This is what the Sales Surtax and Millage were used for at Port Malabar Elementary

In Brevard, surtax dollars have funded school renovations, technology, security improvements, buses, and critical infrastructure projects, while millage dollars have supported teacher pay, student programs, classroom technology, and academic services. Together, these investments have helped keep our schools safe and competitive, benefiting students, taxpayers, businesses, and the entire community. **Each funding source serves a distinct purpose, and the funds cannot be used interchangeably.**

Instructors

- ☑ Media Assistant
- ☑ ParaProfessional- GEN ED I
- ☑ 3rd Grade Reading Interventionist
- ☑ STEM Teacher

Where your tax dollars go.

Voter-approved surtax and millage funding helps Brevard Public Schools maintain safe and effective learning environments for students. These funds are dedicated to essential needs such as improving school facilities, maintaining campuses, and supporting student transportation and safety. By law, this local funding stays in our community and cannot be used for administrative salaries, ensuring it directly benefits schools, students, and staff across the district.

Strong Oversight You Can Trust

Surtax and millage funds are reviewed by independent citizen committees. Both are audited yearly, and reported publicly to ensure funds are spent responsibly and as approved by voters.

THIS IS NOT A NEW TAX

This November, a surtax referendum for our schools will be up for renewal on the ballot. These essential funds will help us continue to strive to create the best classroom experience for our students.

Strong Schools. Strong Brevard.
