

Crabby Snacks 3D –

MakerSpace 3D Challenge

As he creeps to the summit of the Coquina rock, Crabby Snacks watches the sun set recalling dawn on the sands of the Bay side in Long Key, Florida. Crabby Snacks moved from MM 65.5 in the hopes he'd find a new home. Crabby Snacks currently resides in a 3/4 street 90 PVC, but he dreams of having a shell like all of the other Hermit Crabs. Please help Crabby Snacks and design a new home for him using 3D design.

Design from home using TinkerCad or OnShape or join us for Maker Club in Hoover's Media Center every Thursday morning at 8:30 a.m.

- ◆ Designs must be original
- ◆ All design submissions due for approval by Thursday, October 27th.
- ◆ The winning design print will be selected by Crabby Snacks!

See Mrs. Woodbrey in the Media Center if you have any questions.
