

Improve Your Family's Health

Here are 3 great ways to improve your family's health:

1. EAT DINNER TOGETHER

- Family meals are a good time to introduce healthy foods and talk about the day.
- Take your time, sit and relax, keep the TV off, and listen to each other.

2. BE PHYSICALLY ACTIVE TOGETHER

- Go for a family bike ride.
- Go to a park – play catch, take a hike, climb a tree, play!
- Walk around your neighborhood.
- Play hide-and-seek.
- Go to the beach/lake/snow and play.

3. LIMIT SCREEN TIME

- The more screen time (TV, videos, computers, video games, etc.) you have, the less active you are. So, tune it out, turn it off, and get moving!

FAMILY MEAL

Plan a meal to cook and eat together with your family (e.g., pasta with sauce, broccoli, garlic bread, and fruit salad for dessert). Write it on the recipe card and make the meal together. Make other cards each time you plan a new meal. In a month or so, your family will have many "recipes" for great, healthy family meals.

OUR FAMILY MEAL

RECIPE

PICKLE

Ready

- 1 ball
- 2 bases (cones, shoes, shirts, etc.)

Set

- Place the bases 15 paces apart.
- A base runner starts mid-way between the bases.
- A base player stands on each base; one with the ball.

GO!

1. The object is for the base runner to get to a base without getting tagged by a base player.
2. Base players use throwing and running to try to tag the base runner with the ball.
3. Switch base runners and base players after tagging the base runner.
