Early Literacy Corner

Parents Can Help Nurture Healthy Language Development

Children are wordsmiths! They love to tell stories. They often come home with a new joke to tell. They are quick to learn and use new vocabulary. "Read it again" is a phrase that often comes from a child's lips.

Provide opportunities for your child to practice new skills during these important early childhood years.

Talk while doing everyday things. Point out familiar places or objects. Describe and talk about items you see. Speak clearly. Pause for younger children, so they may imitate and understand you.

Read books, sing, and say rhymes with your child every day. As your children mature, have them predict what will happen in the story. Invite them to act it out or draw a picture. Ask "Who," "What," "When," "Where" and "Why" questions during the story or in conversation.

Provide your child with writing materials and the time and space to use them.

Go to museums, visit libraries and enjoy hobbies that broaden your children's knowledge of the world beyond their home and neighborhood.

"Learning starts in infancy, long before formal education begins, and continues throughout life. Early learning begets later learning and early success breeds later success..."
