

## Attention Parents:

Since introducing Google Apps for Education two years ago, we have provisioned almost 38,000 student accounts. With those accounts, Brevard's students have played a role in creating more than 100,000 documents, 7500 spreadsheets, 5500 drawings, 25,000 slide decks, and almost 3000 surveys. Brevard's Google Apps-using students and teachers have uploaded more than 80,000 files to their online storage spaces.

After consulting a number of classroom teachers, principals, directors, and others, we are pleased to announce a shift in our Google Apps Account Provisioning Procedures. To start the 2014-2015 school year, we will be issuing Google Apps accounts to all students in grades 3-12 unless a parent expressly asks us to restrict their child's access to the tools.

The Cloud Collaboration Permission Form is being replaced by a new Google Apps for Education Opt-Out Form.
