afterschool programs, or extended school year programs, and ensure that such interventions respond to students’ academic, social, emotional, and mental health needs. The description must include:**
  - i. **A description of the evidence-based interventions (e.g., providing intensive or high-dosage tutoring, accelerating learning) the SEA has selected, and the extent to which the SEA will evaluate the impact of those interventions on an ongoing basis to understand if they are working;**

Florida will implement the following interventions, which will be evaluated through contract deliverables and student data.

Early Grade-Level, High-Quality Tutoring Initiative (2022-23 and 2023-24): This initiative will triage supports to students with the goal of closing gaps that have likely been exacerbated as a result of the pandemic. This intervention is intended to be deployed at scale for no more than two years with these funds and a focus on closing early grade level gaps. The FDOE will identify and determine tutoring models for development and implementation.

---

<sup>4</sup> Please note that the needs of students experiencing homelessness must be addressed (along with the other groups disproportionately impacted by the COVID-19 pandemic) through the use of the ARP ESSER SEA reservations and the required LEA reservation for the academic impact of lost instructional time; the funding provided to support the needs of students experiencing homelessness by section 2001(b)(1) of the ARP Act is in addition to the supports and services provided with ARP ESSER funds.

High Impact Reading and Supports for Targeted Elementary Schools: This initiative will provide support for those schools with 50 percent or more of their students in grades 3, 4 and 5 scoring below proficiency. This program will:

- Focus on high quality reading strategies and professional development aligned to the science of reading;
- Ensure the provision of effective literacy coaches/experts;
- Ensure the implementation of evidence-based reading intervention curriculums as supplemental resources to close gaps; and
- Funding can also support targeted tutoring interventions for students in these schools by endorsed/certified reading teacher.

Regional Resiliency Teams: Through this initiative, Florida will support schools and districts with the implementation, coordination and delivery of evidence-based student support services in alignment with district's state-required Mental Health Assistance Allocation plans.

STEM Accelerator: Targeted efforts engaging experts in the field to develop state standards for computer science; effective and evidence-based practices for standards implementation; teacher, student, and parent resources; grants to support math acceleration; and grants to expand and enhance computer science credentials in high school aligned to workforce needs.

Targeted Professional Development and Support for Florida's Educators: This initiative will focus on providing evidence-based/research supported professional development and support for Florida educators with an intentional strategy aimed at closing achievement gaps.

**ii. How the evidence-based interventions will specifically address the disproportionate impact of COVID-19 on certain groups of students, including each of the student groups listed in question A.3.i.-viii. When possible, please indicate which data sources the SEA will use to determine the impact of lost instructional time; and**

Statewide assessment data showed a decrease in most grades and subjects statewide. It also showed achievement gaps widening among subgroups. These interventions are targeted to low-performing schools and/or students to address closing achievement gaps, and support the training and implementation of progress monitoring at the district level. Florida will use the progress monitoring dashboard BrightBytes to compile and analyze local and state data as compared to instructional modalities. It will also help determine the support needed based on achievement gaps.

The FDOE will use a variety of data sources to assist LEAs with determining where best to target resources to local groups of students who seem to have been most impacted by COVID-19. These will include progress monitoring data, as well as data from the student and staff data bases used to populate FDOE's Know Your Schools, EdStats, strategic plan, school grades, and VAM data visualization resources. After reviewing these data to determine which groups of students tended to have the steepest declines in on-grade-level-or-above performance on statewide standardized assessments and graduation rates, the largest increases in achievement gaps, the largest declines in learning gains, and the highest likelihood of attending a low performing school or receiving instruction from a low-performing teacher; the FDOE will work with each LEA to ensure resources are targeted appropriately.

- iii. **The extent to which the SEA will use funds it reserves to identify and engage 1) students who have missed the most in-person instruction during the 2019-2020 and 2020-2021 school years; and 2) students who did not consistently participate in remote instruction when offered during school building closures.**

The Reopening Plan and Spring Education Plan, as required by the FDOE, expected districts to transition remote students back to in-person learning if it was not working for that student according to progress monitoring formative assessment data.

Current regional teams will provide tiered support to districts and schools recognized as having the greatest need as identified by data triangulation with continuous progress monitoring and new 2021-22 statewide assessment results. This support includes training for district and school level leaders and teachers on the implementation of evidence-based strategies. New Resiliency Teams will be able to assist districts and schools in identifying and supporting students who did not participate in remote instruction and who are chronically absent, with a focus on deploying supports and interventions. The Resiliency Teams will help districts and partnering agencies to coordinate services in support of getting students on track to graduate and support instruction to target learning loss.

2. **Evidence-Based Summer Learning and Enrichment Programs: Describe how the SEA will use the funds it reserves under section 2001(f)(2) of the ARP Act (totaling not less than 1 percent of the State’s total allocation of ARP ESSER funds) for evidence-based summer learning and enrichment programs, including those that begin in Summer 2021, and ensure such programs respond to students’ academic, social, emotional, and mental health needs. The description must include:**
  - i. **A description of the evidence-based programs that address the academic, social, emotional, and mental health needs of students (e.g., providing intensive or high-dosage tutoring, accelerating learning) the SEA has selected, and the extent to which the SEA will evaluate the impact of those programs;**

Florida will leverage matching grants for LEAs, including charter schools, to operate high-quality, evidence-based summer learning programs with a focus on reading achievement. LEAs will be required to demonstrate how they are prioritizing students who have a substantial deficiency in reading, with demonstration of how they will identify and match evidence-based programs to accelerate learning. LEAs are encouraged to partner with organizations such as the Boys and Girls Clubs, the YMCA, All ProDads, the Urban League and other non-profits with proven expertise and documented results in supporting the acceleration of student achievement. LEAs will also be required to provide a summary of their plan to evaluate the effectiveness of the program and to incorporate feedback in a continuous improvement model.

- ii. **How the evidence-based programs will specifically address the disproportionate impact of COVID-19 on certain groups of students, including each of the student groups listed in question A.3. i.--viii. When possible, please indicate which data sources the SEA will use to identify**

**students most in need of summer learning and enrichment programs;  
and**

LEAs will be required to demonstrate how they are prioritizing students who have a substantial deficiency in reading, which will target resources to all students and subgroups disproportionately impacted by COVID-19. LEAs will use 2021 statewide annual cumulative assessment data as well as interim progress monitoring data to identify the most vulnerable students and evaluate the effectiveness of their interventions. LEAs will include in their plans how evidence-based programs and interventions will be identified, deployed and matched to address the unique and individual needs of students, as well as the processes for monitoring student progress and acceleration.

- iii. The extent to which the SEA will use funds it reserves to identify and engage 1) students who have missed the most in-person instruction during the 2019-2020 and 2020-2021 school years; and 2) students who did not consistently participate in remote instruction when offered during school building closures.**

Florida is using CRRSA funds to identify and re-engage students who failed to maintain enrollment following the pandemic. In addition, Florida has used CARES and CRRSA funds to invest in progress monitoring tools that will aid LEAs in identifying students who have incurred learning loss, and in gauging the effectiveness of interventions that the LEA employs. For ARP, Florida will build on these investments to ensure LEAs have the tools needed to strategically address learning loss for those students most impacted by COVID-19. For summer programs, LEAs will be required to use the available tools and data to demonstrate they are prioritizing those students exhibiting a substantial deficiency in Reading, which will target resources to those students with lasting learning loss due to missed in-person instruction and students who did not consistently participate in remote instruction during school closures.

- 3. Evidence-Based Comprehensive Afterschool Programs: Describe how the SEA will use the funds it reserves under section 2001(f)(3) of the ARP Act (totaling not less than 1 percent of the State’s total allocation of ARP ESSER funds) for evidence-based comprehensive afterschool programs (including, for example, before-school programming), and ensure such programs respond to students’ academic, social, emotional, and mental health needs. The description must include:**
  - i. A description of the evidence-based programs (e.g., including partnerships with community-based organizations) the SEA has selected, and the extent to which the SEA will evaluate the impact of those programs;**

Florida will leverage matching grants to fund high-quality, evidence-based after-school and weekend programs, using effective and highly effective teachers to support acceleration in literacy achievement. LEAs will be required to demonstrate how they are prioritizing closing achievement gaps. LEAs are encouraged to partner with organizations such as the Boys and Girls Clubs, the YMCA, All ProDads, the Urban League and other non-profits with proven expertise and documented results in supporting the acceleration of student achievement. Applicants will also be required to provide a summary of their plan to evaluate the effectiveness of the program and to incorporate feedback in a continuous

improvement model. As a component of this plan, LEAs will provide the evidence-based programs, strategies and interventions to be deployed with a focus on closing gaps by accelerating learning and monitoring individual student progress.

- ii. **How the evidence-based programs will specifically address the disproportionate impact of COVID-19 on certain groups of students, including each of the student groups listed in question A.3.i.-viii. When possible, please indicate which data sources the SEA will use to identify students most in need of comprehensive afterschool programming; and**

Applicants will be required to demonstrate how they are prioritizing closing achievement gaps. Applicants will use 2021 statewide annual cumulative assessment data as well as interim progress data to identify students most in need of comprehensive afterschool programming. Districts will assure that identified students will be supported through expanded learning such as weekends, before/afterschool tutoring, in alignment with locally selected evidence-based programs, interventions and proven practices. Additionally, the support services will include interventions for students with disabilities, English language learners and other identifies student groups.

- iii. **the extent to which the SEA will use funds it reserves to identify and engage 1) students who have missed the most in-person instruction during the 2019-2020 and 2020-2021 school years; and 2) students who did not consistently participate in remote instruction when offered during school building closures.**

For after-school programs, LEAs will be required to use the available progress monitoring tools and data to demonstrate they are prioritizing closing achievement gaps, which will target resources to those students with lasting learning loss due to missed in-person instruction and students who did not consistently participate in remote instruction during school closures.

- 4. **Emergency Needs: If the SEA plans to reserve funds for emergency needs under section 2001(f)(4) of the ARP Act to address issues responding to the COVID-19 pandemic, describe the anticipated use of those funds, including the extent to which these funds will build SEA and LEA capacity to ensure students' and staff's health and safety; to meet students' academic, social, emotional, and mental health needs; and to use ARP ESSER funds to implement evidence-based interventions.**

Based upon a request of Governor DeSantis, the Legislature appropriated funds in order to provide a \$1,000 disaster relief payment to full-time classroom teachers and principals to reimburse them for expenses incurred as a result of the COVID-19 pandemic, and to promote instructional continuity.

## E. Supporting LEAs in Planning for and Meeting Students' Needs

The Department recognizes that the safe return to in-person instruction must be accompanied by a focus on meeting students' academic, social, emotional, and mental health needs, and by addressing the opportunity gaps that existed before – and were exacerbated by – the pandemic. In this section, SEAs will describe how they will support their LEAs in developing high-quality plans for LEAs' use of ARP ESSER funds to achieve these objectives.

1. **LEA Plans for the Use of ARP ESSER Funds:** Describe what the SEA will require its LEAs to include in LEA plans consistent with the ARP ESSER requirements for the use of ARP ESSER funds, how the SEA will require such plans to be made available to the public, and the deadline by which the LEA must submit its ARP ESSER plan (which must be a reasonable timeline and should be within no later than 90 days after receiving its ARP ESSER allocation). The LEA plans must include, at a minimum:
  - i. The extent to which and how the funds will be used to implement prevention and mitigation strategies that are, to the greatest extent practicable, in line with the most recent CDC guidance, in order to continuously and safely operate schools for in-person learning;
  - ii. How the LEA will use the funds it reserves under section 2001(e)(1) of the ARP Act (totaling not less than 20 percent of the LEA's total allocation of ARP ESSER funds) to address the academic impact of lost instructional time through the implementation of evidence-based interventions, such as summer learning or summer enrichment, extended day, comprehensive afterschool programs, or extended school year programs;
  - iii. How the LEA will spend its remaining ARP ESSER funds consistent with section 2001(e)(2) of the ARP Act; and
  - iv. How the LEA will ensure that the interventions it implements, including but not limited to the interventions under section 2001(e)(1) of the ARP Act to address the academic impact of lost instructional time, will respond to the academic, social, emotional, and mental health needs of all students, and particularly those students disproportionately impacted by the COVID-19 pandemic, including students from low-income families, students of color, English learners, children with disabilities, students experiencing homelessness, children and youth in foster care, and migratory students.

LEAs shall complete an application and agree to all assurances no later than 90 days after receiving funds. The approval of the plan from the FDOE will be predicated on the fidelity to implement the plan. The four key areas of the proposed plan are two narrative descriptions of the proposed plan and two assurances:

1. **Prevention and Mitigation Strategies for Safe In-person Learning.** The district shall explain in detail a proposed plan with the following three components:

- a. Focus on closing achievement gaps, particularly those that likely have been exacerbated during the pandemic. Include the plan for additional instructional time including afterschool, weekends and/or summer programs.
- b. Target outreach for students who are performing either below grade level or demonstrating a decline on the district’s progress monitoring system for reading and mathematics, by grade level and by instructional model.
- c. Contact, provide notice and explain the need for intervention services to parents/guardians.

2. **Addressing Learning Loss (at least 20 percent of total allocation).** Of the total amount allocated to an LEA, the LEA must assure the reservation of at least 20 percent of the funds to address learning loss through the implementation of evidence-based interventions in alignment with summer learning or summer enrichment, extended day, comprehensive afterschool programs or extended school year programs, and ensure that those interventions respond to students’ social, emotional and academic needs and address the disproportionate impact of COVID-19 on underrepresented student subgroups (each major racial and ethnic group, children from low-income families, children with disabilities, English language learners, gender, migrant students, students experiencing homelessness and children and youth in foster care).

3. **Activities aligned are consistent with section 2001(e)(2) of the ARP Act.** The LEA shall assure that all proposed activities in the LEA plan will align to any activities authorized under the Elementary and Secondary Education Act, IDEA, Carl D. Perkins Career and Technical Education Act, and Adult Education and Family Literacy Act. ARP Act Section 2001(e)(2)(A) through Section 2001(e)(2)(D).

4. **Learning Loss.** The LEA shall explain in detail the plan to provide professional development and support to ensure teachers and leaders receive professional development regarding addressing learning loss among all students in all subgroups, including by:

- Administering high-quality, reliable assessments that can assess student academic progress and assist educators in meeting student needs, including by using differentiated instruction.
- Implementing evidence-based activities to meet the comprehensive needs of students.
- Providing information and assistance to parents and families on ways to support students.
- Tracking student performance and engagement in distance learning environments (ARP Act Section 2001(e)(2)(N)).

2. **LEA Consultation: Describe how the SEA will, in planning for the use of ARP ESSER funds, ensure that, consistent with the ARP ESSER requirements], its LEAs engage in meaningful consultation with stakeholders, including, but not limited to:**

- i. students;
- ii. families;
- iii. school and district administrators (including special education administrators); and
- iv. teachers, principals, school leaders, other educators, school staff, and their unions.

**The LEA must also engage in meaningful consultation with each of the following to the extent present in or served by the LEA:**

- i. Tribes;
- ii. civil rights organizations (including disability rights organizations); and

- iii. **stakeholders representing the interests of children with disabilities, English learners, children experiencing homelessness, children and youth in foster care, migratory students, children who are incarcerated, and other underserved students.**

**The description must also include how the SEA will ensure that LEAs provide the public the opportunity to provide input in the development of the LEA’s plan for the use of ARP ESSER funds and take such input into account.**

The FDOE will provide technical assistance regarding this requirement and will require an assurance in the application process specific to engaging in consultation with identified stakeholders in this section and will monitor as needed.

- 3. **Describe how the SEA will support and monitor its LEAs in using ARP ESSER funds. The description must include:**

- i. **How the SEA will support and monitor its LEAs’ implementation of evidence-based interventions that respond to students’ academic, social, emotional, and mental health needs, such as through summer learning or summer enrichment, extended day, comprehensive afterschool programs, or extended school year programs – including the extent to which the SEA will collect evidence of the effectiveness of interventions employed;**

Florida has invested in progress monitoring tools and regional support teams to support LEAs in implementing evidenced-based initiatives. The FDOE will require LEAs to utilize these tools to evaluate and report on the effectiveness of their interventions. In addition, the state’s annual cumulative assessments and accountability system provides a framework within which the overall effectiveness of LEA efforts to address learning loss can be determined along with the robust progress monitoring system that is in real time. The Florida Center for Reading Research assists FDOE in staying current on evidence-based interventions and programs, as well as program training to district and school based leadership. The regional teams will support implementation and monitoring of evidence-based interventions and tier supports based on evidence of the statewide assessment data, the progress monitoring data, the initiatives outlined in the district Reading Plan and the school specific Schoolwide Improvement Plan (SIP). In the SIP, specific Areas of Focus are identified as well as the evidence-based intervention. Data will then support if the intervention worked and a mid-year monitoring check will allow the district and school leadership teams to reflect and alter if needed the intervention cycle and monitoring mechanisms.

- ii. **How the SEA will support and monitor its LEAs in specifically addressing the disproportionate impact of the COVID-19 pandemic on certain groups of students, including each of the student groups listed in question A.3.i.-viii; and**

Florida has invested in progress monitoring tools and regional support teams to support LEAs in identifying and addressing learning loss among all students. In addition, the state’s annual cumulative assessments and accountability system provide a framework within which the overall effectiveness of LEA efforts to address learning loss can be determined. The state’s strategic plan contains goals and

metrics aimed at increasing student achievement for all students, as well as subgroups, and closing achievement gaps.

- iii. How the SEA will support and monitor its LEAs in using ARP ESSER funds to identify, reengage, and support students most likely to have experienced the impact of lost instructional time on student learning, such as:**
- **Students who have missed the most in-person instruction during the 2019-2020 and 2020-2021 school years;**
  - **Students who did not consistently participate in remote instruction when offered during school building closures; and**
  - **Students most at-risk of dropping out of school.**

Florida will utilize the progress monitoring tools and regional support teams to identify and address learning loss among students. In addition, the state’s annual cumulative assessments and accountability system provide a framework within which the overall effectiveness of LEA efforts to address learning loss can be determined.

- 4. Describe the extent to which the SEA will support its LEAs in implementing additional strategies for taking educational equity into account in expending ARP ESSER funds, including but not limited to:**
- i. Allocating funding both to schools and for districtwide activities based on student need, and**
  - ii. Implementing an equitable and inclusive return to in-person instruction. An inclusive return to in-person instruction includes, but is not limited to, establishing policies and practices that avoid the over-use of exclusionary discipline measures (including in- and out-of-school suspensions) and creating a positive and supportive learning environment for all students.**

Florida’s LEAs will have flexibility to determine local needs and ensure educational equity. Florida offered face-to-face instruction options for all students during the 2020-21 school year. The LEAs were required by law to provide the full array of educational services so that families who wish to educate their children in a brick-and-mortar school had the opportunity to do so. These services included in-person instruction, specialized instruction for students with an Individual Educational Plan and those services required for vulnerable populations, such as students from low-income families, students of migrant workers, students who are homeless, students with disabilities, students in foster care, and students who are English language learners. An assurance was outlined in the 2020-21 Reopening Plan.

## F. Supporting the Educator Workforce

The Department recognizes the toll that the COVID-19 pandemic has taken on the Nation’s educators as well as students. In this section, SEAs will describe strategies for supporting and stabilizing the educator workforce and for making staffing decisions that will support students’ academic, social, emotional, and mental health needs.

### 1. Supporting and Stabilizing the Educator Workforce:

- i. Describe the extent to which the State is facing shortages of educators, education administration personnel, and other school personnel involved in safely reopening schools, and the extent to which they vary by region/type of school district and/or groups of educators (e.g., special educators and related services personnel and paraprofessionals; bilingual or English as a second language educators; science, technology, engineering, and math (“STEM”) educators; career and technical education (“CTE”) educators; early childhood educators). Cite specific data on shortages and needs where available.

*Complete the table below, changing or adding additional rows as needed, or provide a narrative description.*

The FDOE has been annually tracking the number of projected Day 1 vacancies reported by Florida school districts. The number of projected vacancies significantly declined in September 2020 compared to September 2019 despite more districts reporting. FDOE will continue to track this information perennially.

Projected vacancies for following academic year:

Reporting Year	Projected Vacancies for the next school year	# of Districts Reported
2020-21	7691	70
2019-20	9256	69
2018-19	8972	62

The critical teacher shortage areas for the 2021-22 school year are identified below. The shortage areas represent certification areas where substantial proportions of teachers who are not certified in the appropriate field are being hired to teach such courses, where significant vacancies exist and where postsecondary institutions do not produce enough graduates to meet the needs of Florida's K-12 student population. This information can be used to determine the current and projected needs of classroom teachers for specific subject areas in the upcoming school year.

- Science-General
- English
- Exceptional Student Education (ESE)
- Science-Physical
- Reading
- Technical Education
- Science-Earth & Space
- English for Speakers of Other Languages (ESOL)
- Math

Additional data and information can be found in the 2020-21 Critical Teacher Shortage Report located at: <http://www.fldoe.org/core/fileparse.php/7766/urlt/CTSA2122.pdf>.

In support of elevating and celebrating teachers and the field of education, Florida made historic investments in raising the minimum teacher salary for the 2020-21 fiscal year. Florida's leadership committed and invested \$500 million in state funds to raise minimum salaries to an average of \$47,500. In building on this commitment, an additional \$50 million was added to this effort for the 2021-22 fiscal year so that Florida can retain and recruit the most effective educators in the nation, which ultimately will ensure Florida's students continue to have access to a world class education. State-led initiatives like these, in conjunction with other strategies discussed in the following sections are expected to help mitigate the impacts of possible teacher shortages.

- ii. Describe how the SEA will assist its LEAs in identifying the most urgent areas of shortages or potential shortages, with particular plans for individual LEAs facing the most significant needs (e.g., by avoiding layoffs, providing high-quality professional learning opportunities, and addressing the impact of stress or trauma on educators). Include a description of how other Federal COVID-19 funding (e.g., ESSER and GEER funds under the CARES Act and CRRSA Act) have already been used to avoid layoffs during the COVID-19 pandemic.**

The FDOE will collect additional data at the start of the 2021-22 school year, evaluate the needs of Florida school districts and will support districts that have urgent needs. We have connected school districts with teacher candidates who are searching for jobs in order to fill vacancies and will continue to support those connections moving forward. We are reviewing the annual production number of teacher preparation programs to identify trends of the number of graduates and the placement rate of these graduates and will continue to encourage strong partnerships between teacher preparation programs and school districts. To that end, we have reinforced on-going collaboration between FDOE and the Florida Association of Colleges of Teacher Education (FACTE).

- iii. **Describe the actions the SEA will take to fill anticipated gaps in certified teachers for the start of the 2021-2022 school year and to what extent the SEA will further support its LEAs in expanding the educator pipeline and educator diversity while addressing the immediate needs of students disproportionately impacted by the pandemic (e.g., recruiting teaching candidates to provide high-dosage tutoring or implementing residencies for teacher candidates).**

Florida expects to utilize existing and emerging initiatives that support the recruitment and preparation of high-quality teachers that meet the needs of Florida's schools. These initiatives include:

Teacher Salary Increase Allocation:

During the 2020 Legislative Session, Governor DeSantis and legislative partners secured the Teacher Salary Increase Allocation and funded the allocation with \$500 million. The new statute and funding raised the minimum pay in each school district to at least \$47,500 or to the maximum achievable based on each district's allocation. In the 2021 Legislative Session, this allocation was increased to \$550 million, an increase of \$50 million, to continue increasing the teacher minimum base salary, as well as salary increases for veteran teachers and other eligible instructional personnel. It is a very powerful recruitment tool.

Florida Future Educators of America:

Florida Future Educators of America (FFEA) continues to be a longstanding initiative that focuses on the Grow Your Own pipeline and elevates and celebrates the teaching profession to high school students. The program provides a forum for students to become aware of career opportunities in education and nurtures their interest in teaching as a career. FFEA is administered through local school chapters at all grade levels - elementary through postsecondary.

Job Fairs:

The Great Florida Teach-In is an annual job fair organized by the FDOE. It provides a convenient forum that enables certified teachers seeking employment in Florida to obtain interviews with Florida school district and Florida charter school personnel responsible for hiring teachers. FDOE also connects school districts with teacher candidates who are interested in teaching in Florida and posts district job fair information on the FDOE website.

Teacher Preparation Audit and Review:

Florida is preparing to engage in an audit and review of Florida's teacher preparation landscape. The purpose of the teacher preparation audit and review is take a deep dive into Florida's preparation programs and evaluate the following metrics:

- An analysis of Florida's state-approved teacher preparation programs to understand if they are currently meeting the demands of Florida's public schools.
- An analysis of Florida's state-approved teacher preparation programs to understand their impact on the production of quality teachers.
- An analysis of Florida's teacher preparation accountability system to ensure metrics identify strengths and opportunities for programs to improve.
- A review to determine and reevaluate the impact of the initial and continued approval processes for Florida's state approved teacher preparation programs.

Teacher Pipeline/Grow Your Own Initiative:

FDOE is focused on enhancing the Principals of Teaching CTE framework to align with the professional education examination. The goal is to have a meaningful credential that supports high school students in their pursuit of a career in education. The development of a new CTE pathway for high school students supports the Grow Your Own pipeline in districts.

2. **Staffing to Support Student Needs:** Describe the extent to which the SEA has developed or will develop strategies and will support its LEAs in increasing student access to key support staff within school buildings, including school counselors, special education personnel, nurses, social workers, and psychologists (e.g. hiring additional personnel or freeing up these staff to focus on providing services to students).

Districts receive a state-appropriated Mental Health Assistance Allocation to increase the amount of services provided to students and families. Florida has prioritized support for mental health services to students, as the state appropriation for the Mental Health Assistance Allocation has increased from \$75 million in 2019-20, to \$100 million in 2020-21 and again to \$120 million for 2021-22. Each district is required per s. 1011.62, F.S., to establish policies and procedures to increase the amount of time student service personnel spend providing direct mental health services. These policies and procedures are included in the mental health allocation application that is review by the SEA. The Bureau of Student Support Services consultants also provide continuous support, guidance and technical assistance that helps districts implement effective and efficient practices that allow school-based mental health service providers more time to identify mental health issues and connect children youth and families with appropriate services.

Florida’s ARP proposal includes six regional teams to support schools/districts with the implementation, coordination and delivery of evidence-based support services in alignment with districts’ Mental Health Assistance Allocation plans. Each team will consist of a school social worker, school counselor and school psychologist.

**G. Monitoring and Measuring Progress**

**The Department recognizes that transparency on how ARP ESSER funds are used and their impact on the Nation’s education system is a fundamental responsibility of Federal, State, and local government. In this section, SEAs will describe how they are building capacity at the SEA and LEA levels to ensure high-quality data collection and reporting and to safeguard funds for their intended purposes.**

1. **Capacity for Data Collection and Reporting:** It is important for an SEA to continuously monitor progress and make adjustments to its strategies, as well as to support its LEAs in making adjustments to LEA strategies, based on impact. Describe how the SEA will ensure its capacity and the capacity of its LEAs to collect data on reporting requirements, including but not limited to the examples of reporting requirements described in the SEA’s Grant Award Notification (listed in Appendix B). Describe the SEA’s capacity and strategy to collect data from its LEAs (disaggregated by student group, where applicable), to the greatest extent practicable, including any steps the

**SEA will take to build its capacity in the future (which may include the use of ARP ESSER and other Federal COVID-19 pandemic funds at the SEA and LEA levels), on issues that may include the following:**

- i. Student learning, including the academic impact of lost instructional time during the COVID-19 pandemic;**
- ii. Opportunity to learn measures (e.g., chronic absenteeism; student engagement; use of exclusionary discipline; access to and participation in advanced coursework; access to technology, including educator access to professional development on the effective use of technology; access to high-quality educators; access to school counselors, social workers, nurses, and school psychologists; and results from student, parent, and/or educator surveys);**
- iii. Fiscal data that is comparable across the State (e.g., per-pupil expenditures at the LEA and school levels);**
- iv. Jobs created and retained (by position type);**
- v. Participation in programs funded by ARP ESSER resources (e.g., summer and afterschool programs); and**
- vi. Other reporting requirements reasonably required by the Secretary (please refer to Appendix B of this template; final requirements will be issued separately).**

In Florida, each school district is required to maintain an automated information system that is part of, and compatible with, the statewide Comprehensive Management Information System maintained by FDOE. The Comprehensive Management Information System contains detailed data about student, staff and finance information collected through a survey process at different points throughout the school year with point-in-time information, and an end-of-year survey with full-year information. Annually, this information is also stored in our education data warehouse and used to support data reporting and data-driven decision-making within our state. However, throughout the pandemic, FDOE has and continues to implement strategies with LEAs for guiding policy and resource decisions through high quality data collection and reporting. Under the Reopening Florida's Schools and the CARES Act plan, there were funds allocated for FDOE to procure services for a modernized cloud-based statewide data collection and student information system. That system will have the ability to serve all school districts and public charter schools, Pre-K through 12th grade, for the purposes of data collection, longitudinal analysis and progress monitoring, and also all state and federal funding accountability and reporting requirements. The system will allow districts and schools to use the state's student information system as their own, at their discretion. This funding is intended to help state and LEAs collect and manage education data beyond our point-in-time survey process. It aims to implement data management activities (e.g., real-time data collections) intended to minimize the impact of an event; leverage cloud-based identity and access management tools that school districts can utilize with their current environment; standardize user interface that is used to collect information from school districts; and enhance the access controls around student data while at rest and/or in transit; FDOE also provided LEAs with data science funding with the agreement that county school districts would use these funds for the benefit of all schools in the district, including traditional public, public charter and private schools. The purpose of this funding is to provide resources in the form of a Data Scientist position for using and analyzing data to improve schools and student outcomes. School districts across Florida are generating an unprecedented amount of data through progress monitoring tools, student support services, school improvement and innovated instructional models during this pandemic. Therefore, this

funding is aimed to leverage information for making data-driven decisions during these extraordinary times. Finally, FDOE expanded its ability to gauge students' progress during the pandemic through analyzing mathematics and ELA Progress Monitoring Data within an interactive dashboard. FDOE contracted with a vendor to collect Progress Monitoring Data from school districts three times a year and integrated the data within an interactive dashboard. This tool currently provides in-depth views of students' performance over time at the school, student and sub-group levels. Furthermore, educational stakeholders in Florida are able to leverage this tool to easily identify learning gaps and adjust learning strategies for K-12 students within our education system.

2. **Monitoring and Internal Controls: Describe how the SEA will implement appropriate fiscal monitoring of and internal controls for the ARP ESSER funds (e.g., by updating the SEA's plan for monitoring funds and internal controls under the CARES and CRRSA Acts; addressing potential sources of waste, fraud, and abuse; conducting random audits; or other tools). In this response, please describe the SEA's current capacity to monitor ARP ESSER; steps, if needed, to increase capacity; and any foreseeable gaps in capacity, including how the SEA will provide its LEAs with technical assistance in the anticipated areas of greatest need.**

Monitoring begins with the application process. FDOE will review applications and proposed budgets to ensure that proposed expenditures are reasonable, allowable and necessary. FDOE will also identify LEAs or other subgrantees for monitoring based upon a risk assessment. The monitoring will include compliance with both programmatic and fiscal requirements. At the end of each grant, the recipient submits a final disbursement report that is reviewed to ensure that expenditures aligned with approved budgets. In addition, those recipients meeting the threshold will be required to undergo a federal single audit, and the FDOE will resolve any findings identified on such an audit.

Funds will be made available to recipients via the secure online Florida Grants System, FLAGS. Recipients will be allowed to request advance cash as needed for immediate requirements to carry out the purpose of the program. Federal cash on hand must not exceed the lesser of \$50,000 or 10 percent of the approved allocated award and recipients must not have federal cash on hand for more than three working days. Recipients may report expenditures daily as they occur. System controls are in place that will not allow a recipient to request cash draws for a specific project that would increase the cash on hand over the lesser of \$50,000 or 10 percent of the project allocation award. Reported expenditures are reconciled against the approved budget. Any discrepancies are immediately addressed with the program manager. Final project disbursement reports must be submitted with a signature by the chief financial officer and must include detail to support the expenditures. If the expenditure total is less than the cash advances/draws, the recipient must issue a refund to FDOE.

Recipients are required to maintain records of program activities and financial expenditures and any other documentation necessary for pre or post audit review.

**Appendix A: School Operating Status and Instructional Mode Data Template**

Indicate the date or time period represented by the following data.

[Click here to enter text.](#)

**Table 1**

In the most recent time period available, how many schools in your State offered each mode of instruction or learning model described below? Each row should account for all schools in your State, so that, for each row, the sum of the numbers in the “offered to all students,” “offered to some students,” and “not offered” columns is equal to the number in the “all schools” column.

*Add or change rows as needed*

<b>Number of schools</b>	<b>All schools</b>	<b>Offered to all students</b>	<b>Offered to some students</b>	<b>Not offered</b>
Remote or online only	#	#	#	#
School buildings open with both remote/online and in-person instruction (hybrid)	#	#	#	#
School buildings open with full-time in-person instruction	#	#	#	#

To the extent data are available, please complete the above table for 1) all schools in the State, and 2) separately for each instructional level (e.g., pre-kindergarten/elementary schools, middle schools, high schools).

**See Attached Appendix A, Table 1 Mode of Instruction chart.**

**Table 2**

In the most recent time period available, what was the enrollment and mode of instruction for the schools in your State?

Add or change rows as needed

<b>Number of students</b>	<b>Total enrollment</b>	<b>Remote or online only</b>	<b>Both remote/online and in-person instruction (hybrid)</b>	<b>Full-time in-person instruction</b>
Students from low-income families	#	#	#	#
White, not Hispanic	#	#	#	#
Black or African American, not Hispanic	#	#	#	#
Hispanic, of any race	#	#	#	#
Asian, not Hispanic	#	#	#	#
American Indian or Alaskan Native, not Hispanic	#	#	#	#
Native Hawaiian or Pacific Islander, not Hispanic	#	#	#	#
Two or more races, not Hispanic	#	#	#	#
Race/Ethnicity information not available	#	#	#	#
English learners	#	#	#	#
Children with disabilities	#	#	#	#

<b>Number of students</b>	<b>Total enrollment</b>	<b>Remote or online only</b>	<b>Both remote/online and in-person instruction (hybrid)</b>	<b>Full-time in-person instruction</b>
Students experiencing homelessness	#	#	#	#
Children and youth in foster care	#	#	#	#
Migratory students	#	#	#	#

**See Attached Appendix A, Table 2 Enrollment chart.**

**Appendix B: Reporting Language Included in the Grant Award Notification (“GAN”)**

As described in the Grant Award Notification (“GAN”), the SEA will comply with, and ensure that its LEAs comply with, all reporting requirements at such time and in such manner and containing such information as the Secretary may reasonably require, including on matters such as:

- How the State is developing strategies and implementing public health protocols including, to the greatest extent practicable, policies and plans in line with the CDC guidance related to mitigating COVID-19 in schools;
- Overall plans and policies related to State support for return to in-person instruction and maximizing in-person instruction time, including how funds will support a return to and maximize in-person instruction time, and advance equity and inclusivity in participation in in-person instruction;
- Data on each school’s mode of instruction (fully in-person, hybrid, and fully remote) and conditions;
- SEA and LEA uses of funds to meet students’ social, emotional, and academic needs, including through summer enrichment programming and other evidence-based interventions, and how they advance equity for underserved students;
- SEA and LEA uses of funds to sustain and support access to early childhood education programs;
- Impacts and outcomes (disaggregated by student subgroup) through use of ARP ESSER funding (e.g., quantitative and qualitative results of ARP ESSER funding, including on personnel, student learning, and budgeting at the school and district level);
- Student data (disaggregated by student subgroup) related to how the COVID-19 pandemic has affected instruction and learning;
- Requirements under the Federal Financial Accountability Transparency Act (“FFATA”); and
- Additional reporting requirements as may be necessary to ensure accountability and transparency of ARP ESSER funds.

- **Appendix C: Assurances**

By signing this document, the SEA assures all of the following:

- The SEA will conduct all its operations so that no person shall be excluded from participation in, be denied the benefits of, or be subject to discrimination under the ARP ESSER program or activity based on race, color, national origin, which includes a person's limited English proficiency or English learner status and a person's actual or perceived shared ancestry or ethnic characteristics; sex; age; or disability. These non-discrimination obligations arise under Federal civil rights laws, including but not limited to Title VI of the Civil Rights Act of 1964, Title IX of the Education Amendments Act of 1972, section 504 of the Rehabilitation Act of 1973, and the Age Discrimination Act of 1975. In addition, the SEA must comply with all regulations, guidelines, and standards issued by the Department under any of these statutes;
- The SEA will comply with all ARP Act and other ARP ESSER requirements and all requirements of its Grant Award Notification, including but not limited to:
  - Complying with the maintenance of effort provision in section 2004(a)(1) of the ARP Act, absent a waiver by the Secretary pursuant to section 2004(a)(2) of the ARP Act; and
  - Complying with the maintenance of equity provisions in section 2004(b) of the ARP Act, and ensuring its LEAs comply with the maintenance of equity provision in section 2004(c) of the ARP Act (please note that the Department will provide additional guidance on maintenance of equity shortly);
- The SEA will allocate ARP ESSER funds to LEAs in an expedited and timely manner and, to the extent practicable, not later than 60 days after the SEA receives ARP ESSER funds (i.e., 60 days from the date the SEA receives each portion of its ARP ESSER funds). An SEA that is not able to allocate such funds within 60 days because it is not practicable (e.g., because of pre-existing State board approval requirements) will provide an explanation to the Department within 30 days of receiving each portion of its ARP ESSER funds (submitted via email to your Program Officer at [State].OESE@ed.gov (e.g., Alabama.OESE@ed.gov)), including a description of specific actions the SEA is taking to provide ARP ESSER funds to LEAs in an expedited and timely manner and the SEA's expected timeline for doing so;
- The SEA will implement evidence-based interventions as required under section 2001(f) of the ARP Act and ensure its LEAs implement evidence-based interventions, as required by section 2001(e)(1) of the ARP Act;
- The SEA will address the disproportionate impact of the COVID-19 pandemic on underserved students (i.e., students from low-income families, students from racial or ethnic groups (e.g., identifying disparities and focusing on underserved student groups by race or ethnicity), gender (e.g., identifying disparities and focusing on underserved student groups by gender), English learners, children with disabilities, students experiencing homelessness, children and youth in foster care, and migratory students), as required under section 2001(f) of the ARP Act, and ensure its LEAs address the disproportionate impact of the COVID-19 pandemic on underserved students (i.e., students from low-income families, students from racial or ethnic groups, gender, English learners, children with disabilities, students experiencing homelessness, children and youth in foster care, and migratory students), as required by section 2001(e)(1) of the ARP Act; and
- The SEA will provide to the Department: (1) the URL(s) where the public can readily find data on school operating status and (2) the URL(s) for the SEA and/or LEA websites where the public can find the LEA plans for a) the safe return to in-person instruction and continuity of services

required under section 2001(i) of the ARP Act, and b) use of ARP ESSER funds. SEAs should consider ensuring a standardized URL format in all cases (e.g., xxx.gov/COVIDplan).

### NOTICE TO ALL APPLICANTS

The purpose of this enclosure is to inform you about a new provision in the Department of Education's General Education Provisions Act ("GEPA") that applies to applicants for new grant awards under Department programs. This provision is Section 427 of GEPA, enacted as part of the Improving America's Schools Act of 1994 (Public Law (P.L.) 103-382).

#### To Whom Does This Provision Apply?

Section 427 of GEPA affects applicants for new grant awards under this program. **ALL APPLICANTS FOR NEW AWARDS MUST INCLUDE INFORMATION IN THEIR APPLICATIONS TO ADDRESS THIS NEW PROVISION IN ORDER TO RECEIVE FUNDING UNDER THIS PROGRAM.**

(If this program is a State-formula grant program, a State needs to provide this description only for projects or activities that it carries out with funds reserved for State-level uses. In addition, local school districts or other eligible applicants that apply to the State for funding need to provide this description in their applications to the State for funding. The State would be responsible for ensuring that the school district or other local entity has submitted a sufficient section 427 statement as described below.)

#### What Does This Provision Require?

Section 427 requires each applicant for funds (other than an individual person) to include in its application a description of the steps the applicant proposes to take to ensure equitable access to, and participation in, its Federally-assisted program for students, teachers, and other program beneficiaries with special needs. This provision allows applicants discretion in developing the required description. The statute

highlights six types of barriers that can impede equitable access or participation: gender, race, national origin, color, disability, or age. Based on local circumstances, you should determine whether these or other barriers may prevent your students, teachers, etc. from such access to, or participation in, the Federally-funded project or activity. The description in your application of steps to be taken to overcome these barriers need not be lengthy; you may provide a clear and succinct description of how you plan to address those barriers that are applicable to your circumstances. In addition, the information may be provided in a single narrative, or, if appropriate, may be discussed in connection with related topics in the application.

Section 427 is not intended to duplicate the requirements of civil rights statutes, but rather to ensure that, in designing their projects, applicants for Federal funds address equity concerns that may affect the ability of certain potential beneficiaries to fully participate in the project and to achieve high standards. Consistent with program requirements and its approved application, an applicant may use the Federal funds awarded to it to eliminate barriers it identifies.

#### What are Examples of How an Applicant Might Satisfy the Requirement of This Provision?

The following examples may help illustrate how an applicant may comply with Section 427.

- (1) An applicant that proposes to carry out an adult literacy project serving, among others, adults with limited English proficiency, might describe in its application how it intends to distribute a brochure about the proposed project to such potential participants in their native language.

(2) An applicant that proposes to develop instructional materials for classroom use might describe how it will make the materials available on audio tape or in braille for students who are blind.

(3) An applicant that proposes to carry out a model science program for secondary students and is concerned that girls may be less likely than boys to enroll in the course, might indicate how it intends to conduct "outreach" efforts to girls, to encourage their enrollment.

(4) An applicant that proposes a project to increase school safety might describe the special efforts it will take to address concerns of lesbian, gay, bisexual, and transgender students, and efforts to reach out to and involve the families of LGBT students.

We recognize that many applicants may already be implementing effective steps to ensure equity of access and participation in their grant programs, and we appreciate your cooperation in responding to the requirements of this provision.

[Click here to enter text.](#)

### Estimated Burden Statement for GEPA Requirements

According to the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless such collection displays a valid OMB control number. Public reporting burden for this collection of information is estimated to average 3 hours per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. The obligation to respond to this collection is required to obtain or retain benefit (Public Law 103-382). Send comments regarding the burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to the U.S. Department of Education, 400 Maryland Ave., SW, Washington, DC 20210-4537 or email [ICDocketMgr@ed.gov](mailto:ICDocketMgr@ed.gov) and reference the OMB Control Number 1894-0005.

## Mode of Instruction: Number of Schools Offering In-Person, Innovative, and Traditional Virtual Instruction 2020-21, Final Survey 3 (Spring)

All schools in Florida provided parents the option to send their students to school either in-person, in an innovative setting (e.g., remote/hybrid), or in a traditional virtual setting.

\*Active schools in the 2020-2021 school year with reported enrollment (Survey 3, February 2021); Schools with a "School Function Setting" of County Jail/State Prison, Department of Juvenile Justice (DJJ) and Hospital/Homebound, as reported by school districts on the Florida Master School ID file (MSID) are excluded from this total.

\*\*Virtual Instruction Programs (VIP) are operated through a contract with a provider that is approved by the Florida Department of Education under section 1002.45(2), F.S., The Florida Virtual School or a community college. These programs pre-dated the pandemic and per their purpose are exclusively virtual.

### All Schools

Number of Schools*	Survey 3 (Spring, February 2021)			
	All Schools	Offered to All Students	Offered to Some Students	Not Offered
Per Parental Choice, Instruction Available Either: (1) In-Person, (2) In an Innovative Setting (e.g., remote/hybrid), or (3) In a Traditional Virtual Setting	3,762	3,762	0	0
Instruction Provided through Florida's Virtual Instruction Programs	122	122	0	0

### Elementary Schools

Number of Schools*	Survey 3 (Spring, February 2021)			
	All Schools	Offered to All Students	Offered to Some Students	Not Offered
Per Parental Choice, Instruction Available Either: (1) In-Person, (2) In an Innovative Setting (e.g., remote/hybrid), or (3) In a Traditional Virtual Setting	1,887	1,887	0	0
Instruction Provided through Florida's Virtual Instruction Programs	12	12	0	0

## Mode of Instruction: Number of Schools Offering In-Person, Innovative, and Traditional Virtual Instruction 2020-21, Final Survey 3 (Spring)

### Middle Schools

Number of Schools*	Survey 3 (Spring, February 2021)			
	All Schools	Offered to All Students	Offered to Some Students	Not Offered
Per Parental Choice, Instruction Available Either: (1) In-Person, (2) In an Innovative Setting (e.g., remote/hybrid), or (3) In a Traditional Virtual Setting	573	573	0	0
Instruction Provided through Florida's Virtual Instruction Programs	1	1	0	0

### High Schools

Number of Schools*	Survey 3 (Spring, February 2021)			
	All Schools	Offered to All Students	Offered to Some Students	Not Offered
Per Parental Choice, Instruction Available Either: (1) In-Person, (2) In an Innovative Setting (e.g., remote/hybrid), or (3) In a Traditional Virtual Setting	726	726	0	0
Instruction Provided through Florida's Virtual Instruction Programs	29	29	0	0

### Combination Schools (e.g., K-8, K-12, other configurations)

Number of Schools*	Survey 3 (Spring, February 2021)			
	All Schools	Offered to All Students	Offered to Some Students	Not Offered
Per Parental Choice, Instruction Available Either: (1) In-Person, (2) In an Innovative Setting (e.g., remote/hybrid), or (3) In a Traditional Virtual Setting	576	576	0	0
Instruction Provided through Florida's Virtual Instruction Programs	80	80	0	0

### Mode of Instruction: Number of Schools by Percent of In-Person Enrollment 2020-21, Final Survey 3 (Spring)

All schools in Florida provided parents the option to send their students to school either in-person, in an innovative setting (e.g., remote/hybrid), or in a traditional virtual setting. These numbers reflect the count of schools by the percent of students receiving instruction in-person based on enrollment data reported by school districts in the spring (Survey 3, February).

\*Active Schools in the 2020-2021 school year with reported enrollment (Survey 3); Schools with a "School Function Setting" of County Jail/State Prison, Department of Juvenile Justice (DJJ) and Hospital/Homebound, as reported on the Florida Master School ID file (MSID) are excluded from this total.

\*\*Virtual Instruction Programs (VIP) are either statewide or district-based; these programs pre-dated the COVID-19 pandemic and per their purpose are exclusively virtual.

Based on Enrollment, Number of Schools by Percent of In-Person Instruction	All Schools		Elementary		Middle		High		Combination	
	#	%	#	%	#	%	#	%	#	%
Number of Schools Excluding VIP	3,762		1,887		573		726		576	
100%	277	7%	113	6%	20	3%	66	9%	78	14%
90% to 99%	548	15%	356	19%	53	9%	64	9%	75	13%
80% to 89%	778	21%	499	26%	105	18%	98	13%	76	13%
70% to 79%	630	17%	342	18%	98	17%	112	15%	78	14%
60% to 69%	506	13%	278	15%	67	12%	72	10%	89	15%
50% to 59%	427	11%	182	10%	80	14%	76	10%	89	15%
1% to 49%	570	15%	109	6%	145	25%	232	32%	84	15%
0%	26	1%	8	0%	5	1%	6	1%	7	1%

## Enrollment by Mode of Instruction by School 2020-21, Final Survey 3

All schools in Florida provided parents the option to send their students to school either in-person, in an innovative setting (e.g., remote/hybrid), or in a traditional virtual setting. These numbers reflect the count of schools by the percent of students receiving instruction in-person based on enrollment data reported by school districts in the spring (Survey 3, February).

\*To protect the privacy of individual students, data are not reported when the total number of students is less than 10. An asterisk (\*) appears when data are suppressed.

\*\*In the case where a student had more than one student location reported amongst all their courses, the following hierarchy was used: 1) Innovative (I), 2) Regular (Z), 3) Virtual Options (N, S, or T). Location of Student: <https://www.fldoe.org/core/fileparse.php/19879/urlt/2021-197241.pdf>. Additionally, this report uses standard school exclusions that exclude McKay (3518), Family Empowerment (3900), Contracted Residential Services (9045), and schools greater than 9900 from the overall enrollment counts.

\*\*\*Virtual Instruction Programs (VIP) are operated through a contract with a provider that is approved by the Florida Department of Education under section 1002.45(2), F.S., The Florida Virtual School or a community college. These programs pre-dated the pandemic and per their purpose are exclusively virtual.

**Enrollment by Demographics by Mode of Instruction  
2020-21, Final Survey 3  
State Summary**

In the case where a student had more than one student location reported amongst all their courses, the following hierarchy was used: 1) Innovative (I), 2) Regular (Z), 3) Virtual Options (N, S, or T). Location of Student: <https://www.fldoe.org/core/fileparse.php/19879/urlt/2021-197241.pdf>

This report uses standard school exclusions that exclude McKay (3518), Family Empowerment (3900), Contracted Residential Services (9045), and schools greater than 9900 from the overall enrollment counts.

The identification of children in foster care is based on 2019-20 data from the Florida Department of Children and Families (DCF) applied to 2020-21 enrollment data. Data will be updated once the 2020-21 DCF foster file is available.

# Reopening Florida's Schools and the CARES Act

---

Closing Achievement Gaps and  
Creating Safe Spaces for Learning

*“Together, we will get through this difficult time and emerge stronger than before.”*

*– Governor Ron DeSantis*

**Safe. Smart. Step-by-Step.**

# Utilizing This State Plan

- Part 1 This plan provides diverse insights on the connection between schools and the economy and their subsequent impacts on achievement gaps.
- Part 2 This plan provides health and instructional recommendations for reopening Florida’s schools, aligned to the executive direction of [Florida Governor Ron DeSantis](#), the Re-Open Florida Task Force’s [Safe. Smart. Step-by-Step. Plan](#), the Florida Department of Health (FDOH) and the Centers for Disease Control and Prevention (CDC). **Child care (early learning) programs, K-12 schools and postsecondary institutions should use this document as points to consider and implement with local context, and note that health related mitigations may need to adjust as Florida learns more about the impacts of COVID-19.**
- Part 3 This plan provides the Florida Department of Education’s (FDOE) implementation plan for the federal Coronavirus Aid, Relief, and Economic Security (CARES) Act’s education and child care related components. The plan includes potential opportunities to align FDOE-directed portions of the CARES Act with local education agencies’ (LEA) and postsecondary’s (institutions of higher education or IHE) controlled CARES Act funding.
- Part 4 This plan holds adequate reserve funds back for needs that may emerge closer to and during the 2020-2021 academic year.
- Appendix The appendices to this document contain page numbers and links to reopening strategies and resources referenced throughout Parts 2-3 of the document.
- Indicators Throughout much of the document, indicators on the top left or right of pages to specify whether the page’s content pertains to Child Care, K-12, IHEs or multiple levels of education.

*“Throughout this, two constants remain – keeping our education community safe and ensuring our students receive a first class education in Florida. And our default is to always show compassion and grace.”*

*– Commissioner Richard Corcoran*

## Introduction

# Theory of Action

1. Presume the reopening of school campuses, safely.
2. Open schools with a moral purpose – closing achievement gaps.
3. Florida can only hit its economic stride if schools are open.
4. To ensure safety, take a “dimmer switch” (step-by-step) approach rather than flip the light switch approach.

# Guiding Principles Since Inception of COVID-19

## Initial Response

1. Urgently transition Florida's schools to distance learning to give Florida's students the greatest access to the best education possible.
2. When confronting any difficult decision, always show compassion and grace.

## Recovery

1. Prepare our schools and programs to reopen safely and ready for success.
2. Eliminate achievement gaps, which have likely been exacerbated by this crisis.

# Indicators of Success

1. Keep Florida's entire education family safe and healthy.
2. Instill confidence in Floridians to return to school campuses safely and ready to succeed.
3. Focus on student-centered outcomes.
4. Elevate educators and equip them for success.
5. Enable parents of school-aged children to return to the workforce.
6. Increase Floridians' economic mobility and agility.
7. In all situations, show compassion and grace in decision-making.

*“Without education he lives within the narrow, dark, and grimy walls of ignorance. Education on the other hand, means emancipation; it means light and liberty. It means the uplifting of the soul of man into the glorious light of truth, the light only by which men can be free.”*

*– Frederick Douglass*

## **Part 1: The Impacts on Achievement Gaps**

## Prolonged School Closures Have Disproportionate Impacts

This is particularly challenging for Florida's public school students:

- ❑ 62.6% minority: 33.9% Hispanic; 21.9% Black.
- ❑ 62.7% live in low-income households.
- ❑ 14.1% have special needs (disabilities).
- ❑ 10.2% are English Language Learners (ELLs).

- ❑ **Poor and Marginalized** – The impacts of school closures are [disproportionately felt by the poor and marginalized](#).
- ❑ **Summer-Slide** – [According to the Collaborative for Student Growth, student “achievement typically slows or declines over the summer months,” and the disruption of COVID-19 has in effect lengthened their summer slide.](#)
- ❑ **Increases Stress on Health Care and First Responders** – [Obligating these professionals to address “increased child care obligations.” “The scale of prolonged school closures also directly contributes to behavioral fatigue for all of society.”](#)
- ❑ **Abuse in the Home** – [A recipe for domestic violence](#) and [increased risk of child abuse](#).
- ❑ **Mental Health and Substance Abuse Crises** – [Self-isolation has deep psychological impacts](#), including [increased alcohol abuse](#).
- ❑ **Disruption for Families** – [Puts stress on the regular routines of families and children](#).
- ❑ **Food Supply Chain Broken** – [Schools are also part of the food supply chain that has been bent and in some ways broken](#).

## Schools are Inherently Connected to Florida's Economy and Social Service Sectors

The Florida Council of 100's recent report on [The Impacts Of Prek-12 School Campus Closures](#) delves into the complex array of impacts that prolonged school closures can create.

- ❑ "Four weeks of school closure may have a 'significant impact on academic outcomes' and that **'losing one month of learning may prevent students from meeting grade level knowledge** and skill expectations."
- ❑ "According to Miami-Dade School District Superintendent Alberto Carvalho, it is possible that the most **at-risk students (e.g., living in poverty, having disabilities, learning English)** could see **'historic academic regression.'**"
- ❑ While Florida has been recognized nationally by Vice President Pence and U.S. Secretary of Education Betsy DeVos as a national model for its successful and urgently executed pivot to distance learning, **there are still gaps for many students and even teachers.**
- ❑ "Nearly two-thirds of employed parents of minor children in Florida say that **school closures and/or lack of childcare have either somewhat (41%) or greatly (23%) hurt their ability to fully perform their job** responsibilities during the pandemic."
- ❑ The impacts of prolonged closures are also disproportionately felt by working mothers. **"Mothers express greater levels of difficulty performing job responsibilities while juggling childcare:** 71% say that this has either somewhat (44%) or greatly (27%) hurt their job performance, compared with 44% of employed fathers who say so."

## Lower Wage Workers are Caught in-between the Forces of Business Closures and School Campus Closures

According to Brookings and the University of Chicago, only [“37 percent of U.S. jobs can be performed at home.”](#)

[Jobs in transportation, warehousing, construction, retail, agriculture, forestry, fishing and hunting and accommodation and food services are not friendly to teleworking.](#)

- ❑ For many, the impacts may force them to seek training and employment in an entirely different business sector. Florida’s educational institutions should be prepared to both help mitigate the economic impact and facilitate training in new career pathways for those seeking them.
- ❑ The [Strada Education Network’s survey of 8,000 adults](#) finds that (as of 5/20/20):
  - ❑ 62% of Americans worry about losing their job.
  - ❑ 55% of Americans have lost a job, income or hours.
  - ❑ 39% of those who lost their job believe they need more education to replace it.
  - ❑ 37% of those who lost their job would look to change careers.

## COVID-19 Will Likely Widen Achievement Gaps Without Significant Intervention

The new “subgroup” in education are those students without reliable access to a computer or internet, and those students will heavily overlap with other educational disadvantages experienced by students.

- ❑ [“Too many students in low-income and rural communities don’t have internet access:](#) 35% of low-income households with school-aged children don’t have high-speed internet; for moderate-income families it is 17%, and only 6% for middle-class and affluent families. When measured by race and ethnicity, **the gap is greater for African American and Hispanic families.”**
- ❑ April 17-19, 2020 survey data from the Bill & Melinda Gates Foundation found that **10.2% of Florida children do NOT have access to Internet during the day to support learning.**
- ❑ Postsecondary attendance will also be greatly impacted. [“Families who already feel an economic squeeze from the COVID-19 outbreak may not be able to budget the hundreds of dollars necessary for college acceptance deposits.”](#)
- ❑ [“Those who work with homeless students worry that the pandemic will have an outsized impact on many of them,](#) now and into the future.”
- ❑ [English Language Learners will often find themselves in a desert of access](#) to digital learning devices and the Internet.

## The Narrowing of Florida's Achievement Gaps was Already Slowing in Recent Years

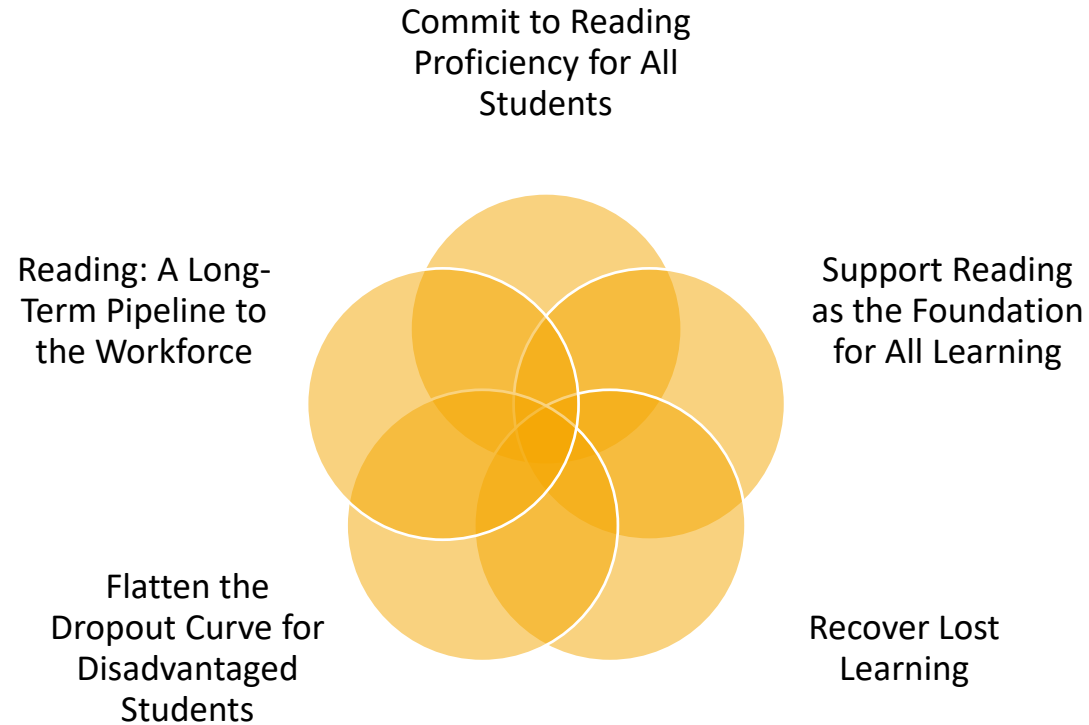

Educational achievement gap closure has been a great source of success for Florida since the late 1990s, and it is a hallmark of the State Board of Education (SBOE) and Florida Department of Education's (FDOE) [2020-2025 Strategic Plan](#), as revised November 2019 to reflect the vision of the DeSantis administration.

Assessment/Measure	Grade	Year	All Students	White/Black Gap	White/Hispanic Gap	Economic Gap
<b>Florida Reading/English Language Arts</b>						
FCAT Reading, Level 3 or Above	4	2002	55%	31%	21%	29%

## A Plan to Reopen and Close Achievement Gaps Must Prioritize Florida's Most Vulnerable Students

When FDOE implemented teleworking in response to COVID-19, it was a plan built around protecting FDOE's most vulnerable employees first, and the path to recovery for Florida's students should be the same.

- ❑ “Lessons from seasonal learning research present us with a moral imperative: to help students succeed academically, [we must provide resources and support to families during and after this disruption.](#)”
- ❑ “[Educators will need data to guide curriculum and instruction in support of students, especially to target resources and attention for communities most impacted](#) by COVID-19 school closures.”
- ❑ Brookshire Elementary School's Melissa Pappas, 2020 Orange County Teacher of the Year, noted:
  - ❑ “As we open the discussion for determining the best possible means of assessing the gap and planning for remediation, it may also be prudent for us to consider the potential regression across multiple areas of development that will collectively impact academic success across grade levels. These areas may include social skills, behavior, and functional skills (including levels of independence).
  - ❑ Additionally, students who typically receive services such as tutoring, speech and language therapy, behavior therapy, occupational and physical therapies, and [mental health or counseling services](#), may not have had access to these services during this time.”

## Part 1: Closing Achievement Gaps – Reading Proficiency

## Investing in Early Literacy Skills Invests in the Recovery of Our Most Vulnerable

Children need to have high quality learning opportunities, beginning at birth and continuing through their entire education journey, including summers, in order to sustain learning gains.

- Reading proficiently by the end of third grade is a crucial marker in a child's educational development. [Failure to read proficiently is linked to higher rates of school dropout, which suppresses individual earning potential as well as the nation's competitiveness and general productivity.](#)
- Getting more young children to read proficiently is not an impossible mission. Currently, policies and funding streams are too fragmented, programs are too segmented by children's age and grade, and key interventions are too partial to ensure widespread, positive results.
- A comprehensive strategy is necessary in order to recover lost learning and close achievement gaps, once and for all.

## Reading Proficiency Impacts Already Vulnerable Students

When controlling for poverty, racial and ethnic graduation gaps disappear when students master reading by the end of third grade.

- ❑ Every student who does not complete high school costs our society an estimated \$260,000 in lost earnings, taxes, and productivity.
- ❑ Nearly 90% of students who failed to earn a high school diploma were struggling readers in third grade.
- ❑ Black and Hispanic students not reading proficiently in third grade are six times more likely to drop out or fail to graduate from high school.
- ❑ Low-income minority students not reading proficiently in third grade are eight times more likely to drop out or fail to graduate from high school.

## Reading Proficiency Impacts Long-Term Economic Recovery

In November 2019, the SBOE established a new high ground goal for reading proficiency for ALL Florida students, [a goal of 90% proficiency by 2024](#).

- ❑ [Dropping out of high school is correlated with lower employment prospects](#), teen and young adult pregnancy, and incarceration.
- ❑ There is a [strong connection between early low literacy skills and incarceration](#).
- ❑ [85% of all juveniles who interface with the juvenile court system](#) are functionally low literate.

Decisions

## Part 1: Closing Achievement Gaps – Progress Monitoring

## The Need for Progress Monitoring and Data Informed Supports

To maximize the value of these supports, Florida should provide technical support and guidance, and provide expert level supports to districts and schools, so that learning and best practices can be shared throughout Florida's entire education family.

- ❑ Progress monitoring is a connective support between the foundational skills that we want students to acquire and their progress through early educational years.
- ❑ Florida needs to invest in building the capacity of districts and schools to use screening and progress monitoring data to drive informed teaching practices and curriculum decisions.
- ❑ Florida should also provide data informed supports to districts and schools. These supports will be used especially for the early foundational years, and will include school improvement strategies and a longitudinal analysis of students' success.

## The 2020 Summer Recovery is a Critical Moment in Time

FDOE is surveying school districts and charter schools to assess the expected use of school campuses during summer 2020.

- ❑ Many of Florida’s districts and schools have begun summer programming that typically begins by late May or early June. While these programs present an opportunity to implement a “dimmer switch” approach to safely reopening school campuses, they are also a critical moment to serve students who likely experienced unprecedented levels of learning loss.
- ❑ Support for Florida’s most educationally vulnerable students – students without access to Internet, students who were already identified as struggling learners and low-income students without adequate personal resources – is critical this summer, in order to begin the process of closing the already widening achievement gaps for these students.
- ❑ All school districts already use early warning indicators to complement Florida’s state-level accountability requirements, and these identifiers would allow FDOE, LEAs and schools to identify students for high priority, face-to-face summer instruction, with a heavy focus on reading.

Open and  
Reopening of  
High-Quality  
Providers

## Part 1: Closing Achievement Gaps – Early Learning

## Preventing Early Learning Gaps

The importance of Florida's child care industry cannot be overstated. Child care is essential to first responders and essential workers, getting families back to work, to businesses that need employees and critical to Florida's overall economic recovery.

- ❑ Given that [90% of brain growth occurs by the time a child is five \(80% by age three\)](#), access to high quality early childhood education plays a unique role in our communities by supporting families and providing our children with a strong foundation for future learning and earning.
- ❑ There are 1.6 million children under the age of six in Florida, with **42% of these children living in poverty**. Preventing future achievement gaps can only be achieved by increasing access to high quality early childhood education.
- ❑ All of these programs should be supported **so that they stay open and reopen stronger to provide quality supports to our children and their families**.
- ❑ Because of the pandemic, none of Florida's 2020 incoming kindergarten students will have had a typical prekindergarten experience. Many will be unfamiliar with the academic language, routines and expectations of the more formal setting of school. **We will need to support the developmental needs of our youngest students as they transition to kindergarten.**
- ❑ There are over 9,000 state and federally funded child care providers in Florida that offer one or both of Florida's state and federally funded programs, School Readiness (SR) and Voluntary Prekindergarten (VPK) Education Program, and **the overwhelming majority of these providers are small businesses**.

# Early Learning Priorities

- Providers: **see next page**
  - Continue supporting providers that are open (birth – age 5 and after school programs) by paying based on enrollment as opposed to attendance.
  - Continue implementing controls for providers who are closed and receiving payment.
  - Provide mini-grants to meet infrastructure, cleaning and supply needs and stipends for teachers.
  - Encourage connections with teachers and the families they serve.
- Families:
  - Eliminated any terminations of SR child care services.
  - Provided flexibility for eligibility for SR child care (i.e., job search).
  - Extended timelines for submission of paperwork by parents to maintain eligibility.
  - Waived required parent SR copayments.
- First Responders/Health Care Workers: **see next two page**

## Percent of Child Care Providers Closed Due to COVID-19

Concerns over COVID-19 were close to toppling the child care industry, presenting a significant parenting challenge to many health care workers and first responders. In response, FDOE's Office of Early Learning (OEL), in coordination with local early learning coalitions, [prioritized and increased access to child care services for health care and first responder professionals.](#)

SR and VPK Providers: Percent Closures

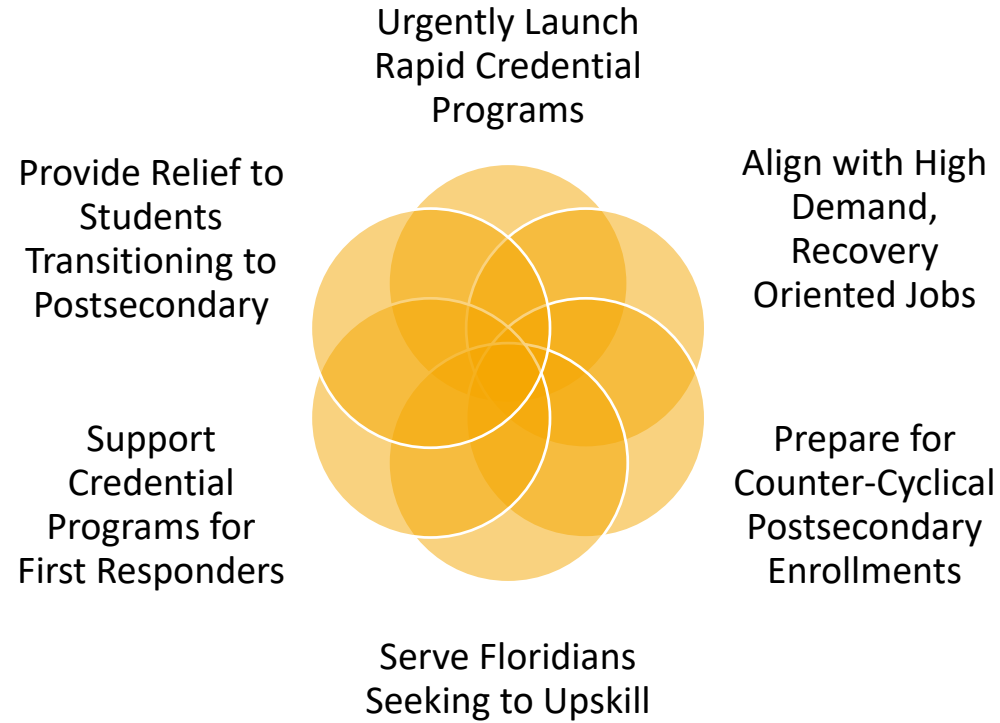

### Successful Partnership to Provide Priority Access for Children of First Responders and Health Care Workers

The new strategy of providing priority access to key industry employees reduced the child care closure rate growth from 58% to 36%, with 11,810 new children of health care workers and first responders being served (as of 6/2/20).

Cumulative Total Essential Services Enrollments

IHEs

## Part 1: Closing Achievement Gaps – Accelerating Economic Growth

## Closing Gaps in Credential Attainment to Accelerate Economic Recovery

The recovery will create jobs that can be filled by unemployed Floridians, but only if they have the essential skills to compete – skills that must be developed in months or weeks. Florida must prepare, pivot and partner with industries outside education to assess and identify the impact of the pandemic on the labor market, identifying new jobs and job functions needed and rapid training programs to meet new work demands and functions.

Displaced workers will want to upskill themselves to be more competitive for jobs in the recovery.

Increase in demand for postsecondary institutions that can urgently redesign credential programs to provide immediate relief for essential jobs.

The unique flexibility and programs of state colleges and technical colleges, which can quickly prop up credential programs, will be an asset.

# Counter-Cyclical Enrollment in Florida's 28 State Colleges

This table shows Florida state unemployment rates and Florida College System (FCS) total FTE, 2005-06 through 2018-19. **Historical trends, including the Great Recession, show that college enrollments are counter-cyclical to the health of the economy, such that unemployment actually correlates to enrollment increases in Florida's state colleges.**

## Historical Impact of Increased Unemployment on Florida College System Enrollment

In analyzing the trends in state unemployment rates and FCS total FTE, on average, as the state unemployment rate increases by 1%, the FCS total FTE increases by 9,596.3, thus the impact continues after the economy recovers (technical colleges increase similarly, on average, by 2,100).

- ❑ Florida's state colleges expect a short-term dip in enrollment demand in Summer 2020, followed by rapid increases in demand in the fall and spring terms, especially in metropolitan areas of north, south and central Florida, where enrollment could grow at three to five times the normal rate, just as it did in 2010.
- ❑ Anticipated increases in FCS student enrollment will be amplified by the various proposals for further federal stimulus, mostly through a combination of direct spending and credit easing, creating a boom in construction and other essential infrastructure jobs and a larger and quicker demand for skilled workers.

## Rapid Credential Programs to Accelerate Recovery

New rapid credential programs – from 1 to 18 weeks for completion – will be necessary to accelerate recovery both for individual households and the state overall.

For individuals, these jobs will pay better and carry higher benefits than those from which they were suddenly furloughed.

Postsecondary should align with CareerSource Florida, credentialing and certification entities to align with high demand and recovery critical jobs.

Continued flexibility in enrollment, credentialing and certifications will enable postsecondary to respond to job market demands for the full period of recovery.

## Supporting the Capacity of Credential Programs Also Supports First Responders

Florida's state colleges and technical colleges are a major supplier of the talent pipeline for law enforcement and other first responder professions.

- ❑ 24 of Florida's 28 state colleges and 7 of Florida's 48 technical colleges host law enforcement academies.
- ❑ In 2018-19, the FCS had 14,984 enrollments and 7,361 completions in first responder programs (law enforcement, fire fighters, fire officers, paramedics, and emergency medical technicians).
- ❑ During the 2019-2020 school year, the state's technical colleges enrolled nearly 5,000 students, and on average graduate 3,000 annually, who chose to dedicate their careers to public service and first-responder-related programs (emergency medical responder/technician, paramedic, fire fighter, nursing, and law enforcement officer).

## Relief Will be Needed by High School Seniors Transitioning to Postsecondary

Programs and pathways should be developed to ensure students transitioning to institutions of higher education (IHE or postsecondary) can be set up for success now and in the future.

- ❑ The sudden changes to education brought on by efforts to mitigate the spread of the COVID-19 virus has caused significant changes in the future outlook of seniors who are transitioning to college, career and life.
- ❑ For example, high value educational experiences, such as the ACT and SAT test administrations and life-shaping course content (e.g., civic literacy) have been interrupted by the crisis.

Reopening is a  
Locally Driven  
Decision

Dimmer Switch  
(Step-by-Step)  
Approach

Create a Local  
Safe Schools Plan  
to Maintain In-  
Person Learning

Establish Supports  
and Partnerships  
in Communities to  
Make Local  
Decisions

Create a  
Framework for  
Local Planning by  
Creating a Crisis  
Response Team

## Part 2: Guidance for Reopening Healthy Learning Environments

## The Reality: Education Programs are Inherently Designed for Social Interaction, Not Social Distancing

For all educational programs, [cleaning, disinfecting](#) and [social distancing are essential](#). However thorough, collaborative and multifaceted reopening and risk mitigation strategies are needed to implement healthy campuses and programs, while earning public confidence.

- ❑ K-12 schools, college campuses and child care programs are inherently [high-contact settings](#), not built conveniently for social distancing.
  - ❑ Schools are designed to bring people together, creating shared learning spaces, enabling teachers to connect with students in-person, empowering students to collaborate and maximizing the value of a shared educational journey.
  - ❑ While educational programs should maintain maximum distance between students' desks, this distance may often not reach 6 feet.
- ❑ **Therefore, reopening will require locally driven strategies with guidance from FDOE, FDOH, FDCF, FDEM and local health officials.**

## Reopening is a Locally Driven Decision

- This document is **NOT** a set of mandates or final set of considerations.
- Reopening ultimately must be driven by local data and the goal of restoring optimal conditions for learning.

- This document is:
  - A guidance document with recommendations.
  - Informed by both published expert guidance and input from dozens of stakeholders (see appendices).
  - A resource and framework for local decision making.
  - A document that is intended to be updated and changed as the context evolves.
- Child care (early learning) programs, K-12 schools and postsecondary institutions should **use this document as points to consider and implement with local context**, knowing that there is not one perfect formula for reopening and differently situated communities will likely establish equally successful plans to reopen that do NOT mirror each other.

## Create a Local Safe Schools Plan to Maintain In-Person Learning, the Best Mode of Education Delivery for High Student Achievement

- ❑ Locally driven context is necessary to reopen so that Florida’s students can optimize learning in-person from great teachers, with the additional benefit of peer-to-peer learning.
- ❑ Online and blended learning does not [“replicate the in-person learning experience.”](#)

Optimize student learning through in-person instruction.

Respond to crisis in concert with the scale of the crisis, preserving in-person education to the extent possible.

Move to distance learning only when educationally beneficial or necessary under the guidance of local health professionals.

## Create a Framework for Local Planning by Creating a Crisis Response Team

- ❑ Districts or schools should coordinate with local health departments and medical experts, to establish protocols for direct supports and communications.
- ❑ The team, such as the example shown here, can **make local decisions about the considerations herein and beyond this document.**

School nurses or other school health staff should serve as liaisons with the county department of health and medical experts.

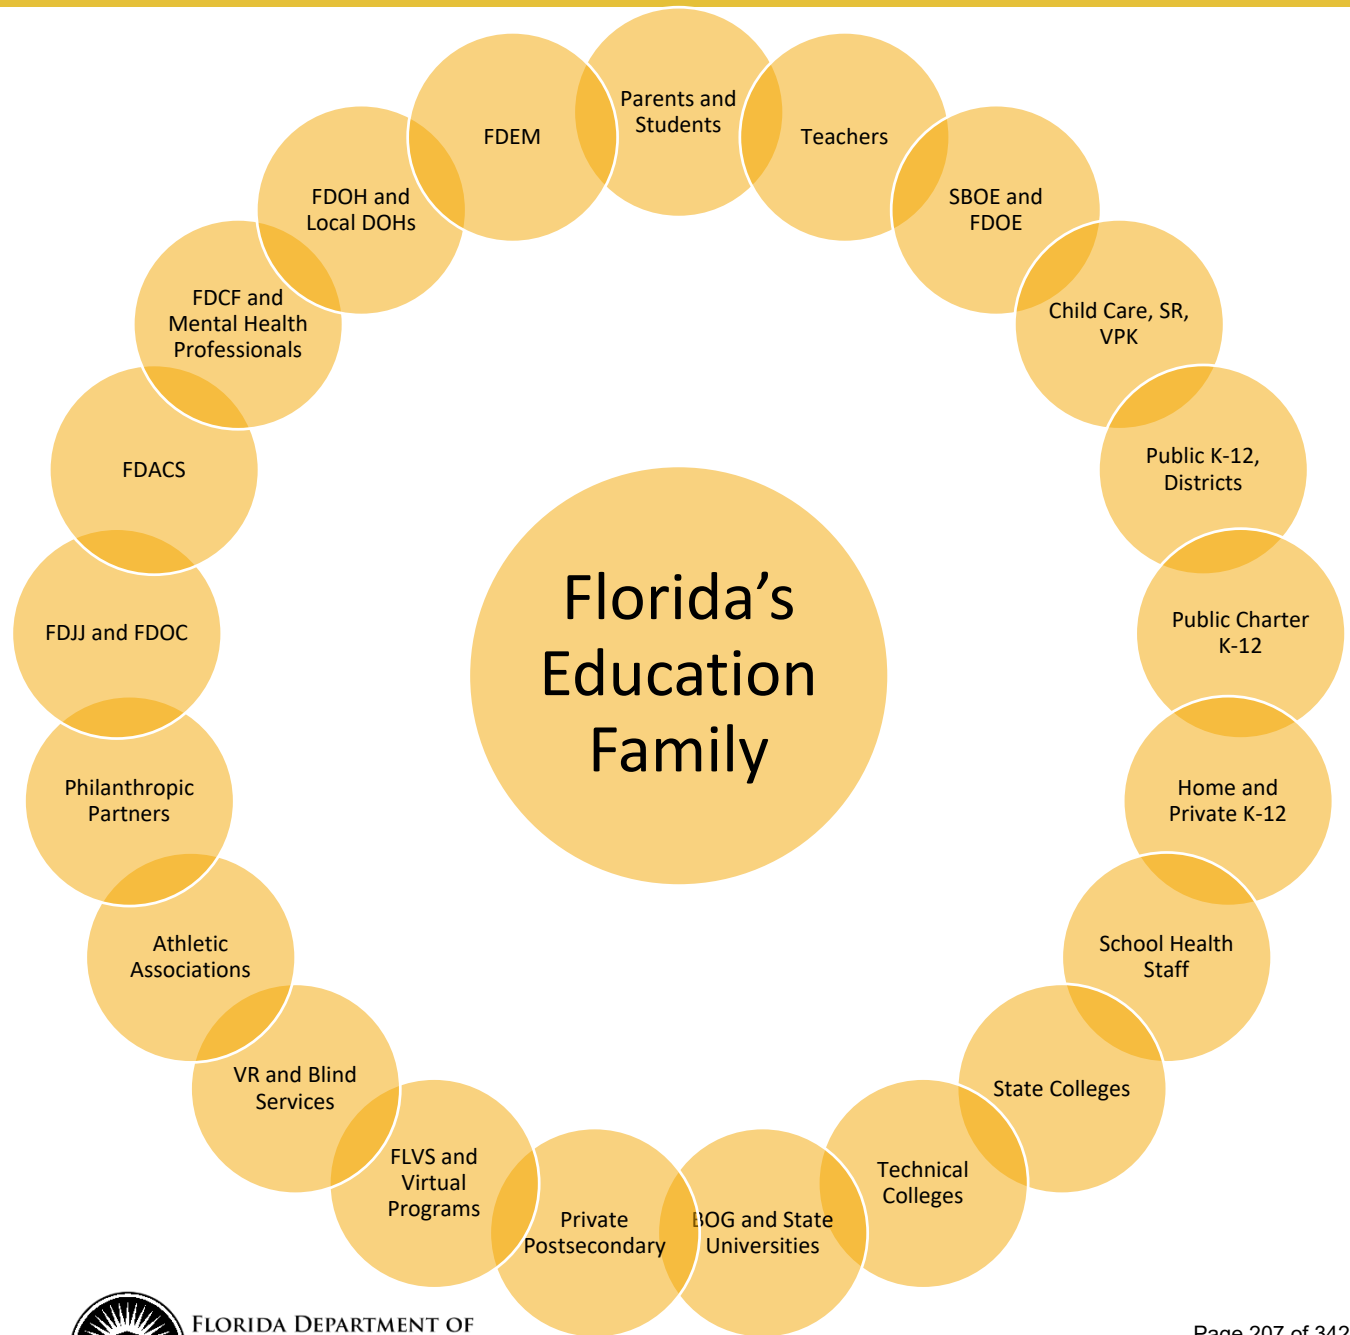

FDOE's May 5, 2020 guidance on [Mental and Behavioral Health and Telehealth Services for Florida Students](#)

District or School Leader	District or School Health Staff	Counselor and/or Mental Health Professional	Instructional Content Leader
Logistics Leader (facilities, food, cleaning, etc.)	District or School IT or ICP Leader	Teacher Leader	CTE Leader
Athletics Leader	Parent Leader	Student Leader	County Health Department Liaison
County Emergency Operations Liaison	Safe School Officer or Law Enforcement Liaison	School District, Charter Network or Early Learning Coalition Liaison	Local Doctor or Medical Expert

## Establish Supports and Partnerships in Communities to Make Local Decisions

Districts, schools and educational programs should connect to the entire education family in their community. Health risk mitigation and concerns at one school can impact the community's collective confidence and decision-making should seldom be done in isolation. Refer to page 7 of the [Safe. Smart. Step-by-Step. Plan For Florida's Recovery.](#)

## Planning Resources: Adhere to Guidelines From CDC, State and Local Departments of Health

As our collective understanding of COVID-19 has evolved, our national and state experts continually update their guidance. A great risk mitigation strategy is not a static document, and should be continually revisited and revised.

- Governor DeSantis' [Florida COVID-19 Resource Center](#) is a one-stop gateway to Florida's experts in recovery and reopening:
  - [Safe. Smart. Step-by-Step. Plan For Florida's Recovery](#) Task Force report.
  - [Florida Department of Health's \(FDOH\) COVID-19 resource page](#).
  - [FDOH's guidance for schools and child care](#) and [Florida Department of Children and Families \(FDCF\) Child Care Services guidance](#).
- The benchmarks for reopening in the Safe. Smart. Step-by-Step. Plan utilized the White House and CDC [Guidelines for Opening America Again](#) as a baseline.
- Local county health departments are a great partner for all educational programs.

## Dimmer Switch Approach: K-12 Campus Reopening Steps 1-2-3

With the majority of child care programs already open, it is recommended K-12 campuses also begin to reopen in June, through a three step approach modeled here.

Step 1 – June – open up campuses for youth activities and summer camps.

Step 2 – July – expand campus capacities further for summer recovery instruction.

Step 3 – August – open up campuses at full capacity for traditional start of the academic year.

While there may be challenges regionally, Florida’s workforce and students with the greatest needs are counting on schools to fight to stay open.

May 22, 2020, Governor DeSantis signed [EO 20-131](#), allowing youth activities, summer camps and youth recreation camps to operate. FDOH also release a [frequently asked questions document with guidance for organized youth activities](#).

## Dimmer Switch Approach: Postsecondary Campus Reopening

Some postsecondary campuses have been allowing limited and safely conducted CTE course-related work to occur, and some state colleges began campus reopening in late May. All state college and technical college campuses should open for Summer B and for full enrollment by August.

- ❑ Summer A refers to the first half of the summer semester.
- ❑ Summer B refers to the second half of the summer semester.
- ❑ Summer C refers to the full length of summer semester.
- ❑ When applicable, state colleges or technical centers can substitute their terminology here for Summer A, B and C.

% of Unduplicated Students who Enrolled in 2019 Summer Courses	53% @ State Universities
	41% @ State Colleges
	35% @ State Technical Colleges

## Promote Risk Reduction Through a Great Culture of Teaching

All types of educational programs have a trusted and persisting role in educating and guiding how millions of Floridians, young and old, embrace their personal efforts to reduce risks for all Floridians.

**At Home** – Schools and educational programs are a trusted source of information in most households, meaning schools have perhaps the greatest ability to teach parents and students the value of good hygiene and screening for symptoms at home.

**At School** – The responsibility cannot be delegated to a few, meaning every employee should be trained in recognizing symptoms, screening students and staff and responding to concerns.

**In the Classroom** – Current health and other related content instruction presents a unique opportunity to incorporate lessons of healthy preventative hygiene and self-screening practices.

## Create Visible Safe Learning Zones

Minimizing spontaneity, uncertainty and ultimately risk on any educational campus is aided by visibly showing everyone what safety looks like, creating a visible feeling of health and safety, so that students and staff can settle into learning rather than wondering.

Encourage visible signals of health and safety from the moment students, parents and staff arrive on campus, or at a program, with physical guides, barriers and alerts that help everyone learn and know how to act safely.

Encourage the use of outside and unconventional spaces with significant options for social distancing for learning and extracurricular activities.

When on campus, to the extent possible, consider moving large staff meetings and student assemblies to more open spaces or utilize virtual tools. The first priority should always be facilitating in-person course needs, so extra convenings should leverage alternative means to convene.

## Win the 6 Key Stages of the Day

For all educational programs, a risk mitigation strategy could be to take steps to reduce risks at six key stages throughout the day. A benefit of this approach is this helps reduce risk cumulatively throughout the day, so that when children and adults are involved in close contact activities for school-related extracurriculars, there's a much lower risk of virus transmission.

Before students/staff arrive on campus

When students/staff move about campus

When students/staff participate in extracurriculars

When students/staff arrive

When students/staff utilize classroom space

When students/staff leave

## Protect Students, Staff and Families with Medical Vulnerabilities

All schools and educational programs should encourage [medically vulnerable students, staff](#) and those who live with medically vulnerable Floridians consult with their family doctor and develop a plan for their safe participation in schooling. Refer to page 7 of the [Safe, Smart, Step-by-Step, Plan For Florida's Recovery](#).

Medically vulnerable students should develop a plan for returning to school with their family doctor.

- For medically vulnerable students who come to school, school health staff should develop school health comprehensive care plans in consultation with the county health department. Schools could consider accommodations on a case-by-case basis, and consider clustering these students away from other students, in smaller settings, with a teacher who is wearing a cloth face covering.

Medically vulnerable staff should also work with their doctors to create a return to work plan.

- Whenever feasible for medically vulnerable staff, steps should be taken to minimize the number of people they interact with, and districts and institutions should consider flexible leave policies.

The same guidelines apply for students and staff who live with medically vulnerable family members.

- Parents, grandparents, caregivers, etc.

## General Mitigation Strategies: Individuals (Students, Parents and Staff)

Individuals are encouraged to practice good hygiene and engage in healthy activities, including outdoor activities, while practicing social distancing. Refer to page 12 of the [Safe. Smart. Step-by-Step. Plan For Florida's Recovery.](#)

The following general guidance is recommended for all individuals throughout each phase of re-opening:

- [Practice social distancing](#), whenever feasible, as the virus is most transmissible indoors under close, sustained contact.
- Frequently wash hands with soap and water for at least 20 seconds or use hand sanitizer with at least a 60 percent alcohol if soap and water are not available.
- Avoid touching eyes, nose and mouth.
- Cover your cough or sneeze with your elbow or a tissue and dispose of the tissue.
- Clean and disinfect frequently touched items and surfaces as much as possible.
- [Monitor your symptoms carefully](#). Note that the CDC reports [children are more frequently asymptomatic and "may not initially present with fever and cough as often as adult patients."](#)
- [If you feel sick, stay home](#). If students become sick, ensure there is comprehensive school health protocol in place.
- If you believe you are infected with COVID-19, contact your health care provider immediately.
- [If you are older than 65 years of age or have a serious underlying medical condition](#), avoid large crowds.

## General Mitigation Strategies: Employers (Schools, Programs)

Employers are encouraged to prepare their workplaces and consider how to minimize the spread of COVID-19 and lower the impact in their workplace. Refer to pages 12-13 of the [Safe. Smart. Step-by-Step. Plan For Florida's Recovery.](#)

The following general guidance is recommended for all employers throughout each phase of re-opening:

- [Practice social distancing](#), whenever feasible, as the virus is most transmissible indoors under close, sustained contact.
- Clean and disinfect high-touch, high-traffic surface areas.
- Develop and implement policies and procedures to train employees on personal hygiene expectations, including increased frequency of hand washing, the use of hand sanitizers with at least 60 percent alcohol and, clear instruction to avoid touching hands to face.
- Make hand sanitizer, disinfecting wipes, soap and water, or similar disinfectant readily available to employees, students and visitors.
- [Encourage employees and students who feel sick to stay home.](#)
- [Monitor employees and students for COVID-19 symptoms.](#)
- Do not allow symptomatic people to physically return until they meet CDC criteria to do so or are cleared by a medical provider.
- Consult with the county health department regarding procedures for workforce tracing following a positive COVID-19 test by an employee, student or those who have come into contact with an individual testing positive for COVID-19.

## Recommendations to Reduce Risks at the Front Door

Educational programs are encouraged to take a front door approach, establishing protocols to massively reduce risk at entry points to campuses, programs and individual classrooms. **Albeit, this strategy needs to be implemented without inadvertently creating “choke points” of congestion.** This can be accomplished by creating multiple check points for entry to a campus or using classrooms, which can be a screening point.

- ✓ Create a crisis response team at the district, school or program level, as applicable.
- ✓ Post a crisis plan and response check list where they are easily accessible.
- ✓ Consider screening students, employees and visitors through visual signage, verbal questions or visual assessments.
- ✓ As feasible and while maintaining the goal of getting students on campus every day, explore staggered schedules, start and end times to limit crowds.
- ✓ Monitor student and employee absenteeism closely, as absenteeism may be an early warning system of larger health concerns.
- ✓ Regularly update employees, parents and students with emails on best practices for at-home preventative care.
- ✓ Locally determine what constitutes an adequate prevention inventory that includes extra supplies of PPE, cloth face coverings, gloves, sanitizer, soap, etc.
- ✓ Consider creating a protocol for incoming and outgoing mail and deliveries, and consider creating a “timeout” or cleansing room.
- ✓ Post signage about hygiene and social distancing in many very accessible areas.
- ✓ Conduct employee trainings for all of the above and regular employee meetings on COVID-19 updates.

## Recommendations to Redesign the School Day to Reduce Risks

While most educational programs are not designed for social distancing, schools are encouraged to explore creative redesigns of how a campus or program is utilized and how students move about can dramatically reduce risks and simplify, when necessary, contact tracing.

- ✓ As feasible, keep groups of students together throughout the day to minimize the number of people in close contact with each person.
- ✓ As feasible, convert cafeterias, libraries, gymnasiums, auditoriums, outdoor areas into classroom space.
- ✓ Explore allowing students to eat meals in traditional classroom space or outdoors.
- ✓ Move nonessential furniture and equipment out of classrooms to increase distance between students and turn desks the same direction.
- ✓ Maintain a maximum distance between desks as possible, even if not able to achieve 6 feet, and avoid sharing of textbooks, supplies and toys.
- ✓ Consider setting up a secondary clinic in schools, exclusively for students showing symptoms of COVID-19.
- ✓ Establish procedures in consultation with school health staff to quickly separate students and staff who become sick from others.
- ✓ Create a disinfection protocol for cleaning door knobs, counters and other surfaces throughout the day.
- ✓ Consider limiting nonessential visitors to campuses and programs.
- ✓ Consider alternative meeting options for nonessential volunteer activities, clubs and other elective meetings that require in-person contact.
- ✓ Explore limiting nonessential mass gatherings or reschedule as virtual gatherings.

## Recommendations to Communicate Transparently and Frequently

Reopening with public confidence can be optimized with regular communications. Health and safety issues should be communicated transparently, [while still protecting the privacy of students and families](#). Refer to page 7 of the [Safe. Smart. Step-by-Step. Plan For Florida's Recovery](#).

- ✓ Communicate to the entire education family of stakeholders in the community.
- ✓ Regularly update families and staff on policies for conduct while on campus, drop-off and pick-up.
- ✓ Use multiple means to communicate: e-blasts, websites, text, social media, classroom lessons, community meetings, one-on-one outreach, etc.
- ✓ Communicate the actions taken, in each step, by a school to reopen.
- ✓ Consider having parents complete an affirmation that they will not send their children to school with symptoms.
- ✓ Communicate the economic importance of supporting parents' return to a normal workday.
- ✓ Reinforce topics like good hygiene, social distancing, identifying symptoms and staying home when feeling sick.
- ✓ Illustrate steps taken to keep school clean and extracurriculars safe.
- ✓ Show compassion for families and staff, as they will be cautious.
- ✓ Express a willingness to always evaluate, improve and reevaluate as necessary.
- ✓ Regularly solicit feedback from parents, students, staff and the community.

## Recommendations to Plan for Graduations, Sports, Band, Arts, Other Extracurriculars and Co-curriculars

Florida's K-12 schools should proactively plan to safely conduct extracurriculars and co-curriculars, including graduations, sports, and other close contact [events and gatherings](#).

- ✓ Consult with the local department of health and the crisis response team.
- ✓ At events, consider non-contact temperature testing of adults who will be direct participants and have close contact with students.
- ✓ Monitor students who participate in extracurriculars for symptoms throughout the day.
- ✓ All equipment, instruments, uniforms, etc. should be washed or wiped down after each use.
- ✓ Explore an increased presence of law enforcement or staff at events to maintain adherence to social distancing.
- ✓ Consider limited seating at events while allowing families to sit together and marking off seating for social distancing.
- ✓ Consider having attendees arrive at events earlier, stagger exits and allow for multiple entry and exit points.
- ✓ Explore options to maintain social distancing at event facilities: public restrooms, concessions, etc.
- ✓ Consider ways to limit close contact between participants and attendees until an event concludes.
- ✓ Identify a space that can be used to isolate staff or participants if one becomes ill at an event.
- ✓ Determine what are adequate prevention supplies to have at an event for participants and attendees, including hand sanitizing stations.

## Cloth Face Coverings (Face Masks)

- ❑ While cloth face coverings are not mandated, schools should explore strategies to utilize them, to the extent feasible.
  - ❑ At a minimum, **schools should be supportive of students, teachers and staff who voluntarily wear cloth face coverings.**
- ❑ The CDC provides comprehensive recommendations for the [use of cloth face coverings to help slow the spread of COVID-19](#).
  - ❑ As feasible, cloth face coverings can be an important mitigation tool for individuals and families when not able to maintain social distancing for activities such as:
    - ❑ Busing and transportation;
    - ❑ Events and meetings;
    - ❑ Courses that necessitate close proximity;
    - ❑ Educating medically vulnerable students;
    - ❑ Supporting medically vulnerable staff; and
    - ❑ Protecting schools' health care workers and crisis responders.
  - ❑ CDC: [“The cloth face coverings recommended are not surgical masks or N-95 respirators. Those are critical supplies that must continue to be reserved for healthcare workers and other medical first responders, as recommended by current CDC guidance.”](#)
  - ❑ FDOH: [“Don’t place a cloth face cover on young children under age 2, anyone who has trouble breathing, or anyone who is unable to remove the mask without assistance.”](#)
  - ❑ Educational programs should be mindful that young children may initially fear individuals wearing a face covering, and therefore should consider ways to gently introduce the idea.

## Recommendations for Student Drop-Off and Pick-Up

Student [drop-off and pick-up](#) are the two most vulnerable times each day for any school or program, from child care through high school, because the largest number of people are on campus in a potentially short window of time.

- Consider having hand hygiene stations set up at or near the entrances and egress of the facility.
- Arrange parent sign-in sheets, either by a sink with soap and water, hand sanitizer with at least 60% alcohol or outside the building, and provide sanitary wipes for cleaning pens.
- Use both entrance and egress to avoid clustering at single points of entry.
- Consider staggering arrival and drop off times and plan to limit direct contact.
- For child care programs, infants should be transported in their car seats and store car seats out of children's reach.
- To the extent possible for families, the same person should drop off and pick up the child every day.
- To the extent possible for families, older Floridians such as grandparents or those with serious underlying medical conditions should not pick up children, because they are more at risk.

## For Reference: CDC Guidance for Cleaning and Disinfecting

The CDC recently updated its “[Reopening Guidance for Cleaning and Disinfecting Public Spaces, Workplaces, Businesses, Schools, and Homes](#).”

Additionally, [pursuant to the CDC’s guidance](#), take steps to ensure water systems and devices are safe to use after a prolonged facility shutdown to minimize the risk of Legionnaire’s Disease and other diseases associated with water.

# GUIDANCE FOR CLEANING & DISINFECTING

## PUBLIC SPACES, WORKPLACES, BUSINESSES, SCHOOLS, AND HOMES

SCAN HERE  
FOR MORE  
INFORMATION

### 1 DEVELOP YOUR PLAN

**DETERMINE WHAT NEEDS TO BE CLEANED.** Areas unoccupied for 7 or more days need only routine cleaning. Maintain existing cleaning practices for outdoor areas.

**DETERMINE HOW AREAS WILL BE DISINFECTED.** Consider the type of surface and how often the surface is touched. Prioritize disinfecting frequently touched surfaces.

**CONSIDER THE RESOURCES AND EQUIPMENT NEEDED.** Keep in mind the availability of cleaning products and personal protective equipment (PPE) appropriate for cleaners and disinfectants.

Follow guidance from state, tribal, local, and territorial authorities.

### 2 IMPLEMENT

**CLEAN VISIBLY DIRTY SURFACES WITH SOAP AND WATER** prior to disinfection.

**USE THE APPROPRIATE CLEANING OR DISINFECTANT PRODUCT.** Use an EPA-approved disinfectant against COVID-19, and read the label to make sure it meets your needs.

**ALWAYS FOLLOW THE DIRECTIONS ON THE LABEL.** The label will include safety information and application instructions. Keep disinfectants out of the reach of children.

### 3 MAINTAIN AND REVISE

**CONTINUE ROUTINE CLEANING AND DISINFECTION.** Continue or revise your plan based upon appropriate disinfectant and PPE availability. Dirty surfaces should be cleaned with soap and water prior to disinfection. Routinely disinfect frequently touched surfaces at least daily.

**MAINTAIN SAFE PRACTICES** such as frequent handwashing, using cloth face coverings, and staying home if you are sick.

**CONTINUE PRACTICES THAT REDUCE THE POTENTIAL FOR EXPOSURE.** Maintain social distancing, staying six feet away from others. Reduce sharing of common spaces and frequently touched objects.

For more information, please visit [CORONAVIRUS.GOV](https://www.cdc.gov/coronavirus)

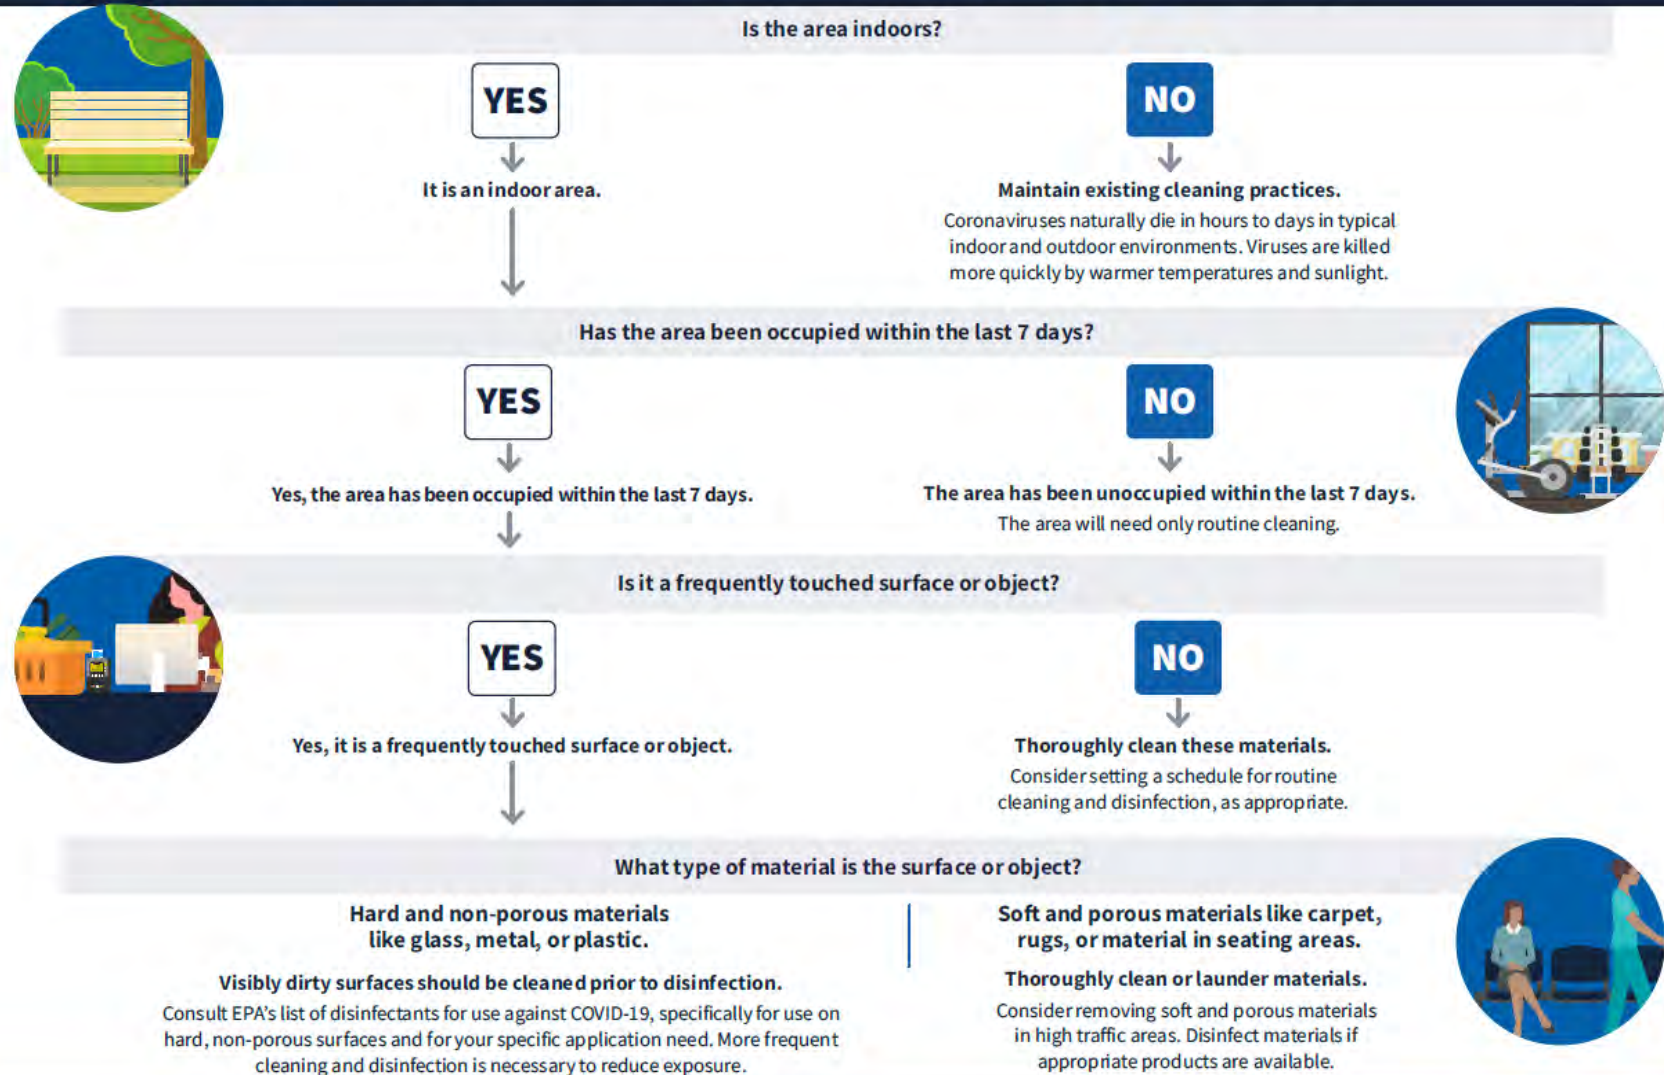

## For Reference: CDC Guidance for Cleaning and Disinfecting

The CDC released a [9-page guidance document to schools and other workplaces to develop a plan for cleaning and disinfecting](#) and [the 2-page cheat sheet here and on the preceding page](#).

### MAKING YOUR PLAN TO CLEAN AND DISINFECT

**Cleaning** with soap and water removes germs, dirt, and impurities from surfaces. It lowers the risk of spreading infection.

**Disinfecting** kills germs on surfaces. By killing germs on a surface after cleaning, it can further lower the risk of spreading infection.

## Where Social Distancing is Not Feasible: Class Size and Busing

6 feet of distance between desks is not feasible for most classrooms and almost never for school buses. However, the impact of class size is not as significant, as [Florida's K-12 class sizes are already constitutionally mandated to be small](#): 18 or fewer students for grades K-3; 22 or fewer students for grades 4-8; and 25 or fewer students for grades 9-12.

- Districts and schools should [explore the use of cloth face coverings on school buses](#).
- Districts and schools could also implement protocols for verbally screening students throughout the day, especially in order for students to gain access to classrooms. **If implementing screening protocols, districts and schools should consult with local health departments, as these protocols evolve.**
- As feasible, districts and schools could align bus and class schedules and seating arrangements with clusters of students who will spend the majority of their days together to minimize any one student's daily contacts.
- The CDC also recently [updated guidance for routine cleaning and disinfecting buses](#).
- Districts and schools should carefully [consider both the pros and cons of environmental measures like opening windows](#), which can ventilate the air, although at the same time pose risks of falling and trigger asthmatic symptoms.

## Additional School-Level Specific Guidance

- IHEs, K-12 schools and child care programs should also continue to monitor additional CDC guidance that is directed toward specific levels of educational institutions and programs.
  - Additionally, the CDC’s disclaimer on the importance of local context should be noted.**
- The CDC’s most up-to-date guidance for [K-12 schools](#) and [postsecondary institutions](#) includes nearly identical flexibilities that **educational programs “can determine, in collaboration with state and local health officials to the extent possible, whether and how to implement these considerations while adjusting to meet the unique needs and circumstances of the local community.”**
    - CDC’s Updated [Considerations for K-12 Schools](#) (includes some Child Care guidance)
    - CDC’s [Youth Programs and Camps Decision Tool](#)
    - CDC’s [Guidance for Child Care Programs that Remain Open](#)
    - CDC’s [Guidance for Talking with Children about Coronavirus Disease 2019](#)
    - CDC’s Updated [Considerations for Institutes of Higher Education](#)
    - CDC’s [Guidance for Institutions of Higher Education with Students Participating in International Travel or Study Abroad Programs](#)

Determine the Local Context of Preparation

Consider a Testing for COVID-19 Protocol

Be Prepared for Locally Driven Crisis Response

Consider a Contact Tracing Protocol

Coordinate with Local Health Officials

## Part 2: Responding to a Confirmed Case

## Great Preparation Helps Ensure Crisis Does Not Overwhelm Instruction and Public Confidence

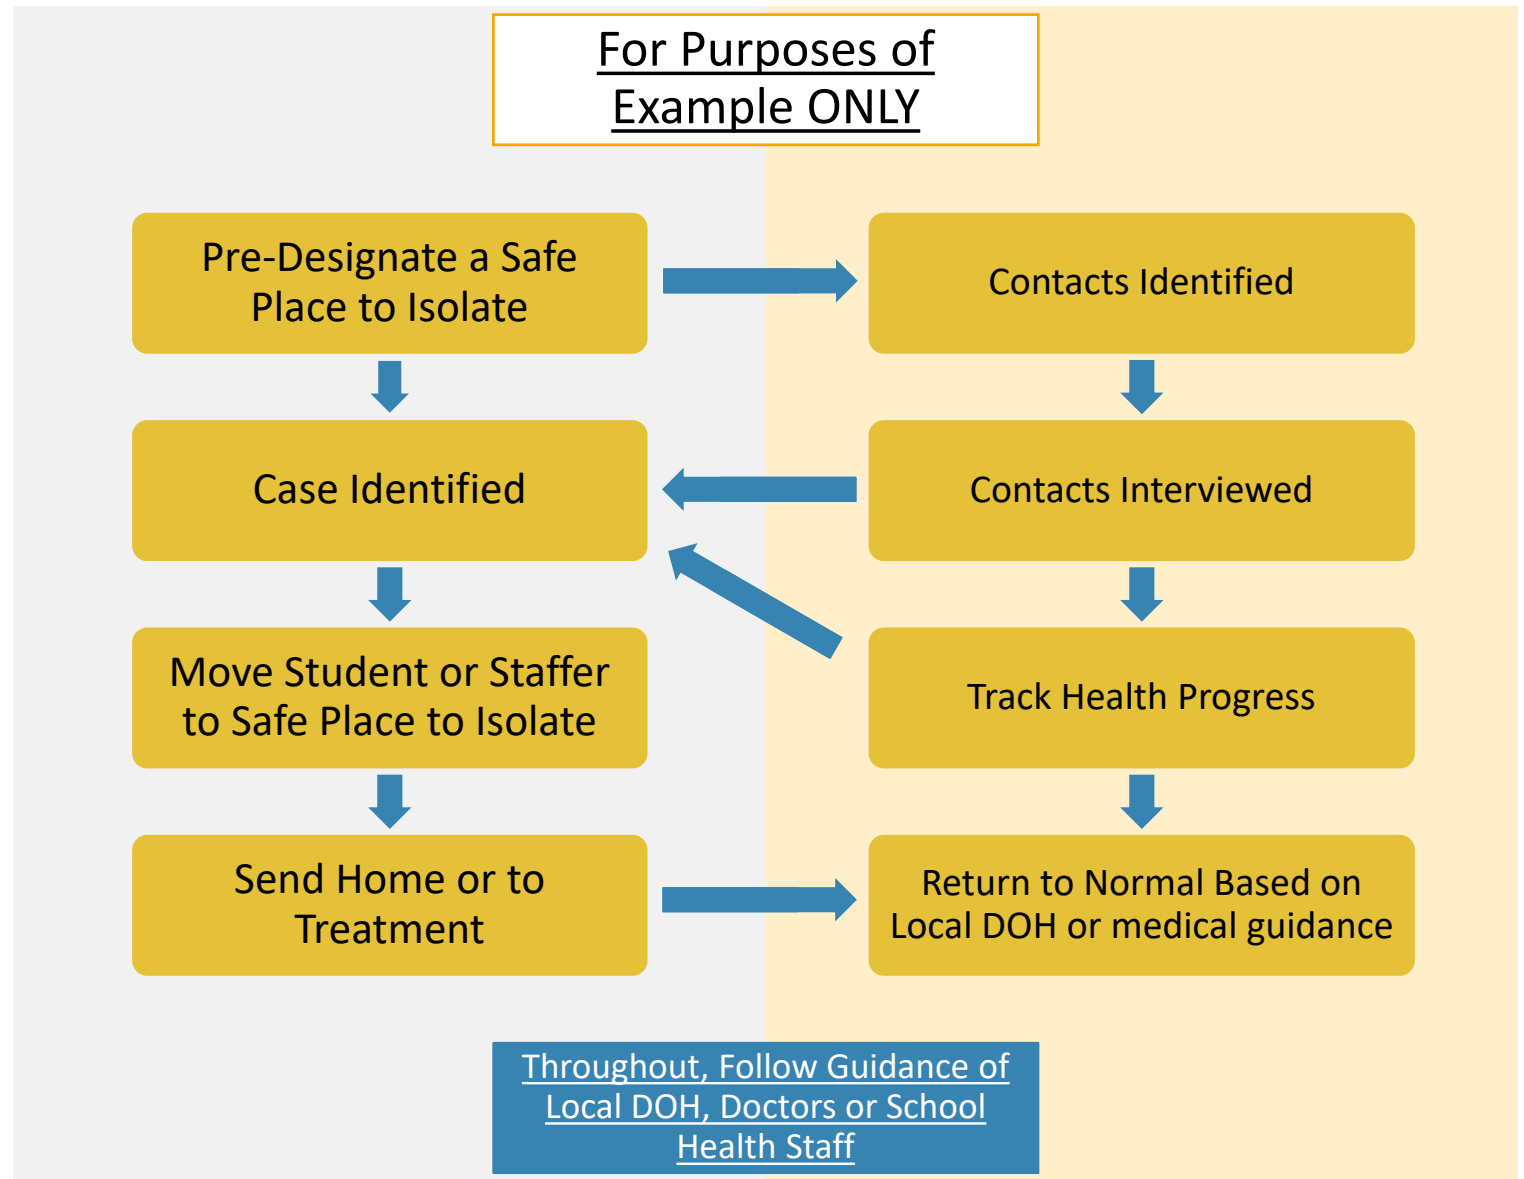

While the CDC reports [COVID-19 hospitalization rates](#) and [death rates](#) for children under-18 are considerably lower than the same for influenza, even one confirmed case can shake a community's confidence. Locally-driven and urgently responsive strategies prepare a school or community to maintain confidence and continuity of education.

## Consider a Contact Tracing Protocol

Districts and schools are encouraged to have communications and protocols in place to work with local health officials to implement [contact tracing](#). **Local health departments have comprehensive contact tracing programs and can coordinate with health staff at schools.** The CDC also offers guidance on the [importance of maintaining the privacy of those impacted](#).

## Consider a Testing for COVID-19 Protocol

Educational programs should consider having protocols in place to **work with local health officials to implement [testing for COVID-19](#)**. If conducting testing on-site, schools could have a valuable tool to quickly maintain the confidence of students, parents and staff.

- Protocols for testing students and staff for COVID-19 should be developed with the guidance of local health officials and considerations should include:**
  - The clinical level of health staff at schools and whether they are qualified to administer a COVID-19 test.
  - Encouraging families and students to maximize the use of their family physicians.
  - Exploring options for coordinating testing directly through the local department of health.
  - Exploring options for nearby testing center locations.
  - Consider using data, like absenteeism trends, to help identify early indicators of potential problems in schools.
- On-site (at school) testing protocols should be implemented in compliance with health care and [privacy laws](#) and, when applicable, obtain the explicit approval of parents.

## Responding to a Confirmed Case

Schools are best prepared if they are ready to respond to a confirmed case. To help prepare, **FDOH is collaborating with FDOE on guidance for contact tracing, testing, verbal screening, preparing school clinics, PPE and more.**

- If a confirmed case has entered a school, regardless of community transmission, any school in any community might need to implement short-term closure procedures regardless of community spread if an infected person has been in a school building. If this happens, [CDC recommends the following procedures regardless of the level of community spread:](#)
  - Coordinate with district, if applicable, and local health officials.** Once learning of a confirmed COVID-19 case for a student or staffer, **the school's health official(s) should immediately contact the county health department.**
  - The district, school or program should also notify FDOE of the initial confirmed case.
- The decision to open or close a school or program should ultimately rest with the local leadership of that school or program** (i.e., the superintendent or board for traditional public schools; a charter's board; a private school's board; the president or board of a state college; director of a technical college; etc.).

## Responding to a Confirmed Case

**Ensure continuity of education:** Review and implement continuity plans, including plans for the continuity of teaching and learning.

- ❑ **Dismiss the room or building of students and most staff for an initial consultation with local health officials.** This initial short-term dismissal allows time for the local health officials to gain a better understanding of the COVID-19 situation impacting the school. **This allows the local health officials to help the school determine appropriate next steps,** including whether an extended dismissal duration is needed.
  - ❑ Ultimately, **local health officials have the expertise to determine the necessary length of closure and scale of response.**
  - ❑ During school dismissals, also consider canceling extracurricular group activities, school-based afterschool programs and large events (e.g., assemblies, spirit nights, field trips and sporting events).
  - ❑ Schools may need to discourage staff, students and their families from gathering or socializing anywhere.
  - ❑ The district, school or program should update FDOE.

## Responding to a Confirmed Case

**Ensure continuity of meal programs:** Consider ways to distribute food to students. If there is community spread of COVID-19, design strategies to avoid distribution in settings where people might gather in a group or crowd.

- Communicate with staff, parents and students.** Coordinate with local health officials to communicate dismissal decisions and the possible COVID-19 exposure.
  - This communication to the school community should align with the communication plan in the school's emergency operations plan.
  - Plan to include messages to counter potential stigma and discrimination.
  - In such a circumstance, it is critical to **maintain confidentiality of the student or staff member as required by the Americans with Disabilities Act and the Family Education Rights and Privacy Act.**
  - The district, school or program should update FDOE.

# Responding to a Confirmed Case

- ❑ **Clean and disinfect thoroughly.** Coordinate with local health officials to determine next steps to mitigate the outbreak.
  - ❑ Close off areas used by the individuals with COVID-19 and wait as long as practical before beginning cleaning and disinfection to minimize potential for exposure to respiratory droplets. Open outside doors and windows to increase air circulation in the area. If possible, wait up to 24 hours before beginning cleaning and disinfection.
  - ❑ Cleaning staff should clean and disinfect all areas (e.g., offices, bathrooms and common areas) used by the ill persons, focusing especially on frequently touched surfaces.
  - ❑ If surfaces are dirty, they should be cleaned using a detergent or soap and water prior to disinfection.
  - ❑ For disinfection, most common [EPA-registered household disinfectants](#) should be effective.
  - ❑ Additional information on cleaning and disinfection of community facilities such as schools can be found on [CDC's website](#).

## Responding to a Confirmed Case

Consider alternatives for providing essential medical and social services for students:

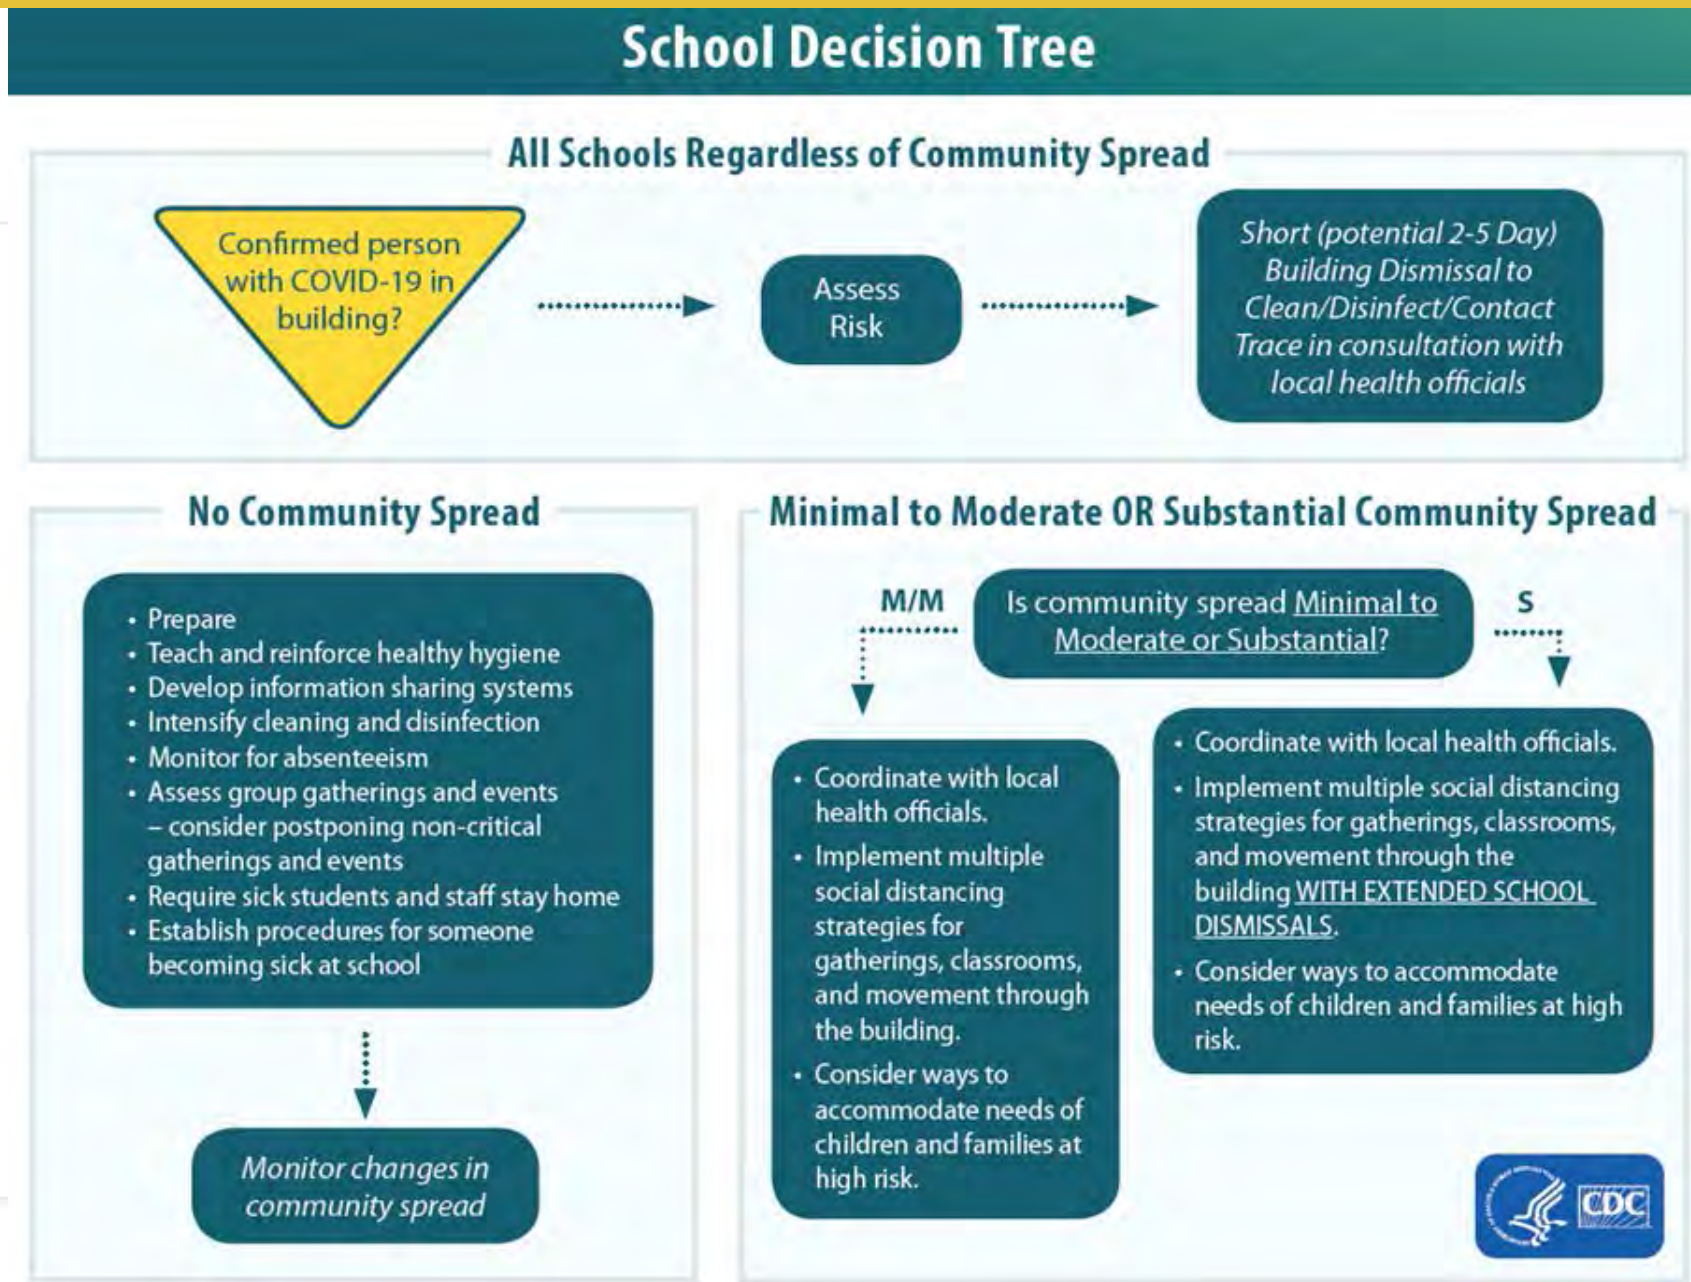

**Work with the county health department** to continue providing necessary services for students with special healthcare needs.

- ❑ [Make decisions about extending the school dismissal.](#)
  - ❑ During dismissals (after cleaning and disinfection), schools and programs may stay open for staff members (unless ill) while students stay home. Keeping facilities open: a) allows teachers to develop and deliver lessons and materials remotely, thus maintaining continuity of teaching and learning; and b) allows other staff members to continue to provide services and help with additional response efforts.
  - ❑ Decisions on which, if any, staff should be allowed in the school should be made in collaboration with local health officials. [Administrators should work in close collaboration and coordination with local health officials to make dismissal and large event cancellation decisions.](#)
  - ❑ Administrators should seek guidance from local health officials to determine when students and staff should return to schools and what additional steps are needed for the school community. In addition, students and staff who are well but are taking care of or share a home with someone with a case of COVID-19 should follow instructions from local health officials to determine when to return to school.
  - ❑ The district, school or program should update FDOE.

## Responding to a Confirmed Case: Child Care and K-12

Immediately contact the county health department to determine next steps to mitigate the potential for an outbreak.

The [CDC's School Decision Tree](#) is a helpful cheat sheet for Child Care and K-12 programs, although **coordinating with local health officials to conduct contact tracing** is an essential element to a school's response.

## Responding to a Confirmed Case: Postsecondary

Most steps identified by the CDC to respond to confirmed cases at IHEs versus Child Care and K-12 programs are very similar. The [noteworthy differences pertain to students who reside on campus at IHEs](#).

- [Ensure continuity of safe housing.](#)**
  - Work in close collaboration with local public health officials to make all decisions related to on-campus housing.**
  - If cases of COVID-19 have not been identified among residents of on-campus community housing,** students may be allowed to remain in on-campus housing. In this situation, educate housing residents on the precautions they should take to help protect themselves.
  - If cases of COVID-19 have been identified among residents of on-campus community housing, work with local public health officials to take additional precautions.** Individuals with COVID-19 may need to be moved to temporary housing locations. Close contacts of the individuals with COVID-19 may also need temporary housing.
  - Residents identified with COVID-19 or identified as contacts of individuals with COVID-19 should not necessarily be sent to their permanent homes off-campus.**
  - Ensure any staff remaining to support students in on-campus housing receive necessary training to protect themselves and residents from spread of COVID-19.**
- [Ensure continuity of food pantries and meal programs.](#)** Consult with local health officials to determine strategies for modifying food service offerings to the IHE community.
- [Consider if, and when, to stop, scale back or modify other support services on campus.](#)** Consider alternatives for providing students with essential medical, social and mental health services. Identify ways to ensure these services are provided while classes are dismissed or students are in temporary housing. Identify other types of services provided to students, staff and faculty (e.g., library services, cleaning services). Consider ways to adapt these to minimize risk of COVID-19 transmission while maintaining services deemed necessary.

# Institutions of Higher Education (IHE) Decision Tree

## Responding to a Confirmed Case: Postsecondary

Immediately contact the county health department to determine next steps to mitigate the potential for an outbreak.

The [CDC's Institutions of Higher Education Decision Tree](#) is a helpful cheat sheet, although **coordinating with local health officials to conduct contact tracing** is an essential element to a school's response.

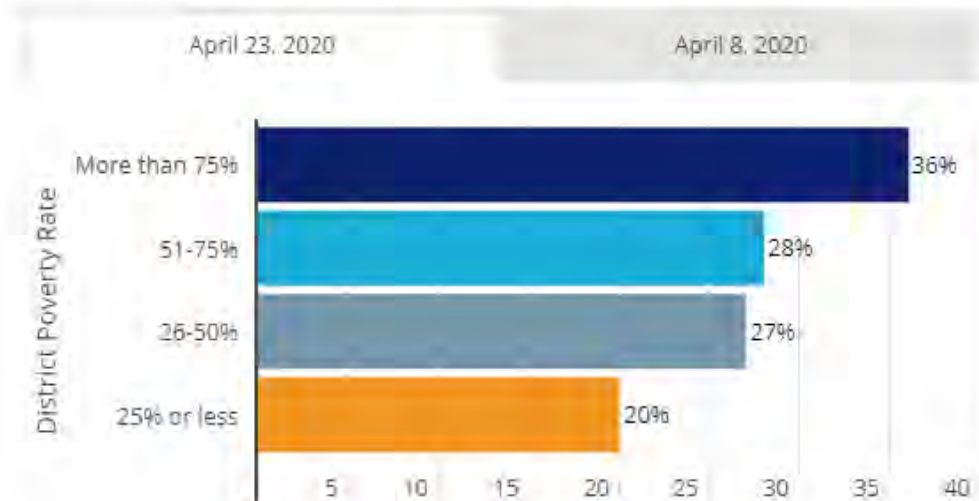

## Part 2: K-12 Instructional Continuity

## Instructional Continuity is a Key Facet of a Healthy and Safe Learning Environment

While Florida executed the most massive one-week pivot in the history of education, long-term improvements to instructional continuity are essential.

In a nationwide survey (which did not perform as well as Florida's results) EdWeek found that ["teachers say student truancy is getting worse, especially in high poverty schools"](#) during the nation's shift to distance learning.

What percentage of your students are essentially "truant" during coronavirus closures (MIA, not logging in, not making contact with you, etc.)?

\*Results show responses from teachers.

SOURCE: EdWeek Research Center Survey, 2020

EdWeek  
Research Center

## Instructional Continuity Plans (ICPs)

With no guarantees that education will go uninterrupted in the 2020-2021 academic year, districts, schools and FDOE should assume that all schools will need to be vigilant in keeping their ICPs up to date.

- ❑ By August, there is a potential that some families will hesitate to send their students back to school for full-time in-person learning.
  - ❑ Local education leaders need to create a supportive environment that encourages students to come back on campus where learning is optimized.
  - ❑ If some families still do not return in August, districts and schools must work to close any potential gaps in learning for those students.
  - ❑ Schools will need to show compassion for families' health-related concerns and simultaneously maintain a commitment to educating every child.
- ❑ State education leaders will need to consider how districts and schools can be empowered to provide those supports.
  - ❑ Summer 2020, FDOE will collaborate with innovative LEAs and charter networks **to determine best practices and flexibilities for seat time and instructional hour requirements in a potentially interrupted or even intentionally blended educational design.**
  - ❑ Long-term considerations will be needed to support students with special needs, accelerated learners, English Language Learners (ELL), migrant and homeless students and students without access to technology.

## Instructional Continuity Plans (ICPs)

Summer 2020, FDOE will collaborate with LEAs, public charter schools and private schools **with the expectation that districts and schools will implement improvements and best practices in ICPs**, covering at minimum the topics in the template herein.

### Section I: Overview of the Instructional Continuity Plan

- Purpose and structure of the Instructional Continuity Plan
- General district and school contact information:
  - Access to phone numbers, email addresses and physical location addresses
  - Important district webpages
- District communication plan (COVID-19 hotline, email addresses, live chat, access to ICP updates and most current district information)

# Template for Instructional Continuity Plans

## Section II: Information for Parents, Guardians and Students

- Introductory letter (explanation of situation and summary of key points from ICP)
- Have a plan to address each student's access to learning:
  - Access to devices
  - Access to Internet
- Access to meal programs
- Continuation of services (overview of the more detailed information in the plan)
- Expectations for parents and guardians
- Frequently asked questions
- [How to access online texts, tutorials, etc.](#)
- [How to access district portal](#)
- [Technical support](#)
- Accessibility for students with disabilities
- Textbook and materials check out and return

# Template for Instructional Continuity Plans

## Section III: Responsibilities

### Teacher Responsibilities:

- Schedule
- Evaluation
- Role in a virtual setting
- Instruction
- [Class Attendance](#)
- Grading
- Assessment
- Access to support
- Communication with administration
- Digital etiquette
- ESE assignments and responsibilities; documentation
- ELL assignments and responsibilities; documentation

- Other specialized: CTE, dual enrollment, IB, AICE, AP

### Administrative Responsibilities:

- Staffing (sick teachers, technology issues, professional learning, etc.)
- Support for staff and community
- Plans and procedures that delineate essential functions
- Emergency decision making process and delegation of authority
- [Guidance counseling and mental health](#)
- ESE, related services and 504 support; meetings, continued services, parent support

### Non-Instructional Responsibilities

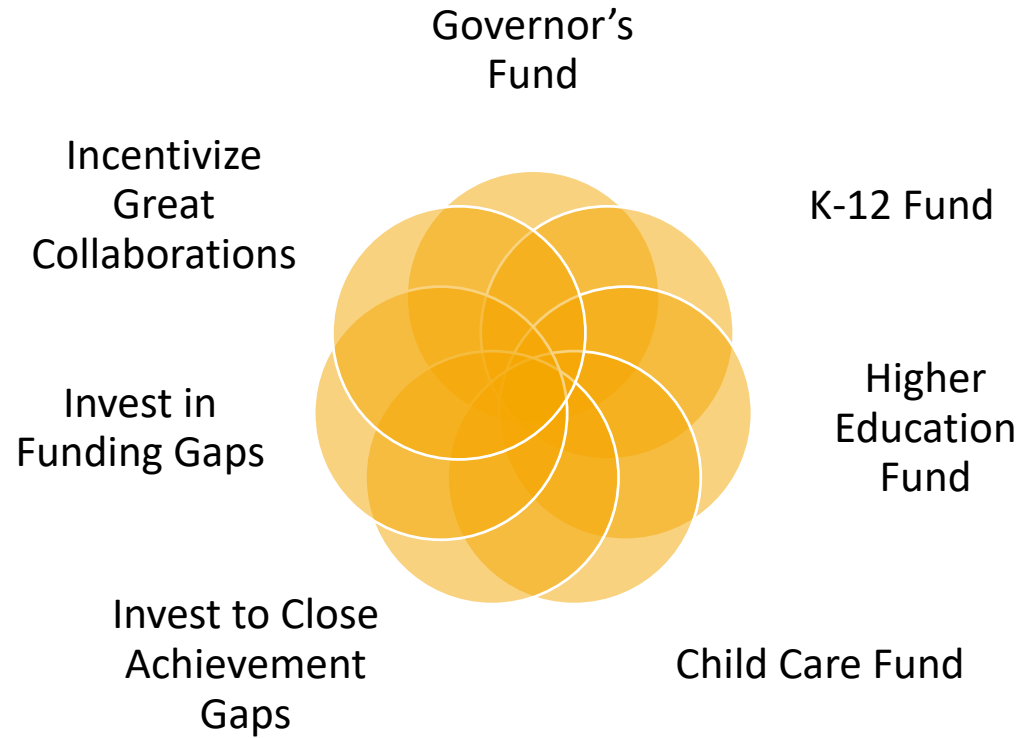

# Template for Instructional Continuity Plans

## Section IV: District Policy and Procedures:

- Attendance
- Grading
- Student workload
- [Student privacy](#) and safety
- Safekeeping and access to essential records and databases
- Exceptional Student Education (ESE)
- English Language Learners (ELL)
- Digital etiquette
- Technology usage

## Section V: Content Delivery

- Methods (e.g. paper-based, online Instruction, recorded lessons teacher-directed instruction, hybrid instructional model)
- Platforms (e.g. Google Suite, Microsoft Teams, local Learning Management System)
- Pacing guide
- ESE and ELL modifications
- Digital resources

## Part 3: The CARES Act

## Overview

The goals align with Governor DeSantis' priorities for Florida's economy and the [State Board of Education's 2020-2025 Strategic Plan](#), as revised November 2019.

- ❑ Friday, March 27, President Trump [signed into law](#) the *Coronavirus Aid, Relief, and Economic Security (CARES) Act*. This assistance for states includes more than \$2 billion combined from the [Education Stabilization Fund](#) and child care relief, supporting young Floridians birth through postsecondary.
- ❑ The Governor and Commissioner's analysis and recommendations consider the total impacts of all four education-related CARES Act funding sources combined, albeit the majority of those funds are not directed by FDOE and in some cases are distributed directly to educational institutions.

## The Four Education Related Categories of CARES Act Funding

The Governor's and Commissioner's recommendations herein pertain to three flexible funding streams:

- Governor's Fund
- FDOE's portion (10%) of the K-12 Fund
- Child Care Fund

Governor's Fund	<ul style="list-style-type: none"> <li>• \$173,585,880</li> </ul>
K-12 Fund	<ul style="list-style-type: none"> <li>• \$770,247,851</li> <li>• Local Education Agencies receive at least 90% (\$693,223,066)</li> <li>• FDOE can utilize up to 10% (\$77,024,785)</li> </ul>
Higher Education Fund	<ul style="list-style-type: none"> <li>• \$873,880,451</li> <li>• 28 State Colleges (\$285,971,411)</li> <li>• 12 State Universities (\$286,360,179)</li> <li>• Private Colleges and Universities (\$274,667,876)</li> <li>• 48 State Technical Colleges (\$26,880,985)</li> </ul>
Child Care Fund	<ul style="list-style-type: none"> <li>• \$223,605,188</li> </ul>

**Governor’s Emergency  
Education Relief Fund  
(Governor’s Fund)**

\$173,585,880

- The Governor applied and U.S. DOE awarded the grant on 5/28/20.
- The purpose of this fund is to provide emergency support to local educational agencies (LEAs), institutions of higher education (IHEs), and other education-related entities most impacted by the coronavirus or that the Governor deems essential for carrying out emergency educational services to students.
- The Governor must return funds not awarded within one year of receiving.
- Under the CARES Act, the FDOE is required to recommend to the Governor which LEAs have been most significantly impacted by the coronavirus.

## Elementary and Secondary School Emergency Relief Fund (K-12 Fund)

\$770,247,851

- FDOE must submit the application for these funds.
- The Act allows the FDOE to reserve up to 10% for state-level activities and costs of administration.**
- The remainder, at least 90%, is guaranteed to LEAs** (including Florida Virtual School, the Florida School for the Deaf and the Blind and the state's lab schools) in the proportion to which they received Title I, Part A funds under the Elementary and Secondary Education Act (ESEA).
- State must return funds not awarded within one year of receiving.
- LEAs are permitted to use the funds for a wide range of 12 specified activities.

## LEA's 90% of the K-12 Fund

**Per the CARES Act, at least 90% (\$693,223,066) of the K-12 Fund is guaranteed to LEAs** in the proportion to which they received Title I, Part A funds under the Elementary and Secondary Education Act (ESEA).

- ❑ A local educational agency that receives funds under this Act may use the funds for any of 12 purposes:
  1. Any activity authorized by the ESEA of 1965, the Individuals with Disabilities Education Act, the Adult Education and Family Literacy Act the Carl D. Perkins Career and Technical Education Act of 2006 or Subtitle VII-B of The McKinney-Vento Homeless Assistance Act.
  2. Coordination of preparedness and response efforts of local educational agencies with state, local, tribal, and territorial public health departments and other relevant agencies, to improve coordinated responses among such entities to prevent, prepare for and respond to coronavirus.
  3. Providing principals and others school leaders with the resources necessary to address the needs of their individual schools.
  4. Activities to address the unique needs of low-income children or students, children with disabilities, English learners, racial and ethnic minorities, students experiencing homelessness and foster care youth, including how outreach and service delivery will meet the needs of each population.

## LEA's 90% of the K-12 Fund *Continued...*

**LEAs must follow all applicable state laws regarding distribution of funds for public charter schools** for those funds distributed through the Governor's Fund and the K-12 Fund.

- ❑ A local educational agency that receives funds under this Act may use the funds for any of 12 purposes:
  5. Developing and implementing procedures and systems to improve the preparedness and response efforts of local educational agencies.
  6. Training and professional development for staff of the local educational agency on sanitation and minimizing the spread of infectious diseases.
  7. Purchasing supplies to sanitize and clean the facilities of a local educational agency, including buildings operated by such agency.
  8. Planning for and coordinating during long-term closures, including how to provide meals to eligible students, how to provide technology for online learning to all students, how to provide guidance for carrying out requirements under IDEA and how to ensure other educational services can continue to be provided consistent with all federal, state, and local requirements.

## LEA's 90% of the K-12 Fund *Continued...*

The Education Stabilization Fund requires that **LEAs receiving either Governor's Fund or K-12 Fund provide equitable services to private schools, after consultation**, in the same manner as provided for Title I, Part A.

- ❑ A local educational agency that receives funds under this Act may use the funds for any of 12 purposes:
  9. Purchasing educational technology (including hardware, software and connectivity) for students who are served by the local educational agency that aids in regular and substantive educational interaction between students and their classroom instructors, including low-income students and students with disabilities, which may include assistive technology or adaptive equipment.
  10. [Providing mental health services and supports.](#)
  11. Planning and implementing activities related to summer learning and supplemental after school programs, including providing classroom instruction or online learning during the summer months and addressing the needs of low-income students, students with disabilities, English learners, migrant students, students experiencing homelessness and children in foster care.
  12. Other activities that are necessary to maintain the operation and continuity of services in local educational agencies and continuing to employ existing staff of the local educational agency.

## Higher Education Emergency Relief Fund (Higher Education Fund)

\$873,880,451

- These funds are directly distributed from the USDOE to institutions of higher education (IHEs).
- 75% of each IHE's allocation of "institutional funds" (\$791,549,000) are based upon their number of Pell grant recipients, and 25% will be based upon their number of non-Pell grant recipients.
- The first half of institutional funds must go directly to students and IHE's may not use those funds to reimburse the institution for other expenses.
- Additionally, some institutions are also eligible for funds as minority serving institutions (\$68,093,543) or improvement of postsecondary institution funding for smaller colleges (\$14,237,908).

## Child Care and Development Block Grant (Child Care Fund)

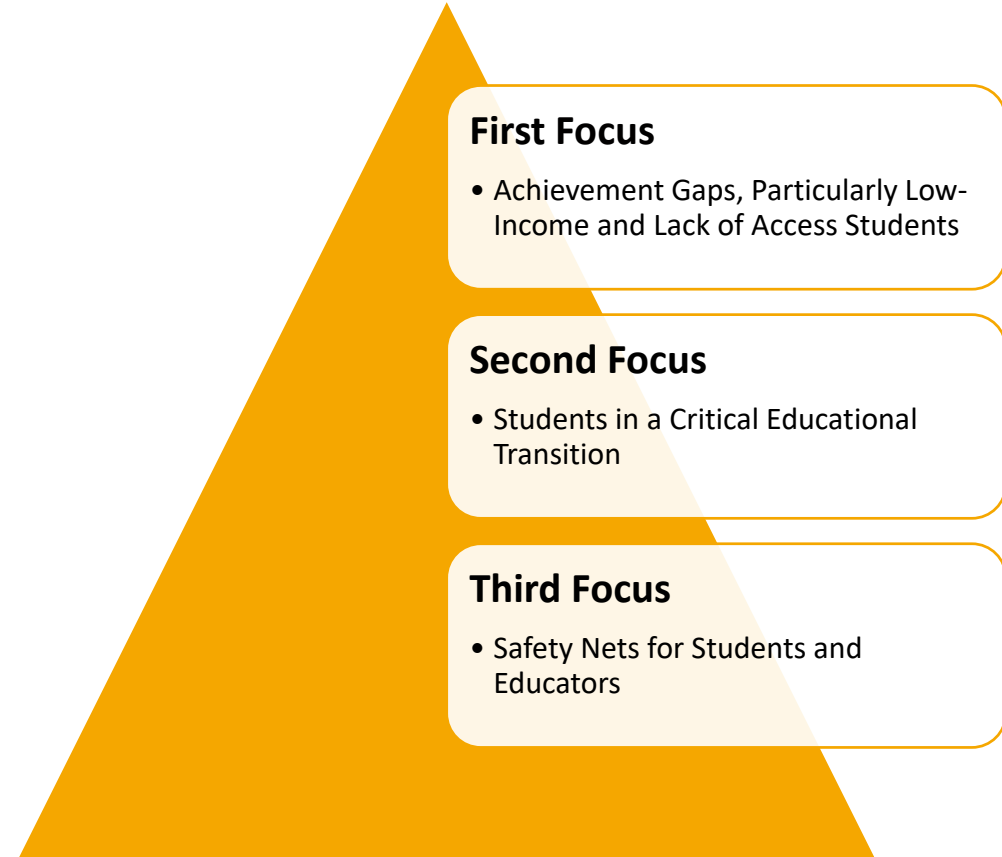

\$223,605,188

- The Act authorizes additional funding for the Child Care and Development Block Grant (CCDBG) to be obligated by September 30, 2022, spent by September 30, 2023.
- Office of Early Learning will be the lead agency for these funds.
- Funds may be expended to:
  - Provide continued payments and assistance to child care providers due to decreased enrollment or closures.
  - Provide child care assistance to health care, emergency response and sanitation employees and other essential workers, without regard to income.
  - Support providers for cleaning and sanitation and other activities to maintain or resume operation.

## Findings: Focus Flexible Funding on Students Represented in Achievement Gaps

By the very nature of achievement gaps and the impacts of poverty, the priority spending will focus on earlier grades, where the educational risk for students and the return on early supports are both at their greatest.

## Findings: Focus Flexible Funding Where Guaranteed CARES Act Funding is Less Per Student

The greatest guaranteed CARES Act funding levels, per student, are already dedicated directly to Florida’s public universities and private postsecondary institutions.

Educational Systems	Annual Student Head Count	Guaranteed CARES Allocation	Guaranteed CARES Allocation Per Head Count
Voluntary PreK + School Readiness + Child Care	649,730	\$223,605,188	\$344
Public K-12 + Private K-12	3,270,472	\$693,223,066	\$212
Technical Colleges/Centers + Apprenticeships	202,543	\$26,880,985	\$133
Florida College System	729,140	\$285,971,411	\$392
Total Private Postsecondary (CIE + ICUF)	359,656	\$274,667,876	\$764
State University System (Undergrad and Graduate)	424,283	\$286,360,179	\$675

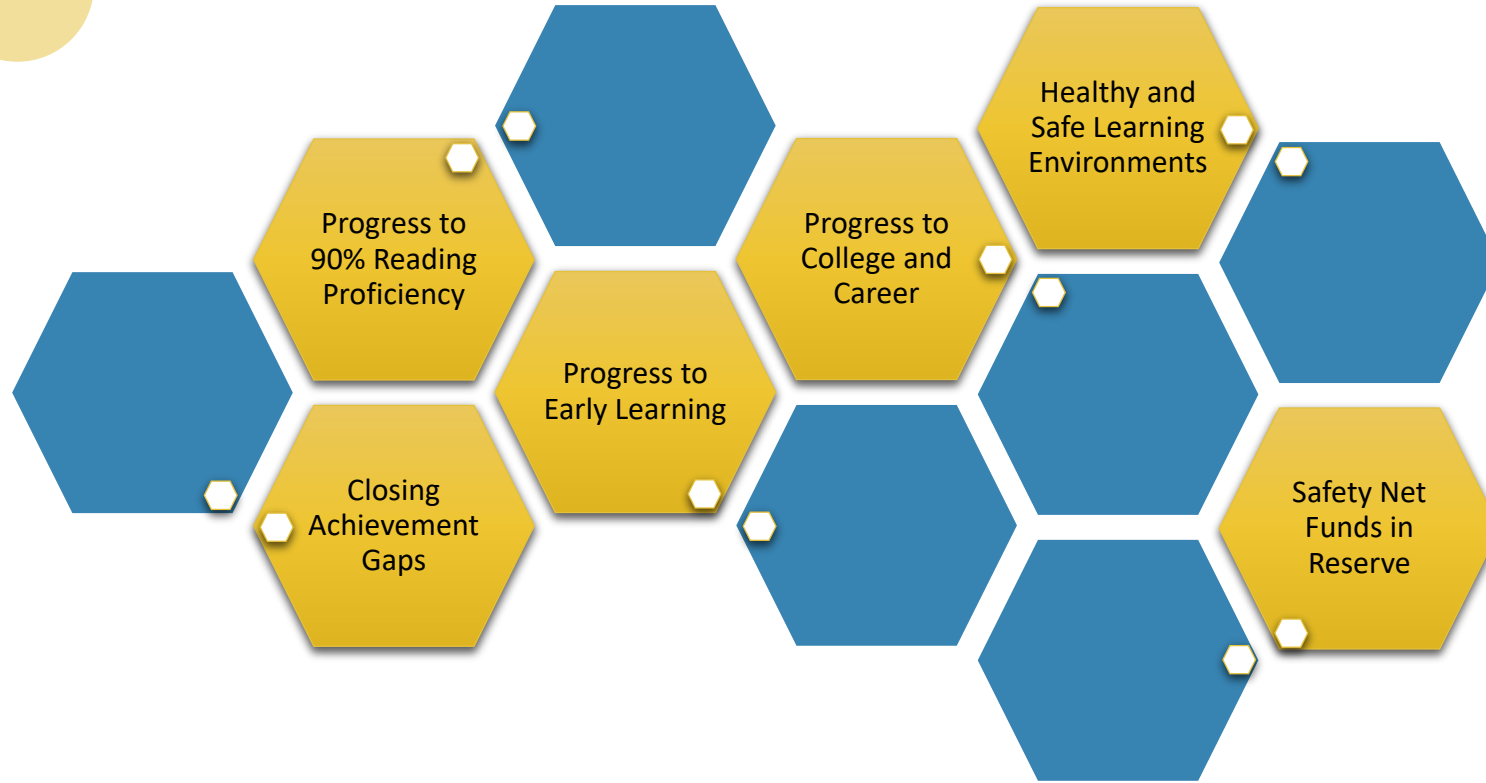

## Findings: Focus Flexible Funding Where Funding Can Incentivize Great Collaborations

While the Governor’s Fund (8.5%) and FDOE’s portion of the K-12 Fund (3.8%) only represent 12.3% of CARES Act education-related funding, combined they represent a \$250+ million opportunity to encourage high quality investments for recovery by LEAs and postsecondary institutions.

- ❑ To maximize the value of CARES Act education-related funding, Governor DeSantis recommends to use the Governor’s Fund and FDOE’s 10% of the K-12 Fund to seed and incentivize great decisions by LEAs, state colleges and state technical colleges to close achievement gaps and reopen safe and healthy schools that are set up for success.

## Part 3: CARES – Summary of Governor’s Recommendations

CLOSING ACHIEVEMENT GAPS AND HEALTHY SCHOOLS	PAGE	GOVERNOR'S FUND	FDOE'S 10% OF K-12 FUND	CHILD CARE FUND
First Responders and Health Care Workers	95			\$ 44,000,000

<b>RESERVE BALANCE</b>		<b>\$ 8,185,880</b>	<b>\$ 774,785</b>	<b>\$ 86,751,528</b>

## CARES ACT Spending Summary

- FDOE is developing assurances that LEAs, schools, technical colleges and state colleges will meet to support and maximize the impact of these investments.
- FDOE will further utilize existing resources and apply for four federal grants to direct additional resources to achieve these goals.

## Part 3: CARES – Progress to Early Learning

# First Responders and Health Care Workers

## **\$44 Million** (from Child Care Fund)

- Continue funding incentives and new enrollments.
- Monitor participation rates to continue to prioritize access to child care SR programs and waive required parent copayments.
- Monitor for appropriate end date, likely during Summer 2020.

# Emergency Child Care Relief Grants

## \$55 Million (from Child Care Fund)

- Support open VPK/SR providers with funding for infrastructure, staff payments/bonuses for retention, cleaning supplies/services and other costs to ensure healthy and safe environments.
- Support open non-VPK/SR providers with funding for infrastructure, staff payments/bonuses for retention, cleaning supplies/services and other costs to ensure healthy and safe environments.
- Support is for providers that were open as of April 30, 2020.

# High-Quality Reopening Support Grants

## \$17 Million (from Child Care Fund)

- Support closed high-quality VPK/SR (i.e., CLASS score required for contracting) to reopen with funding for infrastructure, staff payments/bonuses for retention, cleaning supplies/services and other costs to ensure healthy and safe environments.
- Support closed high-quality non-VPK/SR providers (i.e., Gold Seal status) to reopen with funding for infrastructure, staff payments/bonuses for retention, cleaning supplies/services and other costs to ensure healthy and safe environments.
- Support is for high quality providers that were closed on April 30, 2020.

# Successful Transition to Kindergarten

## **\$21 Million** (from Child Care Fund)

- ❑ \$18 million: Implement summer programs for rising kindergarten students identified with limited language and emergent literacy skills as determined by the VPK assessments and teacher recommendations.
  - ❑ Linked to “Summer Recovery” on page 107.
- ❑ \$2.9 million: Pilot a VPK-K progress monitoring system statewide.
  - ❑ Linked to “PreK-3 Progress Monitoring and Data Informed Supports” on page 102.

# Continue Immediate Supports for Early Learning

(from existing FDOE resources to supplement CARES)

- ❑ \$60.9 million: Spend available CCDF funds as follows:
  - ❑ \$23.7 million: Enrollment and suspended termination for all VPK and SR providers.
  - ❑ \$23.0 million: Fund parents' required SR copayments.
  - ❑ \$14.2 million: Mini-grants for COVID-19 response infrastructure, cleaning, instructor stipends.

# Preschool Development Grant Funds

(from existing FDOE resources to supplement CARES)

- Redirecting \$2.4 million current federal discretionary funds, as appropriate, to continue to support the early learning community.
- Potential also for additional redirected Preschool Development Grant Funds for mental health supports and mapping of child care availability.
- In December 2019, Florida was awarded a renewal of the Preschool Development. The grant is designed to strengthen Florida's overall early childhood system to improve quality early learning experiences for children as well as their successful transition to kindergarten including improved data systems and professional development and resources for early learning teachers, administrators and families. Given the impact of COVID-19, the activities proposed for year 1, January – December 2020, were reviewed and funds will be redirected to support the learning of low income and limited English proficient children with curriculum for their child care providers and digital tools for their families.

## Part 3: CARES – Progress to 90% Reading Proficiency

# PreK-3 Progress Monitoring and Data Informed Supports

## **\$20 Million** (from FDOE's 10% of K-12 Fund)

- ❑ Up to \$10 million:
  - ❑ Invest in building the capacity of districts and schools to use screening and progress monitoring data to drive informed teaching practices and curriculum decisions. Invest in a screening and progress monitoring assessment with LEAs.
  - ❑ Data share to help leverage student data and deployment of professional development to drive improvements.
  - ❑ FDOE will work with districts to deploy professional development, intervention and identification/implementation of the best curriculum (high quality curriculum and the best instruction to drive accelerated growth).
- ❑ Up to \$4 million: FDOE will source a modernized cloud based statewide data collection and student information system with the ability to serve all school districts and public charter schools, Pre-K through 12<sup>th</sup> grade, for the purposes of data collection, longitudinal analysis and progress monitoring and also all state and federal funding accountability and reporting requirements. Such a system would allow districts and schools to use the state's student information system as their own, at their discretion.
- ❑ At least \$6 million: For data modernization, FDOE would provide LEAs with a data science budget, with the agreement that county school districts would use these funds for the benefit of all schools in the district – traditional public, public charter and private schools. These funds would allow each district to dedicate a project manager to ensure successful implementation.

# Upskill Highly Effective Reading Coaches

## \$5 Million (from FDOE's 10% of K-12 Fund)

- Train and develop highly effective reading coaches, up to 2,000 coaches.
- Deploy a proven model for building reading coach effectiveness, accountability and empowerment to ensure teachers in every classroom build the skills needed to deliver scientifically based reading instructional strategies.
- This would involve engaging a research and evidence-based approach to coaching, grounded on the science of reading.
- Engage a university or other entity with the capacity and proven track record to deliver this type of training and support.
- This would result in a coaching certification designated and implemented for these positions.

# Capacity Building for Reading

## \$5 Million (from FDOE's 10% of K-12 Fund)

- ❑ Design, deploy and monitor teacher and school leader professional development, aligned with the strategies that reading coaches will support and manage accountable practices in the classroom.
- ❑ This will include training on how to effectively use data from the progress monitoring assessments to deliver responsive instruction and differentiated interventions.
- ❑ Leverage investments with districts and schools to support teachers in VPK through 3rd grade in developing the competencies necessary to deliver high-quality, evidence-supported reading instruction. This could include completing training for competency one and competency two as aligned with earning a reading endorsement, completing professional development on the University of Florida Literacy Matrix or other state-approved options.
- ❑ Deploy resources statewide that ensure the effective delivery of high-quality, evidence-informed reading instruction for any students identified in need at all grade levels. This would include providing professional development for teachers delivering reading instruction at all grade levels with these teachers attaining a reading endorsement.
- ❑ FDOE is also applying for a new Comprehensive Literacy State Development Grant to refocus and further enhance the comprehensive system of support to improve literacy outcomes for Florida's most disadvantaged students.

# Ensuring High Quality Regional Reading Supports

## \$5 Million (from FDOE's 10% of K-12 Fund)

- ❑ Deploy Regional Support Teams that engage cross-divisional experts (Reading, ESE, etc.) that support and reinforce the professional development and coaching models being deployed statewide, while focusing efforts locally within the regions with support and oversight to ensure fidelity with implementation.
- ❑ 20 Regional Reading Consultants – Literacy Seal Team Six – \$80K salary plus benefits, etc., \$104K total per position. DOE's Just Read, Florida! Office would identify the 20 regional experts that are currently employed by districts across the state.
- ❑ They would retain their employment with their district as part of this strategy, with FDOE granting funds for these individuals to serve in these regional capacities to ensure effective implementation of reading plans/strategies and use of data.
- ❑ Would serve in these roles for two years and not have any other district level duties during this period of time.
- ❑ These positions would be trained on implementation science, the strategies and practices being deployed during the training of the coaches and teachers. These positions would be trained to monitor district-level, school-level and classroom-level data from the progress monitoring tool to help deploy additional professional development and interventions when needed with urgency and fast response.
- ❑ Services provided by these regional consultants would be for the shared benefit of all schools in the districts, traditional public, public charter and private schools.

## Ensuring the B.E.S.T. Curriculum for Reading and Civics

**\$24 Million** (\$20 million from FDOE's 10% of K-12 Fund and \$4 million from Governor's Fund)

- Engage districts and schools in the identification and adoption of the [B.E.S.T. Standards](#) aligned curriculum and supplemental instructional materials to drive teaching and learning in reading for grades K-3.
- The curriculum must be vetted and approved by the FDOE's Just Read, Florida! Office, have the capacity to extend beyond direct classroom instruction in the event schools close campuses again in the future, and provide options for parents/families to support learning in the home. Supplemental resources must be focused and aligned with the five constructs of reading.
- Mini-grants for matching in this effort will first focus on those schools and districts with the greatest achievement gaps (deploy and complete a curriculum audit to determine if what is used is of highest quality).
- \$4 million: Florida's new B.E.S.T. English Language Arts (ELA) Standards became the first in the nation to include a K-12 civic literacy booklist, and FDOE will help LEAs buy directly from this list.

# Summer Recovery

## \$64 Million (from Governor's Fund)

- ❑ Districts and schools would be required to priority target students with significant academic needs (on a trajectory for a level 1 or 2), and therefore requiring greater intervention, for 4-6 weeks of face-to-face learning on school campuses from July to August.
  - ❑ Grades K-3 students for 2019-2020 (1-4 for 2020-2021) identified with a substantial deficiency in reading based on most recent available screening and progress monitoring assessment or other forms of assessment and teacher recommendations; K-3 students who may be at-risk of retention, and any third grade student with a substantial deficiency in reading must be prioritized.
  - ❑ Grades 4-5 students who were level 1 or 2 on their most recent FSA and are served in the lowest 300 performing or D and F schools across the state will also be eligible for summer program options to enhance literacy skills in reading and math.
  - ❑ Rising kindergarteners identified with limited language and emergent literacy skills as determined by the VPK assessments and teacher recommendations would also be served using an aligned strategy, with funding for this option coming from OEL allotted CARES Act Funds.
  - ❑ **When direct face-to-face services for the above Grades K-5 at-risk students are established, funds leftover may be used for direct in-person or blended instruction for students Grades K-12.**
- ❑ Districts and schools participating in these summer program options must commit portions of their funding from the K-12 Fund to ensure teacher effectiveness and qualifications; incentivize student attendance, including transportation and food; communications with staff and parents, mentoring and paraprofessional use; pre- and progress monitoring assessment selection and data sharing; instructional time and content; and connection with students' families.

# Additional Strategies to Support Summer Learning

## **\$1 Million** (from Governor's Fund)

- Within existing resources: Funding would be leveraged and braided with existing FDOE and district resources from the Reading Allocation and Supplemental Academic Instruction allocation as well as federal funds.
- Within existing resources: FDOE will engage all existing summer program providers – 21<sup>st</sup> Century, Boys and Girls Clubs, YMCA/YWCA, Faith-Based, etc. – to provide training and resources to support summer programs in delivering instruction and student learning supports to enhance academic growth.
- \$1 million: Provide mini-grants to existing summer providers to access and deliver high quality content, on-line content and consumable content to reinforce reading and math skills.

# Teacher Professional Development

(from existing FDOE resources to supplement CARES)

- Survey current teachers across the state on what resources and supports they believe would be helpful for them to do their job well, feel supported/appreciated, and share resources and supports needed to improve student learning.
- Providing statewide training to raise teacher morale, big name speakers to motivate and encourage all, recognizing and showing appreciation for the profession and provide packaged and/or online resources.
- Professional development available for free to help teachers build knowledge and skill to teach reading.
- Packaged resources:
  - Student center activities aligned to Florida’s new B.E.S.T. Standards (electronically/C-PALMS).
  - Classroom Libraries (aligned to embedded standards booklists) – to provide and partner with publisher to provide/ship books to all elementary schools in need of improvement.
  - At-Home Reading Packets for Families – to support teachers with providing ready-to-go resources for families to reinforce reading skills taught in school.
  - Resources to support teachers with initial engagement with families prior to the new school year starting (tips to engage, resources such as postcards to welcome families to the New Year, automated messages to help families gear up for the new school year, etc.

## Part 3: CARES – Progress to College and Career

# Rapid Credentials

## \$35 Million (from Governor's Fund)

- ❑ In partnership with the state's 28 Florida College System (FCS) institutions and the state's 48 technical colleges, FDOE is proposing to increase capacity around short-term, in-demand 1) *technical certificate programs* (i.e., short, *credit* options offered by all our FCS institutions); 2) market-driven and in-demand *clock hour career certificate programs* (i.e., short, vocational training programs offered by our technical colleges); and 3) engaging, transformative, in-demand *industry certification* preparation courses (i.e., courses that culminate in an industry-recognized certification that can articulate into college credit).
- ❑ FDOE has identified over 100 of these programs statewide and has cross-walked them to CareerSource Florida's in-demand sector strategies.
- ❑ All three (i.e., technical certificates, clock hour career certificates and industry certifications) of these workforce education-related options are accessible, affordable and articulate into "higher-level" credentials (i.e., AS degrees or BAS degrees) that will make Florida a national exemplar in COVID-19 economic stabilization and recovery efforts.
- ❑ Looking *forward*, FDOE intends to bring all of its resources to bear in helping faculty, administrators and staff provide the necessary resources to reimagine its postsecondary CTE offerings as a mechanism for economic and social mobility.
- ❑ This proposal marries perfectly with the following Dashboard concept, the state's new Perkins V Plan and partnership with CareerSource Florida and regional workforce boards and the state's WIOA funding support of online CTE instruction.

# Pathway to Job Market Dashboard

## \$2.5 Million (from Governor's Fund)

- ❑ Further meets the goals of [Executive Order 19-31](#) by positioning Florida to become #1 in workforce education by 2030, developing a technology platform to provide accurate quantitative data on all of Florida's CTE courses/programs.
- ❑ For economic recovery, postsecondary technical/vocational certifications are an increasingly viable route to well-paying middle-skill jobs and careers in critical needs areas. In Florida, these areas include healthcare technicians, first responders, trades, manufacturing, supply chain and logistics, and general business administration.
- ❑ Currently, CTE data is captured and collected locally and available to FDOE upon request. FDOE would source a technology platform that would provide quantitative data on all of its CTE courses and programs at the state and regional level. The tool would provide internal and external CTE stakeholders a "cockpit view" of the performance (e.g., established performance quality indicators and extent of the program's market alignment) of Florida's credentials of value.
- ❑ The platform would integrate all existing labor market information resources and data, analyzing and aggregating them in a way that paints the most comprehensive and accurate picture possible of the labor market. The platform would be housed within and maintained by FDOE, and integrate data from all secondary CTE programs and all CTE programs within the state's postsecondary system (i.e., all Florida College System institutions and state technical colleges).
- ❑ In the end, the dashboard would permit all of the state's workforce and economic development agencies to access and capture key workforce intelligence and analytics.

## CTE Equipment \$10.9 Million (from Governor's Fund)

- Infrastructure and equipment grants for K-12 schools or technical colleges that could support in-demand CTE programs of study for K-12 students.
- Funding awards based on base allocation of \$55K per district and then \$10K more per K-12 school or technical college who serves K-12 district CTE students with select CTE programs.
- This dollar amount is needed to make a meaningful impact for LEAs and their corresponding technical colleges.
- CTE programs are costly to run and districts often require additional resources to purchase industry-standard technology and equipment.

## Free SAT/ACT \$8 Million (from FDOE's 10% of K-12 Fund)

- Florida will provide up to \$8 million for vouchers to allow public school students to take the SAT or ACT for free during the 2020-2021 academic year.
- To provide all students, especially traditionally underserved populations, with an opportunity to take the SAT or ACT free of charge which may qualify them for admissions to a postsecondary institution and qualify them to earn a Bright Futures scholarship.
- Estimated 200,000 students at \$40 per test.

K-12

## Civic Literacy

### \$1 Million (from Governor's Fund)

*“Knowledge is in every country the surest basis of public happiness. To the security of a free Constitution it contributes in various ways: by convincing those, who are entrusted with the public administration, that every valuable end of government is best answered by the enlightened confidence of the people and by teaching the people themselves to know and to value their own rights.”*  
– George Washington

- ❑ Matching grants for LEAs that voluntarily administer the Florida Civics HS exam, helping with expenses related to the administration of the exam.
- ❑ As of March 2020, 30 districts and 235 schools planned to implement the test, although only Escambia and Hardee school districts were able to do so before the interruptions of COVID-19.
- ❑ These funds will help incentivize all those districts that were interested by supporting their 2020-2021 implementation of the test, which is both informative to students about their readiness to be great advocates for themselves and also allows students to opt out of a similar test in Florida's postsecondary institutions.
- ❑ Early findings from the University of North Florida showed that when students who took the test and did not pass were presented with the option of re-taking it, they opted instead to enroll in a civics course.

# Apprenticeship Expansion

(from existing FDOE resources to supplement CARES)

- ❑ FDOE is continuing to double down on apprenticeship expansion, registering almost a dozen new programs within the last two months. Registered apprenticeships (especially those connected to college credit offered by our FCS institutions) are a proven solution for businesses to recruit, train and retain highly skilled workers. Registered apprentices earn wages while learning occupational specific skills and avoiding any debt.
- ❑ *Apprentice Florida* is an existing CareerSource Florida and Department of Education outreach strategy providing businesses, including targeted industries of information technology, advanced manufacturing, healthcare, hospitality, trade and logistics and construction, with information and resources to help establish or expand registered apprenticeship programs.
- ❑ FDOE will leverage the growth of registered apprenticeship programs as a means to support the entirety of these efforts to help Floridians upskill and transition to recovery-oriented careers.
- ❑ FDOE has applied for a new \$6 million Department of Labor Registered Apprenticeship Grant and, if awarded, will leverage this to support efforts aimed at helping Floridians upskill and transition to recovery-oriented careers.

# Elevate Adult Learners

(from existing FDOE resources to supplement CARES)

- ❑ Within existing Perkins Act resources: FDOE will allocate existing resources to competitively source an accredited provider to implement a virtual high school diploma program for adults, incorporating industry recognized credentials and certifications. This is a great idea to support adults who will be seeking to upskill and have realized how economically vulnerable they are with a struggling economy without a diploma and credential or certification.

# Reimagining Workforce Preparation Grant

(applying for US DOE grant to supplement CARES)

- FDOE intends to apply for the newly launched [Reimagining Workforce Preparation Grants](#) that will provide “support to help States leverage the power of entrepreneurship to create new educational opportunities and pathways that help citizens return to work, small businesses recover, and new entrepreneurs thrive.”
- FDOE would use these grant dollars to supplement the Rapid Credentials work in this plan and to augment existing efforts around entrepreneurship and innovation associated with its new Perkins V State Plan.

## Part 3: CARES – Healthy and Safe Learning Environments

## Supplemental Health and Safety Protective Measures

### 87.5% Reimbursement (from FEMA and FDEM reimbursement)

- ❑ Educational programs from child care to postsecondary are already incurring costs to undertake the “protective measures” necessary to create and sustain healthier learning environments for students, teachers and staff.
- ❑ Schools should maintain an adequate supply of necessary supplies and materials to undertake those emergency protective measures, including cloth face coverings, supplies for cleaning and disinfecting, hand sanitizer, bleach wipes and spray and other personal protective equipment (PPE).
- ❑ The Florida Division of Emergency Management (FDEM) will coordinate with FDOE and Florida’s public schools to secure up to 87.5% reimbursement for both prior and forward-looking costs of protective measures.
- ❑ Additionally, LEAs, public charter schools and postsecondary institutions can also use their CARES Act funds to purchase testing kits for on-site administration, where appropriate and with guidance from county health departments.
  - ❑ **If conducting testing for COVID-19 on-site, districts and schools must implement procedures that comply with health care and [privacy laws](#) and, when applicable, obtain the explicit approval of parents.**

# Telehealth

## \$2 Million (from Governor's Fund)

- ❑ FDOE would provide mini-grants to all K-12 school districts, school district consortia, charter networks and private school networks to help train those districts and schools in best practices to deploy telehealth throughout Florida.
- ❑ FDOE would collaborate with the Florida Department of Children and Families (DCF) and the Agency for Health Care Administration (AHCA) to use the \$2 million to support their existing efforts to deploy additional [therapeutic/clinical tele-mental health services](#) to ensure barriers to accessing these services when needed are mitigated.
- ❑ School districts and schools need these supports to ensure that dollars flow successfully to well-designed, research-informed practices to support tele-counseling and tele-social work services.
- ❑ Training will also be needed for all school counselors, social workers and school psychologists, supporting these professionals and educators who are providing on-line services in the identification of in-home crises that students experience while receiving services through virtual education.

# Instructional Continuity Plans

## **\$8 Million** (from FDOE's 10% of K-12 Fund)

- ❑ FDOE works hand in hand with parents, teachers, educators, and community members to improve Florida's education system for students of all backgrounds and abilities. When standard operating procedures are disrupted due to emergency situations, each district may be asked to implement their Instructional Continuity Plan (ICP), their plan for implementing distance learning in the event of unanticipated campus closures for an extended period of time. The Instructional Continuity Plan can be deployed for periods of time ranging from a day or week, to a month, a semester or even longer if necessary. Each district's ICP communicates and establishes local-level policies and procedures for providing continued instructional and learning support services to their educational community.
- ❑ FDOE would provide LEAs with an \$8 million budget, with the agreement that school districts would also utilize these funds to support the county's public charter schools and private schools in the development of their ICPs.
- ❑ FDOE would work with school districts to design optimal ways to make use of these funds and ultimately upskill district and school staff to be ready for future use of their ICPs.

# Virtual Safety Net

## \$5 Million (from FDOE's 10% of K-12 Fund)

- ❑ Florida Virtual School (FLVS) has already invested nearly \$4 million out of existing resources to offer 100 free courses to all schools in Florida, enhanced their existing learning management system and provided Florida with a virtual safety net that could serve 2.7 million students.
- ❑ This \$5 million investment would recoup those funds and also invest further by increasing capacity to 4 million total students.
- ❑ With 3.3 million students enrolled in either a public or private school, along with another 100,000 learning at home, the capacity to serve 4 million students would more than prepare Florida for future crisis response.
- ❑ Additionally, the restoration of these funds is necessary, as FLVS needs funding restored to its reserves, long-term, in case concurrent usage was unexpectedly high during a crisis. Concurrent usage in effect refers to the number of students using FLVS' learning management system at the exact same moment.
- ❑ For the duration of the COVID-19 disruptions to the education system, FLVS will extend its relief service to provide all Florida students access to FLVS' digital course content (content services), provided that the districts/schools have a learning management system in place.

# Teacher Training on Virtual Learning Management Systems

## \$250K (from FDOE's 10% of K-12 Fund)

- \$250K: Florida Virtual School (FLVS) will continue to provide its 6-hour Virtual Teacher Training (VTT) course for every public school teacher in Florida until all public school teachers are trained.
  - The VTT course is an asynchronous course that showcases FLVS platforms, processes and online teaching best practices to accommodate Florida district teachers who are asked to teach in an online environment.
  - Florida public school teachers who take this 6-hour course will be prepared to instruct through any school district's FLVS franchise.
  - FLVS can provide this training for up to 10,000 teachers per week.
- Within existing resources: FDOE will further support districts and schools' teacher professional development on the following:
  - Teaching through their district's learning management system.
  - Distance learning for specialized forms of instruction, like students with special needs.
  - Delivering high quality instruction in a digital learning environment.
  - Districts and schools will also need guidance on integrating distance learning professional development into their current practices by which teachers earn their required 120 hours of professional learning every 5 years.
  - Districts and schools will further need guidance on conducting a needs assessment.
  - FDOE will help districts and schools identify high quality professional learning facilitators in the digital teaching.

# Distance Learning Days

(from existing FDOE resources to supplement CARES)

- Students and teachers need support creating the “muscle memory” for distance learning, as learning outside the classroom is not a skill equally shared by all students and teachers today. Unquestionably, some students and teachers were better prepared for this transition than others, for a variety of reasons, and this support is necessary should the need arise again for periods of required distance learning.
- Schools and districts will also need FDOE’s support with professional development, instructional design and creating model plans for implementation of these innovations.
- FDOE will work with districts and schools to create a normalized schedule of planned distance learning days and subsequent learning opportunities for teachers and students to become more familiar with distance learning.
- Schools and districts could schedule these days much like teacher planning days, once each month, with training for teachers, students and even parents/guardians to learn how to utilize distance learning tools.
- FDOE will work with districts and schools to identify means of training students and their parents/guardians.
- These days could also become pathways for districts to ensure that students have dedicated time for learning models for [statutorily required instruction, like mental health and substance abuse education](#).

# Rethink K-12 Education Models Grant

(applying for US DOE grant to supplement CARES)

- FDOE is going to apply for the newly launched [Rethink K-12 Education Models Grant](#) that “aimed at opening new, innovative ways for students to access K-12 education with an emphasis on meeting students' needs during the coronavirus national emergency.”
- FDOE would use these grant dollars to support families, school and district transitions to innovative new distance learning models.

Ensure Scholarships for Low-Income Students (\$30M)

Additional Safety Net Funds in Reserve can Expand Upon Priorities Herein (TBD)

Private School Stabilization Grant Funds (\$15M)

## Part 4: CARES – Safety Net Funds in Reserve

## Ensure Scholarships for Low-Income Students Up to \$30 Million (from Governor's Fund)

- Annually, Florida's Tax Credit Scholarship Program provides more than 100,000 low-income students with scholarships that are funded privately through contributions from corporate donors to non-profit scholarship funding organizations.
- Economic uncertainty has slowed commitments for contribution renewals, creating doubt about supports for these 100% low-income and 73% minority students.
- Up to \$30 million will be reserved, if necessary, to ensure these life-altering scholarships are protected for those students who are seeking to renew their existing scholarships.
- Any unused funds would first supplement the Private School Stabilization Fund before being considered for reallocation elsewhere.

# Private School Stabilization Grant Funds

## **\$15 Million** (from Governor's Fund)

- Recent surveys indicate nearly 73% of scholarship participating private schools are seeing declines in re-enrollment compared to 2019; and
- A nearly identical percentage of private schools have heard from parents who may not be able to pay tuition for the 2020-2021 school year.
- During the Great Recession, 2008-2009 was a peak in difficulty for private schools, when a net of 121 closed that year due to financial constraints of tuition paying families.
- In order to avoid such an immediate pressure on schools, this plan would allocate at least \$15 million in reserve for grant funding that private schools which serve student populations of 50% or more state scholarship students can apply for.

## Appendix: Additional State and Federal Requirements

# Funding Equity

- LEAs must follow all applicable state laws regarding distribution of funds for public charter schools for those funds distributed through the Governor's Fund and the K-12 Fund.
- The Education Stabilization Fund requires that LEAs receiving either the Governor's Fund or K-12 Fund provide equitable services to private schools, after consultation, in the same manner as provided for Title I, Part A.
  - Under Title I, Part A, the LEAs are not allowed to reimburse private schools for expenditures (such as salaries), but must provide services on behalf of the private schools.
  - Requires that the control of funds and title to property, materials and equipment purchased remains with the LEA.

# Assurances

- ❑ The Education Stabilization Fund requires that LEAs, states, IHEs or other entities that receive funds shall, to the greatest extent practicable, continue to pay its employees and contractors during the period of any disruption due to coronavirus.
- ❑ A state's application for funds to carry out the Education Stabilization Fund includes assurances that the state will maintain support for elementary and secondary education and higher education, including state funding for IHEs and need-based financial aid, but does not include capital projects or research and development in fiscal years 2020 and 2021, based on the average of the prior three years preceding the Act.
  - ❑ However, the U.S. Secretary of Education may waive the maintenance of effort requirement for states that have experienced a precipitous decline in financial resources.
- ❑ FDOE will provide more specific assurances for receipt of Governor's Fund and DOE's portion of the K-12 Fund dollars proposed herein.

# STATE OF FLORIDA

## OFFICE OF THE GOVERNOR

### EXECUTIVE ORDER NUMBER 21-175

(Ensuring Parents' Freedom to Choose – Masks in Schools)

**WHEREAS**, a right to normal education is imperative to the growth and development of our children and adolescents; and

**WHEREAS**, last summer, at my direction, Florida's Department of Education ordered schools to be open for in-person instruction for five days per week to ensure the continued well-being of students and families; and

**WHEREAS**, schools – including those that did not require students to be masked – did not drive community transmission of COVID-19; and

**WHEREAS**, despite recent Centers for Disease Control and Prevention (CDC) “guidance,” forcing students to wear masks lacks a well-grounded scientific justification; indeed, a Brown University study analyzed COVID-19 data for schools in Florida and found no correlation with mask mandates; and

**WHEREAS**, masking children may lead to negative health and societal ramifications; and

**WHEREAS**, studies have shown that children are at a low risk of contracting a serious illness due to COVID-19 and do not play a significant role in the spread of the virus; and

**WHEREAS**, forcing children to wear masks could inhibit breathing, lead to the collection of dangerous impurities including bacteria, parasites, fungi, and other contaminants, and adversely affect communications in the classroom and student performance; and

**WHEREAS**, there is no statistically-significant evidence to suggest that counties with mask requirements have fared any better than those without mask requirements during the 2020-2021 school year; and

**WHEREAS**, on April 29, 2021, Florida Surgeon General Dr. Scott Rivkees issued a Public Health Advisory stating that continuing COVID-19 restrictions on individuals, including long-term use of face coverings, pose a risk of adverse and unintended consequences; and

**WHEREAS**, on June 29, 2021, I signed into law H.B. 241, the Parents' Bill of Rights; which prevents the state, its subdivisions, or any governmental institution, from infringing on the fundamental rights of a parent to direct the upbringing, education, health care, or mental health of a minor child without demonstrating that such action is reasonable and necessary to achieve a compelling state interest and that such action is narrowly tailored and is not otherwise served by less restrictive means; and

**WHEREAS**, pursuant to Florida law, all parents have the right to make health care decisions for their minor children; and

**WHEREAS**, many school districts are scheduled to begin classes on August 10, 2021, which is less than two weeks away, and within four weeks virtually all public schools across Florida will be underway; therefore immediate action is needed to protect the fundamental right of parents to make health and educational decisions for their children; and

**WHEREAS**, Section 1003.22(3), Florida Statutes, mandates the Florida Department of Health to adopt rules, in consultation with the Florida Department of Education, governing the control of preventable communicable diseases, including procedures for exempting children from immunization requirements; and

**WHEREAS**, Florida's State Board of Education, the chief implementing and coordinating body of public education in Florida, has the authority to adopt rules pursuant to Sections

120.536(1), 120.54, and 1001.02, Florida Statutes, and may delegate its general powers to the Commissioner of Education; and

**WHEREAS**, pursuant to Section 1008.32(4), Florida Statutes, if the State Board of Education determines that a district school board is unwilling or unable to comply with the law, the State Board shall have the authority to, among other things, withhold the transfer of state funds, discretionary grant funds, discretionary lottery funds, or any other funds specified as eligible for this purpose by the Legislature until the school district complies with the law or state board rule and declare the school district ineligible for competitive grants; and

**WHEREAS**, given the historical data on COVID-19 and the ongoing debate over whether masks are more harmful than beneficial to children and to school environments in general, we should protect the freedoms and statutory rights of students and parents by resting with the parents the decision whether their children should wear masks in school; and

**WHEREAS**, we should equally and uniformly protect the freedoms and rights of students and parents across the state.

**NOW, THEREFORE, I, RON DESANTIS**, as Governor of Florida, by virtue of the authority vested in me by Article IV, Section 1(a) of the Florida Constitution, and all other applicable laws, promulgate the following Executive Order, to take immediate effect:

Section 1. I hereby direct the Florida Department of Health and the Florida Department of Education, working together, to immediately execute rules pursuant to section 120.54, Florida Statutes, and take any additional agency action necessary, using all legal means available, to ensure safety protocols for controlling the spread of COVID-19 in schools that:

- A. Do not violate Floridians' constitutional freedoms;
- B. Do not violate parents' right under Florida law to make health care decisions for their minor children; and

C. Protect children with disabilities or health conditions who would be harmed by certain protocols such as face masking requirements.

Section 2. Any action taken pursuant to Section 1 above shall at minimum be in accordance with Florida's "Parents' Bill of Rights" and protect parents' right to make decisions regarding masking of their children in relation to COVID-19.

Section 3. The Florida Commissioner of Education shall pursue all legal means available to ensure school districts adhere to Florida law, including but not limited to withholding state funds from noncompliant school boards violating any rules or agency action taken pursuant to Section 1 above.

Section 4. This does not prohibit the Florida Legislature from exploring legislation to further protect the fundamental rights of students and parents to be free from excessive, harmful regulation in schools.

Section 5. This Executive Order is effective immediately.

IN TESTIMONY WHEREOF, I have hereunto set my hand and caused the Great Seal of the State of Florida to be affixed, at Tallahassee, this 30th day of July, 2021.

## Notice of Emergency Rule

**DEPARTMENT OF HEALTH****Division of Disease Control**

RULE NO.:      RULE TITLE:

64DER21-12      Protocols for Controlling COVID-19 in School Settings

**SPECIFIC REASONS FOR FINDING AN IMMEDIATE DANGER TO THE PUBLIC HEALTH, SAFETY OR WELFARE:** Because a recent increase in COVID-19 infections, largely due to the spread of the COVID-19 delta variant, coincides with the imminent start of the school year, it is imperative that state health and education authorities provide emergency guidance to school districts concerning the governance of COVID-19 protocols in schools. Accordingly, pursuant to its authority to adopt rules governing the control of preventable communicable diseases in public schools, *see* section 1003.22(3), Florida Statutes, the Florida Department of Health, after consultation with the Department of Education, hereby promulgates an emergency rule regarding COVID-19 protocols in public schools to encourage a safe and effective in-person learning environment for Florida’s schoolchildren during the upcoming school year; to prevent the unnecessary removal of students from school; and to safeguard the rights of parents and their children.

This emergency rule conforms to Executive Order Number 21-175, which ordered the Florida Department of Health and the Florida Department of Education to ensure safety protocols for controlling the spread of COVID-19 in schools that (1) do not violate Floridians’ constitutional freedoms; (2) do not violate parents’ rights under Florida law to make health care decisions for their minor children; and (3) protect children with disabilities or health conditions who would be harmed by certain protocols, such as face masking requirements. The order, which is incorporated by reference, directs that any COVID-19 mitigation actions taken by school districts comply with the Parents’ Bill of Rights, and “protect parents’ right to make decisions regarding masking of their children in relation to COVID-19.”

Because of the importance of in-person learning to educational, social, emotional and mental well-being, removing healthy students from the classroom for lengthy quarantines should be limited at all costs. Under Florida law, parents have a fundamental right to direct the upbringing, education, health care, and mental health of their minor children and have the right to make health care decisions for their minor children. HB 241, Ch. 2021-199, Laws of Fla. In furtherance of the Florida Department of Health’s authority to adopt rules governing the control of preventable communicable diseases—and because students benefit from in-person learning—it is necessary to immediately promulgate a rule regarding COVID-19 safety protocols that protects parents’ rights and to allow for in-person education for their children. Removing children from school poses a threat to developmental upbringing and should not occur absent a heightened showing of illness or risk of illness to other students.

**REASON FOR CONCLUDING THAT THE PROCEDURE IS FAIR UNDER THE CIRCUMSTANCES:** This emergency rule is necessary in light of the recent rise in COVID-19 cases in Florida and the urgent need to provide COVID-19 guidance to school districts before the upcoming school year commences. Given that a majority of schools will resume in-person learning for the 2021-2022 school year within the next four weeks, there is insufficient time to adopt the rule through non-emergency process.

**SUMMARY:** Emergency rule 64DER21-12 sets forth the procedures for controlling COVID-19 in school settings. **THE PERSON TO BE CONTACTED REGARDING THE EMERGENCY RULE IS:** Carina Blackmore, Florida Department of Health, 4052 Bald Cypress Way, Tallahassee, Florida 32399-1703, (850)245-4732.

**THE FULL TEXT OF THE EMERGENCY RULE IS:**

64DER21-12 Protocols for Controlling COVID-19 in School Settings

(1) GENERAL PROTOCOLS AND DEFINITION. The following procedures should be instituted to govern the control of COVID-19 in public schools:

(a) Schools should encourage routine cleaning of classrooms and high-traffic areas.

(b) Students should be encouraged to practice routine handwashing throughout the day.

(c) Students should stay home if they are sick.

(d) Students may wear masks or facial coverings as a mitigation measure; however, the school must allow for a parent or legal guardian of the student to opt-out the student from wearing a face covering or mask.

(e) For purposes of this rule, "direct contact" means cumulative exposure for at least 15 minutes, within six feet.

(2) PROTOCOLS FOR SYMPTOMATIC OR COVID-19 POSITIVE STUDENTS. Students experiencing any symptoms consistent with COVID-19 or who have received a positive diagnostic test for COVID-19 should not attend school, school-sponsored activities, or be on school property until:

(a) The student receives a negative diagnostic COVID-19 test and is asymptomatic; or

(b) Ten days have passed since the onset of symptoms or positive test result, the student has had no fever for 24 hours and the student's other symptoms are improving; or

(c) The student receives written permission to return to school from a medical doctor licensed under chapter 458, an osteopathic physician licensed under chapter 459, or an advanced registered nurse practitioner licensed under chapter 464.

(3) PROTOCOLS FOR STUDENTS WITH EXPOSURE TO COVID-19. Students who are known to have been in direct contact with an individual who received a positive diagnostic test for COVID-19 should not attend school, school-sponsored activities, or be on school property until:

(a) The student is asymptomatic and receives a negative diagnostic COVID-19 test after four days from the date of last exposure to the COVID-19 positive individual; or

(b) The student is asymptomatic and seven days have passed since the date of last exposure to the COVID-19 positive individual.

(c) If a student becomes symptomatic following exposure to an individual that has tested positive for COVID-19, the student should follow the procedures set forth in subsection (2), above.

(4) PROTOCOL FOR STUDENTS WITH PRIOR COVID-19 INFECTION. A student who has received a positive diagnostic test for COVID-19 in the previous 90 days and who is known to have been in direct contact with an individual who has received a positive diagnostic test for COVID-19 is not subject to the protocols set forth in subsection (3), so long as the student remains asymptomatic. If a student with a previous COVID-19 infection becomes symptomatic, the student should follow the procedures set forth in subsection (2), above. This subsection applies equally to students that are fully vaccinated for COVID-19.

(5) TESTING. Any COVID-19 testing of minors at school requires informed written consent from a parent or legal guardian.

(6) NON-DISCRIMINATION. Students whose parents or legal guardian have opted them out of a mask or face covering requirement shall not be subject to any harassment or discriminatory treatment, including but not limited to:

(a) Relegation to certain physical locations;

(b) Isolation during school activities; or

(c) Exclusion from any school-sponsored events or activities.

Rulemaking Authority 1003.22(3) FS. Law Implemented 1003.22(3) FS. History—New.

## Notice of Emergency Rule

**DEPARTMENT OF HEALTH****Division of Disease Control**

RULE NO.:      RULE TITLE:

64DER21-15      Protocols for Controlling COVID-19 in School Settings

**SPECIFIC REASONS FOR FINDING AN IMMEDIATE DANGER TO THE PUBLIC HEALTH, SAFETY OR WELFARE:** Because of an increase in COVID-19 infections, largely due to the spread of the COVID-19 delta variant, prior to the beginning of the 2021-2022 school year, it is imperative that state health and education authorities continue to provide emergency guidance to school districts concerning the governance of COVID-19 protocols in schools. In August 2021, all public schools in Florida began the 2021-2022 school year with in-person learning available for all students. The Department of Health adopted Emergency Rule 64DER21-12 on August 6, 2021. Since that time the Department has conducted a review of data for cases of COVID-19 positive school-aged children and data for school-aged children who have been in direct contact with a COVID-19 positive person. The Department observed a large number of students have been required to quarantine for long periods of time, resulting in the loss of hundreds of thousands of days of in-person learning. In addition, the Department observed no meaningful difference in the number of COVID-19 cases in school-aged children in counties where school districts have imposed mask mandates. It is necessary to minimize the amount of time students are removed from in-person learning based solely on direct contact with an individual that is positive for COVID-19, to ensure parents and legal guardians are allowed the flexibility to control the education and health care decisions of their own children, and to protect the fundamental rights of parents guaranteed under Florida law.

In order to permit students to continue in-person learning, to minimize the detriment to students and school personnel from the added burden of recurrent removal of students, and to benefit the overall welfare of students in Florida, it is necessary to provide updated emergency guidance to school districts concerning the governance of COVID-19 protocols in schools. This emergency rule conforms to Executive Order Number 21-175, which ordered the Florida Department of Health and the Florida Department of Education to ensure safety protocols for controlling the spread of COVID-19 in schools that (1) do not violate Floridians' constitutional freedoms; (2) do not violate parents' rights under Florida law to make health care decisions for their minor children; and (3) protect children with disabilities or health conditions who would be harmed by certain protocols, such as face masking requirements. The order directs that any COVID-19 mitigation actions taken by school districts comply with the Parents' Bill of Rights, and "protect parents' right to make decisions regarding masking of their children in relation to COVID-19."

Because of the importance of in-person learning to educational, social, emotional and mental health, and welfare, removing healthy students from the classroom for lengthy quarantines should be limited. Under Florida law, parents and legal guardians have a fundamental right to direct the upbringing, education, health care, and mental health of their minor children and have the right to make health care decisions for their minor children. HB 241, Ch. 2021-199, Laws of Fla. Parents and legal guardians are uniquely situated to understand the health care, emotional, and educational needs of their minor children. In furtherance of the Florida Department of Health's authority to adopt rules governing the control of preventable communicable diseases—and because students benefit from in-person learning—it is necessary to immediately promulgate a rule regarding COVID-19 safety protocols that protects parents' rights and to maximize the allowance of in-person education for their children. Unnecessarily removing students from in-person learning poses a threat to the welfare of children, including their social, emotional and educational developmental, and is not necessary absent illness.

**REASON FOR CONCLUDING THAT THE PROCEDURE IS FAIR UNDER THE CIRCUMSTANCES:** This emergency rule is necessary in light of the unnecessary exclusion of healthy students from in-person learning and the urgent need to provide updated COVID-19 guidance to school districts. Given the evolving nature of this novel disease and the potential for adverse impacts on school children resulting from the unnecessary exclusion of healthy children from in-person learning, there is a need to issue an immediately effective rule while the department promulgates a permanent rule through the non-emergency process.

SUMMARY: Emergency rule 64DER21-15 sets forth the procedures for controlling COVID-19 in school settings. Emergency rule 64DER21-15 repeals and replaces Emergency rule 64DER21-12 that was adopted on August 6, 2021.

THE PERSON TO BE CONTACTED REGARDING THE EMERGENCY RULE IS: Carina Blackmore, Florida Department of Health, 4052 Bald Cypress Way, Tallahassee, Florida 32399-1703, (850)245-4732.

THE FULL TEXT OF THE EMERGENCY RULE IS:

64DER21-15 Protocols for Controlling COVID-19 in School Settings

(1) GENERAL PROTOCOLS AND DEFINITION. The following procedures shall be instituted to govern the control of COVID-19 in public schools:

(a) Schools will encourage routine cleaning of classrooms and high-traffic areas.

(b) Students will be encouraged to practice routine handwashing throughout the day.

(c) Students will stay home if they are sick.

(d) Schools may adopt requirements for students to wear masks or facial coverings as a mitigation measure; however, the school must allow for a parent or legal guardian of the student to opt the student out of wearing a face covering or mask at the parent or legal guardian's sole discretion.

(e) For purposes of this rule, "direct contact" means cumulative exposure for at least 15 minutes, within six feet.

(2) PROTOCOLS FOR SYMPTOMATIC OR COVID-19 POSITIVE STUDENTS. Schools will ensure students experiencing any symptoms consistent with COVID-19 or who have received a positive diagnostic test for COVID-19 shall not attend school, school-sponsored activities, or be on school property until:

(a) The student receives a negative diagnostic COVID-19 test and is asymptomatic; or

(b) Ten days have passed since the onset of symptoms or positive test result, the student has had no fever for 24 hours and the student's other symptoms are improving; or

(c) The student receives written permission to return to school from a medical doctor licensed under chapter 458, an osteopathic physician licensed under chapter 459, or an advanced registered nurse practitioner licensed under chapter 464.

(3) PROTOCOLS FOR STUDENTS WITH EXPOSURE TO COVID-19. Schools shall allow parents or legal guardians the authority to choose how their child receives education after having direct contact with an individual that is positive for COVID-19:

(a) Parents or legal guardians of students who are known to have been in direct contact with an individual who received a positive diagnostic test for COVID-19 may choose one of the following options:

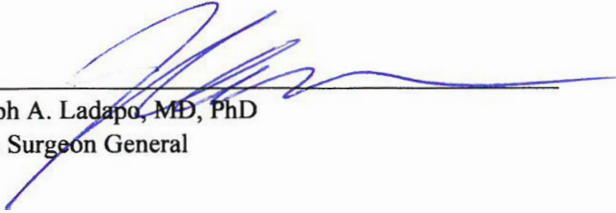

1. Allow the student to attend school, school-sponsored activities, or be on school property, without restrictions or disparate treatment, so long as the student remains asymptomatic; or

2. Quarantine the student for a period of time not to exceed seven days from the date of last direct contact with an individual that is positive for COVID-19.

(b) If a student becomes symptomatic following direct contact with an individual that has tested positive for COVID-19, or tests positive for COVID-19, the procedures set forth in subsection (2), above shall apply. Rulemaking Authority 1003.22(3) FS. Law Implemented 1003.22(3) FS. History—New.

THIS RULE TAKES EFFECT UPON BEING FILED WITH THE DEPARTMENT OF STATE UNLESS A LATER TIME AND DATE IS SPECIFIED IN THE RULE.

EFFECTIVE DATE:

**NOTICE OF EMERGENCY RULE****DEPARTMENT OF EDUCATION****STATE BOARD OF EDUCATION**

RULE No.: 6AER21-01

RULE TITLE: Pupil Attendance Records for COVID-19.

SPECIFIC REASONS FOR FINDING AN IMMEDIATE DANGER TO THE PUBLIC HEALTH, SAFETY OR WELFARE: Given the recent rise in COVID-19 infections, largely driven by the spread of the delta variant, and the impending start to the 2021-2022 school year, the Florida Department of Education has been working to assist the Florida Department of Health in the development of minimum protocols governing the control of COVID-19 in public schools. As school districts seek to impose new COVID-19 restrictions on students, emergency rulemaking is necessary here to protect the rights of students and their parents or guardians.

This rule conforms to Executive Order Number 21-175, which ordered the Florida Department of Health and the Florida Department of Education to immediately execute rules and to take any additional agency action necessary, using all legal means available to ensure safety protocols for controlling the spread of COVID-19 in schools that (1) do not violate Floridians' constitutional freedoms; (2) do not violate parents' rights under Florida law to make health care decisions for their minor children; and (3) protect children with disabilities or health conditions who would be harmed by certain protocols, such as face masking requirements. The order, which is incorporated by reference, located at <https://www.fldoe.org/policy/state-board-of-edu/meetings/>, directs that any actions taken by school districts comply with the Parents' Bill of Rights, codified in Sections 1014.02 – 1014.06, Fla. Stat., and "protect parents' right to make decisions regarding masking of their children in relation to COVID-19." Parental rights include the right to make health care decisions for minor children, unless prohibited by law and the right to direct the education and care of minor children. See, Section 1014.04, Fla. Stat. In order to ensure compliance with the law and state board rule, under Section 1008.32, Fla. Stat., the State Board of Education has authority to withhold from school districts state funds, discretionary grant funds, discretionary lottery funds or any other funds specified as eligible for this purpose by the legislature, until the district comes into compliance.

Many school districts have or are expected to implement "stay-home" directives for students who have been exposed to or who contracted COVID-19 for the upcoming school year. These directives will result in learning loss for students unless plans are enacted to continue learning during "stay-home" days. As a result, it is necessary to

amend the pupil attendance rule to set forth the requirements to count these days as an educational activity for the purpose of pupil attendance. Section 1003.23, Fla. Stat. provides that “[s]tudents may be counted in attendance only if they are actually present at school or are away from school on a school day and are engaged in an educational activity which constitutes a part of the school-approved instructional program for the student. While Rule 6A-1.044, Pupil Attendance Records, includes similar language, there is no criteria to establish “an educational activity which constitutes a part of the school-approved instructional program for the student.” Given that public schools throughout the state open in August and some open in less than one week, there is not sufficient time to proceed through normal rulemaking procedures before school starts in order to address the potential for learning loss to students under “stay-home” directives.

Based upon the foregoing and in compliance with the Governor’s executive order, the agency finds that the potential for learning loss for certain students when school starts in August, creates an immediate danger to the public health, safety and welfare of students and requires emergency action.

**REASONS FOR CONCLUDING THAT PROCEDURE USED IS FAIR UNDER THE CIRCUMSTANCES:**

There are multiple reasons for concluding that the procedure used is fair under these circumstances. First, as noted above, because school begins in August, there is not sufficient time to adopt a rule through non-emergency means before the start of the 2021-22 school year. The Governor’s Executive Order 21-175—issued just days ago. Next, the agency has received multiple requests to clarify the protocols and processes schools should utilize when planning for reopening schools given the presence of COVID-19 and the varied health and educational needs of students. Further, the procedure is fair because the rule relies upon an order of the Governor, which is public, and the emergency rule was made public by publishing it on the Department’s website in an effort to reach interested persons prior to consideration by the State Board of Education. Finally, because the agency is headed by a board, rather than an individual, the rule will be considered at a public meeting before the State Board of Education, with the opportunity for public input prior to adoption. While this period is an abbreviated one, given the need to act quickly to avoid harm to students, the agency is of the opinion that the procedure utilized is fair to interested and affected persons.

**SUMMARY OF THE RULE:** The emergency rule provides criteria to avoid learning loss and consider a student in attendance, when under a “stay-home” directive due to COVID-19.

THE PERSON TO BE CONTACTED REGARDING THE EMERGENCY RULE IS: Jacob Oliva, Chancellor of Public Schools.

THE FULL TEXT OF THE EMERGENCY RULE IS:

6AER21-01 Pupil Attendance Records for COVID-19.

(1) Definitions. “Stay-home” directive means a public K-12 student who is under a quarantine order or is not physically present in school due to contact with, or the asymptomatic contraction of, COVID-19.

(2) In accordance with Rule 6A-1.044, Pupil Attendance Records, Fla. Admin. Code R., a pupil shall be deemed to be in attendance if actually present at school, or away from school on a school day and engaged in an educational activity which constitutes a part of the school-approved instructional program for that pupil.

(3) Where an asymptomatic student is under a stay-home directive, the student may only be considered in attendance if the following criteria are met:

(a) The district has adopted procedures to continue the education of the student during the stay-home directive;

(b) These procedures rely upon continuing the student’s access to assignments and curriculum the student would be receiving were the student physically present in school; and

(c) Instructional personnel or administrative personnel, as defined in section 1012.01, F.S., must be available to assist the student with assignments and curriculum during the stay-home directive.

## NOTICE OF EMERGENCY RULE

### DEPARTMENT OF EDUCATION

### STATE BOARD OF EDUCATION

RULE No.: 6AER21-02

RULE TITLE: COVID-19 Hope Scholarship Transfer Procedures.

**SPECIFIC REASONS FOR FINDING AN IMMEDIATE DANGER TO THE PUBLIC HEALTH, SAFETY OR WELFARE:** Given the recent rise in COVID-19 infections, largely driven by the spread of the delta variant, and the impending start to the 2021-2022 school year, the Florida Department of Education has been working to assist the Florida Department of Health in the development of minimum protocols governing the control of COVID-19 in public schools. As public school districts seek to impose new COVID-19 restrictions on students, emergency rulemaking is necessary here to protect the rights of students and their parents or guardians.

This rule conforms to Executive Order Number 21-175, which ordered the Florida Department of Health and the Florida Department of Education to immediately execute rules and to take any additional agency action as necessary, using all legal means available, to ensure safety protocols for controlling the spread of COVID-19 in schools that (1) do not violate Floridians' constitutional freedoms; (2) do not violate parents' rights under Florida law to make health care decisions for their minor children; and (3) protect children with disabilities or health conditions who would be harmed by certain protocols, such as face masking requirements. The Order, which is incorporated by reference, directs that any actions taken by school districts comply with the Parents' Bill of Rights, codified in Sections 1014.02 – 1014.06, Fla. Stat., and "protect parents' right to make decisions regarding masking of their children in relation to COVID-19." Parental rights include the right to make health care decisions for minor children, unless prohibited by law, and the right to direct the education and care of minor children. See, Section 1014.04, Fla. Stat. In order to ensure compliance with the law and state board rule, under Section 1008.32, Fla. Stat., the State Board of Education has authority to withhold from school districts state funds, discretionary grant funds, discretionary lottery funds or any other funds specified as eligible for this purpose by the legislature, until the district comes into compliance.

Because of the importance of in-person learning to educational, social, emotional and mental well-being, it is important to protect parents' right to make health care decisions for their minor children at school and provide in-person education for their children. Unnecessarily isolating, quarantining, or subjecting children to physical COVID-19 constraints in schools poses a threat to developmental upbringing and should not occur absent a heightened showing of actual illness or serious risk of illness to other students.

The Hope Scholarship Program provides funding for a K-12 public school student to transfer to a private school or to another district in the state if the student has been subjected to harassment or other qualifying adverse, intimidating treatment at school. Applying the Hope Scholarship Program to instances where a child has been subjected to COVID-19 harassment will provide parents another means to protect the health and education of their child by moving their child to another school.

In light of the recent increase in COVID-19 infections, school districts throughout the state are contemplating adoption of additional COVID-19 restrictions. Given that public schools throughout the state open in August and some open in less than one week, there is not sufficient time to proceed through normal rulemaking procedures before school starts. Accordingly, the Department finds that there is an immediate danger to the health, safety and welfare of students that requires emergency action by the department.

REASONS FOR CONCLUDING THAT PROCEDURE USED IS FAIR UNDER THE CIRCUMSTANCES: First, as noted above, because the recent increase in COVID-19 cases has prompted school districts to consider imposing additional COVID-19-related requirements on students and because school begins in August, there is not sufficient time to adopt a rule through non-emergency means before the start of the 2021-22 school year. Second, the agency has received multiple inquiries about school district COVID-19 protocols, which currently vary from district to district and even from school to school. Third, the emergency rule relies upon an Order of the Governor, which is public, and the rule was published on the Department's website to reach interested persons prior to consideration by the State Board of Education. Finally, because the Department is headed by a board, rather than an individual, the rule will be considered at a public meeting before the State Board of Education, with the opportunity for public input prior to final adoption. While this period is an abbreviated one, given the need to act quickly, the Department concludes that the procedure utilized is fair to interested and affected persons.

SUMMARY OF THE RULE: The emergency rule provides a mechanism to transfer a child to a private school or another school district under a Hope Scholarship when a student is subjected to harassment in response to a school district's COVID-19 mitigation protocols.

THE PERSON TO BE CONTACTED REGARDING THE EMERGENCY RULE IS: Dr. Dakeyan C. Graham, Executive Director, Office of Independent Education and Parental Education.

THE FULL TEXT OF THE EMERGENCY RULE IS:

6AER21-02 COVID-19 Hope Scholarship Transfer Procedures.

(1) Definitions. “COVID-19 harassment” means any threatening, discriminatory, insulting, or dehumanizing verbal, written or physical conduct an individual student suffers in relation to, or as a result of, school district protocols for COVID-19, including masking requirements, the separation or isolation of students, or COVID-19 testing requirements, that have the effect of substantially interfering with a student’s educational performance, opportunities or benefits.

(2) A student who is subject to COVID-19 harassment is eligible for a Hope Scholarship under Rule 6A-6.0951, The Hope Scholarship Program, Fla. Admin. Code R.

(3) School District Parent Notification Requirements. Pursuant to the requirements of Section 1002.40(6), a school district must timely notify a parent of the Hope Scholarship program and provide the parent with a completed Hope Scholarship Notification Form, (Form IEPC-HS1), as provided in Rule 6A-6.0951, , Fla. Admin. Code R., when a parent reports COVID-19 Harassment. A parent whose child has, in the view of the parent, experienced COVID-19 Harassment, may submit Form IEPC-HS1 without regard to district notification.

(4) Hope Scholarship Application Procedure. To receive a Hope Scholarship, a parent must:

(a) Follow the procedures set forth in subsection (4) of Rule 6A-6.0951, Fla. Admin. Code R;

(b) Designate the Incident Type as “Harassment” on Form IEPC-HS1; and

(c) Write COVID-19 next to the Incident Type on the form.

(5) The nonprofit scholarship-funding organization shall confirm eligibility for each student and award all scholarships consistent with the requirements of section 1002.40, F.S., Rule 6A-6.0951, Fla. Admin. Code R., and this rule.

STATE OF FLORIDA  
DEPARTMENT OF EDUCATION

IN RE: WAIVING STRICT  
ADHERENCE TO THE FLORIDA  
EDUCATION CODE, AS SPECIFIED  
HEREIN, PURSUANT TO  
EXECUTIVE ORDER NUMBER 20-  
52, MADE NECESSARY BY THE  
COVID-19 PUBLIC HEALTH  
EMERGENCY

DOE ORDER NO. 2020-EO-06

FILED AGENCY CLERK  
2020 JUL -6 AM 11:54  
DEPT OF EDUCATION  
TALLAHASSEE FLA

**EMERGENCY ORDER**

WHEREAS, the Governor of the State of Florida issued Executive Order No. 20-114, ratifying and reaffirming Executive Order No. 20-52, declaring a state of emergency in response to the COVID-19 Public Health Emergency; and,

WHEREAS, education is critical to the success of the state and to an individual, and extended school closures can impede educational success of students, impact families' well-being and limit many parents and guardians from returning to work; and,

WHEREAS, schools are not just the site of academic learning; schools provide many services to students that are critical to the well-being of students and families, such as nutrition, socialization, counseling, and extra-curricular activities; and,

WHEREAS, there is a need to open schools fully to ensure the quality and continuity of the educational process, the comprehensive well-being of students and families and a return to Florida hitting its full economic stride; and,

WHEREAS, school openings must be consistent with safety precautions as defined by the Florida Department of Health, local health officials and supportive of Floridians, young and adult, with underlying conditions that make them medically vulnerable.

NOW, THEREFORE, I, Richard Corcoran, Commissioner of the Florida Department of Education (Department), pursuant to the authority granted by Executive Order 20-52, issue this order to accomplish the goals of: 1) reopening brick and mortar schools with the full panoply of services for the benefit of Florida students and families; 2) suspending and adjusting as necessary reporting requirements to ensure appropriate monitoring and financial continuity of the educational process; 3) retaining high-quality school choices for Florida students and families with a focus on eliminating achievement gaps, which may have been exacerbated by the crisis; and 4) maintaining services that are legally required for all students, such as low-income, English language learning, and students with disabilities.

The temporary and limited nature of the waiver of statutes and rules is necessary to respond to the pandemic. Much like the statutory provisions authorizing an agency to vary or waive a rule under section 120.542, Florida Statutes, all suspensions or modifications provided for in this order provide an alternate means of achieving the underlying purpose of the statute or rule.

I find that flexibility provided for in this order is necessary in order to respond to and mitigate the impact of the emergency and to promote the health, safety, and welfare of persons connected with Florida's educational system.

**I. Reopening Requirements.**

- a. All schools open. Upon reopening in August, all school boards and charter school governing boards must open brick and mortar schools at least five days per week for all students, subject to advice and orders of the Florida Department of Health, local departments of health, Executive Order 20-149 and subsequent executive orders. Absent these directives, the day-to-day decision to open or close a school must always rest locally with the board or executive most closely

associated with a school, the superintendent or school board in the case of a district-run school, the charter governing board in the case of a public charter school or the private school principal, director or governing board in the case of a nonpublic school. Strict compliance with requirements of section 1001.42(4)(f), Florida Statutes, requiring school districts to establish a uniform and fixed date for the opening and closing of schools is waived to the extent necessary to give effect to this Order. In addition, strict compliance with sections 1003.02 and 1011.60(2), Florida Statutes, requiring school districts to operate public schools for a minimum of 180 days or an hourly equivalent is waived to the extent necessary to give effect to this Order, consistent with an approved reopening plan. Further, strict compliance with the reporting requirements for educational planning and information, as set forth in section 1008.385, Florida Statutes, and Rule 6A-1.0014, Florida Administrative Code, is waived to the extent necessary to give effect to this Order, consistent with an approved reopening plan.

- b. Full panoply of services. Pursuant to the authority granted in section 1001.10(8), Florida Statutes, school districts and charter school governing boards must provide the full array of services that are required by law so that families who wish to educate their children in a brick and mortar school full time have the opportunity to do so; these services include in-person instruction (barring a state or local health directive to the contrary), specialized instruction and services for students with Individualized Education Programs (IEPs) or live synchronous or asynchronous instruction with the same curriculum as in-person

instruction and the ability to interact with a student's teacher and peers as approved by the Commissioner of Education. Required services must be provided to students from low-income families, students of migrant workers, students who are homeless, students with disabilities, students in foster care, students who are English Language Learners, and other vulnerable populations.

- c. Progress monitoring. Robust progress monitoring must be extended to all students in the same district or public charter school with tiered support for students who are not making adequate progress. Students who are receiving instruction through innovative teaching methods must be provided additional support and the opportunity to transition to another teaching method if they fail to make adequate progress. Progress monitoring data must be shared regularly with the Department, as prescribed, to help ensure that resources are rapidly deployed to support students who are failing to make adequate progress.
- d. Students with Disabilities and English Language Learners (ELL). Students with IEPs must be given the services necessary to ensure they experience a free and appropriate education. School districts must immediately begin working with IEP teams to identify students who may have regressed during school closures. School districts must ensure that IEP teams determine needed services, including compensatory services. IEP teams must follow a student-centered approach with a commitment to ensure that the individual needs of each child are met. If English Language Learners' English reading, writing, listening or speaking skills have regressed during school closures, school districts should convene an ELL Committee meeting with appropriate staff and parents to

determine if additional or supplemental English for Speakers of Other Languages (ESOL) services are needed. Although ELL Committee meetings may take place virtually or on-site, school districts should ensure that appropriate identification of English skills has been noted and that schools have the resources to implement additional interventions and strategies.

- e. Charter school flexibility. School districts must extend the same flexibility in instructional methods to every charter school that submits a reopening plan to the sponsoring district addressing the requirements set forth in this Order. Charter schools with an approved reopening plan are authorized to exercise this flexibility provided in this Order.

## **II. Reopening Plans.**

- a. In order to receive the flexibility and continuity provided for in this Order, school districts must submit to the Department a reopening plan that satisfies the requirements of this Order. Similarly, each charter school governing board must submit a reopening plan to the sponsoring district. Either a school district or a charter school governing board may request assistance from the Department to resolve any disputes over a sponsor's approval of a charter school's reopening plan. The Department will seek to resolve such disputes within three business days. The Department may withhold approval of a school district's reopening plan until such time as all the charter school reopening plans in the district have been approved by the district. In reviewing and approving plans the Department will also consider factors, including but not limited to, the percentage of students in the district who are projected to learn through live synchronous or asynchronous instruction, the quality of proposed progress

monitoring data and efforts to close achievement gaps. The format of plan submissions, as well as the timing of review and approvals, will be established by the Commissioner of Education. The submission of reopening plans and subsequent approval of those plans does not constitute a waiver of state statutes regarding instructional days and hours, rather approval demonstrates how the district or school adheres to those statutes and rules. Nothing herein requires a district or charter school to submit a plan if the district or charter school wishes to open in traditional compliance with statutory requirements for instructional days and hours.

**III. Reporting Flexibility and Financial Continuity.**

School districts and charter school governing boards with an approved reopening plan will receive reporting flexibility that is designed to provide financial continuity for the 2020 fall semester.

- a. Full Florida Education Finance Program funding from state revenue based on General Appropriations Act (GAA) full-time equivalent (FTE) student membership forecast for 2020 fall semester. School boards and charter school governing boards will receive the GAA funding based on pre-COVID-19 FTE student membership forecasts. Rule 6A-1.0452, Florida Administrative Code, is waived to the extent that the Department will not reduce the distribution of funds based on the July and October 2020 student surveys.
- b. Full FTE credit for innovative learning environments. Although it is anticipated that most students will return to full-time brick and mortar schools, some parents will continue their child's education through innovative learning

environments, often due to the medical vulnerability of the child or another family member who resides in the same household. As described in this Order, school boards and charter school governing boards with an approved reopening plan are authorized to report approved innovative learning students for full FTE credit. However, students receiving virtual education will continue to receive FTE credit as provided in section 1011.61(1)(c)1.b.(III)-(IV), Florida Statutes.

- c. October survey and instructional hours. The October survey will record students receiving instruction through traditional as well as innovative learning environments. The Department will provide modified instructions for the October survey that will authorize the reporting of instruction through traditional and innovative learning environments. Sections 1011.61(1)(a) and 1003.23(1), Florida Statutes, and Rules 6A-1.0451 and 6A-1.0014, Florida Administrative Code, are waived to provide school districts and charter school governing boards with additional flexibility in recording and reporting student attendance and instructional hours, based on guidance from the Department consistent with this Order.

#### **IV. Private Schools that Accept Scholarship Students**

- a. Nonpublic private schools that accept scholarship students may also be deemed by the Commissioner of Education, based on the requirements in sections I.a. and I.b. of this Order and by providing progress monitoring data at the conclusion of the 2020 fall semester for scholarship students to the Department, to satisfy the requirements for each student to maintain direct student contact with teachers under section 1002.421, Florida Statutes, and

"actual school instruction days" for purposes of satisfying the daily and hourly instructional time as set forth in Rule 6A-1.09512, Florida Administrative Code, for students participating in scholarship programs. Private schools that accept scholarship students and are interested in pursuing this option must submit a reopening plan to the Department for review only in the format established by the Commissioner of Education.

All of the statutory and rule waivers set forth in this Order for school districts and charter schools are contingent upon having an approved reopening plan for the 2020 fall semester.

The effective date of this Order shall correspond with Executive Order No. 20-52, and any extensions thereto. However, the waivers set forth in this Order only extend through the 2020 fall semester unless extended by a subsequent order.

DONE AND ORDERED this 6<sup>th</sup> day of July 2020, in Tallahassee, Leon County, Florida.

Richard Corcoran  
Commissioner of Education

I HEREBY CERTIFY that the above EMERGENCY ORDER has been filed with the Agency Clerk of the Department of Education, on this 6<sup>th</sup> day of July 2020.

Agency Clerk

**STATE OF FLORIDA  
DEPARTMENT OF EDUCATION**

FILED AGENCY CLERK

DEPT OF EDUCATION  
TALLAHASSEE FLA

DOE ORDER NO. 2020-EO-07

IN RE: WAIVING STRICT  
ADHERENCE TO THE FLORIDA  
EDUCATION CODE, AS SPECIFIED  
HEREIN, PURSUANT TO  
EXECUTIVE ORDER NUMBER 20-  
52, MADE NECESSARY BY THE  
COVID-19 PUBLIC HEALTH  
EMERGENCY

**EMERGENCY ORDER**

WHEREAS, the Governor of the State of Florida issued Executive Order No. 20-276, ratifying and reaffirming Executive Order No. 20-52, declaring a state of emergency in response to the COVID-19 Public Health Emergency; and,

WHEREAS, in Florida Division of Emergency Management Order No. 20-004, the State Coordinating Officer directed the Florida Department of Education in coordination with educational providers to take all appropriate action to promote the health, safety, welfare and education of Florida's students during the emergency; and,

WHEREAS, the Commissioner of Education issued DOE Order No. 2020-EO-06, providing funding stability for school districts and educational options for parents during the pandemic, including in-person, innovative and virtual instruction; and,

WHEREAS, thanks to Florida's courageous and dedicated educators and local school leaders, all 67 county school districts, all state university laboratory schools and the Florida School for the Deaf and the Blind opened for in-person instruction so that nearly 65% of Florida's public school students (approximately 1.85 million) are learning in-person; and,

WHEREAS, parents and districts continue to need the educational and financial benefits provided by DOE Order No. 2020-EO-06, including funding stability as students continue to return to in-person instruction, supports for students who are not meeting grade-level expectations and an array of learning modalities (in-person, innovative, virtual) so that parents can select the option best suited for their children; and,

WHEREAS, disproportionate numbers of students who are already educationally disadvantaged are learning off-campus or not attending school at all, and certain achievement gaps are widening, such that additional supports and interventions are needed to reach children who are not enrolled in school and to help students who are enrolled but experiencing academic losses during the pandemic.

NOW, THEREFORE, I, Richard Corcoran, Commissioner of the Florida Department of Education (Department), pursuant to the authority granted by Executive Order 20-52 and Florida Division of Emergency Management Order No. 20-004, issue this Order to accomplish the goals of: 1) building on the successful reopening of all public schools to in-person instruction; 2) promoting parental choice while ensuring that every student is making adequate academic progress; 3) providing financial continuity to enable each school district to maintain the full panoply of services for the benefit of Florida students and families, including students from vulnerable populations such as low-income families, migrant families, the homeless, English Language Learners, students in foster care and students with disabilities; and 4) empowering every district to maintain high-quality school choices for Florida students and families with a focus on eliminating achievement gaps, which have been exacerbated by the crisis. I further find that the flexibility provided for in this Order is necessary to respond to and mitigate the impact of the emergency and promote the health, safety, and welfare of persons connected with Florida's educational system.

**I. Spring 2021 Education Plans.**

- a. In order to receive the benefits provided for in this Order, school districts must submit to the Department a Spring 2021 Education Plan that satisfies the requirements of this Order by Tuesday, December 15, 2020. Similarly, each charter school governing board must submit a Spring 2021 Education Plan to the sponsoring district by Friday, December 15, 2020. Either a school district or a charter school governing board may request assistance from the Department to resolve any disputes over a sponsor's approval of a charter school's Spring 2021 Education Plan. The Department will seek to resolve such disputes within three business days. The Department may withhold approval of a school district's Spring 2021 Education Plan until such time as all the charter school Spring 2021 Education Plans in the district have been approved by the district.
- b. Spring Intervention Plans. As a component of a district's Spring 2021 Education Plan, districts must submit a Spring Intervention Plan for students identified for expanded learning and supplemental interventions and services. The plan must document the interventions for reading and mathematics, by grade-level and learning modality, the method of identification of students, and include an explanation of how notice of these services and the need for services will be provided to parents/guardians. Spring Intervention Plans must be designed to focus on closing achievement gaps, particularly those that were exacerbated during the pandemic. Any plans for interventions that will continue into Summer 2021 for students with widening grade-level deficiencies must be identified in Spring Intervention Plans. Districts or charter schools that experienced lost instructional time due to delayed opening or temporary closures must provide an explanation of how lost instruction time has been or will be made up.
- c. The format of plan submissions and assurances, as well as the timing of review and approvals, will be established by the Commissioner of Education. The

submission of Spring 2021 Education Plans, including the companion Spring Intervention Plan, and subsequent approval of those plans do not constitute a waiver of state statutes regarding instructional days and hours, rather, approval demonstrates how the district or school adheres to those statutes and rules. Nothing herein requires a district or charter school to submit a plan if the district or charter school wishes to open in traditional compliance with statutory requirements for instructional days and hours. Such districts or charter schools will be subject to funding increases and decreases in the manner prescribed in Florida law for the Spring semester.

**II. School District and Charter School Requirements for Benefits of the Order.**

- a. All schools remain open. All school boards and charter school governing boards must continue to open brick and mortar schools at least five days per week for all students, subject to advice and orders of the Florida Department of Health, local departments of health, and subsequent executive orders. The day-to-day decision to open or close a school must always rest locally with the board or executive most closely associated with a school: the superintendent or school board in the case of a district-run school; the charter governing board in the case of a public charter school; or the private school principal, director or governing board in the case of a nonpublic school. Strict compliance with requirements of section 1001.42(4)(f), Florida Statutes, requiring school districts to establish a uniform and fixed date for the opening and closing of schools is waived to the extent necessary to give effect to this Order. In addition, strict compliance with sections 1003.02 and 1011.60(2), Florida Statutes, requiring school districts to operate public schools for a minimum of 180 days or an hourly equivalent is waived to the extent necessary to give effect to this Order, consistent with an approved Spring 2021 Education Plan. Further, strict compliance with the reporting requirements for educational planning and information, as set forth in section 1008.385, Florida Statutes, and Rule 6A-1.0014, Florida Administrative Code, is waived to the extent necessary to give effect to this Order, consistent with an approved Spring 2021 Education Plan.
- b. Continue full panoply of services. Pursuant to the authority granted in section 1001.10(8), Florida Statutes, school districts and charter school governing boards must provide the full array of services that are required by law so that families who wish to educate their children in a brick and mortar school full time have the opportunity to do so; these services include in-person instruction (barring a state or local health directive to the contrary), and specialized instruction and services for students with Individual Educational Plans (IEPs). Required services must be provided to students from low-income families, students of migrant workers, students who are homeless, students with disabilities, students in foster care, students who are English Language Learners and other vulnerable populations.
- c. Continue progress monitoring and interventions. Robust progress monitoring and requisite interventions must be extended to all students with tiered support

for students who are not making adequate progress. Progress monitoring data must be shared regularly with the Department, as prescribed, to help ensure that resources are rapidly deployed to support students who are failing to make adequate progress.

- d. Continue expanded learning and supplemental interventions and services. School districts and charter schools must provide supplemental services (such as after-school tutoring, Saturday Academies, Summer Intervention Camps), for any student who, based upon progress monitoring or other data, has not achieved grade-level mastery or who is not on track to achieve a minimum of one year of academic growth during the 2020-21 school year. Such students must be identified by districts and charter schools as soon as possible and provided written notice of the need and availability of these services. School districts and charter schools must use progress monitoring data to track these students, regardless of whether or not they participate in supplemental services.
- e. Continue services for students with disabilities and English Language Learners (ELLs).

1. Students with IEPs must be given the services necessary to ensure that they receive a free and appropriate education, in accordance with their IEPs. School districts must continue to work with IEP Teams to identify students who may have regressed during school closures or during the fall term. School districts must ensure that IEP Teams are appropriately determining needed services, including compensatory services. IEP Teams must follow a student-centered approach and, in accordance with Rule 6A-6.0331, Florida Administrative Code, provide a multi-tiered system of support with a commitment to ensure that the individual needs of each child are met.

2. If an English Language Learner's English reading, writing, listening or speaking skills have regressed during school closures, school districts should convene an ELL Committee meeting with appropriate staff and parents to determine if additional or supplemental English for Speakers of Other Languages (ESOL) services are needed. Although ELL Committee meetings may take place virtually or on-site, school districts should ensure that appropriate identification of English skills has been noted and that schools have the resources to implement additional interventions and strategies. Until Florida Standards Assessment (FSA) for English Language Arts (ELA) assessment scores are available, and despite Rule 6A-6.0903(2)(a)2.b. and c., Florida Administrative Code, school districts are authorized to use scores from district reading assessments, such as progress monitoring, in lieu of FSA-ELA assessment scores, to exit a student from an ESOL program for the 2020-21 school year. Further, despite the requirements of Rule 6A-6.09022(2), Florida Administrative Code, districts may use existing proficiency assessment scores, in lieu of re-testing students for the 2020-21 school year, when determining whether to provide extended services to ELL beyond three years.

- f. Charter school flexibility. School districts must extend the same flexibility in instructional methods and funding to every charter school that submits a Spring 2021 Education Plan to the sponsoring district addressing the requirements set forth in this Order. Charter schools with an approved Spring 2021 Education Plan are authorized to exercise the flexibility provided in this Order. For charter schools with an approved Spring 2021 Education Plan, school districts must adjust funding for their increases or decreases in the same manner that the state funds the enrollment increases or decreases of districts with an approved Spring 2021 Education Plan.
- g. Innovative learning modality. School districts and charter schools are authorized to continue the innovative learning modality in the Spring semester. However, except as provided below, any student who is not making adequate academic progress in the innovative learning modality must be transitioned to another learning modality (in-person, virtual) as soon as practicable. In order for a student who is not making adequate progress to remain in the innovative learning modality, the district or charter school must: 1) provide written notice to the parent or guardian that the child is not making adequate progress and any associated education risks; and 2) obtain written acknowledgement from the parent or guardian verifying the receipt of this information and the intent to remain in the innovative learning modality. Students that are transitioned out of the innovative learning modality based on this requirement must be given additional interventions and supports.
- h. Parental selection of learning modality. School districts and charter schools must not unreasonably restrict the decision of a parent or guardian to alter the learning modality (in-person, innovative, virtual) that best suits their child's needs. Restricting when changes can be made to a certain time of the semester or requiring more than a week's notice prior to changing a student's learning modality are presumptively unreasonable.
- i. Truancy/Attendance of students. School districts must provide enhanced outreach to parents and guardians to ensure maximum in-person enrollment and participation in school. Districts must identify Voluntary Pre-kindergarten and kindergarten-eligible students in their district with the goal of engaging students to maximize kindergarten readiness to support long-term achievement. Efforts to enforce attendance and discourage absenteeism and truancy must be given priority. Every Spring 2021 Education Plan must identify the resources the district will deploy to ensure that every child in the district is accounted for and is actively participating in the public education system, excluding students who are enrolled in private school or home education.
- j. Professional development. In order to assist teachers and their students, school districts must provide training and support to teachers with a focus on those teaching in an innovative and virtual environment for the first time, or who are not yet proficient with these teaching modalities. The training and support must include specific strategies designed to ensure that teachers are fully prepared to

support the intervention needs of their students, regardless of the learning modality.

**III. Financial Continuity to Ensure High-Quality Educational Services.**

- a. Funding for the Fall 2020 semester was set by DOE Order No. 2020-EO-06, which allowed districts to receive funding for the first half of the school year, based upon the General Appropriations Act (GAA) forecast. School districts receive this funding without regard to the results of the October survey.
- b. Funding provided to school districts and charter schools with an approved Spring 2021 Education Plan is designed to continue the financial continuity provided in DOE Order No. 2020-EO-06, with modifications to ensure districts with increased full-time equivalent (FTE) students following surveys 3 and 4 as set forth in Rule 6A-1.0451, Florida Administrative Code, are funded for that increase.
- c. School districts with an approved Spring 2021 Education Plan will receive Florida Education Finance Program (FEFP) funding for the Spring semester based on the methodology described below. For purposes of this Order, the term “GAA forecast” or “forecast appropriation” means the second half of the 2020-21 FEFP appropriation.
- d. The Department will use annualized FTE following surveys 3 and 4, and Add-on FTE from 2019-20 survey 5, to identify all “growth districts.” A growth district is a district where the annualized FTE following survey 3 or 4 (or both), and Add-on FTE from 2019-20 survey 5, generate greater funding for a district than the GAA forecast.
- e. For the Spring semester, each district will receive the greater of:
  - i. The forecast appropriation, less the cost to fund the growth districts; or
  - ii. The funding generated by surveys 3 and 4, and Add-on FTE from 2019-20 survey 5, less the cost to fund the growth districts. The funding generated by surveys 3 and 4, and Add-on FTE from 2019-20 survey 5, shall be equal to one-half of the Second FEFP Calculation plus one-half of the FEFP calculation following surveys 3 and 4.
- f. The cost to fund the increase in growth districts will be proportionately spread across all school districts.
- g. The Student Transportation categorical district allocations within the FEFP shall remain as calculated within the GAA.
- h. Any unused funds from a categorical funded through specific appropriations 8, 9, 92, or 93, shall be used to fund the FEFP for the Spring 2021 semester, consistent with this Order.

- i. Funding adjustments resulting from FTE audits, Earned vs. Paid calculation and other prior year adjustments are not affected by this order and will be processed as in past years.
- j. For charter schools with an approved Spring 2021 Education Plan, school districts must fund their FTE students in the same manner that the state funds districts with enrollment growth or decreases.

**IV. Private Schools that Accept Scholarship Students.**

Private schools that accept public scholarship students may be deemed by the Commissioner of Education to satisfy the requirements for each student to maintain direct student contact with teachers under section 1002.421, Florida Statutes, and “actual school instruction days” for purposes of satisfying the daily and hourly instructional time as set forth in Rule 6A-1.09512, Florida Administrative Code, by submitting a Spring 2021 Education Plan, by Tuesday, December 15, 2020, in a format prescribed by the Department, that provides: 1) access to student progress monitoring data; and 2) plans to provide interventions to struggling public scholarship students, and that does not unreasonably restrict a parent or guardian’s option to alter the learning modality (in-person, innovative, virtual) that best suits their child’s needs. Restricting when changes can be made to a certain time of the semester or requiring more than a week’s notice prior to changing a student’s learning modality are presumptively unreasonable.

**V. Intensive Reading Interventions.**

In order to ensure that students are provided intensive reading interventions when there are limited opportunities to complete reading certifications and endorsements, sections 1008.25(7)(b)3., 1011.62(9)(c)5., and 1011.62(9)(d)1., Florida Statutes, and Rule 6A-6.6053(9)(c)5., Florida Administrative Code, are suspended to allow teachers who are not yet fully certified or endorsed in reading to provide intensive reading interventions out-of-field until June 30, 2021.

**VI. Waivers Require an Approved Spring 2021 Education Plan.**

All of the statutory and rule waivers set forth in this Order for school districts and charter schools are contingent upon having an approved Spring 2021 Education Plan.

**VII. Effective Date.**

This Order is effective immediately, and shall remain effective through the 2021 Summer semester, unless extended by a subsequent emergency order.

DONE AND ORDERED this 30<sup>th</sup> day of November 2020, in

Tallahassee, Leon County, Florida.

Richard Corcoran  
Commissioner of Education

I HEREBY CERTIFY that the above EMERGENCY ORDER has been filed with the  
Agency Clerk of the Department of Education, on this 30 day of November  
2020.

Agency Clerk

Florida Department of Education  
American Rescue Plan Act  
Elementary and Secondary Schools Emergency Relief Fund  
PR Award Number S425U210052  
General Education Provisions Act (GEPA) Statement

#### Personnel

As required in Rule 60L-40.002, F.A.C., and the Florida Department of Education's (FDOE's) Code of Personal Responsibility, Code 8.0 (Equal Employment Opportunity and Affirmative Action), it is the policy of FDOE to provide equal employment opportunity through programs of affirmative and positive action. FDOE employees are provided equal opportunity in all employment practices, including recruitment, examination, appointment, training, job assignment, leave, promotion, demotion, transfer, compensation, discipline, separation, or any other term or condition of employment.

#### Website

Section 508 requires federal electronic and information technology to be accessible to people with disabilities, including employees and the public. In December 2000, the Federal Access Board issued final standards for electronic and information technology under Section 508 of the Rehabilitation Act, which were adopted and published in the Federal Register in April 2001 with enforcement to begin June 21, 2001. While these standards currently apply to the federal government, it is the direct responsibility of Florida state government agencies and their web designers and developers to become familiar with these accessibility guidelines and to apply these principles in designing and creating any official State of Florida website.

All Florida state government websites must comply with Section 508 to ensure the widest possible audience easy access to government information. These standards are based on access guidelines developed by the Web Accessibility Initiative of the World Wide Web Consortium (W3C).

#### Facilities

All facilities used by FDOE are required to be compliant with applicable provisions of the Americans with Disabilities Act.

#### Subgrantees

All of Florida's applications for federal pass-through funds must include a description of how the subrecipient plans to comply with Section 427 of GEPA. One section of the Request for Application states, "Applicants must provide a concise description of the process to ensure equitable access to, and participation of students, teachers, and other program beneficiaries with special needs. For details, refer to <http://www.ed.gov/fund/grant/apply/appforms/gepa427.pdf>." Statements are reviewed for adequacy, consistent with various state and federal access and equity statutes and rules.
